ACKNOWLEDGMENTS

Backlog Cataloging funds were allocated in 2001 to catalog Administrative Records from Chalmette Battlefield and National Cemetery by the Northeast Museum Services Center (NMSC) during August and September of 2001. Curator Kathy Lang, Jean Lafitte National Historical Park, was helpful with both the logistics and content of the collections. The project was coordinated and organized by Michelle Ortwein (Acting Director, NMSC). The processing and cataloging was carried out by Alicia Paresi (Museum Specialist, NMSC), Teri DeYoung (Museum Specialist, NMSC), Tricia Miller (Lead Cataloger, NMSC), Jessica Geisler (Museum Technician, ADAM) and Nancy Hatcher (Museum Specialist, HAFE). The project was completed with the assistance of Liz Banks (Archivist, NMSC). The progress of this project is detailed in this report.

EXECUTIVE SUMMARY

This Completion Report, *Administrative Records from Chalmette Battlefield and National Cemetery*, describes records that document the history, research and administration of Jean Lafitte National Historical Park. This report was completed in October 2002, and is the result of a Backlog Cataloging project (PMIS 40677) carried out by the Northeast Museum Services Center (NMSC) in August and September of 2001.

Jean Lafitte National Historical Park has a significant collection of archival material relating to various sites within the Park. In particular, records from Chalmette Battlefield and the adjacent National Cemetery dominate the collection. Although previously surveyed, these records were unprocessed and uncataloged. At the request of the Park, NMSC was to conduct a preliminary survey, rehouse the collection into archival folders and boxes and catalog the collection into the Automated National Catalog System Plus (ANCS+).

The project began in August 2001 when NMSC staff traveled to Jean Lafitte National Historical Park and continued into September of that year. NMSC conducted a survey of the records, organized document boxes by accession number, organized and rehoused oversized maps and drawings, cataloged the collection and made entries into ANCS+. All boxes and folders were labeled with accession and catalog numbers.

Collection processing included removing staples and fasteners, rehousing records in acid-free buffered enclosures and rehousing photographs in mylar envelopes or pH neutral, unbuffered envelopes. Oversized items were removed from the original folders and rehoused in oversized boxes and cross-referenced to their original location with separation sheets. The collection was cataloged into the Collections Management Module of ANCS+.

METHODOLOGY

The *Administrative Records from Chalmette Battlefield and National Cemetery* consists of burial lists, research reports, field notes, inventories, books, resource management records, photograph albums and oral histories from various park locations. Working through a Cooperative Agreement with the University of New Orleans to process and store archival collections, Jean Lafitte NHP followed guidelines established by the University for documenting the collection. Under the direction of the Curator, the catalogers arranged the records by accession number therein by collection therein by series and therein by item:

Example: Series 1.01.001

1 = represents the collection number
.01 = represents the series within the collection
.001 = represents the item within the collection

Collection 1 consists of series: 1.01, 1.02, 1.03, 1.04, 1.05. Collection 3 consists of series 1.01, 1.05 and series 2. Collection 4 contains audiocassettes, Collection 7 consists of series 1.02, 1.03, 1.05, 2.02 through 2.23, 3.01 through 3.08 and series 4. Accession 99 contains oral history tapes and was not given a collection number. Items within a series were assigned catalog numbers (i.e., JELAB 589) by the Curator. These items were then cataloged into the NPS Automated National Catalog System Plus (ANCS+) by Teri DeYoung and Tricia Miller. Guidelines outlined in *The Museum Handbook, Part II: Museum Records*, the *ANCS User Manual*, and *Standard Operating Procedures for Cataloging Archival and Manuscript Collections into Automated Catalog System Plus Field by Field Listing and Standards* were used to catalog the records.

In October 2002, the records will be transferred to the park and added to the park's master ANCS+ database. At that time, a zipped backup of the records created during the project will be sent to the park Curator. A paper copy of the catalog records will be printed and faxed to the park in advance of park staff unzipping and integrating the records into the park's master database.

ACCOMPLISHMENTS AND CONCLUSIONS

The FY01 Backlog Cataloging project has provided accountability and access for a portion of Jean Lafitte National Historical Park's archival collections. The organization and cataloging of the records provides some intellectual control over the collections.

In following through with the project, it must be stated that NMSC executed the project according to the guidelines outlined by Jean Lafitte NHP Curator, Kathy Lang and the University of New Orleans. This work does not reflect the standard operating procedures of the Northeast Museum Services Center.

RECOMMENDATIONS

Recommendation pertaining to the collections:

- Collections should be stored in an environment appropriate for archive collections.
- To retain intellectual control, park staff should monitor access and use of the archive collections.
- Acidic material, such as newspaper clippings, should be photocopied onto acid-free paper and clippings thrown out.
