CERTIFICATE RECORD No. 19, PAGE No. 9359

STATE OF WASHINGTON, COUNTY OF Clallam

CERTIFICATE OF SURFACE WATER RIGHT

(In accordance with the provisions of Chapter 117, Laws of Washington for 1917, and amendments thereto, and the rules and regulations of the State Supervisor of Water Resources thereunder.)

This is to certify that U. S. D. I. OLYMPIC NATIONAL PARK
of Port Angeles, State of Washington, has made
proof to the satisfaction of the State Supervisor of Water Resources of Washington, of a right to the use
of the waters of Unnamed Stream, a tributary of Quillayute River,
with point or points of diversion within the Government Lot 1
Sec. 21, Twp. 28 N., R. 15 W.W. M., under and subject to provisions contained in
appropriation Permit No. 13422 issued by the State Supervisor of Water Resources, and
that said right to the use of said waters has been perfected in accordance with the laws of Washington,
and is hereby confirmed by the State Supervisor of Water Resources of Washington and entered of
record in Volume 19, at Page 9359, on the 4th day of June, 1965
that the priority date of the right hereby confirmed is December 23, 1963; that the
amount of water under the right hereby confirmed, for the following purposes is limited to an amount
actually beneficially used and shall not exceed 0.045 cubic feet per second during entire
year for Community Domestic Supply for Park Purposes.

A description of the lands under such right to which the water right is appurtenant, and the
place where such water is put to beneficial use, is as follows:

Rialto Beach Picnic Area, Olympic National Forest, within Sec. 21, T. 28 N., R. 15 W.W.M.

Division of Water Resources

Permit to Appropriate Public Waters of the State of Washington

Book No. 34 of Permits, on Page 13422 Under Application No. 18273

U. S. D. I. OLYMPIC NATIONAL PARK

of Port Angeles, Washington

is hereby granted a permit to appropriate the following described public waters of the State of Washington, subject to existing rights and to the following limitations and provisions: Permittee shall construct and maintain at his own expense a weir, or other suitable device, for measuring any water granted herein for irrigation purposes and such appropriation shall be subject to a reasonable rotation system if ordered by the State Supervisor of Water Resources. Diversion intake shall be tightly screened at all times with wire having a mesh opening not greater than 0.125 (1/8) inch

Priority date of this permit is December 23, 1963

Source of the proposed appropriation is an unnamed stream

tributary of Quillayute River

The quantity of water appropriated shall be limited to the amount which can be beneficially applied and not to exceed 0.045 cubic feet per second, or its equivalent in case of rotation, to be used for the following purposes: Community domestic supply for park purposes

as more definitely set out below.

The approximate point of diversion is located 1000 feet South and 100 feet West from

northeast corner of Sec. 21

being within Gov't. Lot 1 Sec. 21, Twp. 28 N., Rge. 15 W. W. M.,
county of Clallam

The use, or uses, to which water is to be applied:

FOR DOMESTIC SUPPLY AND MISCELLANEOUS USES: 0.045 cubic feet per second during entire year for community domestic supply for park purposes to be used

within Rialto Beach Picnic Area, / Olympic National Forest Sec. 21, Twp. 28 N., Rge. 15 W. W. M.,

FOR IRRIGATION: _____ cubic feet per second, _____ acre-feet per year, from _____ to _____ each year, for irrigation of _____ acres, described as follows:

FOR POWER: cubic feet per second continuously each year. Total power to be developed theoretical horse power. Total fall to be utilized feet.
Nature of works by means of which power is to be developed

Works to be located in Sec., Twp. N., Rge. W. M.

Water to be returned to

Point of return Sec., Twp. N., Rge. W. M.

Use to which power is to be applied

FOR MUNICIPAL SUPPLY: cubic feet per second during entire year to supply

DESCRIPTION OF DIVERSION WORK

Height of dam 4 ft. 9 in.; Length on top 26 ft.; Length on bottom 26 ft.

Material to be used and character of construction concrete

Description of headgate 949 ft. of 2 in. plastic pipeline to 20,000 gal. steel reservoir;
480 ft. of 2½ in. plastic pipe from reservoir to place of use in Rialto beach picnic area.
CANAL SYSTEM

At HEADGATE: Width on top (at water line) ft.; Width on bottom ft.;

Depth of water ft.; Grade ft. fall per one thousand feet.

At MILES FROM HEADGATE: Width on top (at water line) ft.; Width on bottom ft.; Depth of water ft.; Grade feet per one thousand feet.

(Please read carefully provisions below)

Construction work shall begin on or before Started

and shall thereafter be prosecuted with reasonable diligence and completed on or before

Completed

and complete application of water to proposed uses shall be made on or before

June 1, 1965

Given under my hand and the seal of this office at Olympia, Washington, this 2nd day of
June, 1964.

Gentlemen:

Enclosed is Permit No. 13422 issued to you under
Application No. 18273. The examination report of
our inspector indicates that your system has been completed.

Also enclosed is Proof of Appropriation, which is to be
filed when the water granted in the permit has been put to
full beneficial use. This notice is not to be filed until
the water has been put to full use. Please note that it
requires your notarized signature.

The statutory filing and recording fees of \$3.00 payable to
the Department of Conservation and \$ 2.00
payable to the Clallam
County Auditor should accompany these forms. Kindly send
two separate checks or money orders.

Please read carefully the instruction sheet as well as both
sides of your copy of the permit.

Very truly yours,

Protests _____

Quantity recommended (total) 0.045 c.f.s. Irrig. _____ Dom. 0.045 c.f.s.

Power _____ Municipal _____ Other uses _____

Department of Fisheries and Game report See below

Special remarks and provisions:

In accordance with the recommendations of the Departments of Fisheries and Game, permit shall be subject to the following provision: The diversion intake shall be tightly screened at all times with wire having a mesh opening not greater than .125 (1/8) inch.

It is noted that the applicant presently enjoys Surface Water Certificate #266 for diversion of 0.01 c.f.s. from Washington Pulp Creek for use in Gov't. Lot 3 of Sec. 22. Since the present source of appropriation is from an unnamed stream farther west and supplies the Rialto Beach picnic area, this constitutes the only right covering the new place of use.

0.045 c.f.s. equals 20 gallons per minute.

In accordance with R.C.W. 90.03.290, I find that there is water available for appropriation from the source in question and that the diversion proposed in the application will not impair existing rights or be detrimental to the public welfare. Therefore, permit should issue as recommended above, subject to existing rights and indicated provisions.

Signed this 1st day of April, 1964

STATE OF WASHINGTON
DEPARTMENT OF CONSERVATION
Division of Water Resources

APPLICATION FOR A PERMIT
To Appropriate Public Waters of the State of Washington
(Read directions on last page carefully before filling out this form)

Application No. 18273

I, United States of America,
(Name of applicant)
of Olympic National Park, Port Angeles, Washington,
(Complete postoffice address)
do hereby make application for a permit to appropriate the following described public waters of the State of Washington subject to existing rights:

If the applicant is a corporation, give date and place of incorporation

1. The source of the proposed appropriation is Washington Pulp Creek,
(Name of stream)
tributary of Quillayute River

2. The amount of water which the applicant intends to apply to beneficial use is 0.045
cubic feet per second, 32 acre-feet per year.

3. The use to which the water is to be applied is domestic supply
(Irrigation, power, mining, manufacturing, domestic supplies, etc.)

4. Time during which water will be required each year 365 days

5. The approximate point of diversion is located 1200 ft. S 45' W to SW, Sec. Cor. Sec. 15,
(Give distance and bearing to section corner)
T 28 N, R 15 W

being within the SW-1/4, SW-1/4 of Sec. 15, Tp. 28 N., R. 15 W. W. M.,
(Give smallest legal subdivision) (E. or W.)
in the county of Clallam

6. The pipe line to be 1458 ft. ~~xxxxxx~~ in length, terminating
(Main ditch, canal, or pipe line)
in the NE-1/4, NE-1/4 of Sec. 21, Tp. 28 N., R. 15 W. W. M.,
(Smallest legal subdivision) (E. or W.)
the proposed location being shown on the accompanying map.

7. Estimated cost of development necessary to utilize fully the appropriation herein asked for
\$8,000.00

8. Does the stream from which you wish to appropriate water flow through the tract of land on which the water is to be used? Yes

9. DESCRIPTION OF WORKS:

(a) DIVERSION WORKS—

(1) Height of diversion dam 4'-9"; length on top 26.0 feet; length on bottom 26.0 feet; material to be used and character of construction concrete

(Loose rock, concrete, masonry, rock and brush, timber crib, etc., wasteway over or around dam)

(2) Description of headgate concrete

(Timber, concrete, etc., number and size of openings)

When storage works are contemplated a storage permit must be filed in addition to the above. These forms can be secured, together with instructions, by addressing the State Supervisor of Water Resources, Olympia, Washington.

(b) Description of Ditch or Pipeline System 939' of 2" plastic pipe diversion to
20,000 steel reservoir 480' of 2-1/2" plastic pipe from reservoir to point of use.

10. IRRIGATION: Number of acres to be irrigated none

11. MUNICIPAL OR COMMUNITY WATER SUPPLY:

Rialto Beach
 To supply the city or community of Picnic Area, Clallam County, having a
(Name) (Name)
 present population of 200 and an estimated population of 200 in 19 66.

(a) Estimated present requirement 20 g.p.m.

12. LEGAL DESCRIPTION OF PROPERTY on which water is to be used, *for all purposes*
 other than Municipal Supply or Power (Copy legal description from deed)

Municipal or domestic supply

(a) What interest do you have in the above described property owner

(b) Are there any existing water rights appurtenant to the above described property yes
 If so, from what source See Remarks

13. POWER:

(a) Total amount of power to be developed H. P.
(Theoretical horsepower)

(b) Total fall to be utilized feet.
(Head)

(c) The nature of the works by means of which the power is to be developed

(d) Such works to be located in of Sec. , Tp. N., Rge. W. M.
(Legal subdivision) (E. or W.)

(e) To what stream is the water to be returned?

(f) Locate point of return Sec. , Tp. N., Rge. W. M.
(E. or W.)

(g) The use to which power is to be applied is

14. WORK SCHEDULE:

(a) Construction work will begin on or before has begun

(b) Construction work will be completed on or before January 1963

Triplicate maps of the proposed ditch or other work, prepared in accordance with the rules of the State Supervisor of Water Resources, accompany this application.

(Applicant)

(SIGN HERE) /Sgd/ John E. Doerr Address _____
(Owner of Land in Item 12)

Signed in the presence of us as witnesses:

(1) _____
(Name) (Address of witness)

(2) _____
(Name) (Address of witness)

Remarks: Application No. 2272, Certificate No. 266 of Washington Pulp and Paper Company, filed April 3, 1928, for 0.01 c.f.s. of the waters of Washington Pulp Creek, according to our real estate deed records, was acquired along with the land from the Crown-Zellerbach Corporation by condemnation in 1943. The final judgment of the related Tract No. C77 was combined with others of that company and is worded "including all interest of the seller in and to the water rights..." Diversion and use for this right were in Lot 3, Sec. 22 of T. 28 N., R. 15 W., This diversion and use has been continued by the National Park Service until the present time. The new diversion is merely a new location upstream from the old diversion.

Nothing herein shall constitute a waiver of any other rights which the United States may have to the same water.

STATE OF WASHINGTON, }
COUNTY OF THURSTON. } ss.

This is to certify that I have examined the foregoing application together with the accompanying maps and data, and return the same for correction or completion, as follows: _____

In order to retain its priority, this application must be returned to the State Supervisor of Water Resources, with corrections, on or before _____, 19____

WITNESS my hand this _____ *day of* _____, 19____

State Supervisor of Water Resources.

DIRECTIONS FOR PREPARING APPLICATIONS

- Initial examination fee of \$10.00 should accompany each application. If additional fee is required, you will be notified.
1. Write plainly in ink or use typewriter.
 2. Read carefully all questions. Answer only those that apply to your project.
 3. Under Question 2 estimate quantity in cubic feet per second or gallons per minute.
1 cubic foot per second equals 450 gallons per minute and is sufficient to irrigate from 40 to 100 acres of land.
0.1 of a cubic foot per second equals 45 gallons per minute and is sufficient for domestic supply and irrigation of 5 to 10 acres of land.
0.05 of a cubic foot per second equals 22 gallons per minute or 31,700 gallons per day. This is ample for a domestic supply and for irrigation of lawn and garden up to 1 or 2 acres.
0.01 of a cubic foot per second equals 4.5 gallons per minute or 6,500 gallons per day. This is ample for an ordinary domestic supply and for irrigation of about ½ acre.
 4. Maps, showing the location of the stream, point of diversion and place of use, must be made in triplicate (3) on the enclosed section plats. If for irrigation, show the approximate area to be irrigated.
 5. In answering Question 5 give approximate distance and direction of diversion point from nearest 40-acre corner, as
"320 feet North and 1100 feet East from South quarter corner of Section 1, Township 13 North, Range 2 East, W. M."
or
"North 36 degrees 20 minutes East 550 feet from the Northeast Corner of the Northwest Quarter of the Southwest Quarter of Section 33, Township 12 North, Range 3 East, W. M."
 6. **Right-of-Way.** If you wish to divert water from or across land not owned by you it will be necessary to secure from the owner the right-of-way needed. The State cannot help you in this.
 7. Be sure to give on the map brief directions for driving to the point of diversion from some town or easily located point on a State Highway. This is for our convenience in making the examination.
 8. If you have been using water since before June 15, 1917, a State permit will be of no advantage to you for that particular use.
 9. Sign application on the line indicated on page 3.

SCHEDULE OF FEES DUE IN CONNECTION WITH OBTAINING WATER RIGHTS
(Sec. 44 of Water Code—Sec. 90.04.040, RCW.)

EXAMINATION FEES

There is a minimum fee of \$10.00 for all applications received.

Additional Examination Fees for Appropriation Applications:

\$2.00 per c. f. s. over 5 c. f. s. to 500 c. f. s., inclusive.
.50 per c. f. s. over 500 c. f. s. to 2000 c. f. s., inclusive.
.20 per c. f. s. over 2000 c. f. s.

Additional Examination Fees for Reservoir Applications:

1¢ per acre-foot over 1000 a. f. up to 100,000 a. f., inclusive.
1/5¢ per acre-foot over 100,000 acre-feet.

FEES FOR FILING AND RECORDING PERMITS

There is a minimum fee of \$4.00 for filing and recording permit.

Additional Permit Fee for Irrigation Purposes:

20¢ per acre over 20 acres to 100 acres, inclusive.
10¢ per acre over 100 acres to 1000 acres, inclusive.
5¢ per acre over 1000 acres.

Additional Permit Fee for Power Purposes:

20¢ per theoretical horsepower over 20 H. P. to 1000 H. P., inclusive.
4¢ per theoretical horsepower over 1000 H. P.

Permit Fee for Other Uses:

For all other beneficial purposes the fee is twice the amount of the examination fee, except for individual household and domestic use; this may include water for the irrigation of a family garden, for which the minimum fee of \$4.00 is charged.

FILING AND RECORDING FINAL WATER RIGHT CERTIFICATE

3. Permit No. 13422 to Appropriate Public Waters of the State of Washington; with letter from M. G. Walker attached.
4. Permit No. 6598 to Appropriate Public Ground Waters of the State of Washington; with letter from M. G. Walker attached.
5. One copy of Water Well Report for Permit No. 6598, Mora Campground.
6. Receipt No. 21248 and Receipt No. 23874 for payment of examination fees and permit fees for Permit No. 13422 and Permit No. 6598.

These papers are being sent to your office so that the Division of Land and Water Rights may have made the required copies needed to bring Dockets 24 and 25 up to date. After duplicating, the originals should be returned to Olympic except as noted.

Items 1 and 2 should be immediately forwarded to the Washington State Division of Water Resources with vouchers for fees as indicated in the letters attached to Permits No. 13422 and No. 6598. These "Proof of Appropriation", which have been signed by the Superintendent and notarized, are due in Olympia by June 1.

The third(drillers) copy of the Water Well Report is in this office so it is unnecessary to return the pink copy, item 5.

Item 6, receipts 21248 and 23874 are of no interest to this office.

Mr. M. G. Walker, Supervisor
Division of Water Resources
Department of Conservation
335 General Administration Building
Olympia, Washington

Dear Mr. Walker:

Enclosed are two water right applications, one for 0.045 c.f.s. of public waters and the other for 20 G.P.M. of ground waters. Also enclosed is a completed Order-Invoice-Voucher covering these applications.

As to the application for public waters you will note under remarks reference to Application No. 2272, Certificate No. 266. Would it be possible to provide us a copy of this certificate?

As to the ground water application, it is pointed out here that ground water has been used from at least three wells in that immediate vicinity prior to June 7, 1945. One of these provided water for Mora Park Resort including a store and residence, 12 housekeeping cabins, gas station and other structures. None of these are being used now, and all the properties within three quarters of a mile are in Federal ownership.

Sincerely yours,

(S&D) JOHN E. DOERR

Memorandum

To: Superintendent, Olympic

From: Acting Regional Chief of Lands, Western Region

Subject: Water Rights for Systems at Rialto Beach and Mora
Campground, Olympic

Enclosed are two draft water right applications for Rialto Beach and Mora Campground for your review and signature. Also enclosed is a completed Invoice, Order, Vouchers, to accompany the applications when submitted. Two blank applications are enclosed in the event you feel some of the data should be revised.

As pointed out in Chief Branch of Water Resources Need's July 1, 1963 memorandum to the Regional Director with copy to you a water right of 0.01 c.f.s. was acquired by the Service in 1943. The transmittal letter to the State Water Rights Board should point this out, and ask that a copy of the permit be returned to us.

This office does not have a copy of the deed or water right. We will probably have to notify the State officials of a change in point of diversion and fill out the proper forms but the early priority date may be of value to us.

JUL 2 - '63

IN REPLY REFER TO:

L54-RLW

See

Memorandum

July 1, 1963

To: Regional Director, Western Region
From: Chief, Branch of Water Resources
Subject: Diversions for water systems, Rialto Beach and Mora Campground, Olympic

The subject diversions were items of construction in a completion report recently reviewed here which bore Superintendent Doerr's approval dated May 22 (P.C.P.'s U91-1 and U95-1). We have no other record of these diversions.

Application No. 2272, Certificate No. 266 of Washington Pulp and Paper Company, filed April 3, 1928, for 0.01 c.f.s. of the waters of Washington Pulp Creek, according to our real estate deed records, has been acquired along with the land from the Crown-Zellerbach Corporation by condemnation in 1943. The final judgment of the related Tract No. C77 was combined with others of that company and is worded "including all interest of the seller in and to the water rights..." Diversion and use for this right were in Lot 3, sec. 22 of T. 28 N., R. 15 W., which may prove useful for perfecting a water right for Mora Campground with a 1928 priority. Because no other water right applications appear to have been made by this Service for these diversions, filings should be made for them as outlined in the second paragraph of the memorandum for your files of November 6, 1961, by Assistant Regional Solicitor George B. Dysart that was written after a meeting with State Division of Water Resources officials (copy enclosed).

Please also note fourth paragraph in Mr. Dysart's memorandum. This Office has had no further information on this aspect of water rights in Olympic. As time permits Mr. Ketcham should investigate this matter.

The Files

November 6, 1961

George B. Dysart
Assistant Regional Solicitor

Meeting with Washington State Division of
Water Resources Relative to Water Rights

On November 2, the undersigned, together with Assistant Superintendent Oscar Sedergren and Mr. Charles Brown, both of the Olympic National Park, met with Mr. Murray G. Walker, Director of Washington State Division of Water Resources, and Mr. Charles Roe, Assistant Attorney General, State of Washington, to discuss the matter of procedures for filing notices with the State of Washington of water diversions and appropriations in the Olympic National Park area by the Park Service.

It was agreed that the Olympic Park officials would file application notices with the State who could file them for the purpose of getting the appropriations on record both as to amount and time of use.

At the meeting the subject was discussed as to the effect of the Federal Government's exclusive jurisdiction over the Olympic National Park area on the State's ability to grant water rights in the area. It was the tentative conclusion of the undersigned that the State may be without authority to issue water rights to anyone, including private persons, for diversions and use in the area which is under the exclusive jurisdiction of the United States by virtue of the cession from the Washington legislature and the acceptance of jurisdiction by Congress. Previously we had considered this question only with respect to water rights acquired for federal use on federal reservations. The exclusive jurisdiction aspect had not entered our prior considerations.

This office will do further research on this latter question. The Washington State Attorney General's office will also examine the question.

Reg. 4

The Washington Attorney General's office and this office will also examine the need for any additional state or federal legislation on certain other aspects associated with the exclusive jurisdiction status of the Park area. It was brought out during the discussions that the filing of subdivision plats with the county records' office may be affected. State law requires that subdivision plats be approved by various state or local officials, including county commissioners, but makes no provision for approval of plats by a federal official, such as the Park Superintendent. Again, there may be a question as to the authority to file or record subdivision plats in an area under exclusive Federal jurisdiction. Certainly such filings are desirable and should be continued.

George D. Dysart

NARRATIVE REPORT

Water System, Rialto Beach, Pacific Coast Area, Olympic National Park

Work Order No. B-26-OLYM (1st Rev.)

Contract No. 14-10-0447-533

Contractor: DelGuzzi, Inc., Port Angeles, Washington

This project consisted of the construction of both diversion and distribution systems to supply water to Rialto Beach Picnic Area.

The diversion portion consisted of:

1. A concrete intake structure, 6.5 cy. of concrete.
2. A 20,000-gallon steel reservoir.
3. A chlorinator house with a water operated hypo-chlorinator.
4. 949 LF of 2" rigid plastic water line, laid on the ground surface.

The distribution portion consisted of:

1. 29 LF of 1" rigid plastic water line.
2. 480 LF of 2½" rigid plastic water line.
3. One concrete block water station.

The project overran the estimate by the following amounts:

<u>Item</u>	<u>Amount</u>	<u>Explanation</u>
1. Conc. for intake structure	\$ 25.00	Extra concrete required to fit field conditions.
2. 2" rigid plastic pipe	102.00 RE	Amount of pipe reduced to fit field conditions.
3. 1" rigid plastic pipe	61.20 RE	Amount of pipe reduced to fit field conditions.

4. 2½" rigid plastic pipe	\$264.00	Amount of pipe increased to fit field conditions.
TOTAL Overage	\$125.80	

The system provides a flow of about five gallons per minute.

Bids for this project were opened at 2:00 p.m., August 29, 1961. Award was made, subject to approval by the Director, on September 14, 1961, to DelGuzzi, Inc., the low bidder. Contract No. 14-10-0447-533 was written covering the combined projects of Work Orders Nos. B-26-OLYM, B-27-OLYM, B-28-OLYM, B-29-OLYM and R-28-OLYM. Notice to proceed was issued October 31, 1961, and received by the Contractor on November 3, 1961. Therefore, November 4, 1961, was recorded as the first day of the contract.

The Contractor started bringing in equipment on November 14, 1961, and continued for about a week.

A highline was rigged to the intake structure and some clearing was done during the next week. On November 28, the first excavation for the dam was started. Heavy rains prevailed. The first concrete used on the dam was poured December 5. The concrete work was completed December 8, 1961.

Work on the reservoir was started December 14, along with the construction of the chlorinator house. The erection of these structures was complete except for paint on January 4, 1962. The paint was applied during the period of January 10-12.

Clearing for the distribution pipe trench started on January 9, 1962. Laying of 2½" plastic pipe was accomplished along with clearing and trenching. The majority of this line was installed by January 17, and effort was diverted to the 2" plastic line to the intake structure.

A Stop Work Order was issued on January 22 due to inclement weather; however, on January 30 it was modified to allow work on this portion of the contract. A complete Stop Work Order due to inclement weather was issued on February 20, 1962.

A partial Resume Work Order was issued June 1, covering this portion of the work and laying of water lines was continued. Progress was very slow.

An inspection on October 3, 1962, revealed poor painting on the interior of the reservoir. This was repaired satisfactorily; however, it is recommended that the reservoir be inspected again before the end of the guarantee period.

During the week of October 15, the mechanical facilities were installed and adjusted and the lines were tested. They were disinfected the following week.

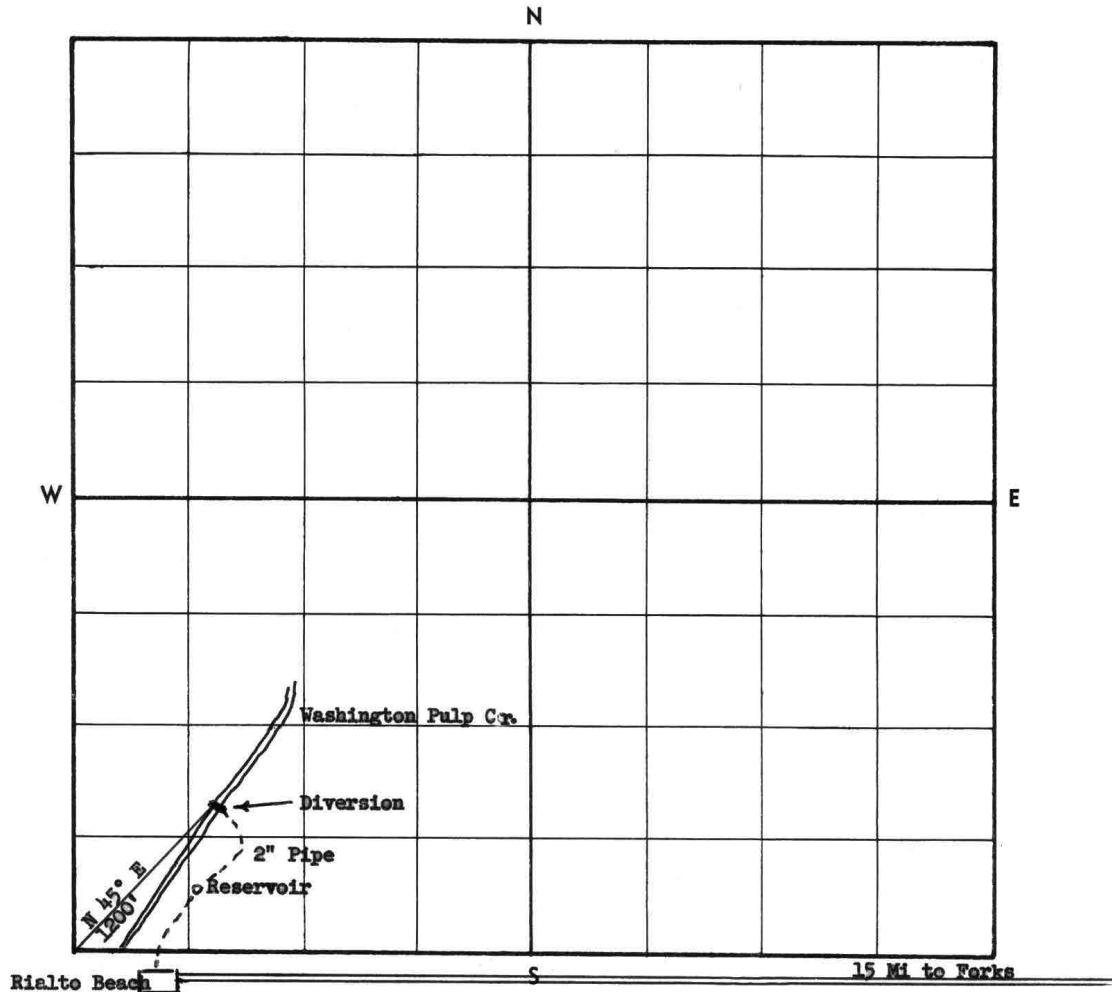

The work was accepted by final inspection and letter on October 23, 1962, and the project resulted in a complete and workable system.

The attached excerpt from the Contractor's final estimate indicates all costs for the project.
