

DESCRIPTIONS OF ARCVIEW FILES

Note: the subdirectory FRAG1997, and all the other files, were originally in a directory named C:\FACULTY\YAUKEY\.

PROJECT FILES

The project file for the species maps is FRAG1997\PROJ1.APR
The project file for the study sites map is FRAG1997\SITES97.APR
The project file for the "Locations of point counts..." map is JLPOINTS.APR.
The project file for the "Major roads and woodlots" map is ROADS.APR.

THEME FILES

The major roads are in file ROADS.SHP (and .DBX and .SHX).
The Barataria Preserve boundary is in file PARKBOUN.SHP (and .DBX and .SHX).
The Mississippi River is in file NEWRIVER.SHP (and .DBX and .SHX).
The outlying wetland and woodland habitats are in file NEWWILD.
The basemap of Barataria Preserve for showing point count locations is JLNHPBIG.TIF.
The locations of point counts are in JLPOINTS.SHP (and .DBX and .SHX).
The woodlots are in FRAG1997\WOODS97.SHP (and .DBX and .SHX).
Themes for individual species are also within subdirectory FRAG1997, and are designated using the species' four-letter code followed by 97:
eg, Acadian Flycatcher is FRAG1997\ACFL97.SHP (and .DBX and .SHX).

Other details of the maps (eg, north arrows or names of woodlots) are contained and automatically displayed within the project files, either in the View or Layout (ie, they are not themes).
