Mr. Arthur Stupka
Park Naturalist
Great Smoky Mountains National Park
Gatlinburg, Tennessee

Dear Mr. Stupka:

With your permission, I collected ants in the Great Smoky Mountains National Park, on August 31, September 1, and 2, 1939. At that time you asked me to send a report of what I found. Art Cole has collected much more extensively, and has checked my ants from the region, so this list will not add any information. Nevertheless, You may want it for your files, so here it is.

Very truly yours,

Mary Talbot
