Dear Mr. Coe:

This is in reply to your letter of April 16 requesting clarification of matters pertaining to our application for permit to appropriate waters of Ennis Creek.

The perfected water right (3-1250) with a priority of April 16, 1937 made out in the name of the United States Forest Service was acquired by the Park Service in 1943. It and that of the Lake Dawn Water Association are diversions from the same stream sometimes described as Klahanne Creek. There is no association between these two older diversions on Klahanne Creek and the new diversion on Ennis Creek. They are on two different forks of Ennis Creek, at near the same elevation separated by a ridge.

The executed invoice portion of purchase order WR-34-64-546 has been forwarded to our fiscal office for payment of filing fee.

Gentlemen:

Enclosed herewith please find the purchase order which you recently submitted with your application for permit to appropriate certain waters of Ennis Creek in Clallam County. The invoice portion has been executed for payment.

In reviewing our files we find that two certificates of water right appear to be in question on this same stream, one being issued in the name of the U. S. Forest Service for the appropriation of the waters of a small tributary of Ennis Creek for domestic water supply to the Ennis Creek Guard Station. The second certificate was issued to the Lake Dawn Mountain Park Water Association for the appropriation of certain waters of Klahanne Creek, tributary of Ennis Creek, for community-domestic supply.

At your convenience we would appreciate clarification as to whether the intended point of diversion under your most recent application is associated with the point of diversion in question in either of the two above water rights.

Very truly yours,
