STATUS	Active	SOURCE Surface Water - Stream
REMARKS Hydrologic Unit #18010209		
NARRATIVE:		
L.W. and Byrel Hosford filed an application to appropriate water from two unnamed streams in 1948, the diversion to be located on their property. A license for the diversions was issued in 1952; a total of 5000 gpd could be diverted from Point of Diversion #2 (NW$\frac{1}{4}$ SE$\frac{1}{4}$ Sec.9) and a total of 6000 gpd was vested between the two diversions. The Park Service acquired the Hosford tract within the boundaries of the park in 1972, along with the water right. At that time the water was being used at three government residences, a maintenance office, and a shop building. There is nothing to indicate any change in the use of the diversions from that date. The composition of the water system is unknown.

Please contact either Dan McGlothlin or myself if this is not acceptable or you have any other questions.

To: Associate Regional Director

From: Chief, Water Resources Division

Subject: Transmittal of Petitions for Change in Purpose of Use

Attached are completed Petitions for Change in Purpose of Use forms for water right licenses in Death Valley National Monument and Redwoods National Park. We would appreciate your assistance in transmitting the petitions to the State Water Resources Control Board. We've included for your consideration a draft letter of transmittal.

When staff of the Water Rights Branch prepared the Reports of Licensee for these areas this year, several discrepancies in use of water became obvious. After discussions with park management, petitions were prepared to change the beneficial use of six water right licenses. Copies of the petitions are included for your files.

Payment will be handled through the Rocky Mountain Region's finance office and will be sent to the State Water Resources Control Board in the form of a U.S. Government purchase order under separate cover.

Please contact Ms. Pat Larson or me at (303) 221-5341 if you have questions regarding these petitions or their transmittal.

Mr. Dave Cornelius
State Water Resources Control Board

P.O. Box 2000
Sacramento, CA 95810

Dear Mr. Cornelius:

Enclosed are Petitions for Change in Purpose of Use for six water right licenses the National Park Service holds in Death Valley National Monument and Redwoods National Park.

As Pat Larson of the Water Rights Branch staff discussed with you earlier this year, the National Park Service is updating the status of its water rights in California park units. For many of the water rights, the beneficial uses have changed, so we believe the Petitions for Change are necessary at this time.

The fees for filing these petitions will be sent to your office under separate cover. The fees will be paid by U.S. Government purchase order issued through the Rocky Mountain Region's finance office. When the purchase order is received, your office should follow the instructions provided on the form to obtain payment of these fees.

Please contact Ms. Pat Larson or Owen Williams of the Water Resources Division at (303) 221-5341 if you have questions regarding these petitions.

Memorandum

TO : Memo for the File (Redwood Docket #8) DATE: February 16, 1972

FROM : Water Resources Specialist, David Chavez, Water Resources,
Office of Regional Chief Scientist (WR)

SUBJECT: Redwood National Park Water Rights License 3442

This is in regard to Mr. Gerard S. Witucki's February 16, memorandum to the California State Division of Water Rights and enclosed report of Licensee Form. It is anticipated that an indication concerning the months water was used for 1969-1971 is more in keeping with the general policy of comity, rather than explicitly stating amounts used each month. However, as we do have more information on gallons used per day, as reflected in Superintendent Davis' February 7 memorandum, further amplification is possible so as to specifically document whether the Park is using a full 6000 gallons per day or not. It would appear that using a figure of 200 gallons per person per day and including irrigation we would be approaching the 6000 gallon amount.

From: Superintendent, Redwood

Subject: Report of Water Rights License 3442 (Application 12228)

As discussed with Mr. Witucki on February 2, 1972, enclosed is the subject report required by the State of California, Division of Water Rights.

The area presently served by this system includes three (3) acquired government residences, a maintenance office and shop building. Use of the water is domestic for up to 20 people and irrigation is for 1 acre of grass and shrubs. Stockwatering no longer occurs.

Although the area was taken by the Act of October 2, 1968, final negotiations were not completed until this summer. The use indicated above was only during the last six months.
