Subject Index and

Topical Index

EXPLANATORY NOTE

Each title in the foregoing bibliography is listed below under one or more subject headings, and is identified by author's name and date of publication. For complete reference, please see bibliographic listing.

Subject headings are based on the following outline. The code number identifying each subject is that employed in the punch-card bibliographic layout (fig. 1, page iv).

1. Paleontology

- 11. Invertebrate paleontology
- 12. Vertebrate paleontology
- 13. Palynology
- 14. Macrobotany
- 15. Paleoecology

2. Stratigraphy and chronology

- 21. Pre-Wisconsin
- 22. Interglacial and interstadial
- 23. Wisconsin stage
- 24. Postglacial (defined by local deglaciation)

3. Glacial geomorphology

- 31. Erosional features and processes
- 32. Streamline features (erosional and depositional)
- 33. Stagnant ice features
- 34. Moraine features
- 35. Fluvioglacial features
- 36. Proglacial lake features

4. Nonglacial geomorphology

- 41. Erosion surfaces and peneplanation
- 42. Valley features and stream processes

43. Shore features and processes
44. Structurally controlled topography
45. Gravity produced and periglacial features
46. Features due to ground water action
5. **Sedimentation and sedimentology**
 51. Till and drift constitution
 52. Alluvial and floodplain sediments
 53. Nonlittoral lacustrine and marine sediments
 54. Weathering, soil development, and classification
6. **Tectonic**
 61. Isostasy, eustasy, glacitectonics and other Quaternary faulting or folding
7. **Miscellaneous**
 71. Descriptive and areal studies
 72. History of investigations
 73. Quaternary geological maps
 74. Bibliography

TOPICAL LISTING

1. Paleontology

11. Invertebrate paleontology
 - Desor, Edouard, 1850
 - Elson, John A., 1959
 - Humphreys, Edwin W., 1909
 - Kellogg, D. S., 1892
 - Letson, Elizabeth J., 1901
 - Maury, Carlotta J., 1908
 - Merrill, F. J. H., 1898
 - Peet, Charles E., 1904
 - Redfield, William C., 1847
 - Richards, Horace G., 1956a, 1956b
12. Vertebrate paleontology
 - Clarke, John M., 1888, 1903a, 1903b
 - Dekay, James E., 1824
 - Dewey, Chester, 1837
 - Eaton, Amos, 1827
 - Edson, Obed, 1884, 1892
 - Edwards, Timothy, 1893
 - Gilbert, Grove K., 1871, 1887
 - Goldring, Winifred, 1922
 - Gordon, Reginald, 1902a, 1902b
 - Guernsey, J. A., 1831
 - Hall, James, 1846, 1871
 - Hartnagel, Chris A., 1926

Heubusch, Carol A., 1959
Hopkins, Thomas C., 1914
Hovey, Edmund O., 1908
Miller, Sylvanus, 1836
Reeds, Chester A., 1927
Sheldon, Pearl G., 1915
Smith, Burnett, 1914, 1929
Stoller, James H., 1932

13. Palynology

Cox, Donald D., 1959
MacClintock, Paul (with Terasmae, Jaan), 1960
Muller, Ernest H., 1960
Terasmae, Jaan, 1959

14. Macrobotany

Britton, Nathaniel L., 1884
Bryson, John, 1889, 1897
Fairchild, Herman L., 1900
Hollick, Charles A., 1894, 1901
Peet, Charles E., 1904
Reeds, Chester A., 1927
Stoller, James H., 1916

15. Paleoecology

Elson, John A. (with Elson, Jeanne B.), 1959
Flint, Richard F., 1953
Goldring, Winifred, 1922
Hollick, Charles A., 1901, 1926, 1930

2. Stratigraphy and chronology

21. Pre-Wisconsin

Carney, Frank, 1907, 1909a, 1909b
Cushing, Henry P., 1910
de Laguna, Wallace, 1949
Fairchild, Herman L., 1909
Fuller, Myron L., 1903a, 1903b, 1905, 1914
Fuller, Myron L. (with Veatch, Arthur C.), 1903c
Gilbert, Grove K., 1897
Grabau, Amadeus W., 1894, 1901
Johnson, Douglas W., 1931a, 1931b
Leverett, Frank, 1902
Lobeck, Armin K., 1927
MacClintock, Paul (with Richards, Horace G.), 1936
Muller, Ernest H., 1960
Perlmutter, Nathaniel M., 1949
Rich, John L. (with Filmer, E. A.), 1915
Salisbury, Rollin D. (with Darton, Nelson H.), 1908
Smock, J. C., 1882
Spencer, Joseph W. W., 1889, 1908, 1921
Stoller, James H., 1916, 1930

Upson, Joseph E., 1955
Whitbeck, Roy H., 1902
Wright, George F., 1921

22. Interglacial and interstadial

Bryson, John, 1889
Carney, Frank, 1909b, 1909c
de Laguna, Wallace, 1949
Dreimanis, Aleksis, 1958
Engeln, O. D. von, 1929a, 1929b, 1931, 1952
Fuller, Myron L., 1905, 1914
Fuller, Myron L. (with Veatch, Arthur C.), 1903c
Grabau, Amadeus W., 1901
Kindle, Edward M., 1913
Lobeck, Armin K., 1927
MacClintock, Paul (with Apfel, Earl T.), 1944
MacClintock, Paul (with Richards, Horace G.), 1936
Maury, Carlotta J., 1908
Muller, Ernest H., 1957a, 1960
Perlmutter, Nathaniel M., 1949
Rich, John L. (with Filmer, E. A.), 1915
Stoller, James H., 1916
Upson, Joseph E., 1955

23. Wisconsin stage

Alden, William C., 1918
Alden, William C. (with Fuller, Myron L.), 1903a,
1903b
Antevs, Ernst, 1928, 1929
Baker, Frank C., 1913
Baldwin, S. Prentiss, 1894
Berdan, Jean M., 1954
Brigham, Albert P., 1892, 1929
Britton, Nathaniel L., 1881, 1886, 1887, 1889
Bryson, John, 1888, 1889, 1893, 1897, 1898
Carney, Frank, 1907a, 1907b
Chamberlin, Thomas C., 1883
Chapman, Donald H., 1937, 1942
Churcher, Paul, 1945
Cook, John H., 1924, 1930, 1942
Cushing, Henry P., 1905, 1916
Cushing, Henry P. & others, 1910
Cushing, Henry P. (with Ruedemann, Rudolph), 1914
de Laguna, Wallace, 1949
Denny, Charles S., 1956
Dreimanis, Aleksis, 1958, 1960
Eaton, Amos, 1827
Eaton, Henry N., 1938
Engeln, O. D. von, 1926
Fairchild, Herman L., 1894, 1903, 1909a, 1909e, 1912a,
1912b, 1913, 1928
Fleming, W. L. S., 1935

- Flint, Richard F., 1953, 1956
Fox, Jay T., 1946
Fuller, Myron L., 1905, 1914
Fuller, Myron L. (with Veatch, Arthur C.), 1903c
Gilbert, Grove K., 1887, 1890, 1895, 1898, 1901
Grabau, Amadeus W., 1901
Hitchcock, Charles H., 1895
Hollick, Charles A., 1894, 1901
Hough, Jack L., 1958
Johnson, Douglas W., 1917a, 1917b
Kay, G. Marshall, 1953
Kemp, James F., 1906
Kindle, Edward M. (with Taylor, Frank B.), 1913
Leverett, Frank, 1892a, 1892b, 1895, 1898, 1902, 1939
Leverett, Frank (with Taylor, Frank B.), 1915
Lobeck, Armin K., 1927
MacClintock, Paul, 1958

Geographic Index

EXPLANATORY NOTE

Each title in the foregoing bibliography is listed below under one or more geographic headings and is identified by author's name and date of publication. For complete reference data, refer to bibliographic listing.

The outlines of the geographic units employed in this index are indicated on figure 3, page 99. The units are physiographic and are adapted from the classifications of Fenneman and Cressey. The geographic units are as listed below. Each is identified on the bibliographic punch card layout (figure 1, page iv) by index code letter indicated at left:

- A. The New England Upland** includes the Taconic Mountains, the Hudson Highlands and the relatively low-lying metamorphic terrane of southeastern New York. South of the Hudson Highlands it includes the Triassic basin with the Palisades of the Hudson developed on a diabase sill.
- B. The Hudson-Champlain Lowland** is a north-south belt from the Canadian border to the Atlantic Ocean, separating the New England Uplands from the Adirondack Mountains and Appalachian Plateaus. In general, it is an area of low relief underlain by nonresistant sedimentary rocks. Strike ridges and valleys are developed along the beveled edges of folded strata west of the mid-Hudson Valley.
- C. The Coastal Lowland** is an area of low relief that includes Fishers Island, Long Island, and part of Staten Island. Although largely underlain by marine sediments, the surface materials are extensively of glacial and fluvio-glacial deposition.

- D. The Mohawk-Black River Lowland** is a belt of low to moderate relief developed on nonresistant, relatively undeformed shales and limestones between the Adirondack Mountains and the Appalachian Plateaus. These low-lying areas channeled glacier flow and hence are rather intensively scoured and drift-covered.
- E. The St. Lawrence Lowland** includes the area south of the St. Lawrence River, approximately to the limit of marine invasion and proglacial lake sediments flanking the crystalline rocks of the Adirondacks. It is an area of low relief in the north, but hilly in the south.
- F. The Erie-Ontario Lowland** includes areas of low relief that border Lakes Erie and Ontario on the south. It extends south to the Onondaga limestone scarp and the strandlines of proglacial Lakes Whittlesey and Warren. It includes an extensive drumlin field.
- G. The Adirondack Highland** comprises an area of moderate to high relief with maximum elevations more than 5,000 feet above sea level. The area is underlain by metamorphic and igneous rocks. It has been intensively glaciated and was the source of accumulation for small valley and cirque glaciers during waning of the continental ice sheet.
- H. The Tug Hill Plateau** is an area of moderate relief, an outlier isolated from the Appalachian Plateau by the Mohawk lowland and a southeastward extension of the Ontario lowland. It is like other parts of the Appalachian Plateau Province in its undeformed bedrock structure, its moderate elevation and dissection, and in its glacial modification.
- I. The Catskill Section of the Appalachian Plateaus** includes the highest elevations in southern New York. It is an area of moderate relief in the west and moderate to high relief in the east. Bedrock structure is essentially undeformed. The continental ice sheet covered even the highest summits.
- J. The Southern New York Section of the Appalachian Plateaus** is an area of moderate relief, underlain by essentially undeformed Paleozoic rocks with low southward regional dip. The intensity of glacial erosion decreases southward. The Finger Lakes and associated through valleys are conspicuous products of glacial modification.
- K. The Kanawha Section of the Appalachian Plateaus** differs from other parts of the province in New York, in that it escaped glaciation. The part of this section in New York lies chiefly south of the bend of the Allegheny River in southwestern New York.
- L. New York.** This indicator refers to references which deal not with specific parts of the State, but with the State as a whole.

Appendix I

GRADUATE THESES ON NEW YORK QUATERNARY GEOLOGY

The following list of titles of graduate theses on problems of New York Quaternary geology is appended in recognition of the fact that a large body of pertinent and valuable research data lies often untapped in unpublished dissertation form. The list is neither indexed nor verified. Time limitation, variability of thesis quality, and the scattered distribution of manuscripts have made it impractical to examine more than a few of the papers listed. Undergraduate theses and research papers are not listed, for it is commonly very difficult to track down such manuscripts. Graduate theses, on the other hand, are generally on file in the library system of the degree-granting university. Most current doctoral dissertations are now available on microfilm at a reasonable price from University Microfilm Service, Ann Arbor, Mich.

- Adams, George F.** 1934. Glacial waters in the Wallkill Valley. Master's thesis. Columbia University
- Alling, Harold L.** 1917. Glacial lakes and other glacial features of the central Adirondacks. Master's thesis, Columbia University
- Alling, M. K.** 1924. A study of the physiographic history of Allen's Creek at Corbett's Glen. Master's thesis. The University of Rochester
- Baker, Elizabeth.** 1930. Tentative evaluation of some of the factors influencing topographic development in central New York State. Master's thesis. Cornell University
- Blackmon, Paul.** 1956. Glacial geology of the East Aurora, New York, quadrangle. Master's thesis. The University of Buffalo (now State University of New York at Buffalo)
- Blagbrough, John.** 1951. The red clay deposits of Otisco Valley. Master's thesis. Syracuse University

- Brainerd, A. E. & Perry, C. W.** 1912. Pleistocene deposits of a section of the larger Cicero Swamp. Master's thesis. Syracuse University
- Brainerd, W. F.** 1922. Dana glacial lake terrace and the great delta of Onondaga Valley. Master's thesis. Syracuse University
- Bryant, Jay C.** 1955. A refinement of the upland glacial drift border in southern Cattaraugus County, New York. Master's thesis. Cornell University
- Carlston, Charles W.** 1946. Appalachian drainage and the Highland Border sediments of the Newark series. Ph. D. thesis. Columbia University
- Carney, Frank.** 1909. Pleistocene geology of the Moravia quadrangle, New York. Ph. D. thesis. Cornell University
- Case, Ermine C.** 1895. The drumlin region of western New York together with some experiments on ice action. Master's thesis. Cornell University
- Chisnell, Thomas C.** 1941. A correlation test of Knickpunkte. Master's thesis. Cornell University
- Chisnell, Thomas C.** 1951. Recognition and interpretation of proglacial strand lines in the Cayuga Basin. Ph.D. thesis. Cornell University
- Connally, G. Gordon.** 1959. Heavy minerals in the glacial drift of western New York. Master's thesis. The University of Rochester
- Cornish, C. B.** 1929. The geography and history of Cortland County. Master's thesis. Cornell University
- Cox, Donald D.** 1958. Some postglacial forests in central and eastern New York State as detected by the method of pollen analysis. Ph.D. thesis. Syracuse University
- Crowl, George H.** 1950. Erosion surfaces in the Adirondacks. Ph.D. thesis. Princeton University
- Cuthbert, F. L.** 1937. A geologic study of Cattaraugus Creek and vicinity with special reference to Pleistocene sediments. Master's thesis. The University of Buffalo (now State University of New York at Buffalo)
- D'Agostino, John.** 1957. Glacial Lake Tonawanda, history and development. Master's thesis. The University of Buffalo (now State University of New York at Buffalo)
- Davis, Ethel.** 1941. Glacial geology of the Palmyra and Pultneyville quadrangles, New York. Master's thesis. The University of Rochester
- Dollen, Bernard.** 1931. Preglacial drainage of the northeastern United States. Master's thesis. The University of Rochester
- Dunbar, E. U.** 1923. Glacial Lake Succession in the Genesee Valley. Master's thesis. The University of Rochester
- Durham, Forrest.** 1954. The geomorphology of the Tioughnioga River of central New York. Ph.D. thesis. Syracuse University
- Edwards, Ira.** 1914. Pleistocene geology of the Albion-Holly district. Master's thesis. The University of Rochester

- Eldredge, F. E.** 1911. Surficial geology of the vicinity of Syracuse. Master's thesis. Syracuse University
- Elston, E. D.** 1915. Some factors influencing the initiation and development of normal potholes. Master's thesis. Cornell University
- Faltyn, Norbert E.** 1957. Seismic exploration of the Tully Valley overburden. Master's thesis. Syracuse University
- Filmer, E. A.** 1928. The glacial geology of the Binghamton, New York, quadrangle. Master's thesis. Cornell University
- Fleming, W. L.** 1931. Glacial geology of central Long Island. Master's thesis. Yale University
- Foote, Charles W.** 1877. Notes upon the geological history of Cayuga and Seneca Lakes, together with a few general remarks upon the glacial period. Ph.D. thesis. Cornell University
- Forde, Margaret E.** 1934. Summary of the geologic literature of the Tarrytown quadrangle, N.Y. Master's thesis. Columbia University
- Fridley, Harry M.** 1928. Identification of erosion surfaces in south-central New York. Ph.D. thesis. Cornell University
- Gabriel, Ralph H.** 1919. The evolution of Long Island: a story of land and sea. Ph.D. thesis. Yale University
- Gifford, John D.** 1941. Glacial drainage in the Kasoag quadrangle, New York, as indicated by eskers. Master's thesis. University of Oklahoma
- Giles, A. W.** 1910. Eskers of western New York. Master's thesis. The University of Rochester
- Goldich, Samuel S.** 1930. The mechanical composition of the till in the Syracuse region. Master's thesis. Syracuse University
- Happ, Stafford C.** 1938. Geomorphic problems in the Minisink Valley. Ph.D. thesis. Columbia University
- Hasser, Edward G.** 1954. A study of Lake Iroquois and post-Lake Iroquois sediments in a peat bog. Master's thesis. Syracuse University
- Holmes, Chauncey D.** 1927. Special glacial features of the Cazenovia quadrangle. Master's thesis. Syracuse University
- Holmes, Chauncey D.** 1939. Pleistocene geology of the region south of Syracuse, New York. Ph.D. thesis. Yale University
- Huck, Florence.** 1920. Comparative lithological study of the materials found in the drift of the Syracuse region. Master's thesis. Syracuse University
- James, Carolyn.** 1943. A boundary between the Hudson Valley and New England Provinces drawn from geomorphic differences. Master's thesis. Columbia University
- Johnson, Howard F.** 1933. The upland erosional surfaces of the Catskills in relation to the present-day drainage. Master's thesis. Cornell University

- Kaiser, Russell F.** 1939. The composition and origin of the glacial till in the Mexico and Kasoag quadrangles, N.Y. Master's thesis. Syracuse University
- Kaiser, Russell F.** 1957. The surficial geology of the southeastern segment of the Lake Ontario till plain, New York. Ph.D. thesis. Syracuse University
- King, Jessie M.** 1934. Glacial sculpture in the region of the north-flowing Finger Lakes of central New York. Master's thesis. Columbia University
- Knight, Pauline U.** 1933. Former drainage of the northern Appalachians. Master's thesis. Columbia University
- Koch, G. H.** 1932. The hydrology of the Onondaga drainage basin. Master's thesis. Syracuse University
- Langey, E. J.** 1952. Unconsolidated sediments in the Black River area of New York State. Ph.D. thesis. Syracuse University
- Leroy, F. L.** 1938. Outlet history of preglacial Cayuga Lake. Master's thesis. Cornell University
- Lockheed, William.** 1895. Preglacial drainage of the Upper Cayuga Basin. Master's thesis. Cornell University
- Marks, Milton.** 1954. Petrology of some sand and gravel deposits near Syracuse, New York. Master's thesis. Syracuse University
- Martin, J. O.** 1903. A study of the drumlin area of New York State. Master's thesis. Cornell University
- Matson, George C.** 1903. A contribution to the study of the interglacial gorge problem. Master's thesis. Cornell University
- Merritt, Richard S.** 1958. Depth of leaching in relation to carbonate content of glacial till in central New York. Master's thesis. Cornell University
- Miller, D. W.** 1953. Potential ground water storage capacity of the upper Pleistocene deposits in Kings County, N.Y. Master's thesis. Columbia University
- Miner, Neil A.** 1933. The origin and history of Green and Round Lakes in Green Lake State Park at Fayetteville, New York. Master's thesis. Syracuse University
- Monnett, Victor E.** 1922. The glacial physiography of the Skaneateles basin. Ph.D. thesis. Cornell University
- Myers, Paul E.** 1958. A petrographic and statistical study of the crystalline constituents of central New York glacial deposits. Master's thesis. Syracuse University
- Namowitz, Samuel N.** 1937. The great inland scarp of Long Island. Master's thesis. Columbia University
- Neel, Robert.** 1951. Stratigraphy and glacial geology of the Portage quadrangle, New York. Master's thesis. The University of Rochester
- Newell, J. G.** 1940. The geomorphic development of the Tug Hill Plateau. Master's thesis. Syracuse University

- Oberlander, Theodore M.** 1956. Glacial and drainage patterns in the Limestone Creek watershed. Master's thesis. Syracuse University
- O'Connell, D. T.** 1926. Pleistocene ice movement in New York City. Master's thesis. New York University
- O'Connell, D. T.** 1932. Review of geology of the eastern part of Bronx County, New York. Ph.D. thesis. New York University
- Peltier, Louis C.** 1939. The glacial geology of Lower Clove Creek Valley, New York. Master's thesis. Columbia University
- Perry, C. W.** 1912. Pleistocene deposits of a section of the larger Cicero Swamp. Master's thesis. Syracuse University
- Phillips, C. W.** 1912. Subsidence structure in Onondaga County. Master's thesis. Syracuse University
- Poth, Charles W.** 1953. A study of the Pleistocene sediments and glacial geology in the valley of Ischua Creek (New York). Master's thesis. The University of Buffalo (now State University of New York at Buffalo)
- Reinecke, Leopold.** 1909. A contribution to the petrography of the Ithaca Drift. Master's thesis. Cornell University
- Rice, H. J.** 1881. Physiography of Cazenovia Valley. Ph.D. thesis. Syracuse University
- Rich, John L.** 1907. Types of marginal glacial drainage in the Finger Lake region. Master's thesis. Cornell University
- Rockwell, Charles.** 1957. A mineral analysis of the sediments of the south shore of Long Island. Master's thesis. University of Oklahoma
- Rudell, Marjorie.** 1935. Glacial gravels, Manhasset formation of Long Island as found in the pits of Goodwyn Gallagher, Roslyn, New York. Master's thesis. Columbia University
- Schmidt, Victor E.** 1947. Varves in the Finger Lakes region of New York. Ph.D. thesis. Cornell University
- Shumaker, Robert C.** 1957. Till texture variation and Pleistocene deposits of the Union Springs and Scipio quadrangles, Cayuga County, New York. Master's thesis. Cornell University
- Shupack, Benjamin.** 1932. Some foraminifera from Long Island and New York harbor. Master's thesis. Columbia University
- Shupack, Dora.** 1939. Foraminifera of the Lincoln Tunnel. Master's thesis. Columbia University
- Simpson, Eugene S.** 1945. Buried pre-glacial channels in the Albany-Schenectady area in New York. Master's thesis. Columbia University
- Smith, Virginia H.** 1938. A review of peneplane interpretations in the Appalachian Plateau. Master's thesis. Columbia University
- Stewart, David P.** 1954. The surface geology and Pleistocene history of the Watertown and Sackets Harbor quadrangles, N.Y. Ph.D. thesis. Syracuse University

- Suess, I. L.** 1932. Problem of post-glacial differential uplift. Master's thesis. The University of Rochester
- Sweet, Lois B.** 1934. Rock gorges associated with the outlet of Cayuga Lake. Master's thesis. Cornell University
- Thompson, Henry D.** 1936. Hudson Gorge in the Highlands. Ph.D. thesis. New York University
- Threet, Richard L.** 1949. Geology and the origin of the Lake Ontario basin. Master's thesis. University of Illinois
- Tuttle, Frances.** 1943. Textural and mineralogical analysis of late Wisconsin glacial and post-glacial deposits from Suffolk County, New York. Master's thesis. Smith College
- Walters, R. F.** 1938. Glacial geology of Monroe County, New York. Master's thesis. The University of Rochester
- Watson, T. L.** 1897. Some higher levels in the post-glacial development of the Finger Lakes of New York State. Ph.D. thesis. Cornell University
- Weiss, Lawrence.** 1951. Origin of the Pleistocene Gardiners clay in eastern Long Island. Master's thesis. New York University
- Whiteman, Edith.** 1930. Regional physiography of the Capital District of New York State. Albany, Cohoes, Troy, and Schenectady quadrangles. Master's thesis. Columbia University
- Wilbur, Doris M.** 1931. The Pleistocene and recent history of the Randolph, New York, area. Ph.D. thesis. University of Iowa
- Wintringham, N. A.** 1947. The geology of Dutchess County, New York. Master's thesis. Cornell University
- Wold, J. S.** 1939. Interglacial consequents of central New York. Master's thesis. Cornell University
