JSA

Needles Well No. 4 (Squaw Springs Well) [NPS Docket= CANY 0002]

Application 37065 was filed in 1965 (0.0334 cfs, for domestic and irrigation purposes). A 1982 memo (CANY to RMR) includes reference to this well. It is not clear if water had been used from this source by this time; money had been expended on well construction and some aspect of water system development. It appears that the park wanted to maintain this well to support visitor facilities that hadn't been developed yet. An extension of time was filed with the state in 1993; at that time, CANY management expressed an interest in retaining rights to use water from this well.

Re: Water Right 05-593 (A37065)

Dear Mr. Lord:

Since receiving a letter of cancellation on the above referenced water right dated September 16, 2004, you and I have visited on at least two occasions about the disposition of the existing well. During our last conversation you indicated that the well had been sealed and abandoned by a State licensed drilling contractor. At that time you also indicated that copies of the documents concerning this work would be available from Wayne Nielsen, Superintendent of the Canyonlands National park. I would appreciate receiving a copy of his Abandonment Report when it is available, to place in our file.

If you have any questions regarding this request, or further discussion in regards to this water right, please feel free to contact me. Your assistance in this matter is appreciated.

Sincerely,

A handwritten signature in cursive script, appearing to read "Mark P. Page".

BEFORE THE STATE ENGINEER OF THE STATE OF UTAH

IN THE MATTER OF APPLICATION)
)
NUMBER 05-593 (A37065)) MEMORANDUM DECISION

Application Number 05-593 (A37065), in the name of USA National Park Service, was filed on July 2, 1965. The owner of record submitted a letter to the Division of Water Rights on September 21, 2004, withdrawing the application and requesting that the State Engineer cancel the filing.

The well drilled under this application will now be left without a water right. As provided by State Administrative Rule R655-4-12, it must be appropriately abandoned and sealed.

It is, therefore, **ORDERED** and Application Number 05-593 (A37065) is hereby **CANCELED** and **WITHDRAWN** pursuant to that request.

This Decision is subject to the provisions of Rule R655-6-17 of the Division of Water Rights and to Sections 63-46b-13 and 73-3-14 of the Utah Code Annotated, 1953, which provide for filing either a Request for Reconsideration with the State Engineer or an appeal with the appropriate District Court. A Request for Reconsideration must be filed with the State Engineer within 20 days of the date of this Decision. However, a Request for Reconsideration is not a prerequisite to filing a court appeal. A court appeal must be filed within 30 days after the date of this Decision, or if a Request for Reconsideration has been filed, within 30 days after the date the Request for Reconsideration is denied. A Request for Reconsideration is considered denied when no action is taken 20 days after the Request is filed.

Dated this 6th day of October, 2004.

For Jerry D. Olds, P.E., State Engineer *Boyd CLAYTON*

Re: Application No. 05-593 (A37065)

By this letter, the United States-National Park Service relinquishes Application No. 05-593 (A37065) to the State of Utah. By Memorandum Decision dated June 12, 2003, the State Engineer granted an extension of time in which to place water to beneficial use pursuant to Application No. 05-593 to November 30, 2006. However, the United States no longer intends to complete this appropriation and so hereby relinquishes Application No. 05-593 to the State of Utah.

The National Park Service does, however, reserve all rights that may be available pursuant to federal law to develop water in the same area in order to meet the purposes of Canyonlands National Park, and this letter should not be construed as a relinquishment of any such rights.

If you have questions, or if there is a more appropriate form to be filled out to complete a relinquishment, please contact Eric Lord at (970) 225-3526.

Sincerely,

Wm. R. Pettee

MEMORANDUM OF DECISION

CANYONLANDS NATIONAL PARK:
Well Right No. 05-593

September 2004

Prepared by Eric Lord
Research Associate
Colorado State University/National Park Service

In 1965, NPS filed Application No. 05-593 with the State Engineer of Utah to appropriate 0.0334 cubic feet per second ("cfs") of water from an underground source. The water was to be used to for domestic use by up to 50,000 visitors per year at the visitor center and campground in the Needles District of CANY. The application was approved November 2, 1965.

Since then, the State Engineer granted several extensions of time in which to put the water to beneficial use. During this time, water was not put to beneficial use, and on February 14, 2003, the State Engineer of Utah sent notice to the Water Rights Branch ("WRB") that proof of beneficial use was due February 28, 2003 or the application would lapse.¹ WRB filed for and received one last extension from the State Engineer's, thinking that WRB would seek to transfer the potential right associated with Application No. 05-593 to a currently producing well supported by Water Right No. 05-554 in order to increase the amount of water that could be withdrawn from that well.

Water Right No. 05-554 supports a well approximately 2-3 miles away that currently supplies water for the Visitor Center and Campground in the Needles District. The terms of Water Right No. 05-554 limit water use to the lesser of the flow rate at continuous pumping (0.111 cfs or 80.38 acre-feet per year) or, 100,000 visitors and 5 families. The State guidelines for such types of use (visitor center, campground) for 100,000 people and 5 families estimate an annual water duty of 21.27 acre-feet per year ("afy"). Actual water use from the well in 2003 was 3.32 acre-feet; the average use over the last 10 years has approximated 4 afy.²

The park was concerned that Water Right No. 05-554 may be inadequate because visitation in 2003 was approximately 130,000, an amount in excess of the limitation stated on the license. It was thought that transferring the amount of water permitted under Application No. 05-593—that is, changing its point of diversion to the currently producing well—would provide additional capacity to meet the future needs of the Visitor Center and Campground.

¹ In the Matter of Application Number 05-593 (A37065), Memorandum Decision (June 12, 2003).

² Draft, Estimation of Future Water Use for Canyonlands National Park, Needles District, Utah, prepared by J. Harte (undated) (citing metered water use data provided by Dave Burt, CANY Maintenance, 4/13/04).

To better understand the nature of the “100,000 visitor and 5 families” cap, the State Engineer office in Price, Utah was contacted. Such a cap, stated in terms of numbers of people rather than in terms of an amount of water, was unusual. The State Engineer indicated that it would be possible to “convert” the “100,000 visitor and 5 families” cap to an amount of water by using either the state guidelines or by applying historical use amounts. However, as for any formal change to the license from a cap based on a number of visitors to a cap based on a water amount, the State Engineer stated that we could leave the license in its current state. Any change needed, if any, could be addressed when the adjudication process reaches the subject watershed.

Using the State guidelines, the “100,000 visitors and 5 families” cap translated to approximately 21.27 afy. (See attached “Canyonlands National Park: Proposed Change of Point of Diversion”). Given that water use is limited to the lesser of the licensed flow rate or the number of visitors, water use from Water Right No. 05-554 would be limited to 21.27 afy. Based on visitation numbers and actual water use amounts, actual annual use for the last 10 years has approximated 3.88 afy. Given that current use approximates 3.88 afy, Water Right No. 05-554 will be sufficient to meet the needs of the Needles District for some time to come. Assuming a 5% annual growth rate in water use at the Visitor Center and Campground, the annual withdrawal cap on Water Right No. 05-554 will not be reached for more than 30 years.

It is highly likely that the water resources in the area will undergo an adjudication by the State long before the amount of water withdrawn pursuant to Water Right No. 05-554 reaches the withdrawal cap. The State is in process of adjudicating drainages of the Colorado River within San Juan, Grand, and Uintah Counties, but has not yet initiated the process in the subject watershed. The United States has not been joined pursuant to the McCarran Amendment in the adjudication but has filed with the State, as a matter of comity, a Statement of Water User’s Claim for Water Right No. 05-554. Because the Visitor Center and Campground area is located on lands withdrawn from the public domain, it is highly likely that a federal reserved water right to meet the water needs of the area will be asserted when the adjudication process is begun in the subject watershed. A preliminary estimate of the amount of water to be claimed pursuant to a federal reserved right in the Needles District yielded a claim of approximately 46 afy.³ This amount is based on applying an assumed 5% annual growth rate to the current average annual use of 4 afy for the next 50 years. This yields a projected water need in the area in the year 2050 of approximately 46 afy.

In June 2004, WRB requested the State Engineer to consider the possibility of recognizing, prior to initiating an adjudication in the subject watershed, a federal reserved water right that would be sufficient to meet the future needs of the Needles District. In conjunction with such recognition, NPS would relinquish its state appropriative water rights in that area and rely solely on the federal reserved right. The State Engineer declined to do so, stating that he did not want to set such a precedent. While the State Engineer declined to enter into such a preliminary agreement in this case, the State

³ Draft, Estimation of Future Water Use for Canyonlands National Park, Needles District, Utah, prepared by J. Harte (undated).

Engineer has historically recognized the existence of federal reserved rights and has entered into a number of agreements pertaining to other NPS units in Utah. Based on this history, there is no reason to doubt that a federal reserved right to meet the future needs of the Needles District will be obtained when the adjudication process reaches the subject watershed.

Absent a preliminary agreement on a federal reserved water right, WRB reconsidered the need to change the point of diversion of Application No. 05-593 to the well supported by Water Right No. 05-554. After further consideration, it was determined that such an action was not warranted. Because Water Right No. 05-554 is sufficient to meet the area's water needs for the foreseeable future, and because a federal reserved water right is reasonably expected to address long-term water needs in the area, it is concluded that there is no present need to change Application No. 05-593 and thereby seek to expand the capacity of the production well. In addition, under state law the NPS would have no basis to support such a change because beneficial use pursuant to Application No. 05-593 could not be accomplished for many years.

Given this conclusion, there is no need to pursue completion of Application No. 05-593 at either its current location or through a change in point of diversion. By the terms of the last extension, the application will lapse November 30, 2006. Rather than letting the application lapse on the state's terms, it is concluded that the application should be relinquished. Because the application has not yet been "perfected" by application of water to beneficial use, the application is not considered to be "property," and may be relinquished without the need to follow surplus property procedures.

There are several precedents for the relinquishment of inchoate water rights. In the following examples, the major motivation for relinquishing the water rights was to avoid a confrontation with a state regarding the abandonment or forfeiture of a federally held state water right. These few cases are here summarized.⁴

In *In the Matter of Water Appropriation A-652* (Department of Water Resources-State of Nebraska, 1996), the U.S. Fish and Wildlife Service affirmatively relinquished a state-issued water right. The right had been acquired by FWS in 1986 in conjunction with the purchase of private land, and had never been put to beneficial use by FWS after the purchase. In 1996, the State of Nebraska initiated proceedings to declare the water right abandoned for non-use, and FWS, on the advice of the U.S. Office of the

⁴ See Memorandum, to John Leshy, from Marilyn Averill, Feb. 27, 1996; Memorandum, to Regional Solicitor-Rocky Mountain Region, from Regional Director-Region 6-Fish and Wildlife Service, Feb. 27, 1996; Memorandum, to Regional Solicitor-Marilyn Averill, from Field Director-Midwest Field Area, Not Dated; Correspondence, to Dept. of Water Resources-State of Nebraska, from Office of the Solicitor-Marilyn Averill, Feb. 28, 1996; Memorandum, to Regional Solicitor-Marilyn Averill, from Field Director, Midwest Field Area, Feb. 28, 1996; Notice of Affirmative Relinquishment of Conditional Water Right and Motion for Order, Concerning Conditional Water Rights of the United State of America, Gunnison County, Colorado, Case No. W-2383, Water Division 4, State of Colorado, Feb. 16, 1996; Motion to Dismiss the Application for a Finding of Reasonable Diligence, Concerning the Application for Water Rights of Northern Colorado Properties, Inc., in Larimer County, Case No. 94-CW039, Jan. 12, 1996.

Solicitor, relinquished the right rather than proceeding to hearing on the abandonment issue.

In a virtually identical case—*In the Matter of Appropriation A-5772* (Department of Water Resources-State of Nebraska, 1996), the National Park Service also relinquished a water right. The rights had also been acquired in conjunction with the purchase of private lands for incorporation into the Agate Fossil Beds National Monument.

In three Colorado water cases—Case No. W-2108, Water Division 4; Case No. W-2383, Water Division 4; and Case No. 94CW039, Water Division 1—the United States affirmatively relinquished *conditional* water rights. As conditional rights, the United States was obligated to put the water to beneficial use in order to perfect the right. Because the United States had no desire to perfect these rights, the rights were relinquished rather than allowed to fail by operation of state law.

Based on the foregoing, WRB concludes that the park should not pursue Application No. 05-593, should not seek to change its point of diversion to the current production well, and should relinquish Application No. 05-593 to the State.

CANYONLANDS NATIONAL PARK:
Proposed Change of Point of Diversion

September 2004

The Visitor Center and Campground in the Needles area draw water from a well in that area. This well is supported by Water Right No. 05-554 which authorizes the withdrawal of water at the rate of 0.111 cfs or enough to service up to 100,000 visitors and 5 families per year. Visitation in that area has been growing and there is concern that the water right will be insufficient to meet future demand at the Visitor center and campground.

There is another well several miles away that is supported by Application No. 05-593; this right authorized the withdrawal of water at the rate of up to 0.0334 cfs or enough to service up to 50,000 visitors and irrigate up to 10 acres. This right has not yet been perfected by beneficial use of water.

Due to increasing demand in the area, NPS is considering changing the point of diversion of Application No. 05-593 to the well supported by Water Right No. 05-554, thereby increasing the total amount of water that may be withdrawn from that well.

Pursuant to Utah law, the amount of water that can be withdrawn annually pursuant to a water right is based on the lesser of the flow rate limitation (assuming continuous pumping) or the type of use authorized in the permit. These constraints are here presented:

Water Right No. 05-554

Permitted Pumping Rate: 0.111 cfs

--assuming continuous

pumping: 80.38 afy

Permitted Uses:

100,000 visitors (visitor center and campground)
plus 5 families

Application No. 05-593

Permitted Pumping Rate: 0.0334 cfs

--assuming continuous

pumping: 24.175 afy

Permitted Uses:

50,000 visitors (visitor center) plus
10 acres irrigation

In order to estimate the amount of water that can be withdrawn to support the permitted uses—that is, in order to convert “100,000 visitors” to a water amount—past water usage amounts and Utah regulations may be used. The water use amounts are derived from the Utah Administrative Code regulations for public drinking water supplies.¹ The relevant guideline amounts are the following:

Visitor Center:	5 gallons per day per visitor
Modern Seasonal Recreation Camp:	60 gallons per day per visitor
Year-round Residential Use:	800 gallons per day per connection

¹ Utah Admin. Code, Rule R309-510. Facility Design and Operation: Minimum Sizing Requirements.

The amounts are used by the state engineer as guidelines for determining the duty of water. These annual amounts are based on the peak day demand.

Applying these guideline amounts to the permitted visitor numbers yields the following permitted use limitations.

Water Right No. 05-554

Permitted Use Limitation:

Visitor Center:²

$$84,000 \text{ visitors} \times 5 \text{ gpd} = 420,000 \text{ gpy} \\ = 1.29 \text{ afy}$$

Campground

$$16,000 \times 60 \text{ gpd} = 960,000 \text{ gpy} \\ = 2.95 \text{ afy}$$

Residences

$$19 \text{ connections} \times 800 \text{ gpd} = 5,548,000 \text{ gpy} \\ (\text{approx. } 20 \text{ people}) = 17.03 \text{ afy}$$

Total (Permitted Use
Limitation):

$$\underline{21.27 \text{ afy}}$$

Application No. 05-593

Permitted Use Limitation:

Visitor Center:³

$$42,000 \text{ visitors} \times 5 \text{ gpd} = 210,000 \text{ gpy} \\ = 0.645 \text{ afy}$$

Campground:

$$8,000 \text{ visitors} \times 60 = 480,000 \text{ gpy} \\ = 1.475 \text{ afy}$$

Irrigation:

$$10 \text{ acres} \times 5 \text{ afy} = 50 \text{ afy}$$

Total (Permitted Use
Limitation):

$$\underline{52.12 \text{ afy}}$$

For sake of comparison, the withdrawal limitations based on flow rate are the following:

Water Right No. 05-554

Flow Rate Limitation:

$$0.111 \text{ cfs} \times 1.984 \times 365 \text{ days} = \underline{80.38 \text{ afy}}$$

Application No. 05-593

Flow Rate Limitation:

$$0.0334 \text{ cfs} \times 1.984 \times 365 = \underline{24.186 \text{ afy}}$$

Regarding Right No. 05-554, the Permitted Use Limitation is the constraining feature (i.e. the lesser of the Permitted Use Limitation and the Flow Rate Limitation) of the water right; consequently, the annual amount that could be withdrawn pursuant to Water Right No. 05-554 would be no more than 21.27 acre feet. Regarding Application No. 05-593, the constraining feature is the Flow Rate Limitation; consequently, the annual amount that could be withdrawn would be an additional 24.186 acre feet. However, NPS has no need to irrigate 10 acres pursuant to Right No. 05-593. That right could be adjusted so that irrigation is reduced from 10 acres to 1 acre, and the remainder of water used for Visitor Center and Campground purposes.

² The permitted use is for 100,000 visitors. The breakdown of visitors using the visitor center (84,000) and the campground (16,000) is based on the approximate ratio of visitors using each facility during 2003.

³ The permitted use is for 50,000 visitors. The breakdown of visitors using the visitor center (42,000) and the campground (8,000) is based on the approximate ratio of visitors using each facility during 2003.

That adjustment would be as follows:

Total Flow Rate Limitation:	24.186 afy
Less one acre of irrigation:	
1 acre X 5 afy =	<u>(5.0 afy)</u>
Remainder allocated to	
visitor use:	19.186 afy

Assuming this adjustment, the water rights would reflect the following:

Water Right No. 05-593:	
100,000 visitors and 5 families:	21.27 afy
Application No. 05-554:	
50,000 visitors:	19.186 afy
One acre irrigation:	5.0 afy

The total annual limit of water that could be withdrawn would be 45.456 acre feet. This should be more than adequate to meet future NPS needs in the area.

DRAFT**Estimation of Future Water Use for
Canyonlands National Park, Needles District, Utah**

Prepared by J. Harte
 Reviewed by _____
 Approved by W. Hansen

Introduction

The objective of this report is to estimate the quantity of water needed for future consumptive use purposes at Canyonlands National Park (CANY), Needles District. Future water use is projected through the year 2054, a 50 year planning period. This report is prepared in support of federal water rights claims in Utah.

CANY, Needles District obtains its drinking water from the "Cave Spring Well" also designated as Well No. 7 by Larry Martin, NPS, WRD in the "Drinking Water Source Protection Plan for Canyonlands National Park, March 2001". The well is 72 feet deep and is located in the SESW Section 20, T. 30 S., R. 20 E. The well is covered under state appropriative Water Right Number 05-554 and is the water source for a visitor center, campground, and employee residences. The "Squaw Spring Well" also designated as Well No. 4 by Larry Martin is not currently being used and has a Proof Due Date of 11/30/2006. The well is 77 feet deep and is located in the SWSW Section 25, T. 30 S., R. 19 E. The well is covered under state appropriative Water Right Number 05-593 and was constructed to be a water source for a visitor center, campground, and irrigation of 10 acres. At this time the park has no plans for significant future development in the Needles District (personal communication with Dave Burt, CANY, 03/10/04).

Methods and Results

Average annual water use at CANY, Needles District was determined by computing the average of the 1994 through 2003 metered water use. Water use records prior to 1994 were not available. Administrative and visitor uses are not distinguished for this report.

The following table shows the metered 1994-2003 annual water use and computed average annual water use for CANY (metered water use data provided by Dave Burt, CANY Maintenance, 04/13/04).

Date	Metered Water Use (gallons)	Metered Water Use (acre-feet)
1994	1,612,760	4.95
1995	1,010,950	3.1
1996	1,136,440	3.49
1997	1,489,340	4.57
1998	1,242,000	3.81
1999	1,143,008	3.51
2000	1,316,690	4.04
2001	1,064,830	3.27
2002	1,535,710	4.71
2003	1,082,280	3.32
Average Annual Water Use	1,263,401	3.88

In order to make a conservative estimate of future water needs at CANY, Needles District the National Park Service-wide average annual visitation growth rate for the period from 1948-1998 is applied to the estimate of current annual water use. Appendix A describes the computation of this rate as well as the rationale for its selection as an appropriate rate. Applying the average annual growth rate of 5 percent per year to the current water use of 3.88 rounded up to 4.0 acre-feet per year, for fifty years, yields a projected water need in the year 2050 of approximately 46 acre-feet per year.

DRAFT

Recommendation

In order to accommodate future growth at CANY, Needles District it is recommended that the future consumptive use claim for Canyonlands National Park, filed with the State of Utah in conjunction with the "Colorado River in San Juan, Grand, and Uintah Counties, Utah, and Exclusive of the Green River Drainage Adjudication-Civil No. 4477-01 Area" and the "Price/Green Rivers General Adjudication, Utah-Civil No. 8598-92 Area", be 46 acre-feet per year. Of the 46 acre-feet of water diverted annually we estimate that 50%, or 23 acre-feet, will be depleted from the Colorado River system.

DRAFT**APPENDIX A****Determination of a Regional Growth Rate for Projecting Future Water Needs
at Southeastern Utah National Park Units**

Because park water use is partially a function of park visitation, historic visitation data were examined to determine a reasonable growth rate for estimating future water needs. Unfortunately methods of counting park visitors have not been consistent over time, making estimates of growth rates at individual park units difficult. For this reason, an attempt was made to derive a regional growth rate that incorporates data from a number of National Park units.

Average annual growth rates for the period 1948 through 1998 were computed for each of five National Park units in southeastern Utah and for total National Park unit visitation (Table 1). Historical data for total nationwide park visitation are shown in Table 2, along with the computed average annual growth rate. Average annual growth rates at southeastern Utah parks range from 11.3 percent per year at Canyonlands National Park to 28.7 percent per year at Capitol Reef National Park, with a nationwide average of 4.8 percent.

Adopting a nationwide average annual growth rate of 5.0 percent as the regional growth rate is reasonable. It is the lowest calculated growth rate and it incorporates the most visitation data, potentially mitigating the effects of inconsistent visitor counting methods.

Table 1. Average annual growth rates (1948-1998) for five National Park units in southeastern Utah and the National Park Service (NPS) nationwide average.

	NPS National	Arches NP	Canyonlands NP ^a	Capitol Reef NP ^b	Hovenweep NM	Natural Bridges NM
Growth Rate (percent per year)	4.8	12.4	11.3	28.7	13.1	12.3

^a Canyonlands NP was established in 1965. The average annual growth rate was computed from 1966-1998 visitation data.

^b Capitol Reef NP was established in 1938, however, continuous visitation records do not begin until 1950. The average annual growth rate was computed from 1951-1998 visitation data.

Table 2. Number of visitors and interannual growth rates for all National Park Service units.

Year	Visitors	Growth Rate	Year	Visitors	Growth Rate
1904	122,594		1953	52,268,174	0.10
1905	142,859	0.17	1954	54,210,200	0.04
1906	32,475	-0.77	1955	56,572,800	0.04
1907	63,242	0.95	1956	61,602,300	0.09
1908	70,926	0.12	1957	68,016,000	0.10
1909	87,998	0.24	1958	65,460,900	-0.04
1910	200,516	1.28	1959	68,900,500	0.05
1911	224,407	0.12	1960	79,229,000	0.15

Re: L54 (2380)
CANY/Water Rights
Water Right 05-593

Dear Sir or Madam:

The enclosed Application for Permanent Change of Water was received in our office on November 6, 2003. We have retyped the application with several necessary changes. Also, an application map is required showing the point of diversion and place of use for both the heretofore and the hereafter portions of the application. A sample map for your information is enclosed. A map verification statement, signed by the applicant, must be submitted with the application map. This statement has been enclosed. Lastly, the correct filing fee is \$100.00, based on the volume of 24.175 acre-feet, and we are returning enclosed check no. 012096 in the amount of \$75.00.

Please note that a flow of 0.0334 cfs, flowing 24 hrs. a day for 365 days will produce at a maximum 24.175 acre-feet of water. The duty for irrigation in this area is currently 5 acre-feet per acre, and the requested 10 acres of irrigation would require 50 acre-feet of water. Therefore it is not possible for this flow to provide for the 10 irrigated acres, let alone the domestic portion of the uses. Assuming this water right change is approved, the process of proving up the water right will of necessity limit the uses to those that can be sustained with a flow of 0.0334 cfs.

Review and return the signed Permanent Change Application, Map Verification Statement, and Application Map to this office along with a check in the amount of \$100.00, made payable to Division of Water Rights, to cover the filing fee. If you need any assistance, you are welcome to contact this office at (435) 637-1303, or visit our web site at: <http://www.waterrights.utah.gov>.

Sincerely,

Casey Ford, P.E.
Assistant Regional Engineer

APPLICATION FOR PERMANENT CHANGE OF WATER

STATE OF UTAH

Rec. by _____

Fee Rec. _____

Receipt # _____

For the purpose of obtaining permission to make a permanent change of water in the State of Utah, application is hereby made to the State Engineer, based upon the following showing of facts, submitted in accordance with the requirements of Section 73-3-3 Utah Code Annotated, as amended.

*WATER RIGHT NO. 05 - 593 *APPLICATION NO. a _____

Changes are proposed in (check those applicable)

☒ point of diversion. ☒ place of use. _____ nature of use. ☒ period of use.

1. OWNER INFORMATION

Name(s): United States - National Park Service *Interest: 100 %
Address: 1201 Oak Ridge Drive Suite 250
City: Fort Collins State: Colorado Zip Code: 80525

2. *PRIORITY OF CHANGE: _____ *FILING DATE: _____

*Is this change amendatory? (Yes/No): _____

3. RIGHT EVIDENCED BY: Water Right 05-593

Prior Approved Change Applications for this right: No

*****HERETOFORE*****

4. QUANTITY OF WATER: 0.0334 cfs and/or _____ ac-ft.

5. SOURCE: Underground Water Well

6. COUNTY: San Juan

7. POINT(S) OF DIVERSION:

Reservoir Name: _____ Storage Period: from _____ to _____

Capacity: _____ ac-ft. Inundated Area: _____ acres.

Height of dam: _____ feet.

Legal description of inundated area by 40 acre tract(s): _____

24. EXPLANATORY

The following is set forth to define more clearly the full purpose of this application. Include any supplemental water rights used for the same purpose. (Use additional pages of the same size if necessary): The point of diversion (well site) of water right 05-593 will be moved to the same well used pursuant to water right 05-554 in order to meet increasing water demand at nearby visitor center and campground. The combined rights would allow for withdrawal of water sufficient to supply up to 150,000 visitors per year.

The undersigned hereby acknowledges that even though he/she/they may have been assisted in the preparation of the above-numbered application through the courtesy of the employees of the Division of Water Rights, all responsibility for the accuracy of the information contained herein, at the time of filing, rests with the applicant(s).

Signature of Applicant_____
Signature of Applicant

APPLICANT'S MAP VERIFICATION STATEMENT

I/we, _____, hereby acknowledge that this map
(or, the map attached to this application), consisting of _____ pages numbered
_____ to _____ was prepared in support of Application Number _____.
I/we hereby accept and submit this map as a true representation of the facts shown thereon
to the best of my\our knowledge and belief.

INSTRUCTIONS FOR APPLICATION MAPS

According to a 1998 amendment to Section 73-1-11 of the Utah Code, when land is conveyed on or after May 4, 1998, all approved water rights pass silently as an appurtenance to the land unless reserved. Because of this, it is important that the place of use for a water right be appropriately described and mapped to reduce any confusion that might occur when the place of use is conveyed. An accurate water use map will provide definition of the water right and its place of use on the land in the event the property is conveyed.

Application maps must be submitted with the following applications: Application to Appropriate, Temporary Application, Exchange Application, Application for Permanent Change, and Application for Temporary Change.

The application map must show the parcel of land, the proposed place of use and the proposed point of diversion. Maps filed with applications to change the place of use must also show the parcel of land and the place of use where the water was previously used. The specific location to be shown on the map is described as follows for each type of beneficial use: **Irrigation** - where water will be applied on a parcel of land, **Domestic** - the residence(s); **Stockwatering** - where stock will be watered or area where stock are impounded or grazed; **Fish Culture** - the pond, lake, reach of stream or facility; **Instream** - the reach of stream where flows are to occur; **Mining** - the area where water will be used for mining purposes; **Oil Well Uses** - the oil field described in the developing entity's mineral rights or other development authority or the facility or area where use occurs; **Power, Commercial, Industrial or Other Uses** - the facility or area where beneficial use occurs.

Each map must show the Section, Township and Range. Any land boundaries shown on the map must be tied to a section corner (NE, SE, NW, SW) or a quarter section corner (N¼, E¼, S¼, W¼) of the section-township-range survey for the area of use. Any public roads adjacent to or near the parcel of land should be shown on the map. Subdivision maps must show the subdivision name and the lot/block designations.

Application maps may be based on all or part of an appropriate County Recorder's ownership plat map or subdivision plat map (see attached examples). For large tracts (40 acres or larger) of land, all or part of a USGS Topographic Quadrangle Map can be used. The Department of Natural Resource's Book Store carries most Utah maps.

For water right filing purposes, the most convenient map sizes are 8½"x11" or 8½"x14". Ownership plat maps may also be filed.

Maps must include a north arrow, standard scale, legend describing any symbols used and irrigated acreage and/or place of use should be shaded or hatched.

The applicant's Map Verification Statement (see attachment) must be completed, signed and included on The Application Map.

The State Engineer will determine the suitability of any application map submitted.

If you have any questions, or require further assistance, contact the Division of Water Rights Office nearest you: Cedar City (435-586-4231); Logan (435-752-8755); Price (435-637-1303); Richfield (435-896-4429); Salt Lake (801-538-7240); Vernal (435-781-5327).

IN THE MATTER OF APPLICATION)

MEMORANDUM DECISION

NUMBER 05-593 (A37065))

Application Number 05-593 (A37065), in the name of USA National Park Service, was filed on July 2, 1965, to appropriate 0.0334 cfs of water from an existing 6-inch well, 77 feet deep, located at a point North 275 feet and West 1319 feet from the S $\frac{1}{4}$ Corner of Section 25, T30S, R19E, SLB&M. The water is to be used for irrigation of 10.00 acres from April 1 to October 31, and for domestic purposes of 50,000 visitors per year at a visitor's center and campground at Canyonlands National Park. The application was approved on November 2, 1965, and proof of beneficial use was last due on February 28, 2003.

The applicant has filed a request for extension of time within which to submit proof with the State Engineer stating that it is their intention to move this water right to an existing well drilled under Water Right Number 05-554 for additional use at the Needles Area Visitor's Center and campground. Therefore, the applicant is requesting additional time to file a change application and complete the proof work.

The extension request was advertised in The San Juan Record on March 12, and 19, 2003, and was not protested.

Information contained in the file indicates that a well was drilled under this right in 1965, and a water system for temporary housing was constructed. However it does not appear long term continual use of the water has occurred. However, the applicant's affidavit in support of the application may justify reasonable cause for delay. The applicant shall understand that if a change application is filed, approved and developed, the original well under this application may require abandonment and sealing as directed by state rules and regulations for well drilling.

The applicant is placed on notice that extension requests must comply with the provisions of Section 73-3-12, Utah Code Annotated 1953. The State Engineer may grant extensions of time only "on proper showing of diligence or reasonable cause for delay". The applicant must satisfy Section 73-3-12 by providing a detailed account of the work accomplished during this extension period, which may include the filing of a change application to an existing well, and use of the water to demonstrate due diligence or reasonable cause for delay, or the requests will be denied.

It is, therefore, **ORDERED** and an extension of time within which to submit proof is **GRANTED** on Application Number 05-593 (A37065) to and including November 30,

MEMORANDUM DECISION
APPLICATION NUMBER
05-593 (A37065)
PAGE 2-

2006, but with the condition that further requests for extension of time will be critically reviewed, and unless the water has been placed to full beneficial use within the time hereby granted, the State Engineer will deny any further request for extension of time.

This extension is granted in accordance with the law which states: "The construction of the works and the application of water to beneficial use shall be diligently prosecuted to completion within the time fixed by the State Engineer. Extensions of time ... may be granted by the State Engineer on proper showing of diligence or reasonable cause for delay ... In the consideration of an application to extend the time in which to place the water to beneficial use under an approved application, ... the State Engineer shall deny such extension and declare the application lapsed, unless the applicant affirmatively shows that he has exercised or is exercising reasonable and due diligence in working toward completion of the appropriation."

This Decision is subject to the provisions of Rule R655-6-17 of the Division of Water Rights and to Sections 63-46b-13 and 73-3-14 of the Utah Code Annotated, 1953, which provide for filing either a Request for Reconsideration with the State Engineer or an appeal with the appropriate District Court. A Request for Reconsideration must be filed with the State Engineer within 20 days of the date of this Decision. However, a Request for Reconsideration is not a prerequisite to filing a court appeal. A court appeal must be filed within 30 days after the date of this Decision, or if a Request for Reconsideration has been filed, within 30 days after the date the Request for Reconsideration is denied. A Request for Reconsideration is considered denied when no action is taken 20 days after the Request is filed.

Your contact with this office, should you need it, is with the Price Regional Office. The telephone number is (435) 637-1303.

Dana Dredge, Extension Secretary

IN THE OFFICE OF THE STATE ENGINEER OF THE STATE OF UTAH
REQUEST FOR REINSTATEMENT AND EXTENSION OF TIME
(After Fourteen Years)

RECEIVED

FEB 28 2003

WATER RIGHT NO. **05-593 (A37065)**APPLICANT: **USA National Park Service**WATER RIGHTS
PRICESTATE OF UTAH
COUNTY OF**San Juan**1201 Oakridge Drive Suite 250
Fort Collins, CO 80525

Charles W. Pettee, being first duly sworn that he or she is the (agent of the)
owner of the above number application; that the information given is true and correct to the best of his or her knowledge.

Describe briefly the type and extent of construction completed to date, and cause for delay.

Water Right No. 05-593 was originally permitted for domestic use to meet the needs of up to 50,000 visitors at the Needles area visitor center and campground, and for irrigation of up to ten acres. The National Park Service recognizes that this water right has a long history of extensions; nevertheless, the National Park Service requests one final extension of two months to allow for the filing of a change of water right. It is our intention to change the point of diversion to a well that is already supported by Water Right No. 05-554. The amount of visitor use at the visitor center is nearing the limitations of Water Right No. 05-554 and the National Park Service wishes to improve its ability to meet the needs of visitors by adding Water Right No. 05-593 to the same well site. Under such arrangement, water drawn pursuant to Water Right No. 05-593 will be put to beneficial use during the upcoming visitor season. Because Water Right No. 05-593 was originally permitted for domestic use in the visitor center area, there would be no increase in permitted rights in the area. Therefore, we request an extension of time of two months past the date of approval, if granted, in order to file a change of water right to accomplish the above described changes.

Pursuant to Section 73-3-12, Utah Code Annotated 1953 (as amended), request is made for REINSTATEMENT and EXTENSION OF TIME for filing proof from

February 28, 2003 to **, 20__.

Charles W. Pettee **Two months beyond date of approval, if granted.

Dear Applicant:

RE: Application No. 05-593 (A37065)
PROOF-DUE DATE: February 28, 2003

It is noted from our files that you have only fourteen (14) more days in which to submit proof before the lapsing of your application.

This letter is sent to remind you to have your proof or request for extension of time filed in this office before the proof-due date of your application, which is February 28, 2003.

Enclosed is a request for extension of time form in case you have misplaced the one previously sent to you.

Your contact with this office, should you need it, is with our Regional Office in Price. The telephone number is (435)637-1303.

Yours truly,

A handwritten signature in cursive script that reads "Jerry D. Olds".

BEFORE THE STATE ENGINEER OF THE STATE OF UTAH

IN THE MATTER OF APPLICATION)

NUMBER 05-593 (A37065))

MEMORANDUM DECISION)

Application Number 05-593 (A37065), in the name of USA National Park Service, was filed on July 2, 1965, to appropriate 0.0334 cfs of water from a six inch well, 77 feet deep, located at a point North 275 feet and West 1319 feet from the S $\frac{1}{4}$ Corner of Section 25, T30S, R19E, SLB&M, and used for the irrigation of 10.00 acres from April 1 to October 31, and the domestic purposes of 50,000 visitors per year. The application was approved on November 2, 1965, and proof of beneficial use was last due on February 28, 1998.

The applicants filed a request for extension of time within which to file proof with the State Engineer stating reductions in funding have caused delays, more time is needed to put the water to beneficial use.

The extension request was advertised in The San Juan Record on March 11, 1998, and March 18, 1998, and was not protested.

Information contained in the file indicates that the well was drilled in 1965, and since that time, little additional development has been completed under the application. However, the applicant's affidavit in support of the application may justify reasonable cause for delay.

The applicant is placed on notice that future extension requests must comply with the provisions of Section 73-3-12, Utah Code Annotated 1953. The State Engineer may grant extensions of time only "on proper showing of diligence or reasonable cause for delay". The applicant in future extension requests must satisfy Section 73-3-12 by providing a detailed accounting of the work completed during this extension period, which should include the beneficial use of the water to demonstrate due diligence or reasonable cause for delay, or the requests may be denied.

It is, therefore, **ORDERED** and an extension of time within which to submit proof is **GRANTED** on Application Number 05-593 (A37065) to and including February 28, 2003, but with the condition that further requests for extension of time will be critically reviewed, and unless substantial progress is shown in the form of physical development within the time hereby granted, the State Engineer may deny the next request for extension of time.

This extension is granted in accordance with the law which states: "The construction of the works and the application of water to beneficial use shall be diligently prosecuted to completion within the time fixed by the State Engineer. Extensions of time ... may be granted by the State Engineer on proper showing of diligence or reasonable cause for delay ... In the consideration of an application to extend the time in which to place the water to beneficial use under an approved application, ... the State Engineer shall deny such extension and declare the application lapsed, unless the applicant affirmatively shows that he has exercised or is exercising reasonable and due diligence in working toward completion of the appropriation."

This Decision is subject to the provisions of Rule R655-6-17 of the Division of Water Rights and to Sections 63-46b-13 and 73-3-14 of the Utah Code Annotated.

1953, which provide for filing either a Request for Reconsideration with the State Engineer or an appeal with the appropriate District Court. A Request for Reconsideration must be filed with the State Engineer within 20 days of the date of this Decision. However, a Request for Reconsideration is not a prerequisite to filing a court appeal. A court appeal must be filed within 30 days after the date of this Decision, or if a Request for Reconsideration has been filed, within 30 days after the date the Request for Reconsideration is denied. A Request for Reconsideration is considered denied when no action is taken 20 days after the Request is filed.

Dear Applicant:

RE: Application No. 05-593 (A37065)
PROOF-DUE DATE: February 28, 1998

To appropriate water in Utah, or to change the point of diversion, place and nature of use of water, you must make application, receive approval, complete the intended development work and submit proof that the water has been put to beneficial use. Our records indicate that you have not made proof on your application. This is due on February 28, 1998.

In those areas in which general adjudication proceedings are pending and elections are authorized, the applicant can either:

1. Submit a satisfactory proof of beneficial use; or
2. Elect to file a statement of water user's claim in lieu of proof of beneficial use; or
3. Request an extension of time.

Failure to complete one of the above three actions on or before the proof-due date shall cause the application to LAPSE.

If development is not complete, additional time may be allowed by completing the enclosed request for extension of time and submitting it in affidavit form on or before the proof-due date. Since fourteen years or more have passed since approval of the application, your request for extension of time can only be granted after publication of notice of such request and a twenty day protest period. The fee for filing this request is \$75.00. Also enclosed is an election to file a water user's claim in lieu of proof for submission if the project is complete.

Your contact with this office, should you need it, is with our Regional Office in Price. The telephone number is (801)637-1303.

RE: Application No. 05-593 (A37065)

Request for extension of time in which to submit Proof of Appropriation or Proof of Change contemplated by the above-numbered application has been considered and the time for receiving Proof of Appropriation is hereby extended from February 28, 1993, to February 28, 1998.

This extension is granted in accordance with the law which states: "The construction of the works and the application of water to beneficial use shall be diligently prosecuted to completion within the time fixed by the state engineer. Extensions of time ... may be granted by the state engineer on proper showing of diligence or reasonable cause for delay... In the consideration of an application to extend the time in which to place the water to beneficial use under an approved application, ... the State Engineer shall deny such extension and declare the application lapsed, unless the applicant affirmatively shows that he has exercised or is exercising reasonable and due diligence in working toward completion of the appropriation."

I earnestly recommend that you complete your development and submit Proof of Appropriation at the earliest possible date.

Your contact with this office, should you need it, is with our Regional Office in Price. The telephone number is (801)637-1303.

Dear Sir:

I hereby request WITHDRAWAL of the Election to File Statement
of Water User Claim which I submitted on the above numbered application.

I understand this will automatically reinstate the last proof
due date by which time I must either submit Proof, Election Form, or
Request for Extension of Time.

Moab, UT 84532

Dear Applicant:

RE: Application No. 37065 (05-593)

Request for extension of time in which to submit Proof of Appropriation or Proof of Change contemplated by the above-numbered application has been considered and the time for receiving Proof of Appropriation is hereby extended from February 28, 1982 to February 28, 1985 inclusive.

This extension is granted in accordance with the law which states: "The construction of the works and the application of water to beneficial use shall be diligently prosecuted to completion within the time fixed by the state engineer. Extensions of time ... may be granted by the state engineer on proper showing of diligence or reasonable cause for delay... In the consideration of an application to extend the time in which to place the water to beneficial use under an approved application, ... the State engineer shall deny such extension and declare the application lapsed, unless the applicant affirmatively shows that he has exercised or is exercising reasonable and due diligence in working toward completion of the appropriation."

I earnestly recommend that you complete your development and submit Proof of Appropriation at the earliest possible date.

Yours very truly,

Dee C. Hansen

FORM 38

Scott M. Matheson, Governor
Temple A. Reynolds, Executive Director
Dee C. Hansen, State Engineer

Dear Applicant:

RE: Application No. 37065 (05-593)

To appropriate water in Utah or to change the point of diversion, place and nature of use of water, you must make application, receive approval, complete the intended development work and submit proof that the water has been put to beneficial use. Our records indicate that you have not made proof on your application. This is due February 28, 1982.

In those areas in which general adjudication proceedings are pending and elections are authorized, the applicant can either:

1. Submit a satisfactory proof of appropriation;
or
2. Elect to file a statement of water user's
claim in lieu of proof of appropriation
or
3. Request an extension of time.

Failure to complete one of the above three actions on or before the proof-due date shall cause the application to lapse.

If development is not complete, additional time may be allowed by completing the enclosed request for extension of time and submitting it in affidavit form on or before the proof-due date. Since fourteen years or more have passed since approval of the application, your request for extension of time can only be granted after publication of notice of such request and a thirty-day protest period. The fee for filing this request is \$37.50. Also enclosed is an election to file a water user's claim in lieu of proof for submission if the project is complete.

Yours truly,

Dee C. Hansen, P.E.
State Engineer

Dear Mr. Mekeel:

On October 29, 1979, our office received two Form 30, Extension of Time Requests, After 14-years, for the above-numbered applications. In your letter which accompanied the extension requests, you stated that we would receive a check for \$75.00 (\$37.50 for each request) to cover the advertising fee for the extension requests. To date, we have not received a check for these applications.

Could you please see that we receive this check in the near future, so we can process the extension of time requests.

Yours very truly,

Debra P. Horrocks

Debra P. Horrocks

Remaining work: Pumping system \$15,000.00

Reason not completed:

The war in Viet Nam has caused cuts in our appropriations and we have
not been able to complete the work needed for full beneficial use.

Request is made for reinstatement and extension of time for filing proof
from February 28, 1968, to February 28, 1973.

Affiant understands he will be notified of a hearing date, at which time he
or his representative must attend, be able to defend data given; and
affiant upon oath states that the information given above is to the best of
his knowledge true and correct.

Gentlemen:

RE: APPROVED APPLICATION NO. 37065 (05-593)

Enclosed find Approved Application No. 37065 . This is your authority to proceed with actual construction work which, under Sections 73-3-10 and 73-3-12, Utah Code Annotated, 1953, as amended, must be diligently prosecuted to completion. The water shall be put to beneficial use and proof of appropriation made to the State Engineer on or before -----February 28, 1968-----otherwise the application will lapse.

Failure on your part to comply with the requirements of the statutes may result in forfeiture of this application.

Yours truly,

Hubert C. Lambert

APPLICATION TO APPROPRIATE WATER STATE OF UTAH

NOTE: The information given in the following blanks should be free from explanatory matter, but when necessary, a complete supplementary statement should be made on the following page under the heading "Explanatory."
For the purpose of acquiring the right to use a portion of the unappropriated water of the State of Utah, for uses indicated by (X) in the proper box or boxes, application is hereby made to the State Engineer, based upon the following showing of facts, submitted in accordance with the requirements of the Laws of Utah.

1. Irrigation ☒ Domestic ☒ Stockwatering ☐ Municipal ☐ Power ☐ Mining ☐ Other Uses ☐
2. The name of the applicant is United State of America, National Park Service
3. The Post Office address of the applicant is P.O. Box 728, Santa Fe, New Mexico 87501
4. The quantity of water to be appropriated is 0.334 second-feet or acre-feet
5. The water is to be used for Domestic from January 1 to December 31
(Major Purpose) (Month) (Day) (Month) (Day)
other use period Irrigation from April 1 to October 31
(Minor Purpose) (Month) (Day) (Month) (Day)
and stored each year (if stored) from to
(Month) (Day) (Month) (Day)
6. The drainage area to which the direct source of supply belongs is Colorado River
(Leave Blank)
7. The direct source of supply is Underground water
(Name of stream or other source)

which is tributary to , tributary to
*Note—Where water is to be diverted from a well, a tunnel, or drain, the source should be designated as "Underground Water" in the first space and the remaining spaces should be left blank. If the source is a stream, a spring, a spring area, or a drain, so indicate in the first space, giving its name, if named, and in the remaining spaces, designate the stream channels to which it is tributary, even though the water may sink, evaporate, or be diverted before reaching said channels. If water from a spring flows in a natural surface channel before being diverted, the direct source should be designated as a stream and not a spring.

8. The point of diversion from the source is in San Juan County, situated at a point N 78°12'W, 1347' from the S² corner of Section 25, T. 30 S., R. 19 E., SLB&M.

*Note—The point of diversion must be located definitely by course and distance or by giving the distances north or south, and east or west with reference to a United States land survey corner or United States mineral monument, if within a distance of six miles of either, or if at a greater distance, to some prominent and permanent natural object. No application will be received for filing in which the point of diversion is not defined definitely.

9. The diverting and carrying works will consist of 8" well 70'-80' in depth, cased throughout with 6" casing, 1500' of 2" pipe to a 25,000 gallon storage tank, then into a distribution system to supply a visitor center and 100 unit campground.

10. If water is to be stored, give capacity of reservoir in acre-feet height of dam
area inundated in acres legal subdivision of area inundated

11. If application is for irrigation purposes, the legal subdivisions of the area irrigated are as follows S² Section 25, T. 30 S., R. 19 E., SLB&M.

ACTUAL DIA. 6" DEPTH 22'
ST. ENG. ENDORSED 212-65-6-CT.
Under proposed road about 500 feet water.

Total Ten (10) Acres

12. Is the land owned by the applicant? Yes X No If "No," explain on page 2.
13. Is this water to be used supplementally with other water rights? Yes No X
If "yes," identify other water rights on page 2.
14. If application is for power purposes, describe type of plant, size and rated capacity.
15. If application is for mining, the water will be used in Mining District at the mine, where the following ores are mined
16. If application is for stockwatering purposes, number and kind of stock watered
17. If application is for domestic purposes, number of persons 50,000 visitors per year, or families
18. If application is for municipal purposes, name of municipality
19. If application is for other uses, include general description of proposed uses
20. Give place of use by legal subdivision of the United States Land Survey for all uses described in paragraphs 14 to 19, incl. S² Section 25, T. 30 S., R. 19 E., SLB&M.
21. The use of water as set forth in this application will consume 0.334 second-feet of water and 0.0 second feet will be returned to the natural stream or source at a point described as follows:

Page No. 2

EXPLANATORY

The following additional facts are set forth in order to define more clearly the full purpose of the proposed application:

This 8" well will be drilled to a depth of 70'-80' and cased with 6" pipe. The water will be distributed to a visitor center and 100 unit campground located in the Needles' District of Canyonlands National Park to serve 50,000 visitors per year.

NOTHING HEREIN CONSTITUTES A WAIVER OF ANY OTHER RIGHT WHICH MIGHT BE VESTED IN THE NAME OF THE UNITED STATES OF AMERICA.

(Use page 4 if additional explanatory is needed.)

The quantity of water sought to be appropriated is limited to that which can be beneficially used for the purpose herein described.

UNITED STATES OF AMERICA, National Park Service, Southwest Region

Memorandum

To: Denise Newberry, Water Resources Division, NPS
From: Superintendent, Southeast Utah Group
Subject: Water Rights Permit

It is our understanding that the water rights permit for the Squaw Springs Well #4 (Location N78 12' W, 1347 ft. from S 1/4 corner Sec. 25 T30S, R19E, SLB&M San Juan County) is to soon expire. It is our desire to protect, and retain full rights to this well. Please file an unlimited extension of this permit.

Should you have any further questions regarding this matter, please contact the Chief of Maintenance, Bill Cunningham (801) 259-7164 or Needles District Maintenance and Operations Foreman, Brian J. Coulter at (801) 259-6568.

Gail C. Menard
Acting Superintendent

cc: Res Mgmt, SEUG

Squaw Springs Well
(Needles Well No. 3)
Contract entitled "Unnumbered Account"
April - May 1965

Drilled by Lester Binning of Payson, Utah

Total Contract Price \$1,997

This well was drilled from April 30 to May 20, 1965. It is located in the SE $\frac{1}{4}$, SW $\frac{1}{4}$ of Sec. 25, T30S, R19E and is just a short distance south of Squaw Springs. It is on the other side of the fault from the spring, and the pump testing of the well had no apparent effect on the spring flow. It is 6 inches in diameter, 77 feet deep, cased to the bottom, and yielded 13 GPM with 28' of drawdown after 24 hours of pumping. Static water level was 26' and the water temperature was 59°.

The original state application for this well was No. 37063 but later on, due to a mix-up, application No. 37065 (05-593) was applied to this well by the State. As stated in the Superintendent's memorandum of June 28, 1968, this latter one is the one the State wishes us to use henceforth.
