If this structure is not required for employees' entertainment, full restoration and exhibition as history house museum should be considered. Band report 9/10

Assistant Regional Director

Regional Director

Comments Due August 21
Office Memorandum • UNITED STATES GOVERNMENT

TO: Dr. Nelijke

FROM: Mr. Orth

SUBJECT: 405 Locust St. Home

The fact that this is the oldest house in the Project—and a modest one—justifies, in my mind, preserving the interior as a period home exhibit. I cannot understand why no period dwellings are to be exhibited as restorations. Didn't the founding fathers live here, and their retainers & fellow-citizens, as well?

Subject: Historic Structure Reports on 408, 413, 415, and 423 Locust Street

Enclosed in quadruplicate for your review are the administrative and historical data sections of the Historic Structure Reports on 408, 413, 415, and 423 Locust Street.

Through inadvertence the reports have not been submitted.

By this memorandum we are requesting the Eastern Office of Design and Construction to prepare the architectural data sections of these reports.

M. O. Anderson

                Evidence
Section 2. Historical Associations
Section 3. Evaluation of Historical Importance
CHAPTER I
ADMINISTRATIVE SECTION

Prepared by Superintendent M. O. Anderson
NAME AND NUMBER OF BUILDING

408 Locust Street, Building No. 22, is situated on the south side of Locust Street between Fourth and Fifth Streets, in Area "B" of the Park.
PROPOSED USE OF STRUCTURE AND JUSTIFICATION

It is proposed that the exterior of this structure be restored to serve as a needed feature in the landscape design of the Park, and that its interior be converted for employee housing. This structure, along with the other five on Locust Street, has no significant association with important figures or events, but is typical of Philadelphia dwellings of the historic period. The retention of all six, for incorporation in the overall design of this section of the Park, will help recall the eighteenth-century atmosphere.

Justification for this proposed use is contained in the approved Mission 68 Prospectus for the Park. Only a limited number of key protective, maintenance, interpretive, and administrative personnel will be provided with housing in this and the other five structures.
PROVISION FOR OPERATING HOUSE

As residence for Park personnel, the building would be leased and rent charged.
PRELIMINARY ESTIMATE OF COST FOR REHABILITATING THE STRUCTURE AND GROUNDS

$19,700.
CHAPTER II
HISTORICAL DATA

Prepared by Historian David A. Kimball
The two and a half story dwelling at 408 Locust Street is the oldest dwelling within Independence National Historical Park. It was built by Hugh James, a Philadelphia merchant, in 1763-1764.

James purchased the lot upon which the house now stands from Dr. William Shippen on May 15, 1761. The lot was situated on the south side of Prune [Locust] Street, 137 feet west of Fourth Street, and measured 18 feet in width on Prune Street by 70 feet in depth. The deed provided that "James shall within 3 years at his own cost build on the lot one tenantable Dwelling House."

James probably did not begin building the required "tenantable Dwelling House" until after September 1, 1762. On that date he agreed with the owner of the property adjoining his on the west, Bernard Kapoon, to open a 3 foot alley between their lots. This alley ran from Prune Street 30 feet southward. James provided 2 feet of his lot for this alley, Kapoon provided 1 foot, and James acquired the privilege of building over the alley provided he left a clearance of 8 feet. This provision enabled him to build a house 19 1/2 feet wide on a lot only 18 feet wide.

The provisions of the deed to the lot required James to complete the house at 408 Locust by May 15, 1764, and it is probable that he did so. The house was described by Gunning Bedford in a survey made for the Philadelphia Contributionship on February 1, 1765, as follows:
A house belonging to Hugh James Situated on the South Side of Pruant [Locust] Street, between Fourth & Fifth Streets—where he dwells—19 feet front—15 feet back—2 Storys high—9 inch walls—Board Newel Stairs—one Room on a floor—Garet plastered—Modillion Eaves in front—out Side painted—away out on Roof—quite New—£100 at 22/6

The house described in this survey is the front part of the present 408 Locust Street (see Illustration No. 1).

The building described above was very small, particularly since the "Board Newell Stairs" occupied the south east corner of each of the three rooms. In 1770 James built two brick kitchens, which were described in a Contributionship survey made on December 31, 1770, as follows:

two New Kitchens for Hugh James adjoining his dwelling house on the South Side of Pruant Street, near 4th Street each being 15 by 12 ft—2 Storys high—9 inch walls—painted out side—£100 at 20/ p.c. Gung Bedford on. £ 50 each (see also the Survey Book entry of this survey in the Appendix).

The spatial relationship which these kitchens bore to the older portion of the house is not clear. One of them certainly abutted it on the south (see Illustration No. 1), and the stairs were removed to it. The second kitchen, however, may have abutted the first kitchen on either the south or east. James had acquired the lot east of the 408 property in 1767, and while he did not build a house on it until 1771 or 1772, he may have built a kitchen there prior to building a house. However, it is as equally possible that he built
the second kitchen as a southward extension of the first, thereby adding a two story "Ell" 12 feet by 30 to the original 408 Locust Street structure. An architectural examination should be undertaken to determine the location of this second kitchen.

There is no record of further structural changes or additions until the property was surveyed again in 1857 (see Illustration No. 1) and also Philadelphia Contributionship Survey No. 9927 in Appendix). By this date a backbuilding 11 feet by 23 feet and an 11 x 11 wooden kitchen had been added to the 1764 structure. Despite the 1 foot difference in width, the northern 15 feet of this addition consisted of the first 1770 kitchen. The question is whether the additional 8 feet represented a later addition or was part of the second 1770 kitchen.

The only major structural change made since this survey was the substitution of a slightly larger brick kitchen for the wooden kitchen of the survey. The date of this alteration has not been determined.

Thus, the front portion of 408 Locust, while the interior appointments have been altered, is the original structure erected in 1763-64 and described in the 1765 survey. The northern 15 feet of the south extension, while its interior too has been altered, is one of the 1770 kitchens. The next 11 feet of this extension may or may not be part of the second 1770 kitchen; this should be established by an architectural investigation.
HISTORICAL ASSOCIATIONS

Since there are no tax records or city directories for the period 1765-1785, it is not possible to determine precisely who occupied 408 Locust in the twenty years after it was built. However, reference to this house in the various insurance surveys as "the house where he [Hugh James] dwells" indicate that James occupied the house until his death in 1780. Following his death, his widow seems to have lived there until about 1790. However, tax records show that Matthew Shaw, a carpenter, occupied the property, or that adjoining it to the east, for two years during the 1780's, and that George Carrot, a wheelwright, also occupied the premises for at least 1 year.

From 1790 until 1799 the property at 408 (as well as those at 404 and 406) was rented by Dr. Andrew Ross. In 1799, Dr. Ross paid taxes on the properties, but the directory places John Palmer, merchant, at 408 Locust. In 1800, Francis Coustellier rented the three properties; in 1802, 1803, and 1804, they were rented by a Mrs. Martin.

Patrick Nowlan, a tailor, acquired the "Two Story Brick Messuage or Tenement and Kitchen" at 408 Locust from the heirs of Hugh James' widow on April 23, 1804. Nowlan seems to have lived in the house until his death; his widow and children continued to live there until about 1816. In the ensuing years the property was rented at various times to coachmaker John Stone, a Patrick Wood, and Andrew Williams. There is a faint possibility that Thomas Birch, the artist,
rented the property in 1820 (the tax records for that year contain an entry indicating that Birch rented the property but this entry is crossed out in pencil, as though it had been entered erroneously).

On March 14, 1825, Thomas Stewart acquired the 408 Locust property from Widow Nowlan. Apparently Stewart did not occupy the property himself. He undoubtedly rented it, but the only tenant of whom we have record was R. P. King, printer, who leased the property in 1840. This may have been the R. P. King who was active in providing hospital facilities in Philadelphia during the Civil War. In 1892 the property passed from the trustees of Stewart's estate to George C., William J. and Martha S. Roney. In 1906, Matthew T. Galien acquired it. The United States acquired title in 1956.
EVALUATION OF HISTORICAL IMPORTANCE

No figure of major historical importance ever occupied 408 Locust Street; no significant historical events took place there. Nevertheless, the structure is of historical importance as the oldest dwelling remaining within Independence National Historical Park and as an example of the less pretentious type of row house found throughout Philadelphia in the late 18th Century. Its importance justifies retention of the house and restoration of the exterior to its 1770-1800 appearance.
