APPLICATION NO. 5864

PERMIT NO. 3713

CERTIFICATE NO.

TITLE OF DOCKET LODI SPRING PIPE LINE

PRIORITY 7/6/43

REMARKS:

CERTIFICATE RECORD No. 21, PAGE No. 10271

STATE OF WASHINGTON, COUNTY OF Pierce

CERTIFICATE OF SURFACE WATER RIGHT

(In accordance with the provisions of Chapter 117, Laws of Washington for 1917, and amendments thereto, and the rules and regulations of the Department of Water Resources thereunder.)

This is to certify that UNITED STATES DEPARTMENT OF THE INTERIOR, NATIONAL PARK SERVICE
of Longmire, State of Washington, has made
proof to the satisfaction of the Department of Water Resources of Washington, of a right to the use
of the waters of unnamed spring (Lodi Spring)
/and/or Lodi Creek, a tributary of West Fork White River,
with point or points of diversion within the SE $\frac{1}{4}$ SE $\frac{1}{4}$
unsurveyed
Sec. 29/, Twp. 17 N., R. 9 E., W. M., under and subject to provisions contained in
appropriation Permit No. 3713 issued by the Department of Water Resources, and
that said right to the use of said waters has been perfected in accordance with the laws of Washington,
and is hereby confirmed by the Department of Water Resources of Washington and entered of
record in Volume 21, at Page 10271, on the 3rd day of April, 1968
that the priority date of the right hereby confirmed is July 6, 1943; that the
amount of water under the right hereby confirmed, for the following purposes is limited to an amount
actually beneficially used and shall not exceed 0.89 cubic foot per second from June through
October each year for community domestic supply for public park, including commercial
food and hotel services; and fire protection, as needed.

A description of the lands under such right to which the water right is appurtenant, and the
place where such water is put to beneficial use, is as follows:

NE $\frac{1}{4}$ SE $\frac{1}{4}$ and SE $\frac{1}{4}$ NE $\frac{1}{4}$ Sec. 33 (unsurveyed) and Secs. 34 and 35 (unsurveyed),
T. 17 N., R. 9 E.W.M., within Mount Rainier National Park

The right to the use of the water aforesaid hereby confirmed is restricted to the lands or place of use herein described, except as provided in Sections 6 and 7, Chapter 122, Laws of 1929.

This certificate of surface water right is specifically subject to relinquishment for nonuse of water as provided in Section 18, Chapter 233, Laws of 1967.

WITNESS the seal and signature of the Assistant Director, Division of Water Management,
Department of Water Resources affixed this 3rd day of April, 1968.

Proof of Appropriation of Water

- #4
- Application No. 5864 Permit No. 3713
1. Name of Permittee Dept. of the Interior, National Park Service, Mount Rainier NP
 2. Postoffice address Longmire, Washington 98397
 3. Source of appropriation Lodi Spring
 4. Name or number of works (if any) Lodi Springs pipeline
 5. For what purpose or purposes is water used? Domestic 10%, recreational 70%, industrial 20% and fire protection as needed.
 6. Give date of beginning of construction June 16, 1931
 7. Give date of completion of construction work, including water distribution system
September 4, 1934
 8. Give date when water was completely applied to proposed use July 1960
 9. If used for irrigation:
Give number of acres described in permit _____
Give number of acres actually irrigated _____
 10. If used for power: HP actually developed _____
 11. LEGAL DESCRIPTION OF PROPERTY ON WHICH WATER IS USED:

Throughout approximate Sec. 34 and 35 (unsurveyed), T. 17 N., R. 10 E., W.M.
within the boundary of Mount Rainier National Park

12. During what months is water used? June through October
13. Does map filed with your application show correctly the location of well or point of diversion for withdrawal of water, and area of land where water is used? Yes
14. If the dimensions, location or type of structure do not correspond to those described in your permit, state what changes have been made, giving dimensions, etc. _____
15. Actual measured discharge or diversion of permanent system: 400 (gpm or cfs)
(0.89 cfs)

(Sign certification on reverse side)

STATE OF WASHINGTON
DEPARTMENT OF CONSERVATION AND DEVELOPMENT
Division of Hydraulics

Permit to appropriate Public Waters of the State of Washington

Book No. 15 of Permits, on Page 3713 Under Application No. 5864

United States of America, Department of the Interior, National Park Service
by John C. Preston, Superintendent of Mount Rainier National Park
of Longvire, Washington

is hereby granted a permit to appropriate the following described public waters of the State of Washington, subject to existing rights and to the following limitations and provisions: Permittee shall construct and maintain at his own expense a weir, or other suitable device, for measuring any water granted herein for irrigation purposes and such appropriation shall be subject to a reasonable rotation system if ordered by the State Supervisor of Hydraulics; and it is further provided that Permittee, in the use of water under this permit, shall comply with all the laws of the Departments of Fisheries and Game in accordance with Chap. 127, Laws of 1939, and all regulations and laws hereafter enacted.

Priority date of this permit is July 6, 1943

Source of the proposed appropriation is Lodi Spring,
tributary of West Fork of White River

The quantity of water appropriated shall be limited to the amount which can be beneficially applied and not to exceed 1.0 cubic feet per second, or its equivalent in case of rotation, to be used as set out below:

The approximate point of diversion is located N 81° 46' W 38,081 feet from Post No. 60
of the original boundary of Mount Rainier National Park as established by
the General Land Office Survey of 1909, and defined as SE corner of Sec. 31,
Twp. 17 N., Rge. 10 E.W.M.
being within approximate SE 1/4 of SE 1/4 Sec. 29, Twp. 17 N., Rge. 9 E. W. M.,
(Unsurveyed)
county of Pierce

The use, or uses, to which water is to be applied:

FOR DOMESTIC SUPPLY AND MISCELLANEOUS USES: 1.0 cubic feet per second during entire year for Domestic, recreational, industrial and fire protection purposes to be used most of approximate Secs. 34, 35, 36, Twp. 17 N., Rge. 9 E.W.M. and within W 1/2 Sec. 31, Twp. 17 N., Rge. 10 E. W. M. (unsurveyed)

FOR IRRIGATION: _____ cubic feet per second, from _____ to _____
each year, for irrigation of _____ acres, described as follows:

FOR POWER: _____ cubic feet per second continuously each year. Total power to be developed _____ theoretical horse power. Total fall to be utilized _____ feet.
 Nature of works by means of which power is to be developed _____

Works to be located in _____ Sec. _____, Twp. _____ N., Rge. _____ W. M.

Water to be returned to _____

Point of return _____ Sec. _____, Twp. _____ N., Rge. _____ W. M.

Use to which power is to be applied _____

FOR MUNICIPAL SUPPLY: _____ cubic feet per second during entire year to supply _____

DESCRIPTION OF DIVERSION WORKS

Height of dam 4 ft.; Length on top 20 ft.; Length on bottom 15 ft.

Material to be used and character of construction _____

Concrete with wasteway over dam

Description of headgate 6" steel pipe from dam to adjacent pump site. 1 - 100 gpm. reciprocating pump with 40 H.P. Electric motor and 1 - 300 gpm, 4-stage centrifugal pump with 125 H.P. Electric motor now installed. Other units to be installed as needed.

CANAL SYSTEM

AT HEADGATE: Width on top (at water line) _____ ft.; Width on bottom _____ ft.;

Depth of water _____ ft.; Grade _____ ft. fall per one thousand feet.

AT _____ MILES FROM HEADGATE: Width on top (at water line) _____ ft.; Width on

bottom _____ ft.; Depth of water _____ ft.; Grade _____ feet per one thousand feet.

The pump line is of steel, 6" diameter, length approximately 5200 feet with pump lift of 856 feet, terminating at Frozen Lake which has been improved as reservoir.

(Please read carefully provisions below)

Construction work shall begin on or before Already started

and shall thereafter be prosecuted with reasonable diligence and completed on or before _____

October 1, 1960

and complete application of water to proposed uses shall be made on or before _____

October 1, 1961

Given under my hand and the seal of this office at Olympia, Washington, this 23rd day of

October, 1943

/s/ Chas. J. Bartholet.

State Supervisor of Hydraulics.

INSTRUCTIONS

This permit is not a final water right but a license to proceed with construction and use the water, under the provisions of the permit, pending the time that the final certificate of water right is issued.

Actual construction work must be commenced, the project must be completed, and water put to beneficial use within the time fixed by the permit. The times for commencement and completion will be found on the second page of this permit.

Accompanying this permit is a blank for making report of beginning of construction and thereafter blanks, as listed on the back of the permit, will be furnished you and must be filled out and filed in this office as the work progresses. *Failure to file the required notices or to comply with the provisions for protection of fish life may result in cancellation of the permit.*

Should it be impossible for you to begin or to complete the work before the expiration of the time fixed in the permit, you should make application to the Supervisor of Hydraulics for an extension of time, stating reasons why such an extension is needed.

Any assignment of this permit must be in writing and must be recorded in this office in order to be valid. There is a statutory fee of \$2.00 for recording assignments.

This permit is issued subject to vested rights and all beneficial uses made of the water prior to the date of filing of the application for this permit, and it should be understood that the diversion must be so regulated that it will not injuriously affect such prior rights.

When all of the water has been put to the beneficial use or uses set out in the permit and all notices filed "Certificate of Water Right" will be issued. *Such certificate gives final title to the water granted.*

CHAS. J. BARTHOLET,
State Supervisor of Hydraulics.

Before your certificate of water right is issued it will be necessary to file with the State Supervisor of Hydraulics each of the following reports:

1. Notice of Beginning of Construction.
2. Notice of Completion of Construction.
3. Notice of Complete Application of Water to a Beneficial Use.
4. Proof of Appropriation of Water.

Upon a satisfactory showing that the appropriation has been perfected as provided by statute the State Supervisor of Hydraulics will issue a water right certificate.

(Blanks will be furnished by the office of the Supervisor of Hydraulics)

No.

STATE OF WASHINGTON }
COUNTY OF PIERCE } ss.

NOTICE OF WATER RIGHT APPLICATIONS NOS. 5864, 5865, 5866, 5867, 5875 AND 5876.

State of Washington, Office of Supervisor of Hydraulics, Olympia

TO WHOM IT MAY CONCERN:

Notice is hereby given that the United States of America, Department of the Interior, National Park Service, by John C. Preston, Superintendent of Mount Rainier National Park at Longmire, Washington has filed, under date of July 6, 1943, applications for permits to appropriate and store, subject to existing rights, public waters in Pierce County for domestic supply, recreational, industrial use and fire protection, as follows:

Application No. 5864 for appropriation of 1.0 second-foot from Lodi Spring, tributary of West Fork of White River, the point of diversion to be within the approximate SE $\frac{1}{4}$ of SE $\frac{1}{4}$ of Sec. 23, Twp. 17 N., Rge. 9 E. W. M. (unsurveyed);

Application No. 5865 for appropriation of 0.05 second-foot of water from unnamed springs, tributary to Tipsoo Lake and Ohanapecosh River, the point of diversion to be within the approximate NE $\frac{1}{4}$ of NE $\frac{1}{4}$ of Sec. 23, Twp. 16 N., Rge. 10 E. W. M. (unsurveyed);

Application No. 5866 for appropriation of 0.25 second-foot of water from Frozen Lake, to be diverted within the approximate NE $\frac{1}{4}$ of Sec. 33, Twp. 17 N., Rge. 10 E. W. M. (unsurveyed);

Application No. 5867 to construct a reservoir and store for beneficial use 64 acre-feet of water in Frozen Lake reservoir, the impounding dam to be located within the approximate NE $\frac{1}{4}$ of NE $\frac{1}{4}$ of Sec. 33, Twp. 17 N., Rge. 9 E. W. M. (unsurveyed);

Application No. 5875 for appropriation of 0.03 second-foot of the waters of Shadow Lake Outlet, a tributary of White River, the point of diversion to be within the approximate SW $\frac{1}{4}$ of Sec. 2, Twp. 16 N., Rge. 9 E. W. M. (unsurveyed); and

Application No. 5876 for appropriation of 0.2 second-foot of the waters of Killekat Creek, tributary to the White River, the point of diversion to be within the approximate SW $\frac{1}{4}$ of SW $\frac{1}{4}$ of Sec. 3, Twp. 16 N., Rge. 10 E. W. M. (unsurveyed).

Maps showing the locations and plans of said diversions, storage and places of proposed use are on file in the office of the state Supervisor of Hydraulics, Olympia, Washington, together with such other information as is required by law.

Any person, firm or corporation whose right will be injuriously affected by said applications may file with the State Supervisor of Hydraulics, at Olympia, Washington, such objections or representations, in writing, as he may desire to make, within thirty (30) days after date of last publication, which date is August 17, 1943.

Witness my hand and official seal this 27th day of July, 1943.

STATE OF WASHINGTON
DEPARTMENT OF CONSERVATION AND DEVELOPMENT
Division of Hydraulics

APPLICATION FOR A PERMIT
To Appropriate Public Waters of the State of Washington
(Read directions on last page carefully before filling out this form)

Application No. **5864**

United States of America, Department of the Interior, National Park Service,
I, **by John C. Preston, Superintendent of Mount Rainier National Park,**

of **Longview** (Postoffice), County of **Pierce**,
State of **Washington**, do hereby make application for a permit to appropriate

the following described public waters of the State of Washington subject to existing rights:

If the applicant is a corporation, give date and place of incorporation. **---**

1. The source of the proposed appropriation is **Lodi Spring**
(Name of stream)
tributary of **West Fork of White River**
2. The amount of water which the applicant intends to apply to beneficial use is **1.00**
cubic feet per second.
3. The use to which the water is to be applied is **domestic, recreational, industrial and fire**
(Irrigation, power, mining, manufacturing, domestic supplies, etc.)
protection at the Yakima Park Area of Mount Rainier National Park.
4. Time during which water will be required each year **March to October inclusive.**
5. The approximate point of diversion is located **N 81° 46' W 38,061 feet from Post No. 60 of**
(Give distance and bearing to section corner)
the original boundary of Mount Rainier National Park as established by the General Land
Office Survey of 1909, and defined as SE corner Sec. 31, T. 17 N., R. 10 E. W.M.,
being within the **unsurveyed SE 1/4 SE 1/4** of Sec. **29**, Tp. **17** N., R. **9 E** W. M.,
(Give smallest legal subdivision) (E. or W.)
in the county of **Pierce.**
6. The **main pipe line** to be **5200** ft. or miles in length, terminating
(Main ditch, canal, or pipe line)
in the **unsurveyed NE 1/4 SE 1/4** of Sec. **33**, Tp. **17** N., R. **9 E** W. M.,
(Smallest legal subdivision) (E. or W.)
the proposed location being shown on the accompanying map.
7. The name of the ditch, canal or other works is **Lodi Spring Pipe Line**

8. Estimated cost of development necessary to utilize fully the appropriation herein asked for
\$ **35,000.00.**

9. Does the stream from which you wish to appropriate water flow through the tract of land on
which the water is to be used? **No.**

10. Do you own the required right-of-way for the proposed works? **Yes.**

DESCRIPTION OF WORKS

DIVERSION WORKS—

11. (a) Height of diversion dam **4** feet; length on top **20** feet;
length at bottom **15** feet; material to be used and character of construction
Concrete with wasteway over dam.

(Loose rock, concrete, masonry, rock and brush, timber crib, etc., wasteway over or around dam)

(b) Description of headgate **6" steel pipe from dam to adjacent pump site. 1 - 100 gpm**
reciprocating pump with 40 HP electric motor and 300 gpm 4-stage centrifugal pump with
125 HP electric motor now installed. Other units to be installed as needed.

When storage works are contemplated a storage permit must be filed in addition to the above. These forms can be secured, together with instructions, by addressing the State Supervisor of Hydraulics, Olympia, Washington.

CANAL SYSTEM—

12. (a) Give approximate dimensions at each point of canal where materially changed in size, stating miles from headgate. At headgate: Width on top (at water line) _____ feet; width on bottom _____ feet; depth of water _____ feet; grade _____ feet fall per one thousand feet.

(b) At _____ miles from headgate: Width on top (at water line) _____ feet; width on bottom _____ feet; depth of water _____ feet; grade _____ feet fall per one thousand feet.

The pump line is of steel, 6" diameter, length approximately 5200 feet with pump lift of 856 feet, terminating at frozen lake which has been improved as reservoir.

SUPPLY THE FOLLOWING INFORMATION ACCORDING TO USE PROPOSED:

IRRIGATION—

13. The land to be irrigated has a total area of _____ acres, described as follows: _____
(Give legal subdivision by section, township and range)

(If more space is required, attach separate sheet)

14. Give the legal description of land when water is to be used for purposes other than irrigation, power and municipal supply. **most of Secs. 34, 35, 36, Tp. 17 N., R. 9 E. W.M.;**
_____ Sec. _____, Tp. _____ N., Rge. _____ W. M.
(Legal subdivisions) (E. or W.)

(a) To what stream is water returned **east main or middle fork of White River**

(b) Locate the point of return **from near / center** Sec. _____, Tp. _____ N., Rge. _____ W. M.
by seepage from sewage disposal plant.
(Smallest legal subdivision) (E. or W.)

POWER—

15. (a) Total amount of power to be developed _____ H. P.
(Theoretical horsepower)

(b) Total fall to be utilized _____ feet.
(Head)

(c) The nature of the works by means of which the power is to be developed _____

(d) Such works to be located in _____ of Sec. _____,
Tp. _____ N., Rge. _____ W. M.
(Legal subdivision) (E. or W.)

(e) To what stream is the water to be returned _____

(f) Locate point of return _____ Sec. _____,
Tp. _____ N., Rge. _____ W. M.
(E. or W.)

(g) The use to which power is to be applied is _____

MUNICIPAL SUPPLY—

16. To supply the city of _____
(Name)
 _____ County, having a present population of _____
 and an estimated population of _____ in 19 _____

(a) Estimated present requirement 0.25 sec. ft.

(b) Estimated future requirement 1.10 sec. ft. to be supplied in part from
Frozen Lake.

17. Construction work ~~will begin~~ ^{was begun} on or before June 16, 1931.

18. Construction work will be completed on or before 1960 when full pump capacity is needed.

Duplicate maps of the proposed ditch or other works, prepared in accordance with the rules of the State Supervisor of Hydraulics, accompany this application.

United States of America
(Name of applicant)

by /s/ John C. Preston

Superintendent of Mount Rainier National Park.

Signed in the presence of us as witnesses:

(1) /s/ O. W. Carlson, Longmire, Wash.
(Name) (Address of witness)

(2) /s/ L. A. Boyer, Longmire, Wash.
(Name) (Address of witness)

Remarks: This diversion supplements the original Yakima Park Water Supply from
Frozen Lake, for which a separate application is filed.

This water is delivered to Frozen Lake where all or any part may be
stored until needed. There are 64 acre feet of live storage in Frozen Lake as covered
by accompanying application.

STATE OF WASHINGTON, }
 COUNTY OF THURSTON. } ss.

This is to certify that I have examined the foregoing application together with the accompanying maps and data, and return the same for correction or completion, as follows: _____

In order to retain its priority, this application must be returned to the State Supervisor of Hydraulics, with corrections, on or before _____, 19 _____

WITNESS my hand this _____ day of _____, 19 _____

 State Supervisor of Hydraulics.

DIRECTIONS FOR PREPARING APPLICATIONS

Initial examination fee of \$5.00 should accompany each application. If additional fee is required, you will be notified.

1. Write plainly in ink or use typewriter.
2. Read carefully all questions. Answer only those that apply to your project.
3. Under Question 2 estimate quantity in cubic feet per second or gallons per minute.
 - 1 cubic foot per second equals 450 gallons per minute and is sufficient to irrigate from 40 to 100 acres of land.
 - 0.1 of a cubic foot per second equals 45 gallons per minute and is sufficient for domestic supply and irrigation of 5 to 10 acres of land.
 - 0.05 of a cubic foot per second equals 22 gallons per minute or 31,700 gallons per day. This is ample for a domestic supply and for irrigation of lawn and garden up to 1 or 2 acres.
 - 0.01 of a cubic foot per second equals 4.5 gallons per minute or 6,500 gallons per day. This is ample for an ordinary domestic supply and for irrigation of about $\frac{1}{2}$ acre.
4. Maps, showing the location of the stream, point of diversion and place of use, must be made in duplicate on the enclosed section plats. If for irrigation, show the approximate area to be irrigated.
5. In answering Question 5 give approximate distance and direction of diversion point from nearest 40-acre corner, as
 - "320 feet North and 1100 feet East from South quarter corner of Section 1, Township 13 North, Range 2 East, W. M."
- or
 - "North 36 degrees 20 minutes East 550 feet from the Northeast Corner of the Northwest Quarter of the Southwest Quarter of Section 33, Township 12 North, Range 3 East, W. M."
6. **Right-of-Way.** If you wish to divert water from or across land not owned by you it will be necessary to secure from the owner the right-of-way needed. The State cannot help you in this.
7. Be sure to give on the map brief directions for driving to the point of diversion from some town or easily located point on a State highway. This for our convenience in making the examination.
8. If you have been using water since before June 15, 1917, a State permit will be of no advantage to you for that particular use.
9. "Public waters" only are subject to appropriation. If a stream does not flow beyond the borders of the landholding on which it rises or into any other body of water it will not be considered public water in the meaning of the statute.
10. Sign application on the line indicated under Section 18.

SCHEDULE OF FEES DUE IN CONNECTION WITH OBTAINING WATER RIGHTS (Sec. 44 of Water Code—Sec. 7399, Remington's Rev. Stat.)

EXAMINATION FEES

There is a minimum fee of \$5.00 for all applications received.

Additional Examination Fees for Appropriation Applications:

\$1.00 per c. f. s. over 5 c. f. s. to 500 c. f. s., inclusive.
 .25 per c. f. s. over 500 c. f. s. to 2000 c. f. s., inclusive.
 .10 per c. f. s. over 2000 c. f. s.

Additional Examination Fees for Reservoir Applications:

1/2¢ per acre-foot over 1000 a. f. up to 100,000 a. f., inclusive.
 1/10¢ per acre-foot over 100,000 acre-feet.

FEES FOR FILING AND RECORDING PERMITS

There is a minimum fee of \$2.00 for filing and recording permit.

Additional Permit Fee for Irrigation Purposes:

10¢ per acre over 20 acres to 100 acres, inclusive.
 5¢ per acre over 100 acres to 1000 acres, inclusive.
 2½¢ per acre over 1000 acres.

Additional Permit Fee for Power Purposes:

10¢ per theoretical horsepower over 20 H. P. to 1000 H. P., inclusive.
 2¢ per theoretical horsepower over 1000 H. P.

Permit Fee for Other Uses:

For all other beneficial purposes the fee is twice the amount of the examination fee, except for individual household and domestic use; this may include water for the irrigation of a family garden, for which the minimum fee of \$2.00 is charged.

FILING AND RECORDING FINAL WATER RIGHT CERTIFICATE

In office of Supervisor of Hydraulics \$1.40
 In office of County Auditor..... .75

TABULATION OF DATA FOR STUDY OF WATER RIGHTS

CONDITIONS

COVENANT AGAINST CONTINGENT FEES.—The Contractor warrants that no person or selling agency has been employed or retained to solicit or secure this contract upon an agreement or understanding for a commission, percentage, brokerage, or contingent fee, excepting bona fide employees or bona fide established commercial or selling agencies maintained by the Contractor for the purpose of securing business. For breach or violation of this warranty the Government shall have the right to annul this contract without liability or in its discretion to deduct from the contract price or consideration the full amount of such commission, percentage, brokerage, or contingent fee.

OFFICIALS NOT TO BENEFIT.—No member of or delegate to Congress, or resident commissioner, shall be admitted any share or part of this contract, or to any benefit that may arise therefrom; but this provision shall not be construed to extend to this contract if made with a corporation for its general benefit.

CONVICT LABOR.—In connection with the performance of work under this contract, the Contractor agrees not to employ any person undergoing sentence of imprisonment at hard labor.

BUY-AMERICAN ACT.—The Contractor agrees that there will be delivered under this contract only such unmanufactured articles, materials and supplies, hereinafter referred to in this clause as "supplies", as have been mined or produced in the United States and only such manufactured supplies as have been manufactured in the United States substantially all from supplies mined, produced, or manufactured in the United States. Provided, however, that the exemptions and exceptions from the foregoing, established by or under the "Buy-American Act" (41 U.S. Code 10 a-d), shall apply.

DISCOUNTS.—In connection with any discount offered, time will be computed from date of delivery of the supplies to carrier when delivery and acceptance are at point of origin, or from date of delivery at destination or port of embarkation when delivery and acceptance are at either of those points, or from date correct invoice or voucher is received in the office specified by the Government if the latter date is later than the date of delivery.

INSPECTION.—Except as may be otherwise provided in this contract, final inspection and acceptance will be made at destination. Supplies rejected at destination for nonconformance with specifications shall be removed by the Contractor at his expense promptly after notice of rejection.

WORK HOURS ACT OF 1962.—"This contract, to the extent that it is of a character specified in the Work Hours Act of 1962 (Public Law 87-581, 76 Stat. 357-360) and is not covered by the Walsh-Healey Public Contracts Act (41 U.S.C. 35-45), is subject to the following provisions and to all other provisions and exceptions of said Work Hours Act of 1962.

"(a) No contractor or subcontractor contracting for any part of the contract work shall require or permit any laborer or mechanic to be employed on such work in excess of eight hours in any calendar day or in excess of forty hours in any workweek unless such laborer or mechanic received compensation at a rate not less than one and one-half times his basic rate of pay for all hours worked in excess of eight hours in any calendar day or in excess of forty hours in such workweek, whichever is the greater number of overtime hours.

"(b) In the event of any violation of the provisions of paragraph (a), the contractor and any subcontractor responsible for such violation shall be liable to any affected employee for his unpaid wages. In addition, such contractor or subcontractor shall be liable to the United States for liquidated damages. Such liquidated damages shall be computed, with respect to each individual laborer or mechanic employed in violation of the provisions of paragraph (a), in the sum of \$10 for each calendar day on which such employee was required or permitted to work in excess of eight hours or in excess of forty hours in a workweek without payment of the required overtime wages.

"(c) The Contracting Officer may withhold, or cause to be withheld, from any moneys payable on account of work performed by the contractor or subcontractor, the full amount of wages required by this contract and such sums as may administratively be determined to be necessary to satisfy any liabilities of such contractor or subcontractor for liquidated damages as provided in paragraph (b)."

FEDERAL, STATE AND LOCAL TAXES.—Except as may be otherwise provided in this contract, the contract price includes all applicable Federal taxes in effect on the date of this contract but does not include any State or local sales, use, or other tax directly applicable to the completed supplies or services covered by this contract nor any other tax from which the Contractor or this transaction is exempt. Upon request of the Contractor, the Government shall furnish a tax exemption certificate or similar evidence of exemption with respect to any such tax not included in the contract price pursuant to this clause. For the purpose of this clause, the term "date of this contract" means the date of the contractor's quotation or, if no quotation, the date of this purchase order.

VENDOR'S BILLING INSTRUCTIONS

Vendor's invoices shall be submitted in the ORIGINAL only and shall contain the following information: Contract or proposal number (if any), order number, and item numbers, description of supplies or services, sizes, quantities, unit prices and extended totals. Bill of Lading number and weight of shipment will be shown for shipments made on Government bills of lading. If prepaid parcel post charges are billed, the gross weight and shipping point must be shown.

Gentlemen:

Receipt is acknowledged of your warrant in the amount of \$35.00 which covers the certificate recording fees in this office. However, before we can issue the certificate of water right, we will need the fees which cover the recording of the final certificate of water right in the Lewis County and Pierce County Auditor's Office. This is in accordance with our letter dated January 25, 1968.

Please forward your warrants directly to this office.

Very truly yours,

Re: Surface Water Permit No. 3713 - Lodi Springs pipeline

Gentlemen:

Receipt is acknowledged of the proof of appropriation form in connection with processing the above referenced permit. All that remains now is to collect the statutory filing and recording fees from your office. We would therefore appreciate it if you would forward your warrants to this office. Please make one warrant for \$5 made payable to the Department of Water Resources, and one warrant for \$2 made payable to the Pierce County Auditor.

Very truly yours,

Re: Surface Water Permit No. 3713

In checking over your permit we find that you have not submitted
Notice of Completion of Construction.

If the work has been completed on this project, kindly fill out the enclosed form. If it has not, you should request an extension of time for which there is a statutory fee of \$ 5.00. Please state why such extension is necessary and make check payable to the Department of Water Resources.

If we do not hear from you within sixty (60) days from date, we shall assume that you are no longer interested in retaining the permit and shall cancel it without further notice.

Very truly yours,

Gentlemen:

Re: Your No.L54 SSCLW
Surface Water Permits No.'s 3709,
3713, 3714, 3716, 3717 and 3813.

Receipt is acknowledged of your letter dated January 10, 1967 along with a purchase order in the amount of \$30 to cover the statutory fees for filing extensions under the above-numbered permits. In accordance with your request you will find enclosed our invoice for these charges.

It is pointed out, however, that we not be able to grant five-year extensions of time under each of the permits for the total amount of \$30. In accordance with statutory provisions which became effective in August 1965, only a one-year extension may be granted for the minimum statutory extension fee of \$5. Therefore, upon receipt of the \$30 subject permits will all be extended one year.

Very truly yours,

DEPARTMENT OF CONSERVATION

MORA - NR #4

Mr. H. W. Pollack, Supervisor
Division of Water Resources
Department of Conservation
335 General Administration Building
Olympia, Washington

Dear Mr. Pollack:

This is our request for five-year extensions of time, covering appropriations of water under Permits 3709, 3714, [REDACTED] 3716, 3717 and 3813 at Mount Rainier National Park. The extensions will enable the completion of construction under each of the permits. All of the water systems are in operation, but none have been completed to permit use of all authorized water. Due to the rapidly increasing public use of the Mount Rainier National Park, it would be unrealistic to reduce the permits to the water now being used, based on projects which have not yet reached their full design.

We are enclosing our purchase order for \$30.00 to cover the statutory fees for filing such requests. Payment will be made upon receipt of your invoices.

Sincerely,

(Sgd) MANUEL MORRIS

Dear Sir: Re: Surface Water Permits 3709 and ~~3710~~

We have received no further response to our letter of October 21 and November 9, 1966 and as the permits now stand they are subject to cancellation unless you obtain extensions of time for each. Therefore, if you are still interested in perfecting the permits to certificates of water right please take those measures as outlined in our letter of October 21, 1966.

If we do not hear from you within thirty (30) days we will assume you are no longer interested in these permits and they will be automatically cancelled.

Dear Sir:

We are in receipt of your letters of October 21, 1966 which have reference to Surface Water Permit No. 3709 and No. ~~3710~~. Your letter advises that in checking over our permits you find we have not submitted Notices of Completion of Construction. We regret that we are unable to identify these permits without additional information, since our files are maintained by the name of the national park, then by site within the park, and finally by the source.

It would be helpful if you would furnish additional information, such as park, source, or even the county in which this permit applied.

Sincerely,

(Sgd) MANUEL MORRIS

Dear Mr. Walker:

Enclosed is an "Invoice Order Voucher" in the amount of Two Dollars for an extension of time for completion of construction under our Permit No. 3713.

Our construction program calls for additional development in the Yakima Area, Mount Rainier National Park. Due to the continuing increase of visitation in the National Park system our facilities require additional development until the ultimate recreational potential of each area is realized.

Memorandum

To: Superintendent, Mount Rainier
From: Acting Regional Chief of Operations, Region Four
Subject: Water Right Application 5864, Permit 3713, Lodi Spring,
Docket 4, Mount Rainier National Park

We note that the letter dated October 10 from the State of Washington, copy of which you sent us with your memorandum of October 26, requests action on Lodi Spring water right, Permit No. 3713, by December 9 or the permit will be cancelled.

Mr. Maier has provided by memorandum of November 7 information on the policy of the National Park Service under which water rights have been acquired in accordance with State law. In the absence of authority to make an exception at Mount Rainier we believe you should take appropriate action as requested by the October 10 letter.

It is our understanding that no additional construction is contemplated on the Lodi Springs system. We note that the July, 1958 revision of the Mission 66 development schedule provides \$35,300 for the headworks of the Yakima Park water system. We presume this is improvement to the Frozen Lake reservoir and does not apply to the system described by the permit. We conclude it would be proper to submit a notice of completion of construction using the form furnished by the State. However, we would like to review the notice before it is submitted to the State and would appreciate receiving a draft copy of the completed form. A copy also should be sent to the Director for Mr. Dunn's review.

Prompt action is required to meet the December 9 deadline.

Memorandum

To: Superintendent, Mount Rainier
From: Assistant Regional Director, Region Four
Subject: Water Right Procedure, Region Four

We received your memorandum of October 26 requesting information concerning the source of authority requiring the National Park Service to secure water rights in Mount Rainier National Park from the State of Washington.

The procedures and instructions for the acquisition of water rights under which this office has operated are contained in the references listed below. You may note that the acquisition of water rights in accordance with State procedure appears to be a matter of Departmental policy, the expenditure of funds for such purpose being authorized by an act of Congress.

(1) Memorandum of February 17, 1945 (RD-102), Acting Regional Director Tolson to Regional Directors, Paragraph 2, which states in part"For water systems which have already been constructed without complying with the water codes, the applications shall be completed and filed as soon as it is possible to assemble the necessary data. For new projects, the filing procedure shall comply with the State law."

(2) Act of August 7, 1946 (60 Stat. 885) which states in part that appropriations for the National Park Service are authorized for.... "(g) investigation and establishment of water rights in accordance with local custom, laws and decisions of courts..." (Title 16 USC 173-8)

(3) Memorandum of April 8, 1955 (RD-6-95) Acting Director Thomas J. Allen to Washington office and all Field Offices concerning delegations of authority for water right matters....

(4) Memorandum of October 3, 1955, Acting Assistant Solicitor Golden to Director stating that the National Park Service should continue to file under state law in the same manner as it has done in the past and, that, in his opinion, the fact that the United States may have exclusive jurisdiction would not alter the situation.

- (5) Teletype of December 28, 1955, Acting Assistant Director Langley to Regional Director stating that water right filings should continue as in the past and that in the opinion of the Solicitor's Office the Fulton Dam case does not change the situation.
- (6) Memorandum of October 23, 1957 (LS4) Assistant Director Tolson to Assistant Solicitor, National Parks, reporting on a meeting attended by Regional Solicitor Burke, Field Solicitor Hollister, Mr. A. Van V. Dunn and others concerning water right procedure.
- (7) Memorandum of November 29, 1957 (LS4), Assistant Solicitor Biddie to Director expressing agreement that the National Park Service should continue to file applications and perfect rights to the use of water in the National Parks and Monuments in compliance with the water laws of the respective states.
- (8) Memorandum of December 4, 1957 (LS4) Assistant Director Price to Regional Directors indicating there should be no change in Park Service procedure.

Copies of the above references, except Item 2, are attached.

We are furnishing the Director and the Regional Solicitor copies of this memorandum for review and comment.

Mr. Preston P. Macy
Superintendent
Mount Rainier National Park
Longmire, Washington

Dear Mr. Macy:

You and the Park Engineer have mentioned the letter from the State of Washington of October 10, 1960, of which a copy is attached.

I expressed surprise, rather forcibly, that the Park paid, or had to pay, any attention to the State of Washington in the use of Park water, in view of the State and Federal legislative enactments creating the Park. You think several Department of the Interior pronouncements are to the effect that the parks must comply with State requirements in the use of park waters within the park.

If you care to forward this letter to the National Park Service for comment, please ask whether and in what federal case or cases, the general question has been decided.

Very truly yours,

(Signed)

Mr. Dunn.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
WATER RIGHTS SECTION
SAN FRANCISCO, CALIF.
601 Sheldon Building

January 3, 1944.

MEMORANDUM for the Director.

The enclosed Comments on Applications to Appropriate Waters of White River, and on Water Claim for Tipsoo Lake, at Mount Rainier are purely for record purposes. The applications and permits will be submitted within a few days. The water right instruments, when received, will go in the deed folders Nos. 6-11 inclusive, for that Park.

A. van V. Dunn,
Hydraulic Engineer.

Enclosure 342.

cc: Region Four, with enclosure.
Mt. Rainier, with enclosure.

Comments on Applications to Appropriate Waters of White River

Yakima Park Pipe Line

1. Water Rights Section does not have profile of Yakima Park Pipe Line, but by elevations of headgate and main line above Lodge, and also by quantity of water used, as described in Brysdale report of March 20, 1935, the grade of 2.1 ft. per 1000 ft. is checked very closely.

2. If above grade is correct no more than 0.25 sec. ft. of water can be conveyed and used until a larger pipe is installed. A 10" or 12" main is needed for probable ultimate demand.

3. Dunn and Brysdale agree fairly closely in ultimate water demand of close to 1.00 sec. ft., and the present application is for 0.25 sec. ft. from Frozen Lake and 1.00 sec. ft. from Lodi Spring which is great enough to permit some unforeseen increase in rate of demand. Exact flow from Frozen Lake seems to be unknown but about 0.22 sec. ft. from Brysdale report.

4. Claim is made for right to extend system to serve Sunrise Point as a precaution. This does not make the Sunrise Point development obligatory.

White River Entrance Pipe Line

1. Data on this line is very meager, but since there are no conflicting claims within several miles the description in the application should be ample if there are no errors which would be evident to the rather casual observation of a representative of the State Engineer.

2. The claim for 0.2 sec. ft., which cannot be perfected until the pipe line is enlarged, is based on Brysdale's report, and is probably large, but not excessive for the purpose of the appropriation.

White River Campground Pipe Line

1. The present system is described. It may be that a higher diversion and larger pipe may be wanted for fire protection later. This would only mean a change in point of diversion if no more than 20,000 gpd is used.

2. The claim for 0.03 sec. ft. (about 20,000 gpd) is ample in the eyes of Waterhouse, Dunn, and 50% more than Brysdale's estimate. The increase is based on master plan suggestion to try to draw attendance from the campgrounds at Yakima Park area.

Lodi Spring Pipe Line

1. Apparently 0.88 sec. ft. will have to be pumped from Lodi Spring if the Yakima Park demand reaches the estimated 1.10 sec. ft. This amounts to 394 gpm continuously for 24 hours. The two installed pumps have a capacity of 400 gpm which is just sufficient. The velocity in the pipe line will be about 4.5 ft. per second which is also satisfactory.

2. The weak points in the present installation are:

- A. There can be no shut-down for repair or maintenance.
- B. If larger pump units are installed to deliver the required quantity, the velocity in the pipe will become excessive, as follows:

12 hr. pump at 800 gpm - velocity about 9 ft. per sec.
8 hr. pump at 1200 gpm - velocity about 13 ft. per sec.

A larger pipe can be anticipated.

3. A redeeming feature is that the maximum demand will not be needed for more than a short period of each season. The storage capacity of Frozen Lake would provide for the maximum demand for about 2 weeks. Therefore, by filling the lake during the months of May and June at the rate of about 300 gpm during 8 hours of each day will probably permit the continued use of present installation.

4. Nothing in the application suggests pumping during spring floods when water is most abundant because there is no need to tie the park down to use of flood flow if not necessary. However, the system does permit use of flood flow if necessary and if such flood season comes after power house and pump site become accessible in spring.

Frozen Lake Storage Claim

1. The Water Rights Section has topography of the lake before it was partially dredged to provide fill for the dam. This shows storage of only 74 acre feet, or 24,300,000 gallons, while old records show a capacity of 28,000,000 gallons. The map to accompany the application has been modified to show dredging along north side of lake to provide the necessary fill. This excavation, whether from there or some other part of the lake, increases the storage to 76 acre feet, or 24,800,000 gallons — still below the park records. All of these quantities are based on spillway elevation at the crest of the dam (6725), and outlet at natural ground level at intake (6705). Actually, the spillway seems to be about 2 feet lower, giving a

capacity of 64 acre feet. In order to make maps and claims consistent, the 64 acre foot value is used. Since no other records will probably be available the result will be a right to store to within 2 feet of dam crest regardless of the exact quantity. This should be satisfactory.

2. The intake of the dam is apparently approximately at elevation 6705, but from drawing R-4833, presumably as constructed, the outlet goes through the dam at about elevation 6707. Mr. Waterhouse seems to feel that there has been evidence of syphon action in the past to drain full storage, but it may be questioned by the State Supervisor of Hydraulics. We should be ready to justify the claim or reduce the quantity if necessary. As an alternate we can claim that it is planned to alter dam outlet to provide diversion of full storage before proof of full use is required.

3. Because the lake is both a direct source of supply and a storage reservoir, we have designated the 6-inch outlet as diversion works as far as the control valves and distribution pipe therefrom.

Comments on Water Claim for Tipsee Lake

1. Spring flow varies between 10 gpm (0.0223 sec. ft.) and 100 gpm (0.223 sec. ft.). Although Drysdale report estimates ultimate need at 0.1 sec. ft. (64,632 gpd), Dunn and Waterhouse question availability of more than 0.05 sec. ft. at time of maximum need. This quantity (32,316 gallons per day) will serve the following:

1 caretaker's quarters (family of 3) -	350 gpd
1278 picnickers @ 25 gpd each -	<u>31,950 "</u>

Total	32,300 gpd
-------	------------

A 100,000 gallon reservoir would permit a 3-day use by double this population and provide better fire protection.

2. The same source is figured as ultimate supply for a winter sports area at Cayuse Pass. With the same 100,000 gallon storage, since no use would be made at Tipsee Lake in winter, the supply will provide a 2-day lodge area use of:

500 people over night at hotel at 200 gpd each -	20,000 gal.
5,785 people 1 day each at 25 gpd -	<u>144,625 "</u>

Total	164,625 gal.
-------	--------------

3. The application for appropriation of water is for 0.05 sec. ft. on basis of these figures.

State Supervisor of Hydraulics,
Olympia, Washington.

Re: Applications Nos. ~~5864~~ 5865, 5866, 5867,
5875, and 5876.

Dear Sir:

Reference is made to your letter of September 24, 1943, with regard to payments of fees on the above applications.

It happens that our funds for the 1944 fiscal year, starting July 1, 1943, did not clear the Treasury until this month, and for some reason the voucher you signed on July 6 had not been set up as an obligation on the preceding year's books. I find that the accounting office has had to hold up payment on several vouchers for that reason, but the voucher definitely went through for payment last week and I am sure you will receive your money in a few days if not ahead of this letter. Any other voucher which you may receive and return to arrive here before the end of business on June 30, 1944, is now also assured of prompt payment, and we hope the unusual experience of the past few months will not be repeated another year.

It happens that we have van dykes of all tracings mentioned in the same letter, so that we do not need any but that for the dam as you suggest. However, a photostat negative of the print which you are to return may, or may not, give the reproductions we want. It also costs at least as much as a van dyke from you. Hence, we are returning an order for the second sheet of the drawing NP-RAI-6984.

We have also sent you, through the Superintendent of Mount Rainier, applications and map to appropriate waters in the Carbon River drainage of the park. In that case, we did not make a negative of the tracing NP-RAI-6986. Therefore, please fill the order that will be requested by Superintendent Preston. If you wish, you can hold the enclosed voucher until the receipt of this new application, and make both prints at once and include their charge on the one voucher.

Yours very truly,

AvVD:SH

Mr. A. van V. Dunn
Hydraulic Engineer
National Park Service
601 Sheldon Building
San Francisco, California

Dear Mr. Dunn:

Replying to your letter of September 21, concerning Applications Nos. ~~5864~~, 5865, 5866, 5867, 5875 and 5876:

We have signed and are returning, herewith, voucher in the amount of \$52.00 to cover filing and recording fees for permits under the above numbered applications. However, we call your attention to the fact that we have not yet received a check to cover the examination fees for these applications, although vouchers for Nos. 5864, 5865, 5866 and 5867 were signed and returned on July 6th and for the other two applications on July 22nd, and we should at least have these fees before we issue permits.

The maps which accompanied the applications are filed with the applications and therefore have the same file numbers. We do not make any notations on the maps regarding acceptance or approval, with the exception of maps showing plans for reservoirs, which is the case in regard to Reservoir Application No. 5867 for Frozen Lake storage. The charge for approval on this was \$5.00 and was included in the voucher returned to you on July 22. As soon as the check for this is received, we will note approval on one of the maps sent us and return it to you for your records and a duplicate will be kept for our files. We are therefore returning the unused voucher you sent us to cover costs of Van dyke negatives.

Yours very truly

CHAS. J. BARTHOLET
Supervisor of Hydraulics

Re: Applications Nos. ~~5865~~ 5865, 5866,
5867, 5875, and 5876.

Dear Sir:

In compliance with your letter and statement of September 18, 1943, we enclose a voucher for \$52.00 to cover fees for filing and recording the permits under the above numbered water right applications. If you will sign at the point indicated by pencil cross, and return, we will see that payment is promptly made.

We have also filed a map in connection with these applications, and one in connection with Applications Nos. 5788, 5789, and 5790 for claims in the Chanapecosh drainage, all at Mount Rainier National Park. We assume that on receipt you add certain notations with regard to file numbers, date of receipt, acceptance or approval. If such is the case, we should like to obtain a van dyke negative of each when all notations are made. We enclose a second voucher to cover such costs and request that you sign and return it for payment with the negatives.

To the extent that this duplicates any similar requests by the Superintendent of Mount Rainier, his requests may be cancelled, or this request may be cancelled to the extent you have already filled his order.

Yours very truly,

AvVD:SH

A. van V. Dunn,
Hydraulic Engineer.

Dear Sir:

Mr. A. van V. Dunn, Hydraulic Engineer of the National Park Service, has forwarded a copy of your letter of July 27 to this office. Notice of water right applications Nos. ~~5864~~, 5865, 5866, 5875 and 5876 has been submitted for publication and affidavit of same will be forwarded to your office as soon as it has been received.

In regard to affidavit of publication of notice covering applications 5788, 5789 and 5790, this affidavit was received in this office on March 20 and mailing stamp indicates that it had been received in your office on March 19. We assumed that you had made the necessary record of the affidavit and that it was being forwarded to this office for filing, as it had been received without letter of transmittal. The affidavit is being returned under this cover.

Sincerely yours,

John C. Preston

Attention: A. van V. Dunn, Hydraulic Engineer.

Gentlemen:

Enclosed is a notice of your six water right applications, which you should have published for two consecutive weekly issues of any newspaper of general circulation published at Tacoma, the county seat of the county in which the diversions and use are to be made (This is a statutory requirement), after which kindly send the affidavit of publication to this office. Publication should start within thirty days from date.

The notice will give you the numbers of the different applications and we are sending you an extra copy of the notice so that you will have a record of same.

We wish to call your attention to the fact that we have not yet received the affidavit of publication of notice of your former applications 5788, 5789 and 5790, which notice was sent to you February 17, 1943.

Yours very truly

CHAS. J. BARTHOLET

Copy to Supt., Mt. Rainier Nat. Park 7/30/43

M Dunn.

601 Sheldon Building

July 16, 1943.

Mr. Chas. J. Bartholet,
State Supervisor of Hydraulics,
Olympia, Washington.

Dear Sir:

In accordance with your letter of July 6, 1943, we are returning Application No. 5866 together with separate applications for the diversions from Klickitat Creek and the Shadow Lake Outlet.

In removing the claims for Klickitat Creek and Shadow Lake Outlet the following changes are needed in Application No. 5866 as I have shown by hand:

8. Estimated cost - \$68,000.

16. Present requirement- 0.25 sec. ft.
Future requirement - 0.25 sec. ft.

We also note under 5 that we referred to R. 10 W., which should be R. 10 E.

We also enclose a voucher for \$15 to cover the two new applications and fee for examining the Frozen Lake Dam. We have put the other voucher through and you should shortly receive payment.

So far as we can see, all tributaries of a river within the National Park, since no one else has access therein, might be considered as one stream as we did in Application 5866. There can be no conflicting diversion between the various diversions or on the various tributaries until they have united and left the park. The only other reason for independent applications which we can see is to increase filing fees.

We will have similar cases in connection with claims to be filed for the Nisqually River drainage. Would you accept a single application for two diversions on different streams when the two contribute to a single distribution system? As an example, would you have accepted a single application for the diversions from Lodi Spring and Frozen Lake since they both serve the single distribution system of the Yakima Park Area?

Yours very truly,

AvVD:SH

Enclosure 282.

cc: Director.
Regional Director, Region Four.
Supt., Mt. Rainier N. P.

A. van V. Dunn,
Hydraulic Engineer.

601 Sheldon Building

July 2, 1943.

Supervisor of Hydraulics,
Division of Water Resources,
Olympia, Washington.

Dear Sir:

We enclose the following applications to appropriate and store water for use at Mt. Rainier National Park:

1. Application to appropriate waters of nameless springs tributary to the Ohanapecosh River, together with tracing and print of drawing NP-RAI-6985, Tipsoo Lake Water Claim.
2. Application to appropriate waters of Frozen Lake, Klickitat Creek and Shadow Lake Outlet, all tributary to White River.
3. Application to appropriate waters of Lodi Spring, tributary to the West Fork of White River.
4. Application to store water in Frozen Lake, tributary to the main branch of White River.
5. Tracing and two prints of drawing NP-RAI-6984 in 2 sheets, White River Water Claims, of which sheet 1 is the map to accompany the two applications to appropriate waters of the greater White River drainage and sheet 2 is the Frozen Lake Reservoir to accompany the storage application.
6. Voucher for \$20 to cover examination fees for the four applications.

If you will sign the voucher at the point indicated by pencil cross and return it we will see that payment is made promptly.

We have made a single application for the appropriations of Frozen Lake, Klickitat Creek and Shadow Lake Outlet because they are all part of one recreational development on a homogeneous area of Park Service land. No other claimants may obtain access to White River above the park boundary

FILE COPY

without special Congressional authorization. The application to appropriate Lodi Creek is separate because the West Fork does not unite with the main White River until it reaches a point some distance outside the park.

Yours very truly,

A. van V. Dunn,
Hydraulic Engineer.

AvVD:SH

July 6, 1943.

National Park Service
Water Rights Section
601 Sheldon Building
San Francisco, California

Attention: A. van V. Dunn, Hydraulic Engineer.

Gentlemen:

This will acknowledge receipt of your letter of July 2, together with four applications for permits to appropriate and store water, but as the statute and the rules and regulations of this office require separate applications for diversions on each stream, we are returning the application covering Frozen Lake, Klickitat Creek and Shadow Lake Outlet, with the request that you file separate applications for Klickitat Creek and Shadow Lake Outlet. It will not be necessary to file another application for Frozen Lake, as this application has been recorded for diversion from that source only, and it will not be necessary to send additional maps as those submitted cover the ground very well for all of the applications. Please return Application 5866 on Frozen Lake after you have taken from it the necessary data for separate applications for the other two diversions.

It will be necessary for us to approve plans of the dam for Frozen Lake Reservoir. This is required on all reservoirs containing 10 acre-feet or more. Therefore, will you please send us an additional voucher in the amount of \$15.00 to cover the \$5.00 examination fee on two new applications and the \$5.00 minimum fee for examination and approval of dam plans. We will approve drawing-Sheet 2 of 2, Drawing NP-RAI #6984 as to safety for the dam structure.

We will enclose the voucher for \$20.00 examination fees on four applications.

Yours very truly

Chas. J. Bartholet

STATE OF WASHINGTON
OFFICE OF SUPERVISOR OF HYDRAULICS
OLYMPIA

NOTICE OF WATER RIGHT APPLICATIONS NOS. ~~5864~~ 5865, 5866, 5867,
5875 and 5876.

TO WHOM IT MAY CONCERN:

Notice is hereby given that the United States of America, Department of the Interior, National Park Service, by John C. Preston, Superintendent of Mount Rainier National Park at Longmire, Washington has filed, under date of July 6, 1943, applications for permits to appropriate and store, subject to existing rights, public waters in Pierce County for domestic supply, recreational, industrial use and fire protection, as follows:

Application No. 5864 for appropriation of 1.0 second-foot from Lodi Spring, tributary of West Fork of White River, the point of diversion to be within the approximate SE $\frac{1}{4}$ of SE $\frac{1}{4}$ of Sec. 29, Twp. 17 N., Rge. 9 E.W.M. (unsurveyed);

Application No. 5865 for appropriation of 0.05 second-foot of water from unnamed springs, tributary to Tipsoo Lake and Ojnapesosh River, the point of diversion to be within the approximate NE $\frac{1}{4}$ of NE $\frac{1}{4}$ of Sec. 23, Twp. 16 N., Rge. 10 E.W.M. (unsurveyed);

Application No. 5866 for appropriation of 0.25 second-foot of water from Frozen Lake, to be diverted within the approximate NE $\frac{1}{4}$ of Sec. 33, Twp. 17 N., Rge. 10 E.W.M. (unsurveyed);

Application No. 5867 to construct a reservoir and store for beneficial use 64 acre-feet of water in Frozen Lake reservoir, the impounding dam to be located within the approximate NE $\frac{1}{4}$ of NE $\frac{1}{4}$ of Sec. 33, Twp. 17 N., Rge. 9 E.W.M. (unsurveyed);

Application No. 5875 for appropriation of 0.03 second-foot of the waters of Shadow Lake Outlet, a tributary of White River, the point of diversion to be within the approximate SE $\frac{1}{4}$ of Sec. 2, Twp. 16 N., Rge. 9 E.W.M. (unsurveyed); and

Application No. 5876 for appropriation of 0.2 second-foot of the waters of Klickitat Creek, tributary of the White River, the point

of diversion to be within the approximate SW $\frac{1}{4}$ of SW $\frac{1}{4}$ of Sec. 3,
Twp. 16 N., Rge. 10 E.W.M. (unsurveyed).

Maps showing the locations and plans of said diversions,
storage and places of proposed use are on file in the office of
the State Supervisor of Hydraulics, Olympia, Washington, together
with such other information as is required by law.

Any person, firm or corporation whose right will be injuriously
affected by said applications may file with the State Supervisor
of Hydraulics, at Olympia, Washington, such objections or repre-
sentations, in writing, as he may desire to make, within thirty
(30) days after date of last publication, which date is August 17, 1913.

Witness my hand and official seal this 27th day of July,
1913.

CHAS. J. BARTHOLET
State Supervisor of Hydraulics.
