

UNITED STATES GOVERNMENT

Memorandum

TO : Bill Hooper

DATE: August 23, 1982

FROM : Bill Halainen

SUBJECT: Purple Loosestrife (*Lythrum salicaria*)

Sarah and I conducted an informal survey of park lands to determine the spread of purple loosestrife, a plant whose rapid spread in marshy lands is pushing out many native species. We found that it is to be found in virtually all wetland areas in Minute Man, as the accompanying map indicates. Similar checks in future years will help us determine the degree of proliferation. At present, as the attached article indicates, there is no known way of permanently eliminating the plant, but the opportunity may present itself in the future.
