Dear Mr. Walker:

In accordance with your discussion November 2 with representatives of this office and Assistant Regional Solicitor George D. Dysart, enclosed are four signed forms of Proof of Appropriation of Water covering Permits No. 2520, No. 6012, No. 2519 and No. 2522, and payment voucher for the same. The original of the accompanying voucher should be signed and returned to this office for final processing.

There are also enclosed three sets of voucher forms for forwarding to the Auditors of Mason County, Clallam County and Jefferson County. In forwarding these vouchers the Auditors should be advised to sign the original and return it to this office for payment.

Gentlemen:

Re: **Surface** Water Permit No. 2519

In checking over your permit we find that you have not submitted your Proof of Appropriation of Water.

If the water has been put to the full use as indicated in the permit, you should fill out the enclosed Proof of Appropriation form (to be notarized) and submit to this office along with statutory fees of \$3.00 payable to the Department of Conservation and \$ 2.00 payable to the Jefferson County Auditor. Please send two separate checks or money orders. By following the above instructions, you will receive your final water right certificate.

If more time is required to put the water to full use, an extension of the time limit should be requested. By statute, a \$2.00 fee must accompany such request. Please state why such extension is necessary.

If we do not hear from you within sixty (60) days from date, we shall assume that you are no longer interested in retaining the permit and shall cancel it without further notice.

Very truly yours,

Memorandum

To: Regional Director, Region Four
From: Chief, Water Resources Section
Subject: Extensions of Time, Water Right Permits 2519, 2520 and 2522,
Dockets 1, 2 and 3, Olympic

Attached are your copies of orders granting extensions of time until October 1, 1961, in which to perfect the subject water rights. Copies and originals are also being sent to the Park and the Western Office of Design and Construction, and each order should be filed in the designated docket folder.

As explained in separate memorandum transmitting a similar order for extension of time under Permit 6012, Docket 19, we should obtain a complete analysis of present use and ultimate demands, and modify the applications or prepare to make proof by 1961 if possible.

Re: Permit 2519-Jackson Guard Water System-
Olympia
Permit 2520-LaPoel Campground Water
System-Olympic
Permit 2522-Graves Creek Campground
Water System-Olympic
Permit 3768-Carbon Creek Entrance
Water System-Mt. Rainier
Permit 3769-Ipsut Creek Campground
Water System-Mt. Rainier

Dear Mr. Walker:

Request is hereby made for extensions of time in which to make full beneficial use of water under each of the five designated permits. Since Section 90.20.090 of the Remington Revised Statutes does not seem to limit the length of such extensions, we suggest that 5-year extensions, if permissible, would be much more convenient for both of our offices than the one year permits of the type which were granted a year ago.

During the war years, the National Park Service was forced to leave developments at the stage completed by 1941. For the past decade, the annual increases in public use of the national parks and monuments has far exceeded expectations, and is still increasing. The annual visitation already exceeds the stabilized limits which had been estimated for about 1960 but it has been impossible to anticipate the trends in time to provide adequate facilities. As a result, the number of guest accommodations are less than planned before the war and per capita water use is below modern standards.

The three water claims for Olympic appeared excessive when jurisdiction was transferred from the Forest Service to the Park Service but it now appears that the full quantity of water may be used although such use has not been reached. It would be unwise to make proof and limit rights at this time, or to define the method or place of use by such proof.

The two claims for Mt. Rainier are for quantities of water which might be used now or in the near future if it were not for the lack of adequate modern comfort stations and cottages with private baths. Recent studies have also indicated that developments in the greater Carbon River drainage, in the Park, may have to be regrouped with different proportions of the water used from each system, to permit proper spacing of the accommodations which are now expected to be needed.

We are now faced with the same problem in all national parks and monuments. Accordingly, under MISSION 66, to which I have referred in previous correspondence, and you have probably seen press releases, we have now started a 10-year planning and development program to have facilities adequate for the anticipated attendance of 1966. Specific developments involving individual water systems will be completed in the order of the apparent most desirable priority. Some of the subject water rights pertain to developments with relatively low priority. For this reason, we should like to obtain long enough extensions of time to keep the total number at a minimum.

Very truly yours,

A. van V. Dunn
Chief, Water Resources Section

January 31, 1956

Memorandum

To: Regional Director, Region Four
From: Chief, Water Resources Section
Subject: Water Right Application 2519, 2520 and 2522, Dockets 1, 2 and 3, covering Jackson Guard Station, LaPoel Campground, and Graves Creek Campground Water Systems, Olympic

With copies of this memorandum for the Superintendent and Western Office of Design and Construction, we are sending you each three copies of the letter of January 24 from the Supervisor, Washington, Division of Water Resources, granting an extension of time from October 1, 1955 to October 1, 1956, in which to complete construction of each of the three water systems. The original letter is one of the three being sent to the Superintendent, and one copy should be filed in each of the subject docket assemblies, in all offices.

The request of October 20, 1955, was for an extension of five years. A similar request was made for five-year extension under Permits 3709, 3714, 3716, 3717 and 3813, for water system developments, by letter of December 22, 1955. As indicated in attachments with separate memo, the five-year extension was granted on the latter set.

Both requests were composed by me and signed by Mr. Robertson after I left on trips. The only significant difference I can see in the two requests is that I said it would be unwise to make proof on less than authorized quantity of water at Mt. Rainier because of continuing increases in annual attendance.

We will try to obtain five-year extensions next fall. Meantime, however, we should have a report after the peak of the 1956 season, but not later than September 15, giving maximum day population served at each area, estimates of quantities of water used for other purposes, and a sketch plan of existing system, or reference to plans of system now in existence, if they are on file in Washington. By sketch, I mean one that shows hydraulic properties and area of use, but that no engineering traverses are needed.

SIGNED

Department of Conservation and
Development
Olympia, Washington

Permits 2519, 2520 and 2522 for Jackson
Guard Ranger Station, LaFol Campground
and Graves Creek Campground Water Systems,
Olympic National Park

Dear Mr. Walker:

We have received your notice that Permits 2519 and 2522 will
expire on November 1 if proof or request for extension of time is not
submitted. Permit 2520 should be added to this list.

All three of these water systems were constructed by the Forest
Service, which also filed the applications for the permits, before the
developments were transferred to the National Park Service and included
in Olympic National Park. All three systems are in operation, serving
the public and Park employees, and the amount of public use is increasing
appreciably each year but the authorized quantities of water have not
yet been used.

Accordingly, request is made for an extension of time of five
years in which to make proof of beneficial use. It is our desire to
defer proof until the authorized quantity of water is used, or until
the visitor use becomes stable at some lower quantity.

Enclosed are a purchase order and voucher to cover the fees
of \$2.00, or \$6.00, for the extensions of time. The voucher should be
signed and returned for payment.

Very truly yours,
S I G N E D

Dear Sir:

Complying with your request of September 14, we are extending the time for making complete application of water to beneficial use under Permits Nos. 2519, 2520 and 2522 for projects at Olympic National Park to October 1, 1950.

Of course, if proof of appropriation can be made before the expiration of the extension period, it should be done so that final certificates of water right may be issued.

NOTICE OF WATER RIGHT APPLICATIONS.

State of Washington, Office of Supervisor of Hydraulics, Olympia.

To Whom It May Concern: Notice is hereby given that the United States Forest Service of Olympia, Washington, under date of April 16, 1937, filed with the State Supervisor of Hydraulics, Olympia, Washington, the following applications for permits to divert public waters:

Application No. 4381 for appropriation of 0.05 second-feet from Gamm Creek, tributary of Dosewallips River, to be diverted within SW $\frac{1}{4}$ of SW $\frac{1}{4}$ of Sec. 16, Twp. 26 N., Range 3 W., W. M., for water supply for Gamm Creek Camp;

Application No. 4385 for appropriation of 0.05 second-feet from an unnamed stream, tributary of Taft Creek, to be diverted within NW $\frac{1}{4}$ NE $\frac{1}{4}$ of Sec. 12, Twp. 27 N., Range 19 W., W. M., for water supply for Jackson Guard Station;

Application No. 4387 for appropriation of 0.05 second-feet from Jackson Creek, tributary of Hood's Canal, to be diverted within NW $\frac{1}{4}$ of SE $\frac{1}{4}$ of Sec. 3, Twp. 26 N., Range 2 W., W. M., unsurveyed, for water supply for Rainbow Camp Ground;

Application No. 4388 for appropriation of 0.05 second-feet from an unnamed stream, tributary of Graves Creek, to be diverted within NE $\frac{1}{4}$ of NE $\frac{1}{4}$ of Sec. 16, Twp. 24 N., Range 7 W., W. M., for water supply for Graves Creek Forest Camp;

Application No. 4391 for appropriation of 0.05 second-feet from Wilson Creek, tributary of Dosewallips River, to be diverted within SW $\frac{1}{4}$ of SE $\frac{1}{4}$ of SE $\frac{1}{4}$ of Sec. 24, Twp. 26 N., Range 3 W., W. M., for water supply for Corrigenda Guard Station.

All of the above appropriations to be used continuously, subject to existing rights, in Jefferson County, Washington.

A map showing the location and line of said diversion and the place of the proposed use is on file in the office of the State Supervisor of Hydraulics, Olympia, Washington, together with such other information as is required by law.

Any person, firm or corporation whose right will be injuriously affected by said application may file with the State Supervisor of Hydraulics, at Olympia, Washington, such objections or representations, in writing, as he may desire to make, within thirty (30) days after date of last publication, which date is May 17, 1937.

Witness my hand and official seal this 23rd day of April, A. D., 1937. CHAS. J. BARTHOLET,
State Supervisor of Hydraulics.
Date of first publication April 29, 1937. 497

RAY O. SCOTT, being sworn, says that he is the Manager of the PORT TOWNSEND LEADER, a weekly newspaper, printed in the English language, in Port Townsend, Jefferson County, Washington, established, published and circulated continuously for more than six months prior to the date of the first publication of attached notice; that it is a newspaper of general circulation in said County and State and is printed in an office maintained at the aforesaid place of publication. That the annexed is a true copy of the Notice of Water Right Application

as it was published in regular issues (and not in supplement form) in said paper for a period of 2 consecutive weeks, beginning on the 29th day of April, 1937, and ending on the 13th day of May, 1937, and that said newspaper was regularly distributed to its subscribers during all of said period. That the full amount of the fee charged for the foregoing publication is the sum of \$12.15, which amount has been paid in full, at the rate of \$1.40 per hundred words for the first insertion, and 86 cents per hundred words for each subsequent insertion.

APPLICATION FOR A PERMIT
To Appropriate Public Waters of the State of Washington

Application No. 4385

Permit No. 2519

I, United States Forest Service
(Name of applicant)
of _____, County of _____,
(Postoffice)
State of Washington, do hereby make application for a permit to appropriate
the following described public waters of the State of Washington subject to existing rights:

If the applicant is a corporation, give date and place of incorporation _____

1. The source of the proposed appropriation is an unnamed tributary of Taft Creek
(Name of stream)
tributary of Hoh River
 2. The amount of water which the applicant intends to apply to beneficial use is 0.05
cubic feet per second.
 3. The use to which the water is to be applied is Domestic supply for Jackson
(Irrigation, power, mining, manufacturing, domestic supplies, etc.)
Guard Station
 4. Time during which water will be required each year March 1st to November 30th
 5. The approximate point of diversion is located South 23° East 1120' from 1/4 Section
(Give distance and bearing to section corner)
corner on North line of Section 12, Twp. 27 N., Rge. 10 W.W.M.
- being within the NW 1/4 NE 1/4 of Sec. 12, Tp. 27 N., R. 10 W. W. M.,
(Give smallest legal subdivision) (No. E. or W.)
in the county of Jefferson
6. The pipe line to be 1500 ft. ~~xxxxxxx~~ in length, terminating
(Main ditch, canal, or pipe line)
in ~~the~~ Lot 4 of Sec. 12, Tp. 27 N., R. 10 W. W. M.,
(Smallest legal subdivision) (No. E. or W.)
the proposed location being shown on the accompanying map.
 7. The name of the ditch, canal or other works is Jackson Guard Station pipe line.

8. Estimated cost of development necessary to utilize fully the appropriation herein asked for
\$ 500.00

9. Does the stream from which you wish to appropriate water flow through the tract of land on
which the water is to be used? No.

10. Do you own the required right-of-way for the proposed works? Yes.

DESCRIPTION OF WORKS.

DIVERSION WORKS—

11. (a) Height of diversion dam 6 feet; length on top 20 feet;
length at bottom 10 feet; material to be used and character of construction
Timber crib- Wasteway over dam.

(Loose rock, concrete, masonry, rock and brush, timber crib, etc., wasteway over or around dam)

(b) Description of headgate No headgate. 2" pipe and screen at intake.
(Timber, concrete, etc.; number and size of openings)

When storage works are contemplated a storage permit must be filed in addition to the above. These forms can be secured, together with instructions, by addressing the State Supervisor of Hydraulics, Olympia, Washington.

CANAL SYSTEM—

12. (a) Give approximate dimensions at each point of canal where materially changed in size, stating miles from headgate. At headgate: Width on top (at water line).....feet;
width on bottom.....feet; depth of water.....feet;
grade.....feet fall per one thousand feet.

(b) At.....miles from headgate: Width on top (at water line).....feet;
width on bottom.....feet; depth of water.....feet;
grade.....feet fall per one thousand feet.

SUPPLY THE FOLLOWING INFORMATION ACCORDING TO USE PROPOSED:

IRRIGATION—

13. The land to be irrigated has a total area of.....acres,
described as follows:.....
(Give legal subdivision by section, township and range)

(If more space is required, attach separate sheet)

14. Give the legal description of land when water is to be used for purposes other than irrigation, power and municipal supply. Lot 4 Sec. 12, Tp. 27 N., Rge. 10 W. W. M.,
(Legal subdivisions) (E. or W.)

(a) To what stream is water returned Hoh River by seepage

(b) Locate the point of return.....Sec....., Tp.....N., Rge.....W. M.,
(Smallest legal subdivision of section) (E. or W.)

POWER—

15. (a) Total amount of power to be developed.....H. P.
(Theoretical horsepower)

(b) Total fall to be utilized.....feet.
(Head)

(c) The nature of the works by means of which the power is to be developed.....

(d) Such works to be located in.....of Sec.....
(Legal subdivision)
Tp.....N., Rge.....W. M.
(No. E. or W.)

(e) To what stream is the water to be returned.....

(f) Locate point of return.....Sec.....
Tp.....N., Rge.....W. M.
(No. E. or W.)

(g) The use to which power is to be applied is.....

MUNICIPAL SUPPLY—

16. To supply the city of _____, _____
(Name)
County, having a present population of _____
and an estimated population of _____ in 19____
(a) Estimated present requirement _____
(b) Estimated future requirement _____

17. Construction work will begin on or before _____

18. Construction work will be completed on or before _____

Duplicate maps of the proposed ditch or other works, prepared in accordance with the rules of the

In order to retain its priority, this application must be returned to the State Supervisor of Hydraulics,
with corrections, on or before _____, 19____

WITNESS my hand this _____ day of _____, 19____

State Supervisor of Hydraulics.

PERMIT

This is to certify that I have examined the foregoing application and do hereby grant the same, subject to the following limitations and conditions: If for irrigation, this appropriation shall be subject to such reasonable rotation system as may be ordered by the State Supervisor of Hydraulics.

The amount of water appropriated shall be limited to the amount which can be applied to beneficial use and not to exceed -0.05- cubic feet per second, or its equivalent in case of rotation.

The priority date of this permit is April 16, 1937

Actual construction work shall begin on or before April 1, 1939

and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1939

Complete application of the water to the proposed use shall be made on or before

October 1, 1940

Given under my hand and the seal of this office at Olympia, Washington, this 15th day of March, 1938

(SEAL)

(Sgd.) Chas. J. Bartholet

State Supervisor of Hydraulics.

Application No. <u>4385</u> Permit No. <u>2519</u>	PERMIT To Appropriate Public Waters of the State of Washington	Filed by <u>United States Forest Service</u> County of <u>Jefferson</u>	This instrument was first received in the office of the State Supervisor of Hydraulics, Olympia, Washington, on the <u>16th</u> day of <u>April</u> , 19 <u>37</u> , at <u>2:30</u> o'clock <u>P.</u> M.	Approved <u>March 15, 1938</u> Recorded in Book No. <u>11</u> Permits, on Page <u>2519</u>	CHAS. J. BARTHOLET State Supervisor of Hydraulics. JAY THOMAS, PUBLIC PRINTER, OLYMPIA
---	---	--	--	--	---

Before your certificate of water right is issued it will be necessary for you to file with the State Supervisor of Hydraulics a copy of each of the following reports:

- 1st. Progress reports (in case temporary permit is issued).
- 2nd. Affidavit of publication of notice of water right application.
- 3rd. Notice of beginning of construction.
- 4th. Notice of completion of construction.
- 5th. Notice of application of water to a beneficial use.
- 6th. Proof of appropriation of water.

Upon a satisfactory showing that the appropriation has been perfected as provided by statute the State Supervisor of Hydraulics will issue a water right certificate.

(Blanks will be furnished by the office of State Supervisor of Hydraulics)

Memorandum

To: Director

From: Assistant Regional Director, Region Four

Subject: Hoh Area Campground Water System, Docket No. 1,
Olympic National Park

To answer the quotations asked in Mr. Dunn's memorandum we are attaching a marked print of drawing HPOLY 2401 dated May 21, 1959.

The new source is erroneously shown on the Mt Ten quadrangle and on drawing HP-OLY 2401 as Taft Creek. The stream proposed as the new source reaches the Hoh River at about the same point as the real Taft Creek does. It is possible the two streams join a few feet before their joining the Hoh, consequently the name "West Fork of Taft Creek" has been suggested for the unnamed stream.

The existing source is being retained as a standby hence it may be that we should file a new application rather than petition for a change of point of diversion.

[Handwritten: X Spaulding 8/11]
[Handwritten: Whitworth]

By memorandum of July 21, Mr. L. E. Martin of the WODC Office transmitted to us a copy of NP-OLY/3208 for the subject system. By comparing it with Master Plan Drawings 2022H and 3125 and with NP-OLY/6975 titled Known Water Claims in my report of 1941 on Olympic water rights, it appears that this project may be an improvement of the Jackson Guard Station Water System, Permit No. 2519, acquired from the U. S. Forest Service, which is recorded in Water Right Docket No. 1.

Drawing 3208 does not give the name of the source, or any geographical location by section, but the master plan drawings show the developed area to be on Taft Creek, and the records in Docket 1 show old water system diverted from a tributary of that creek. The drawing should be revised to show the relation between the old and new developments, if any.

The comparison also suggests that there may be a change in the diversion point. The former diversion point described on Application 4385, in the docket, is tied by bearing and distance to a section quarter corner. If a tie is obtained between the old and the new diversion points (provided there is a change), by scaling on the drawing or by survey, it can be used to compute a bearing and distance to the new diversion from the quarter corner. This information, together with descriptive data of the new diversion structure can be used to make application to the State Division of Water Resources for a change in point of diversion, and other changes in place and purpose of use, in the matter of this pending water right proof.

We note in the docket that an extension of time in which to apply water to full use has been granted until October 1 of this year. The request for further extension might have more sympathetic consideration if made as part of an amendment of the application.

IN REPLY REFER TO:

154-OEL

September 7, 1961

Memorandum

To: Regional Director, Region Four

From: Chief, Water Resources Section

Subject: Hoh Area Campground Water System, Docket 1, Olympic

We are filing Drawing NP-OLY-2401 which Mr. Maier forwarded with memorandum of August 14 in our assembly of the subject docket.

Mr. Maier is correct in suggesting that another application for appropriation of the new source should be filed if the Jackson Guard system is to be retained. However, it seems to me that the two diversions should be treated as parts of the one water supply system for the area as a whole, and the new application should be for the appropriation of a supplemental supply. It might even be desirable to amend the rights under Application 4385, Permit 2519 to permit diversion from either source, and to make the same provision in the application for the use of water in excess of the 0.05 c.f.s. covered by said permit.

I assume that the entire 0.05 c.f.s. is not used under the permit, and it will be more difficult to make proof under either permit, if neither claim is fully exercised for many years. It would be easier to make proof on 0.05 c.f.s. as soon as that amount is used, and then have only the supplemental supply to consider later. It would also be easier to show that the older right was not lapsing.

September 18, 1956

Memorandum

To: Regional Director, Region Four

From: Superintendent, Olympic

Subject: Water Right Application 2519, 2520 and 2522, covering Land of 9/20
Jackson Guard Station, LaPoeI Campground and Graves Creek
Campground Water Systems, Olympic

We are providing a report as requested in Mr. Dunn's memorandum of January 31, though it is doubtful that the authorized quantity of water is being used, with the exception of the Hoh.

As no appreciable water storage is available, needs should be based on maximum day use and not average day use. The minimum increase in use for any of these areas was 15% over last year.

Application No. 2519, Jackson Guard Station (Hoh)

Maximum day visitation including campers and picnickers, 1800 persons. Maximum day campground use included in above, 175 campers, 275 picnickers. Ranger Station occupied by four persons. Bunk house occupied by six persons. Minimum of two government horses watered in corral area. Approximately one acre of land irrigated.

This application should be amended; as to name (Hoh Ranger Station and Campground); also as to use, to include the public campground and irrigation of approximately one acre at the station; period, year round for station and one hundred and twenty days for public camp.

Application No. 2520, La PoeI Campground

Maximum day visitation including campers and picnickers, 253 persons, which included 228 campers and 25 picnickers, Ranger Station occupied by three persons.

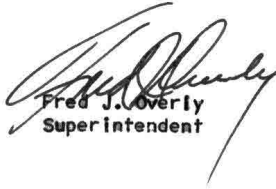

Application No. 2522, Graves Creek Campground

Maximum day visitation including campers and picnickers, 243 persons, which consisted of 163 campers and 80 picnickers.

From all three dockets the old "Proof of Appropriation of Water" should be removed and destroyed.

As we do not have the elevation on these water systems, we cannot provide at this time a sketch map showing the hydraulic properties. The existing maps filed in each docket will show the area of use.

Fred J. Overly
Superintendent

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
WASHINGTON 25, D. C.

In reply refer to:
L54 OLYM

October 31, 1950

Mr. H. W. Pollock
Supervisor of Hydraulics
Department of Conservation and Development
Box 207
Olympia, Washington

Dear Mr. Pollock:

This is to request extensions of time in which to make full beneficial use of water under the following water rights at the Jackson Guard Station and LaPeel and Graves Creek public campgrounds in Olympic National Park:

Application No. 4385 - Permit No. 2519
Application No. 4386 - Permit No. 2520
Application No. 4388 - Permit No. 2522

Each water right permit authorizes the use of 0.05 second-foot of water. The claims were for more water than used when they were filed, based on anticipated future demands for the Park visitors using each of the areas. The total number of visitors to the Park numbered about 25,000 in 1937, when the water right applications were initiated. There was a drop in public use of the Park during the war, but the following tabulation of annual attendance for the travel years ending September 30 indicates that the public use, and therefore the water consumption, is rapidly increasing and has not reached a maximum.

<u>Year</u>	<u>Number of Visitors at Park</u>
1940	91,863
1941	92,966
1946	121,712
1947	182,164
1948	182,280
1949	392,506
1950	405,347

Not all of the Park visitors use each of the designated areas, but the annual use of each area is increasing with the over-all increase in total Park attendance. Some of the public use areas of the Park are now approaching full occupancy, which is limited by available acreage for development. It is becoming necessary to provide

expanded facilities at other areas where space is available, and to develop some entirely new campgrounds and contact areas. Accordingly, we cannot fully define the ultimate capacity of the three designated areas until the master plan of Park development is revised on the basis of the marked increase in Park attendance during the past two years.

It is requested that a five-year extension of time be granted in order to permit attendance and proportionate use of the designated areas to reach a possible point of stability, before making proof for final license.

Sincerely yours,

(SGD.) A. VAN V. DUNN.

Dunn

October 20, 1955

Memorandum

To: Regional Director, Region Four
From: Acting Chief, Water Resources Section
Subject: Water Right Permits 2519, 2520 and 2522, Dockets 1, 2 and 3, Olympic National Park

Attached are three copies of letter of October 20, to State Supervisor, Division of Water Resources, requesting extensions of time under the designated permits and a copy of the notice relating to Permits 2519 and 2522. One copy of letter should be filed in each of the designated dockets in your office, along with notice when applicable.

Copies are being sent directly to the Superintendent for similar disposition. Copies are also being sent to the Western Office of Design and Construction although it has not docket assemblies. We will supply dockets shortly.

If all dockets are alike, they contain an old form of proof, apparently prepared for Mr. Macey's signature, but not executed, about 1939, and we have since obtained extensions of time in 1943 and 1950, as shown in the same docket. We believe the proof, just above notice of completion of construction, should be destroyed to eliminate confusion, but wish your concurrence first. A new form would now be needed if proof were possible, and it would be signed by Mr. Overly.

Each permit is for the use of 0.05 sec.ft. or 30,816 gallons per day. An analysis of peak day water use should be made in each case, based on area irrigated, and maximum number of campers and picnickers, to determine how much of that quantity of water is now being used. We can make proof whenever we can support it, even if just after obtaining an extension of time.

WATER RESOURCES
Water Rights

Mr. Preston P. Macy
Superintendent
Olympic National Park
Port Angeles, Washington

Dear Mr. Macy:

Your letter of January 3 is received.

We are attaching Certificate of Water Right No. 1250 referred to in the second paragraph of your letter.

Under date of February 25, 1939, we forwarded to Major O.A. Tomlinson, Superintendent of the Mount Rainier National Park, Longmire, Washington, assignments required by the State Supervisor of Hydraulics, together with application for permits No. 4385, 4386, 4388 and 4389, which applications cover permits No. 2523, 2522, 2520, and 2519.

Action toward completion of water rights for these camps, namely Soleduck, Graves Creek, Lapoel and Jackson Guard Station was no doubt taken by Major Tomlinson. We are unable to locate anything in our files concerning certificates No. 594, 1249 and 1391. ^{822,}

We trust that the above information will assist you in clearing up the water right certificates referred to, and if we can be of further assistance in this connection, please advise.

Very truly yours,

/s/ Carl B. Neal

Re: Applications 2519, 2520, and 2522.

Dear Sir:

We wish to thank you for your broad extension of time in which to perfect water rights under the above applications. We can assure you that we are just as anxious as you to complete all rights.

It happens that we inherited these claims from the Forest Service when Mt. Olympus National Monument was enlarged and made Olympic National Park. Due to changes in plans with the transfer we think we may prove up on less than the original claim, but war came before we could obtain sufficient data on public use to make a final determination of the trends. We will make proof as soon as normal attendance seems to have returned and reached a static stage or the full quantity covered by permit is used.

Yours very truly,

AvVD:SH

Re: Water Right Application No. 4385, Permit No. 2519
" " " " 4386 " " 2520
" " " " 4388 " " 2522

Dear Sir:

This is a request for an extension of time in which to prove full beneficial use under the above water rights covering the pipe lines at Graves Creek Campground, LaPoel Campground, and the Jackson Guard Station at Olympic National Park.

Beneficial use is made largely by the visiting public. Public attendance was somewhat greater in 1941 than in 1940 when the last extension of time was requested, but with military occupation of part of the park, and the general reduction in travel in 1942 and 1943, due to gas restrictions, there has since been an unnatural decrease.

Full beneficial use had not been made prior to 1942, but increasing attendance had indicated that there would be more demand in the future. With the uncertainty as to state population after the war, it would be very unwise to limit water use to any past consumption. If possible, therefore, we request that the extension of time be made to run until four or five years after the war in order that we may have a better opportunity to determine what part of the claimed quantities of water we shall need in the areas mentioned.

Yours very truly,

AvVD:SH

September 6, 1943

MEMORANDUM for the Regional Director, Region Four.

Attention: Hydraulic Engineer Dunn

This is in reply to Mr. Dunn's memorandum of August 30 in connection with Water Right Applications 4385, 4386 and 4388 covering Jackson Guard Station, Lapool Campground and Graves Creek Campground.

Probably very little, if any, more water has been used at any of these locations than was shown as used at the time of your last reports of a few years ago.

No large Army units have used any of the above mentioned areas, and there is no other place within the park where the Army has used such a volume of water. At Elwha, Army occupancy of that camp has been from 50 to 200 men, with an average of 75 men. One hundred men using 100 gallons per day would consume 10,000 gallons of water per day.

Two areas outside the park are extensively used by the Coast Guard, each with probably close to 200 men. These are Kalaloch, Becker's Resort, and Lake Ozette, Keller's Resort. In both cases, however, we believe the entire water supply is obtained from a well at the former, and by well, or pump from the lake, at the latter.

Preston F. Macy
Superintendent

601 Sheldon Building

August 30, 1943.

MEMORANDUM for the Superintendent,
Olympic National Park.

Our records show that we are supposed to prove full beneficial use on October 1, 1943, for Water Right Applications 4385, 4386 and 4388 covering the Jackson Guard Station, Lapoel Campground and Graves Creek Campground, each one for a total of 0.05 second foot or 30,000 gallons a day. It is assumed that no more water has been used than at the time of our last reports a few years ago unless the Army is making use of any of these areas.

Will you please advise of any area which the Army may have taken over and occupied with a large enough group of people to use 30,000 gallons a day. For such estimate you should figure about 85 to 100 gallons per capita per day.

Unless there are such Army uses we will arrange to request an extension of time until after the war in which to complete proof.

AVVD:SH

A. van V. Duhn,
Hydraulic Engineer.

August 30, 1940

Memorandum for Superintendent Macy,
Olympic National Park:

Reference is made to your memorandum of August 20, advising of the completion of Notice of Application of Water to Beneficial Use in the case of permit No. 2523, subject, however, to final payment of the voucher. The vouchers returned with your memorandum have been signed and submitted to the fiscal department for payment.

It is gratifying to know that similar proof in connection with permits 2519, 2520, and 2522 have been granted an extension of time to October 1, 1943. Hydraulic Engineer Dunn has called attention to the fact that it would probably be difficult to prove full beneficial use of all the water claimed under any of these permits in 1943 or any time thereafter unless further facilities are developed in the area. He has also called attention to the fact that there may be additional developments at other points in the same drainage for which no applications or permits have as yet been obtained from the State Engineer.

We suggest, therefore, that between now and October 1, 1943, every effort be made to work out full development programs, not only in the areas covered by these permits, but any other possible campgrounds or ranger stations which may be desirable in the same drainage, in order that by 1943 we may transfer such portions of the rights as desirable to other points of diversion and thus perfect them, or, if desirable, reduce the claims in accordance with the needs developed by this master plan study.

AvVD:SH

Vouchers showing charge to Water Rights funds are attached for your transmittal.

FILE COPY

OLYMPIC NATIONAL PARK
PORT ANGELES, WASHINGTON

Mr. Chas. J. Bartholet,
Supervisor of Hydraulics,
Division of Water Resources,
Department of Conservation and Development,
Olympia, Washington.

Dear Sir:

During the year 1939 we filed form SF No. 380-1930 "Proof of Appropriation of Water" by the following water systems which were transferred from the U. S. Forest Service to the United States Department of the Interior, National Park Service, Olympic National Park, by an instrument dated February 24, 1939, a copy of which you have in your records:

Soleduck Forest Camp -	0.01 sec. ft. - Permit 2523
Graves Creek Forest Camp -	0.05 sec. ft. - Permit 2522
LaPoel Forest Camp -	0.05 sec. ft. - Permit 2520
Jackson Guard Station -	0.05 sec. ft. - Permit 2519

This form was executed to indicate that the pipe capacities were being diverted to the extent of beneficial needs. We did not execute forms SF No. 379-1937 "Notice of Complete Application of Water to a Beneficial Use" because full pipe capacities had not been needed for beneficial use at that time.

Full beneficial use of the pipe capacity (0.01 sec. ft.) was reached at Soleduck Forest Camp, Permit 2523, on July 4, 1940. We, therefore, enclose form SF No. 379, executed to cover that water system and claim, and which will permit the issuing of the final certificate.

Water use at Graves Creek and LaPoel Campgrounds and the Jackson Guard Station is being made at an increasing rate, but full pipe capacities have not yet been made. This is due largely

Copy to Director: 9/18/40
Copy to Regional Director, Reg. II - 9/18/40.

to changes in administrative procedure since the areas were transferred from the Forest Service to the National Park Service. The retarded use, however, is only temporary during the reorganization and development of other facilities to adapt the areas to the Park Service needs.

May we request, therefore, such extension of time as you may grant for the final perfection of the following water claims:

Graves Creek Forest Camp - Permit 2522 - 0.05 sec. ft.
LaPoel Forest Camp - Permit 2520 - 0.05 sec. ft.
Jackson Guard Station - Permit 2519 - 0.05 sec. ft.

In discussion with our hydraulic engineer, A. van V. Dunn, early in the month, you advised that forms SF Nos. 379 and 380 should be submitted at the same time. Under these circumstances you may wish to return form No. 380 for these three claims until the extended date authorized.

In requesting the extension of time, we should also like to refer to Mr. Dunn's explanation of Federal procedure. We have plans for developing the areas, and Park Service standards are such that ultimate water demands may be greater than under Forest Service supervision. At the same time, development is dependent on the appropriation of funds and likely to be curtailed during the period of the enlarged national defense program. Thus a time extension of two or three years would be more appropriate than a one-year limit.

Yours very truly,

Preston P. Macy,
Superintendent.

to Olympic 660-05.7*

OFFICE OF THE SUPERINTENDENT

Olympic National Park
July 31, 1940

Memorandum to Supt. Macy:

I looked over your water system at Lapoel today and questioned the campground attendants of that and the Soleduck areas as well as Associate Engineer Hopper. From the data I obtained I am quite certain that Jackson Guard system, permit 2519; Lapoel system, permit 2520; and Graves Creek system, permit 2522; have none of them had the beneficial use of more than 0.01 second feet of water, or approximately 20% of the quantity requested in the applications. I further doubt if the full quantity will be beneficially used for many years, if at all, unless there are marked travel increases and the development of greater facilities.

At the same time, except for Lapoel, where an extension is to be made this summer to the caretaker's quarters, I consider the system placed to beneficial use, and the quantity used to the extent of public need. This need will further increase annually with increased park attendance. Further, the Forest Service perfected certificates which you now own for such campgrounds as Elwha, July Creek, Olympic Hot Springs, and Altaire campgrounds although I doubt if most of these have had full beneficial use.

I do not think we should drop any of the original claim at the moment with park developments so uncertain. Hence, I suggest that we request an extension of time at once. We have good reason as we are not following the Forest Service development program. If the request is denied we still have time to make an excessive claim after Labor Day, which might be accepted, and certainly have time to consider future plans a little further.

In the case of Soleduck, permit 2523, which is for only 0.01 second feet, I feel satisfied that full use has been made. If you have the state forms No. 379 which we returned to you in the early spring I suggest we fill the one out for that system and I will prepare a statement of justification for your files to protect your signature.

During the conference of Superintendents and Inspectors at San Francisco in March you brought up the question of extending the penstock of a lodge to give greater head and power so that you could use it for light in one of your campgrounds. I do not seem to have my notes on that matter with me but believe it was at Lapoel. This plan now takes on new significance,

The plan first offers a means of perfecting the unused portion of your claim under application No. 2520, though this would require a change in point of diversion from your system to that of

2

the lodge system, and a conversion from campground domestic use to the inferior power use. Second, a Mr Edward N Brooks has perfected certificate No. 876, permit No. 1974, with priority of Oct. 21, 1932 for 1.00 second feet from Lapcoel, which I believe to be for the power and domestic use at that lodge. Your transfer of about 0.04 second feet to his system would make it available for his domestic use. Your change in his point of diversion would require that he, as well as you, file applications for the changes.

Your files include an office memo from Ward H Ellis of the Forest Service, dated Feb. 8, 1939 regarding a change at Dungeness Forks Forest Camp in which the State Supervisor is reported to have said that such change would not require extra fees or reposting, but I am not sure that it would apply to both imperfect and perfected rights, nor to private as well as federal changes. This needs more investigation and consideration.

From my observations this afternoon, the stream was flowing between one and two second feet after the diversions for the lodge and your campground had been made. However, Mr Hopper advised that the stream has been nearly dry during his brief stay in the park. Your suggested plan involved a consolidation of private and federal systems which is not generally favored by Park Service officials, but for which you can find several precedents in my recent "Water Rights Influence on National Park Service Water Systems". In addition you need power at the campground which is not otherwise available at all times from Lapcoel Creek. Therefore, I think your plan has merit, but should be carefully considered with due regard to alternate development from some other stream draining into Lake Crescent.

I also find the following certificates of water right in your files which have been acquired from the Forest Service:
 Certificate No. 822 for 1.0 second foot from Griff Creek for power and domestic purposes at your Elwha Light plant.
 Certificate No. 594 for 0.02 second feet for domestic purposes at the Elwha Ranger Station from Griff Creek.
 Certificate No. 1249 for 0.05 second feet from small brook tributary to Elwha River for public domestic use at Elwha Forest Camp.

I understand that you have plans to improve at least the system in the forest camp, and that the CCC is using water from one of the two domestic systems. I believe the right to 0.07 second feet (45,242 gpd) is ample for all the needs now made or proposed, but the proposed changes should recognize the right, and the changes in use, and we may have to transfer part of the right from one system to the other when I see the design for the new system.

The power right is for 9 KW. I doubt if that will be ample for all needs in the future. The same right might produce more power by changing the point of diversion to give greater head. An alternate is to file on a junior right for more water at the present diversion with an increased pipe size as needed. The design should consider both possibilities.

In this connection your records show that the Northwestern Power and Light Company already has certificates NO's 610, 613, 611, and 612 for 800.0 second feet of direct diversion and 65,000 acre-feet of storage from the Elwha River, all senior to all your rights in the area. Your

3

certificates 594 and 1249, as possibly consumptive, are most in jeopardy, but not seriously since the river is not adjudicated and the State Supervisor does not see any need for such action. The power certificate No. 822 is non-consumptive and will cause no conflict as long as your diversion and return are both above or below the same points of the Company diversion. You are merely cautioned not to let the two systems cross, and referred to an undesirable example in my "Water Rights Influence on National Park Service Water Systems".

Your records also show the following certificates to water rights to have been acquired from the Forest Service by the Park Service:

- Certificate No. 1167 for 0.05 sec. ft. from July Creek for domestic use at the July Creek Forest Camp.
- small*
Certificate No. 1251 for 0.05 sec. ft. from a small brook tributary to Boulder Creek for similar use at the Olympic Hot Springs Forest Camp. (I shall try to get some more data from Mr. Hopper in the morning and believe this is ample for both your camp and the lodge operating under special use permit, though the certificate may have to be amended.)
- prob. doesn't include special use permit*
Certificate No. 1252 for 0.10 sec. ft. from small brook tributary to the Elwha River for similar use at the Altaire Forest Camp. (This is probably more than ample, but is junior to the Northwestern Bower and Light Company rights with a situation which I have already explained
- small*
is place
Certificate No. 1168 for 0.05 sec. ft. from a nameless tributary of the Greywolf, a branch of the Dungeness, for similar use at the Dungeness Forks Forest Camp. (This right should be ample for all your needs at Deer Park and the area of present use, but will require amendment. The right is junior to rights for the Sequim irrigation district with its potential demand for about 105,000 acre-feet per year for 35,000 acres, whose actual claims and rights are not listed in your files and hence only estimated by me. This greater Dungeness drainage, according to the State Supervisor of Hydraulics, needs the greatest watching, and the Park Service should consult the Water Rights Section before making any changes or new diversions.)

I find that you have a conveyance from the Forest Service for permits No's 2519, 2520, 2522 and 2523, in duplicate, which was required by the Supervisor before you could proceed with the perfection of the rights. Your file does not include a similar conveyance for the seven certificates more recently acquired. Since such a conveyance would be required before you amended any of the certificates I believe you should obtain it. I have taken the liberty to take the carbon copy for further copying at our office and suggest that you merely wait for possible comment from Regional Attorney Taylor before requesting a similar one on the certificates.

You have obtained a reference to all recorded rights with diversions in the park, but not those between the park and sea. Both would be necessary for proper evaluation of park claims, but you will also note from the letters of the State Supervisor that he has the records only of rights initiated since the water code was established in 1917. Other records may, or may not, exist, in the office of the various county auditors. In other words, I do not think it is

4

essential to get the other data at this time. The main thing is to keep us advised of any plans you may make for water use in any tributary of the Dungeness and Elwha Rivers. Meantime I shall try to list our essential needs for further water rights records in a further report after my return to San Francisco.

On my way to this park, yesterday, I called on the State Supervisor, but unfortunately did not have the information I now have. I did find, however, that he has no authority over rights initiated before the code was adopted in 1917. Further, he cannot record a right initiated prior to 1917, whether it was properly recorded in the county, or not; and he does not recommend any attempt to record such uses now, until an adjudication may be called. At the same time, we may have, and are likely to acquire claims to use which were initiated prior to 1917 by our land purchases. For this reason every such purchase should be covered by a deed including all appurtenant water rights. Further, we should get data on the early use, and file it for reference at the time of a possible adjudication.

For the above reason I wish to suggest that a list be prepared of all water systems now in use by the Park or its operators, which should include all information you may have, or can obtain from the vendors. Further, each water system should be surveyed and shown on your utility maps. We have limited funds for such work each year. I intend to allot a portion of the current funds to your park on my return to the office, but they will probably be inadequate for all the needs, especially with the Queets addition being acquired. May I request, therefore, that you use what we provide, first for the more important systems either measured by importance to the Park or by the urgency of proposed changes. I shall add my suggestions by correspondence from San Francisco.

A. van V. Dunn
Hydraulic Engineer

CC-Joseph E Taylor, Regional Attorney (Please copy for Regional officers, Chief Engineer, and the Director)

(6 copies 660-887) TAYLOR

July 25, 1940

Memorandum for Superintendent Macy,
Olympic National Park:

Reference is made to your memorandum of July 23, concerning the application of water to a beneficial use under existing water rights permits now held by the National Park Service.

As you no doubt will have observed from the copy of Hydraulic Engineer A. van V. Dunn's itinerary previously furnished you, he has included Olympic National Park. Originally it was anticipated that he would visit your Park after a visit to Mount Rainier. However, he may have modified that plan by reversing that order, in which case he will have advised you.

It is suggested that copies of permits be made available to Mr. Dunn on his arrival, and he can then outline to you the information necessary in order to obtain an extension of time within which to submit final proof.

Answering the last question of your memorandum, it is my opinion that following acceptance of cession, ~~exclusive~~ of jurisdiction, previously made by the State of Washington, it will be unnecessary to proceed with further filings for water rights. The status of water rights existing as of the time of the acceptance of such cession will have to be investigated and the terms of the acceptance, together with the terms of the cession, will have to be considered, but I am sure that we will find the filings with the State of Washington would thereafter be of no effect, except for record purposes. For such record purposes it may be subsequently determined to be advisable to carry on filings with the State Supervisor of Hydraulics.

May 27, 1940

Memorandum for Superintendent Macy,
Olympic National Park:

Reference is made to your memorandum of May 8, 1940, regarding proof of application of water to beneficial use at Soleduck, Graves Creek, Lapool and Jackson Guard Station.

There are two types of information necessary:

1. The actual amount of water used per day from each water system on peak days, and so far as possible as an average during the season.
2. The number of people in residences, camps, and as picnickers actually using the water for the periods measured. If any of the water is used for irrigation, we should also know the acreage irrigated, and what was growing on it.

Associate Engineer Hopper can best determine a method of measuring water used (not total diverted), and we assume you will keep attendance records by days for the various areas. By proper cross reference as to dates, these two sets of data will be what we need.

It is not necessary to keep the records all summer, but we should get peaks such as Memorial Day, and July 4. Then, if you have a later date with greater attendance we can make a proportionate estimate of consumption that date.

Since the proof is needed by September 1, we should submit it during August. Hydraulic Engineer Dunn expects to visit the area to get a general picture of the water problem some time in July or August, but it would be well to send a copy of your data to this office by August 1 in order that we can be sure to have it ready on time.

Your attention is called to the fact that you may not use as much water as was covered by the permits. If that is the case, please advise us about mid-July as to what quantity you have been using, and the attendance. Under those circumstances we may wish to show progress and request an extension of time a little before September 1, 1940.

FILE COPY

601 Sheldon Building
March 15, 1940

Memorandum for Superintendent Macy,
Olympic National Park:

Re: Olympic Water Rights.

As a review of our conference of March 14, 1940, you have the following water rights which were transferred from the Forest Service and perfected by the Park Service during the past summer:

Permit #2523 - Soleduck Hot Springs Water System.
Permit #2522 - Graves Creek Campground Water System.
Permit #2520 - Lapoeel Creek Campground Water System.
Permit #2519 - Jackson Guard Station Water System.

In addition, you have two other water systems, at Eagle Rock and some other area, which were built by the Forest Service, but for which you have no records of water rights. We decided that there was no great rush on water rights for Olympic, but that it would be desirable for you to determine from the Forest Service whether they had filed or perfected rights for these two systems.

If water rights were actually perfected, we should like to obtain copies of the maps, applications and permits issued by the State Supervisor of Hydraulics.

AvVD:SH

Regional Attorney.

FILE COPY

601 Sheldon Building
October 19, 1939

Memorandum for Superintendent Macy, Olympic National Park:

Reference is made to Acting Superintendent F. J. Overly's memorandum of October 11 to the Regional Director concerning water right permits Nos. 2519, 2520, 2522, and 2523, originally issued to the United States Forest Service, covering appropriations of water in the areas now within the boundaries of Olympic National Park, and which permits were assigned to the National Park Service, and, I understand, the original assignment was filed with the Supervisor of Hydraulics for the State of Washington.

In Mr. Overly's memorandum it is asked what is meant by complete application of water to a beneficial use, and it is pointed out that the water systems themselves have been completed and water has been, and is being, used.

To the extent that water has been, and is being, used, there is an actual application to a beneficial use. However, we were doubtful as to whether it could be shown that the full amount of water filed upon in each application had actually ever been used. Complete application to a beneficial use means the application of the full quantity of water filed upon to a beneficial use or uses. Inasmuch as it is our custom to always try to appropriate more water than is actually being used at the present time, in order to allow for future expansion, we always request a period of years within which to make complete application to beneficial use. Apparently the Forest Service did likewise in their filings.

If you are able to establish an application to the beneficial use or uses specified in the applications, of all of the quantities of water filed on in connection with any of these systems, you are in a position to file your proof of complete application to beneficial use with respect to those systems. If, on the other hand, you are presently using only a portion of the water filed upon, it behooves us to wait for the full period in order to attempt to establish full use of the quantity of water covered by the permit.

We trust that we have made ourselves clear with respect to the distinction between a complete application to a beneficial use and merely the completion of construction and use of some of the waters filed upon.

Memorandum for the Director:

Reference is made to our memorandum for Superintendent Macy of March 15, 1939, a copy of which was sent to you, returning four permits Nos. 2519, 2520, 2522, and 2523, issued to the United States Forest Service, covering appropriations of water in areas now within the boundaries of Olympic National Park.

In that memorandum we stated that copies would be furnished to the Director, and we are accordingly forwarding to you herewith copies of each of the four permits above numbered. Also enclosed are copies of section plats to accompany the permits. In addition, we are sending to you herewith copies of letters of October 14, 1938, and February 25, 1939, from the U. S. Forest Service to Superintendent Tomlinson, letter of February 4, 1939, from the State Supervisor of Hydraulics to Mount Rainier National Park, and copy of assignments of the four water right permits from the U. S. Forest Service to the National Park Service.

We prepared in this office and forwarded to Superintendent Macy for filing with the Supervisor of Hydraulics forms covering notice of beginning of construction, notice of completion of construction, and proof of appropriation of water, for each of the four systems covered by the permits, and have been advised by the Superintendent that these have been filed as required. Complete application of the water to a beneficial use is not required until October 1, 1940. Prior to that date, upon receipt of information from the Superintendent that such complete application has been made, we will prepare the proper forms for filing with the Supervisor of Hydraulics, in order that a final certificate may be issued. In the event complete application is not made on or before October 1, 1940, an extension of time will be requested.

April 10, 1939

Memorandum for Regional Attorney Taylor:

Re: Water Rights, Mt. Olympus.

In reply to your memorandum of March 10, 1939, Superintendent Tomlinson has forwarded two copies of each of the maps accompanying the following old Forest Service filings for Mount Olympus, which we have recently recorded in the name of the United States for the National Park Service:

Application No. 2519 - Jackson Guard ^{Station} ~~Campground~~ Water Supply.
Application No. 2520 - La Poel Campground Water Supply.
Application No. 2522 - Groves Creek Campground Water Supply.
Application No. 2523 - Soleduck Campground Water Supply.

These copies were made by Assistant Engineer George T. Hopper, so far as I can determine, and are evidently very carefully done. They are not, however, certified copies, and cannot be further reproduced without photostating or tracing.

As a part of the permanent record, I believe it would be to our advantage to order photostat negatives of the original drawings from the State Supervisor of Hydraulics. From these negatives we should supply prints for the park, Regional Engineer's office, the Director, and yourself.

A. van V. Dunn,
Associate Engineer.

601 Sheldon Building
March 15, 1939

Memorandum for Superintendent Macy:

Through: Superintendent Tomlinson.

Reference is made to our memorandum of March 10 upon the subject of completion of necessary forms with respect to the permits to appropriate water Nos. 2523, 2522, 2520, and 2519, issued to the United States Forest Service, covering areas now within the boundaries of Olympic National Park. My memorandum apparently crossed in the mails yours signed by G. T. Hepper, Assistant Engineer, of March 8, with which were supplied certain missing data necessary for completion of the forms previously submitted to us.

We are herewith returning the applications above numbered for retention in your files, and we have made copies of these for our files, as well as for the Director and Regional Director. In addition, we are enclosing in duplicate, completed except for signature, forms covering notice of beginning of construction, notice of completion of construction, and proof of appropriation of water, for each of the four systems covered by the applications. You will note, in connection with permit No. 2523 covering use for public campground at Seleduck Hot Springs, that a typed copy of the notice of completion of construction is furnished for your files. This was made necessary by the fact that there was only one printed form remaining when this notice was prepared.

We are also returning herewith the original and duplicate assignment of the applications and permits above mentioned, executed by the United States Forest Service. We have made copies of this assignment for our records and those of the Director and Regional Director.

It is suggested that you forward to the Supervisor of Hydraulics the original assignment and retain the duplicate copy for your files. At the same time, it is suggested that you file the original notices herewith enclosed after signature by you, with the request that they be noted of record after the notation of the assignment.

We are returning herewith the following papers received with Mr. Kopper's letter of February 27:

Letters of October 14, 1938, and February 25, 1939, from the U. S. Forest Service to Superintendent Tomlinson.

Letter of February 4, 1939, from the State Supervisor of Hydraulics to Mount Rainier National Park.

Invoice of February 4, 1939, from the Division of Hydraulics to the National Park Service for filing and recording certificates.

We have previously forwarded to you a voucher prepared to cover the recording fee of the assignment in the sum of \$2.00, which should now be forwarded with the assignment itself to the Supervisor of Hydraulics, and, upon signature by the Supervisor of Hydraulics, should be returned to us in order that we may place it in channels for payment.

May we caution you again that it is most desirable to have these rights now in the name of the United States of America, and the signature is made by the Superintendent as the authorized representative thereof. Should the Supervisor of Hydraulics question this in view of the assignment by the Forest Service, it is hoped that you may be able to give a satisfactory explanation to him.

Encls.

March 10, 1939

AIR-MAIL

Memorandum for Superintendent Tomlinson:

Attention: G. T. Hopper, Assistant Engineer.

Reference is made to your letter of February 27 enclosing applications for permit to appropriate water Nos. 2523, 2522, 2520, and 2519, issued to the U. S. Forest Service, covering areas now within the boundaries of Olympic National Park.

It is noted that at that time you were writing to the Forest Service for information necessary to complete forms Nos. 10615 and 10618, questions 5, 6, and 7. We are wondering if you have had any response from your inquiry to date. Before completion of the forms forwarded to us, we should have this information, and, inasmuch as the permits lapse on April 1, we should have it as soon as possible. The information should include the date of beginning of construction and the date of completion of construction.

With reference to question No. 7, which is a statement of the date of complete application to beneficial use, we feel that that may be omitted at this time, inasmuch as we have another year and a half before such complete usage becomes necessary.

In question No. 10 reference is made to a map filed with the application, and we feel that we should be furnished either with prints of these maps, or, what is perhaps better, a Van Dyke negative from which we can have prints run off for ourselves, the Regional Director, and the Director, and any you might care to have. It might be necessary to procure such a Van Dyke from the Supervisor of Hydraulics, if the original tracing is on file in his office, and if there are certain costs or fees in connection with procuring such a negative they can be defrayed from our funds. We will make copies of the applications just as they are on file.

It is noted from the correspondence that the Forest Service has already paid the fees for the examination, filing, and recording of the applications, and the statement prepared by the Supervisor of Hydraulics seems to cover recordation of certificates, from which we infer that he means certificates issued after proof of complete beneficial use. Consequently, it should not be necessary at this time to deposit those fees, and the only fee that we can see necessary right now is the recording fee for the assignment in the sum of \$2.00. We are forwarding herewith a voucher covering that fee, which we ask that you retain until we have forwarded the completed forms covering beginning and completion of construction.

All filings should be in the name of the United States of America per the Superintendent.

Encl.

Joseph E. Taylor,
Regional Attorney.

WATER RESOURCES - Olympic
Water Rights

Major O. A. Tomlinson, Superintendent,
Mount Rainier National Park,
Longmire, Washington.

Dear Mr. Tomlinson:

Reference is made to your letter of March 2.

Our records show the following data as to starting and completion dates of construction on the four permits recently sent you:

<u>Name</u>	<u>Starting Date</u>	<u>Completion Date</u>
Soleduck Forest Camp	1936	1937
Graves Creek	1936	1937
Lapoel Forest Camp	1927	1927
Jackson Guard Station	1936	1937

We regret that our records on these permits do not show anything more definite in dates than as outlined above, but we believe this information as given you will enable you to consummate the permits with the State Supervisor of Hydraulics.

Very truly yours,

JAMES C. ILLER,
Forest Supervisor.

By (SGD) Vondis E. Miller,
Acting

REC'D MAR 6 1939

REC'D MAR 6 1939

March 2, 1939

Mr. James C. Iler, Forest Supervisor,
Olympic National Forest,
Olympia, Washington.

Dear Mr. Iler:

Thank you for your recent transmittal of an assignment covering applications for permits to divert waters for areas now within the boundaries of Olympic National Park.

In filing proof of diversion forms, it is necessary that the starting and completion date of construction be indicated.

May we have this information for these projects at your convenience.

Very truly yours,

O. A. Tomlinson,
Superintendent.

By
G. T. Hopper,
Ass't Engineer.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
MOUNT RAINIER NATIONAL PARK

LONGMIRE, WASHINGTON February 27, 1939

REC'D MAR 2 1939

Memorandum to the Regional Director:

Attention: Regional Attorney.

There are enclosed applications for permit to appropriate water, No. 2523, 2522, 2520 and 2519 issued to the U. S. Forest Service, covering areas now within the boundaries of Olympic National Park.

There is also enclosed correspondence concerning the above permits, and an assignment to the U. S. Department of the Interior, National Park Service, Olympic National Park by the Forest Service as requested by the Supervisor of Hydraulics.

There are also enclosed forms necessary for the completion of permits and a bill from the State covering additional filing fees.

We are forwarding these to your office for completion and filing with the State.

We are writing the Forest Service for information necessary to complete forms No. 10615 and 10618 questions 5, 6 and 7. This information was requested from the Forest Service but was not received, and will be forwarded as soon as obtained.

O. A. Tomlinson,
Superintendent.

Major O. A. Tomlinson, Superintendent,
Mount Rainier National Park,
Longmire, Washington.

Dear Mr. Tomlinson:

Reference is made to our letter of October 14, and to a
letter of February 4, addressed to you by the State Supervisor of
Hydraulics, all of which are returned herewith.

The assignment required by the State Supervisor of Hydraulics
is attached in duplicate together with applications for permit, num-
bers 4385, 4386, 4388, and 4389.

If we can be of further assistance, please advise.

Sincerely yours,

JAMES C. ILER,
Forest Supervisor.

STATE OF WASHINGTON
DEPARTMENT OF CONSERVATION AND DEVELOPMENT
DIVISION OF WATER RESOURCES

Charles J. Bartholet, Supervisor

OLYMPIA

February 4, 1939.

Mount Rainier National Park
Longmire, Washington

Gentlemen:

Re: Permits Nos. 2519, 2520, 2522 and 2523.

Complying with your request of the 2nd, we are enclosing, in duplicate, forms for filing notices of beginning and completion of construction, complete application of water to beneficial use and proof of appropriation to be filed in connection with the above numbered permits. The duplicates are for your records. Upon receipt of these forms properly made out and signed, and payment of the statutory fees set out in the attached statement a final water right certificate will issue.

How do you wish the certificates made out? In the name of the Mount Rainier National Park, National Park Service or Department of the Interior? Please give this information definitely. In any case, however, it will be necessary to have an assignment from the U. S. Forest Service of the permits. This assignment must be recorded in this office and there is a statutory fee of \$2.00. Any form of assignment which sets out the permits definitely will be acceptable to this office and all four permits may be included in one assignment.

Yours very truly

CHAS. J. BARTHOLET
Supervisor of Hydraulics

Improvements
Water Systems
Reports
Olympic

Major O. A. Tomlinson,
Supt., Mt. Rainier National Park,
Longmire, Washington.

Dear Sir:

In a recent check-up on our water rights we have found permits issued by the State Division of Hydraulics for the diversion of water for the following locations:

Soleduck Forest Camp -	permit # 2523
Graves Creek Forest Camp -	" # 2522
Lapoel Forest Camp -	" # 2520
Jackson Guard Station -	" # 2519

The water systems for the above are all complete and it is only a question of filling out the necessary forms to obtain the final certificate of water rights. All the examination, filing, and recording fees have been paid and the permits lapse April 1, 1939, apparently, if no further action is taken.

We understand it is possible to transfer these permits and we thought you might be interested in taking them over.

Very truly yours,

VONDIS E. MILLER,
Acting Forest Supervisor,

By
(Sgd) C. M. Adams
Acting.

(Original returned to Superintendent Macy.)

WHEREAS, the U. S. Forest Service by application duly made,
was granted the following water right permits;

Soleduck Forest Camp	- - - -	Permit #	2523
Graves Creek Forest Camp	- - -	"	2522
Lapoel Forest Camp	- - - -	"	2520
Jackson Guard Station	- - - -		2519

which water rights were granted by the State of Washington to the
U. S. Forest Service; and

WHEREAS, the Olympic National Park has been created out of a
portion of the National Forest Reserves, to which said permits
belong; and

WHEREAS, said permits will lapse on April 1, 1939, unless
appropriate and timely action is taken to renew them; and

WHEREAS, said permits are of no further use or benefit
to the U. S. Forest Service and are of value and use to the
U. S. Department of the Interior, National Park Service, Olympic
National Park;

NOW, THEREFORE, know all men by these presents, that the
U. S. Forest Service does hereby convey, transfer, and assign to
said U. S. Department of the Interior, National Park Service,
Olympic National Park, all its rights and claims to the water
right permits above described.

WITNESS the signature of the U. S. Forest Service this

24 day of Feb'y. 1939.

Memorandum for Superintendent Tomlinson:

With reference to copy of your letter of February 2 addressed to the State Supervisor of Hydraulics, we are pleased with the information that four Forest Service appropriations named therein may be transferred to the National Park Service. If there are any changes to be made at the time of transfer, such as points of diversion, places of use, or purposes for which the water may be used, this office will be glad to aid you in the preparation of the appropriate transfers or filings.

We will be glad to be kept informed as to developments with reference to water rights at Olympic National Park.

Joseph E. Taylor,
Regional Attorney.
