U. S. Geological Survey, Surface Water Branch, Salt Lake City, Utah is hereby authorized during the period from August 12, 1958 to August 11, 1978 to use the following-described land in the above-named area: An area adjacent to the left pier of the bridge across Courthouse Wash, Arches National Monument. The gauging station will be located under the bridge behind the left pier out of sight of the visiting public. The bridge is located across Courthouse Wash on the newly constructed monument entrance road at Station 250+00. The location of the gauging station in relation to the bridge and left pier is shown on the print of ARCH-1-58 attached hereto and made a part of this permit.

for the purpose of **obtaining records of stream flow and flood flow magnitude and intensity. (Courthouse Wash)**

subject to the conditions on the reverse hereof and attached pages and to the payment to the Government of the United States of the sum of ten Dollars (\$ 10.00), in advance annually (~~Monthly~~), or as follows: The annual fee is hereby waived since the permit is issued to the U. S. Geological Survey a Government agency.

payment to be made to the Superintendent by Express or Postal Money Order, Certified Check, or Draft payable to the National Park Service, or Cash.

Issued at Arches National Monument this 2nd day of March, 1959

L54 LWSSC

SLW
Memorandum

To: Superintendent, Canyonlands

From: Supervisory Hydraulic Engineer, LWSSC

Subject: Special use permit, Water Rights Docket #4, Arches

In reviewing Arches Water Rights Docket #4 (Courthouse Wash) we note that George White's Special Use Permit #14-10-333-463 for stock driving along the Wash expired in 1962. We would appreciate a copy of the new permit if one has been issued.

Correspondence in this docket suggests the possibility that a diligence water right may exist in Courthouse Wash and, if it does, White might possibly be a successor. This diligence right does not appear to have been researched and consequently has neither been proven or disproven. If such a right were established--and assuming non-use of the water for several years--then such non-use might be used as a basis for showing legal abandonment. This would give us the opportunity to appropriate the water for public use. We would appreciate your comments.

Also, docket correspondence suggests making a map of actual watering places along Courthouse Wash. We would appreciate receiving three copies for distribution to other docket holders if such a map was made. Preferably, send us your copy--we will reproduce it and return it to you.

Memorandum

To: Director

From: Acting Assistant Regional Director, Operations

Subject: Special Use Permit 14-10-0333-1534, George White, Arches

Enclosed is the Washington Office copy of the subject permit issued to George White of La Sal, Utah, for a livestock driveway across portions of Sections 5, 9, 10 and 22, T. 25 S., R. 21 E., Arches National Monument.

The permit replaces a previous permit number 14-10-0333-463 which expired May 25, 1965. The present permit covers the period from May 26, 1965 to May 25, 1970 and provides for two crossings annually and driving 105 head of cattle across Arches National Monument to reach Mr. White's grazing allotment west of the boundary of Arches.

The permit consists of a map and five pages and the ten-dollar annual fee for the 1965 calendar year has been received and deposited.

By copies of this memorandum the Field Finance Office copy has been distributed and we are mailing the Superintendent three copies of the map to attach to his copies of the permit in lieu of the reproduced map which he designated as Page 6.

CONDITIONS OF THIS PERMIT

1. **Regulations.**—The permittee shall exercise this privilege subject to the supervision of the Superintendent, and shall comply with the regulations of the Secretary of the Interior, or other authorized officer of the Government, governing the area.

2. **Definition.**—The term "Director, National Park Service" as used herein shall include the appropriate Regional Director or Superintendent as the representative of the Director.

3. **Rights of the Director.**—Use by the permittee of the land covered hereby is subject to the right of the Director, National Park Service, to establish trails, roads, and other improvements and betterments over, upon, or through said premises, and further to the use by travelers and others of such roads and trails as well as of those already existing. If it is necessary to exercise such right, every effort will be made by the National Park Service to refrain from unduly interfering or preventing use of the land by the permittee for the purpose intended under this permit.

4. **Nondiscrimination.**—If use of the land covered by the permit will involve the employment by the permittee of a person or persons, the permittee agrees to observe the following nondiscrimination provisions in connection with the use to which the lands covered by this permit may be devoted:

In connection with the performance of work under this contract, the contractor agrees not to discriminate against any employee or applicant for employment because of race, religion, color, or national origin. The aforesaid provision shall include, but not be limited to, the following: employment; upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rate of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post hereafter in conspicuous places, available for employees and applicants for employment, notices to be provided by the contracting officer setting forth the provisions of the nondiscrimination clause.

The contractor further agrees to insert the foregoing provisions in all subcontracts hereunder, except subcontracts for standard commercial supplies or raw materials. (Executive Order 10557; September 3, 1954.)

5. **Damages.**—The permittee shall pay the United States for any damage resulting from this use which would not reasonably be inherent in the use which the permittee is authorized to make of the land described in this permit.

6. **Construction.**—No building or other structure shall be erected under this permit except upon prior approval of plans and specifications by the Director, National Park Service, and the premises and all appurtenances thereto shall be kept in a safe, sanitary, and sightly condition.

7. **Removal of structural and improvements.**—Upon the expiration of this permit by limitation of time or its termination for any reason prior to its expiration date, the permittee, if all charges due the Government hereunder have been paid, shall remove within such reasonable period as is determined by the Superintendent, but not to exceed 90 days unless otherwise stipulated in this permit, all structures and improvements placed on the premises by him, and shall restore the site to its former condition under the direction of the Superintendent. If the permittee fails to remove all such structures and improvements within the aforesaid period, they shall become the property of the United States, but that will not relieve the permittee of liability for the cost of their removal and the restoration of the site.

8. **Water Rights.**—The United States reserves the rights to perfect title to all rights for water which may be developed or used in connection with this permit and shall furnish water to the permittee, when available, at reasonable rates to be approved by the Director, National Park Service. Should such water service be unavailable or inadequate, the permittee may, with prior approval of the Director, provide the same at his own expense, subject to such special requirements as may be prescribed.

9. **Disposal of refuse.**—The permittee shall dispose of brush and other refuse as required by the Superintendent.

10. **Timber cutting.**—No timber may be cut or destroyed without first obtaining a permit therefor from the Director, National Park Service.

11. **Fire prevention and suppression.**—The permittee and his employees shall take all reasonable precautions to prevent forest, brush, grass, and structural fires and also shall assist the Superintendent in extinguishing such fires in the vicinity of any tract which may be used hereunder.

12. **Soil erosion.**—The permittee shall take adequate measures, as directed and approved by the Superintendent to restrict and prevent soil erosion on the lands covered hereby and shall so utilize such lands as not to contribute to erosion on adjoining lands.

13. **Benefit.**—Neither Members of, nor Delegates to Congress, or Resident Commissioners shall be admitted to any share or part of this permit or derive, either directly or indirectly, any pecuniary benefit to arise therefrom: *Provided, however,* That nothing herein contained shall be construed to extend to any incorporated company, if the permit be for the benefit of such corporation.

14. **Assignment.**—This permit may not be transferred or assigned without the consent of the Director, National Park Service, in writing.

15. **Revocation.**—This permit may be terminated upon breach of any of the conditions herein or at the discretion of the Director, National Park Service.

January 19, 1959

Memorandum

To: Superintendent, Arches National Monument
From: Regional Chief of Lands
Subject: Stock Crossing Permit, Special Use Permit No. 14-10-333-463,
George White, Arches

We are returning your copy (Superintendent's), the Permittee's copy and the Final Orders and Opinion copy of the subject permit, issued by you January 7, 1959. It is requested that you give, or mail, the Permittee's copy to him, and since the permit was issued by you, the blue (Final Orders and Opinion) copy should be placed in your Final Orders and Opinion file.

We have made distribution of the other copies with a copy of this memorandum.

Mr. White's check No. 291 dated 1/8/59 in payment for the annual fee is acknowledged.

We concur in the twelve hour crossing time, as specified by you in the permit.

JUL 31 1958

Memorandum

To: Superintendent, Arches
From: Regional Chief of Operations
Subject: Stream Gaging Station, USGS, Courthouse Wash
Bridge, Arches National Monument

Attached is copy of District Engineer M. T. Wilson's letter to the Regional Director, dated June 24, in which he requests permission to install a 42" corrugated pipe under and adjacent to the north pier of the Courthouse Wash bridge in accordance with the copy of a portion of the drawing NM-ARC-3001 attached. According to Mr. Wilson, the proposed stream gaging station would be under the bridge and out of sight unless you were standing in the stream channel looking through the bridge opening.

A special use permit would probably be the best instrument to use to grant the authority requested. Since stream gaging stations are usually permanent in nature, we presume the station will be in operation for several years and the permit would probably be for a 20-year period.

Mr. Wilson does not indicate he has discussed the matter with you and we would like to have your comments with any special conditions you think should be incorporated in the permit. We have attached a supply of special use permit forms and suggest, providing you concur in the request, you indicate in draft form any items you think should be included in the permit. The permit, if granted, will be an "unnumbered" permit and carry the ARCH prefix. We suggest you prepare the permit in draft form, assign the proper number, and we will do the final typing in this office.

A copy of our reply to Mr. Wilson is attached.

JUL 31 1958

Memorandum

To: District Engineer, U. S. Geological Survey,
300 Federal Building, Salt Lake City 1, Utah

From: Regional Chief of Operations, National Park
Service, P.O. Box 1728, Santa Fe, New Mexico

Subject: Stream Gaging Station, USGS, Courthouse Wash
Bridge, Arches National Monument

Your request for permission to install a 42" corrugated pipe under the Courthouse Wash Bridge at Arches National Monument has been referred to Superintendent Wilson for his comment.

We presume since you have inspected the site you may have previously discussed this matter with Superintendent Wilson at the time of your visit to Arches. However, we wish to have the Superintendent's comments before we advise you more in detail.

Our Service has a Special Use Permit which, providing the installation meets with the Superintendent's approval, could be used to cover such an installation. We have attached uncompleted copies of the Special Use Permit form for your review and the printed items on Page 2 that are not applicable could be crossed out.

Before we can prepare the form for your signature, we should have the following information:

1. How soon do you plan the construction or installation?
2. How many years would the gaging station remain in place?
3. Would it be possible or practical to paint the corrugated pipe a color similar to the bridge pier?

4. Can you give the approximate size and number of the intakes through the pier wall to the main channel?

While not indicated in your letter or sketch, we presume the installation as proposed will not require any wires, electrical or otherwise.

Other Supporting Information

ARCHES NATIONAL MONUMENT

Water Rights #4

Courthouse Wash

According to correspondence in the docket, Courthouse Wash has water in the winter months all the way through the Monument.

The water right should be protected under the Winters Doctrine (Winters versus U. S., 207 U.S. 5&4). The law of that case says that the U. S., as owner of title to lands reserved for public use, owns water rights sufficient for its present and future needs even if it does not comply with state water appropriation laws.

If Courthouse Wash land was ever in private ownership, or in U. S. ownership but subject to private acquisition under the public domain disposal laws, protectable private water rights could have been acquired prior to 1929. In 1929, the proclamation reserving Arches as a national monument withdrew it from further possibility of private acquisition.

If there are no recorded alien water rights to Courthouse Wash, then no protectable rights were acquired between 1903, when Utah appropriation laws were passed, and 1929, when the creation of the Monument ended all possibility of alien appropriation.

The only other adverse possibility might be a diligence water right acquired prior to 1903, but none has been claimed or proven.

By William Cruzen
LWSSC
December, 1966

WJF 2/27
L54-464

JUN 22 1958

Memorandum

To: Regional Director, Region Three
From: Chief, Water Resources Section
Subject: Water Rights, Court House Wash, Docket 4, Arches

Attached is your folder for the subject docket, with dividers for Parts I, II and III, table of present contents, and included items I B 1 and III-A. We have also provided our own copies of I A 1 and I A 2, but I A 1 is a poor thermofax copy. We shall appreciate having you prepare and distribute good copies of listed items which are not in your assembly.

I have not decided what form of rights should be asserted or recorded in Part II because of lack of information. I believe that George White may have successorship interests in a grazing range to the east of the Park, and that they may have been initiated prior to 1903, and thus include diligence rights to stock watering in Court House Wash. The next question would be whether the U.S. can assert title to the diligence rights through Special Use Permit 14-10-333-463, under which Mr. White has lost most sufferance rights or privileges.

An appropriative water right should be established by application if any stock watering facilities are provided. None can be perfected without a man-made physical improvement. I doubt if there would be a protest of such an application if we first determined the basis of diligence rights, and then indicated that the appropriation did not constitute an assertion of valid non-Federal diligence rights or a waiver of other rights which the United States may have to the same water.

Special Use Permit 14 10 333 463 only seems to authorize two crossings of the Monument; but Mr. Keill's memorandum of February 25 states that Court House Wash provides the only water for adjacent portion of Mr. White's grazing allotment, and may thus be used throughout the grazing season. With about two miles of the Wash outside of the eastern Monument boundary, he may have sufficient water on his allotment. However, the extent of water use within the Monument should be defined. This should include an explanation of whether the stock crosses the Monument in one day or two.

Part I B provides for flow measurements. I do not expect to keep such records up-to date. However, we should probably obtain a summary of the records at the old gauge site in Sec. 22, and get periodic summaries of records at new gauge at bridge, which I presume to be in Sec. 10. I believe that Part I should also include a map showing both gauge sites and the drainage areas in the Monument which are tributary to both, and the percentages of the total drainage area tributary to each gauge site. The need for this data will depend somewhat on the nature of any Federal water rights which may be established in Arizona vs. California. This map, rather than or in addition to the drawing with the permit, should become part of the permit.

IN REPLY REFER TO

UNITED STATES
DEPARTMENT OF THE INTERIOR
GEOLOGICAL SURVEY

300 Federal Building
Salt Lake City 1, Utah
June 24, 1958

Regional Director, Region 3
National Park Service
Box 1728
Santa Fe, New Mexico

Dear Sir:

The Geological Survey has operated a stream gaging station on Courthouse Wash for a number of years at a site located about 1/2 mile upstream from the Colorado River. This station was destroyed by a flood on Aug. 5, 1957. Adequate sites for stream gaging stations on this type of stream are practically non-existent unless considerable expense is involved. The problem involved is one of protection to the installation during a flood runoff.

The new bridge across this Wash on the recently completed road into the Arches Monument offers an ideal site for the rehabilitation of this gage. The streamflow, flood frequency, and magnitude data collected by such an installation is valuable to many people and to State and Federal agencies. As a matter of fact the Bureau of Public Roads made inquiry to this office for flood information on Courthouse Wash when designing this bridge.

We would like to obtain permission to install a 42-inch corrugated pipe well to house stream gaging equipment at this bridge site. We propose to install this structure on the inside of the left bridge pier near the downstream end but behind the abutment at the end of the pier. The well would be anchored to the pier and intakes run through the pier wall to the main channel. The entire structure would be under the bridge and out of sight unless one were standing in the channel looking through the bridge opening.

Very truly yours,

M. T. Wilson
District Engineer

P. S. Enclosed is your print of an Architectural drawing of the bridge showing our proposed gaging installation.

IN REPLY REFER TO:

L-54

1959 MAR 5 AM 8 39

Memorandum

FEB 25 1959

To: Director
From: Regional Chief of Lands
Subject: Stock Driveway, Special Use Permit 14-10-333-463,
and Water Rights, Courthouse Wash, Arches

Your memorandum of January 28 outlined the need for a docket to record the use authorized by George White under the subject numbered permit.

Superintendent Wilson was in the Regional Office during the week of February 2 and reported to Mr. Ratcliff that during the winter months there is live water all the way through the Monument in Courthouse Wash.

I am also advised by Mr. Ratcliff and Superintendent Wilson that Mr. White has no other sources of water on that portion of his allotment between Arches and the Colorado River.

I will attempt to get more information the first time I am at Arches, and we will attempt to determine if there are sources of permanent water at Courthouse Wash that could be used by Mr. White.

Now that Mr. Richman is State Supervisor for Utah, I doubt that we will encounter another case similar to the protest of Application 21087, Docket No. 2.

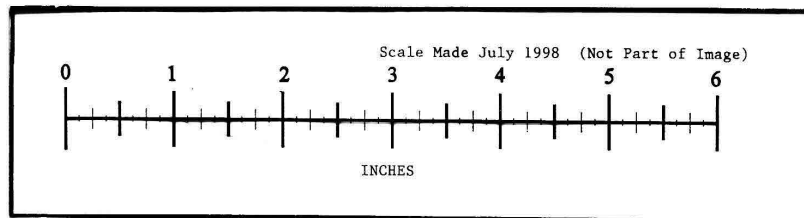

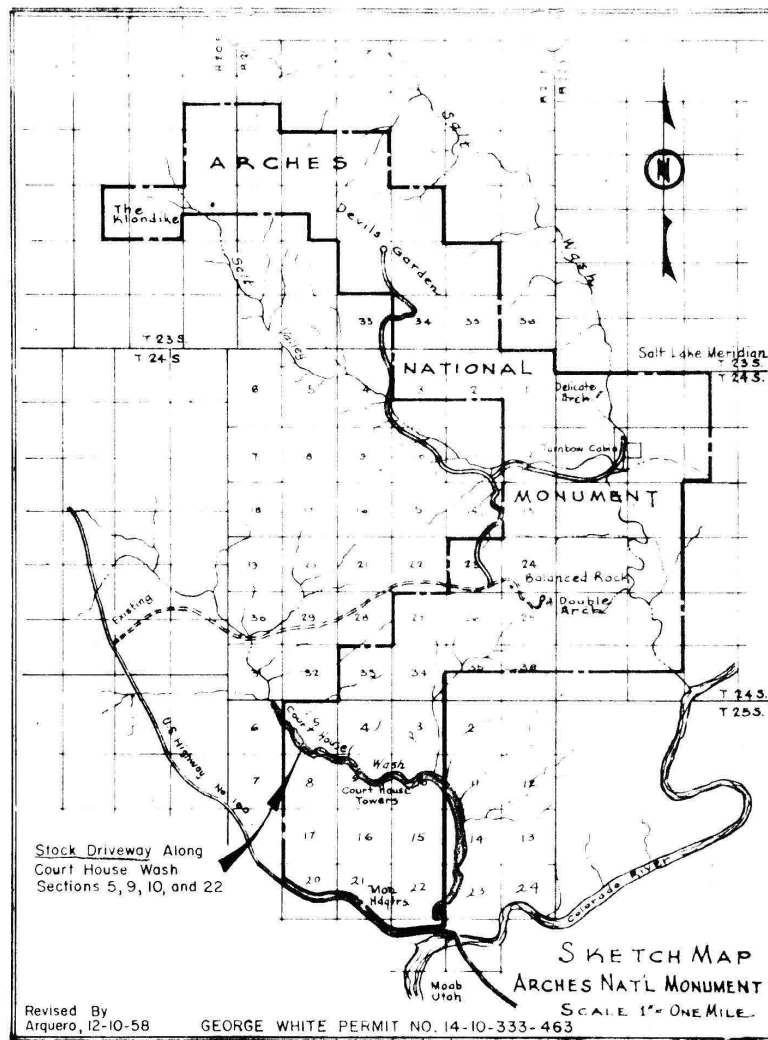

However, before we make any filing, I think it would be good judgment to discuss the matter with Mr. Richman after I have reviewed the situation on the ground with Superintendent Wilson.
