This is Kate Ruskin checking in to let you know the final counts on birds banded and radio-tagged by NYC Audubon this season so you can keep a look out for them in the NY area and as they migrate this fall!

17 GREG fledglings radio-tagged:

- Black letters on white
- Positioned on the left leg, above the joint with the antenna pointing down (they're small, less than 3% of their body weight, but visible)

10 GLIB fledglings color-banded:

- Black letters on white
- Positioned on the left leg, above the joint

700 DCCO fledglings banded (they're not one of our focal species, but I'm sure you see plenty of them cavorting with herons):

- Black letters on orange
- Positioned on the right leg, between the joint and the foot

One of our volunteers at NJ Audubon Society recently saw a tagged GREG at DeKorte Park in the Meadowlands, and I just picked up one's radio signal at Harrier Meadow last week! The birds are out there and just waiting to be spotted by you! We're REALLY looking forward to more sightings. Please email/call me as soon as possible if you see one of our birds.

Thanks!
Kate
