

Seasonality

S spring April - June
S summer July - August
F fall September - November
W winter December - March

* Detected during **National Park Service I&M Northeast Temperate Network** (NETN) volunteer breeding bird surveys or other recent evidence of nesting in park.

† Expected to occur in park but no recent detections.

Species compiled using NETN forest breeding bird monitoring data, eBird, and NPSpecies information as of 10/2017. For more about breeding bird monitoring in Acadia, see <https://www.nps.gov/im/netn/breeding-landbirds.htm>.

Bird Checklist

Potential bird encounters in the park throughout the calendar year.

Chances of Detection:

- A - Abundant:** Occurs in moderate to large numbers and easily found in appropriate habitat.
- C - Common:** Found in moderate numbers and usually easy to find in appropriate habitat.
- U - Uncommon:** Small numbers and usually, but not always, found with some effort in appropriate habitat.
- R - Rare:** Occurs annually in very small numbers or in restricted habitat. Can be difficult to find.
- O - Occasional:** Observed some years but not detected every year.
- S - Sporadic:** May be a single sighting, or years and even decades can pass without a detection.

Blank spaces either indicate species absence or insufficient data.
