Memorandum

To: Regional Director, Region Three  
From: Chief, Water Resources Section  
Subject: Docket 18, Newbold Ditch, Grand Teton National Park

We are resuming work on the long suspended project of converting temporary water right assemblies, on file in our various offices, into permanent dockets. The last one to be so converted was for Hot Springs Ditch (Docket 17 - see memo dated August 30, 1955).

Attached is a docket folder No. 18 for Newbold Ditch (also called Newbold Canal) with index, dividers and Part V-A-1, in which the contents of temporary assembly "D" should be placed. Assembly "D" contains the certificate and map for the Newbold Ditch right, and those for a group of independent ditches, and improperly defined ditch extensions, which are listed below, for which the "means of conveyance and point of diversion (have been) transferred to Newbold Ditch". The above quote appears on each certificate. They are as follows:

Midland Ditch (and Enlargements)  
Sebastian Ditch (and Enlargements)  
Mesa Ditch (and Enlargements)  
Enlargement of Ideal Ditch

Part V-A contains those enlargements of the Ideal Ditch rights which were transferred to Newbold Ditch. Other Ideal Ditch rights were transferred to the Hot Springs Ditch and appear in Docket 17, as illustrated on Part V-A-1 sketch, entitled "Lands Originally Irrigated Under the Ideal Ditch). Its supporting map is also attached.

For Mr. Mott's information, each of the permanent dockets is being assembled to contain all rights which are appurtenant to one ditch system. The applications and certificates designate many implied independent ditches which are actually only laterals of others. Other rights, such as those originally appurtenant to the Ideal Ditch, were subsequently amended to authorize diversion and conveyance through one or more adjacent ditches, and the original ditch was abandoned, or restricted as to further use. The present docket grouping is the result of 1953 field studies, and can only be properly completed by those who made the field studies.

At the time of the study, some rights in many ditches were appurtenant to private land which has subsequently been acquired by the United States. Although there are no such alien interests in the Newbold Ditch, it should be explained that the private interests as of 1953 will appear as alien sections of the proper dockets. The transfer of such rights can be quickly made by subsequent review of the land deed files.

Other such docket conversions will follow as time permits. Should any records be missing from the field folders we will supply copies upon your advice.

# LANDS ORIGINALLY IRRIGATED UNDER THE IDEAL DITCH

AND THEIR PRESENT STATUS  
(ALL FEDERALLY OWNED)

See Certificates 30-444, 30-457 & 41-433 of permits 3833, 1107E & 2824½E. This acreage, according to the State Engineer's records, is still irrigated by the Ideal Ditch, but there presently is no headgate for such a ditch, and existing parts of the original ditch are inter-connected with the Hot Springs Ditch. Apparently these rights are being exercised through the latter's headgate.
