

WATER-RIGHT DOCKET

Glacier National Park

Docket No: 6

CLEVELAND CREEK. WATERTON RANGER STATION WATER SYSTEM

Preliminary Docket Information

00-00-0000: water right: docket number 6

Docket No. 6

WATER RIGHT

Glacier National Park

County: Glacier

Permit No.: Recorded with the county book 81, pages 43-52, according to note on map, but no record of filing in the docket.

Date the right originated: The water system was constructed in 1942

Purpose:

Location of the diversion:

Source of water: Cleveland Creek (?)

Quantity claimed:

Summary of Status: Federal water right consisting of a concrete dam diversion, pipeline and distribution system. The water system was constructed also in 1942

WATER RIGHT RECORD

Park: GLAC

Docket Number:
Fed. #6

IDENTIFICATION NO: GLAC R A F 0 6

DITCH/WATER SYSTEM: Waterton Ranger Station

SOURCE OF SUPPLY: Cleveland Creek

LOCATION:

WATER RIGHT:

Appropriator: United States of America, National Park Service

Application/Permit Number:

Certificate Record Number:

Date of Priority:

Quantity of Water:

Purpose:

Irrigated Land Description:

SUMMARY OF STATUS: This is a Federal water right consisting of a concrete dam diversion, pipeline and distribution system. The water system was constructed in 1942.

Memorandum

To: Regional Director, Region Two

From: Chief, Water Resources Section

Subject: Waterton Ranger Station Water System, Drawing 5363-A,
Docket 6, Glacier

Folders for the subject docket are being distributed with this memorandum. We have filed the print which Mr. Mott forwarded with memorandum of March 30.

I am not sure that the land has been subdivided in this area. If not, a tie from old and proposed new points of diversion to both of Waterton Creek, and theoretical projection of section lines for description in a county filing would suffice. An actual section corner tie would be preferred. Angular ties to monuments on each side of the lake at the Canadian border would also be desirable if they are visible from some points in the area. The drawing might show these details as an insert, but no map will be needed with the county filing. All ties can be quite approximate in this case.

Because of the international nature of Waterton Lake, I believe that the filing should give both old and new points of diversion when it is made. It should also give the date of first development and water use at the area, and indicate that the new system is an enlargement or replacement, as the case may be.

MAR 30 1959

Memorandum

To: Director
From: Hydraulic Engineer, Region Two
Subject: Water Rights, Drawing NP-GLA-5363-A, Waterton Ranger Station, Glacier National Park

Attached is a copy of March 18, 1959 memorandum with subject drawing from Mr. Stanley C. Joseph, acting Superintendent of Glacier National Park.

The drawing represents the present water system installation at Waterton Ranger Station. We are placing one copy of subject drawing in a Temporary Water Right Assembly.

The reconstruction of the water system included in the 1961 construction program will not change the point of diversion, but the final system alignment to be supplied later by the Superintendent should be included with the filing of the water right with the State Engineer.

Signed

William A. Mott
Hydraulic Engineer

Memorandum

To: Regional Director, Region Two
Acting
From: /Superintendent, Glacier National Park
Subject: Water Rights, Waterton Ranger Station

Attached are duplicate prints of Drawing No. NP-GIA-5363-A which show the results of water right surveys in the Waterton Ranger Station area. These prints show the existing diversion and pipeline serving the ranger station and outbuildings.

The water system was constructed in 1942. The main pipeline is composed of 4-inch woodstave and 4-inch galvanized steel pipe, with 2-inch galvanized steel service and drain lines.

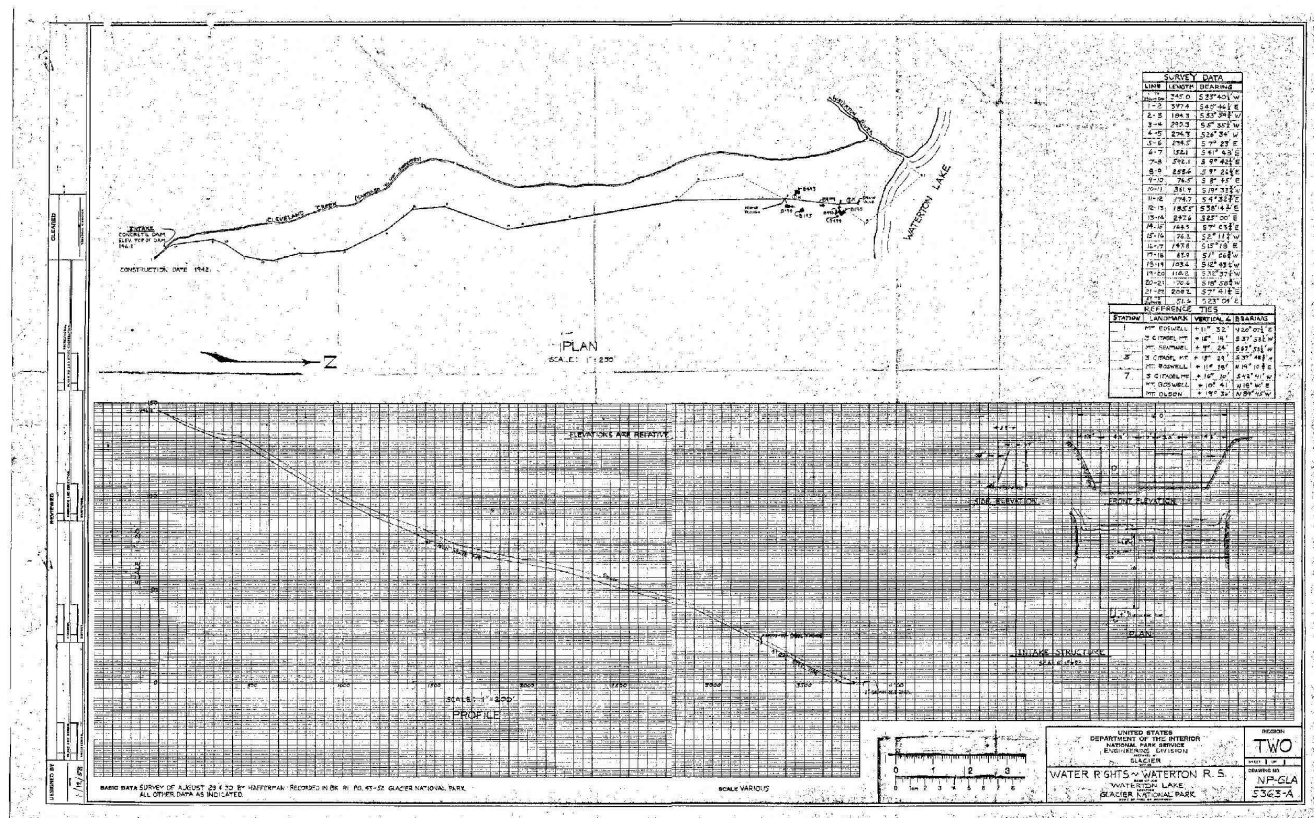

The 1961 MISSION 66 Construction Program calls for reconstruction of the entire system, except the diversion. As soon as the reconstructed line is established, we will amend this drawing and forward revised copies to you.
