Memorandum

To: Superintendent, Grand Teton National Park

From: Acting Assistant Regional Director

Subject: Proposed Enlargement of Hot Springs Ditch, Grand Teton National Park

Attached is a copy of Mr. Allen's December 4 memorandum concerning plans to establish water rights in connection with proposed irrigation of the SW $\frac{1}{4}$ of Section 33, T. 43 N., R. 115 W. by the Fish and Wildlife Service. Also attached are the original of the water right application in draft form, an autostat copy of the portion of the application that contains information beyond the standard printing of the form, and two advance prints of the map to accompany the application.

Please check with Mr. Nelson on whether he has already filed application. If he has not, you will want to obtain his answers to Mr. Dunn's questions which include (1) approximate locations and estimate of costs of turnout gates (2) any corrections that may be necessary in answers to questions 11 and 13 of the application.

Also please check on whether J. H. May and the United States are the only parties having interest in the Hot Springs Ditch. Then you should obtain Mr. May's assurance, and that of others owning interest, if any, that they will sign the consent without financial consideration.

You will note that data for a cross section of the J. H. May Enlargement between the center and north quarter-corner of Section 4 is needed. Apparently this does not have to be very exact so we presume you can, in spite of winter conditions, supply the approximate width and depth at a point which you should locate and show on the map.

The original of the drafted application should be returned, after review with Mr. Nelson, with any corrections that seem in order. One print of the map should be returned after the locations of the turnout gates and of the cross section have been shown.
