THIS PROJECT OR JOB HAS BEEN COMPLETED IN ACCORDANCE WITH APPROVED DRAWINGS, SPECIFICATIONS, AUTHORIZED CHANGES

SUBMITTED BY (Name and title): Samuel A. King, Assistant Superintendent DATE: April 5, 1957
APPROVED BY (Name and title): Dean C. Jacobs, Superintendent DATE: April 5, 1957

ATTACH NARRATIVE OF EVENT, PHOTOGRAPHS, AND "AS BUILT" DRAWINGS TO THIS FORM

Construction work on this water supply line was initiated in August, 1951. Thereafter work was carried on intermittently each summer until August 31, 1956, when the project was completed. The line comprises some 6000 feet of 3 inch wooden pipe. About 1000 feet of the line is above ground encased in a wooden box packed with red-wood bark for insulation. That portion of the line below ground level comprising some 5000 feet is not insulated. While this segment of the headquarters water system is considered complete, it is in-operative and will remain so until such time as certain refinements are incorporated in the system. The latter to be determined after additional engineering research can be accomplished.

There is, however, some 333 feet of 4 inch wooden line in this system connecting the old reservoir to the new and which is functioning at present.

The other portion of this project comprising the water reservoir of 50,000 gallons capacity is functioning satisfactorily.

Memorandum

To: Regional Director, Western Region

From: Acting Chief, Branch of Water Resources

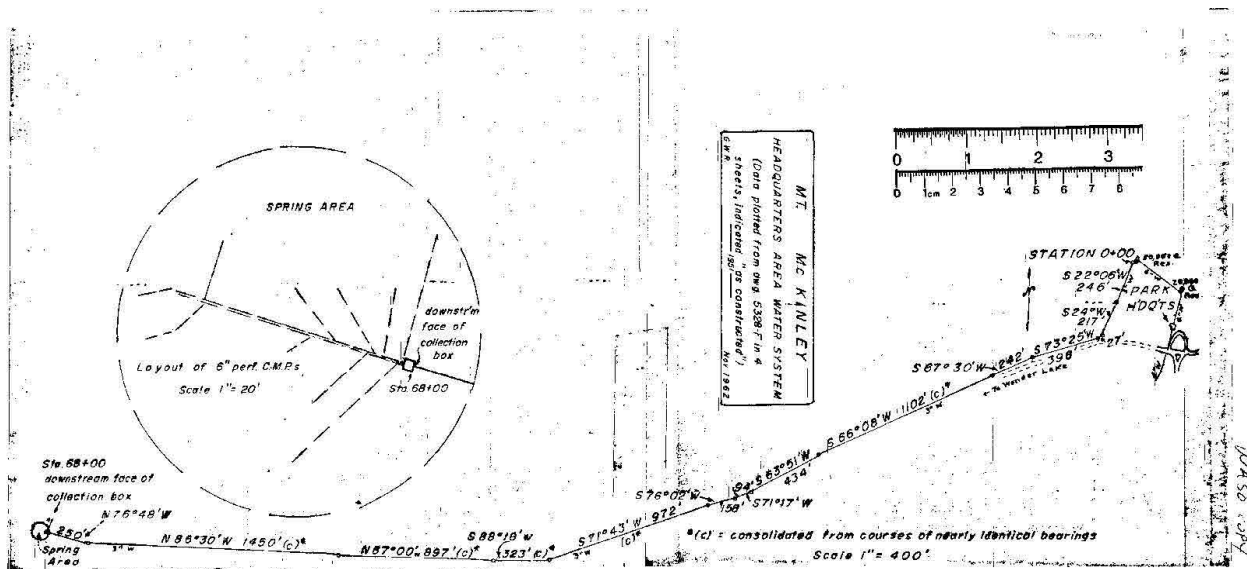

Subject: Water Right Docket No. 2, Headquarters Area, Mt. McKinley

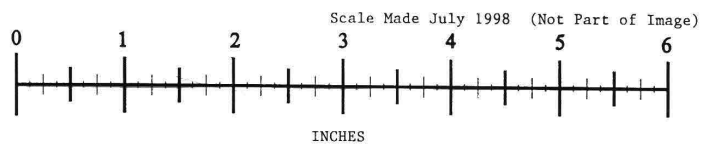

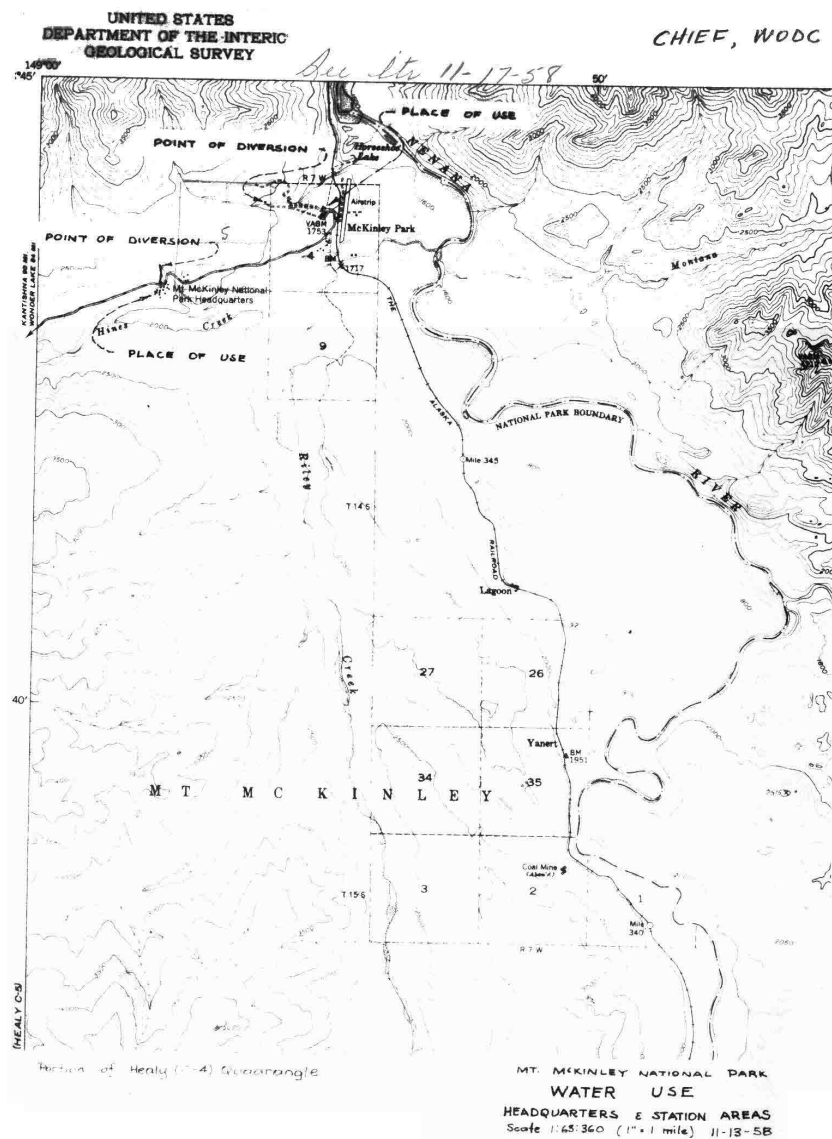

There is enclosed a docket folder for the subject docket containing pertinent parts of the completion report approved April 5, 1957, for P.C.P. U-15-2 and a sketch map, the source of which is explained thereon. Since the source map is entitled to indicate additions to an existing system a search of our WASO files was made for the purpose of including an earlier completion report or parts thereof but none was located. If available such might be supplied for each docket copy from a field source.
