NATURE OF COMPLAINT: Pollution at tank facility

FILE REVIEW: March 3, 1995 **BY:** Patty Moran

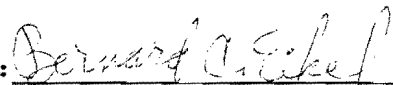

RESULTS: The National Park Service has offered comments on the revised characterization plan regarding sampling/analysis methods, decontamination, installation of monitoring wells, and the health and safety plan for the project. The Service has informed the operator of its approval of the revised site characterization plan upon incorporation of the comments into the plan by the operator.

COMMISSION ACTION: The operator is reminded that compliance with Railroad Commission regulations must be achieved upon completion of remediation. The Railroad Commission also requests that the operator contact the District 04 office prior to proceeding with the sampling and that sampling analyses reports be forwarded to the District Office. The operator is further reminded of the facility's proximity to the Gulf; thereby, the location is considered a sensitive area.

FOLLOW UP: A file review is scheduled for the week of April 17, 1995. An update on this complaint will be prepared for receipt in Austin on May 5, 1995.

Patty Moran
Graduate Engineer
