Philadelphia, PA 19118

During a field survey of endangered, threatened, vulnerable and rare plant species of the Pennsylvania portion of the Upper Delaware Scenic and Recreational River, data were also recorded on bird species seen or heard at various locations. The data reported here were collected during June and July 1984. Because of the season, they are believed to represent breeding birds. Identification of birds and bird songs was made by Richard Mellon, an experienced field ornithologist.

TABLE 1: Bird Species Noted in the Pennsylvania Portion of the
Upper Delaware Scenic and Recreational
River During June and July 1984
