Spring No. 39.

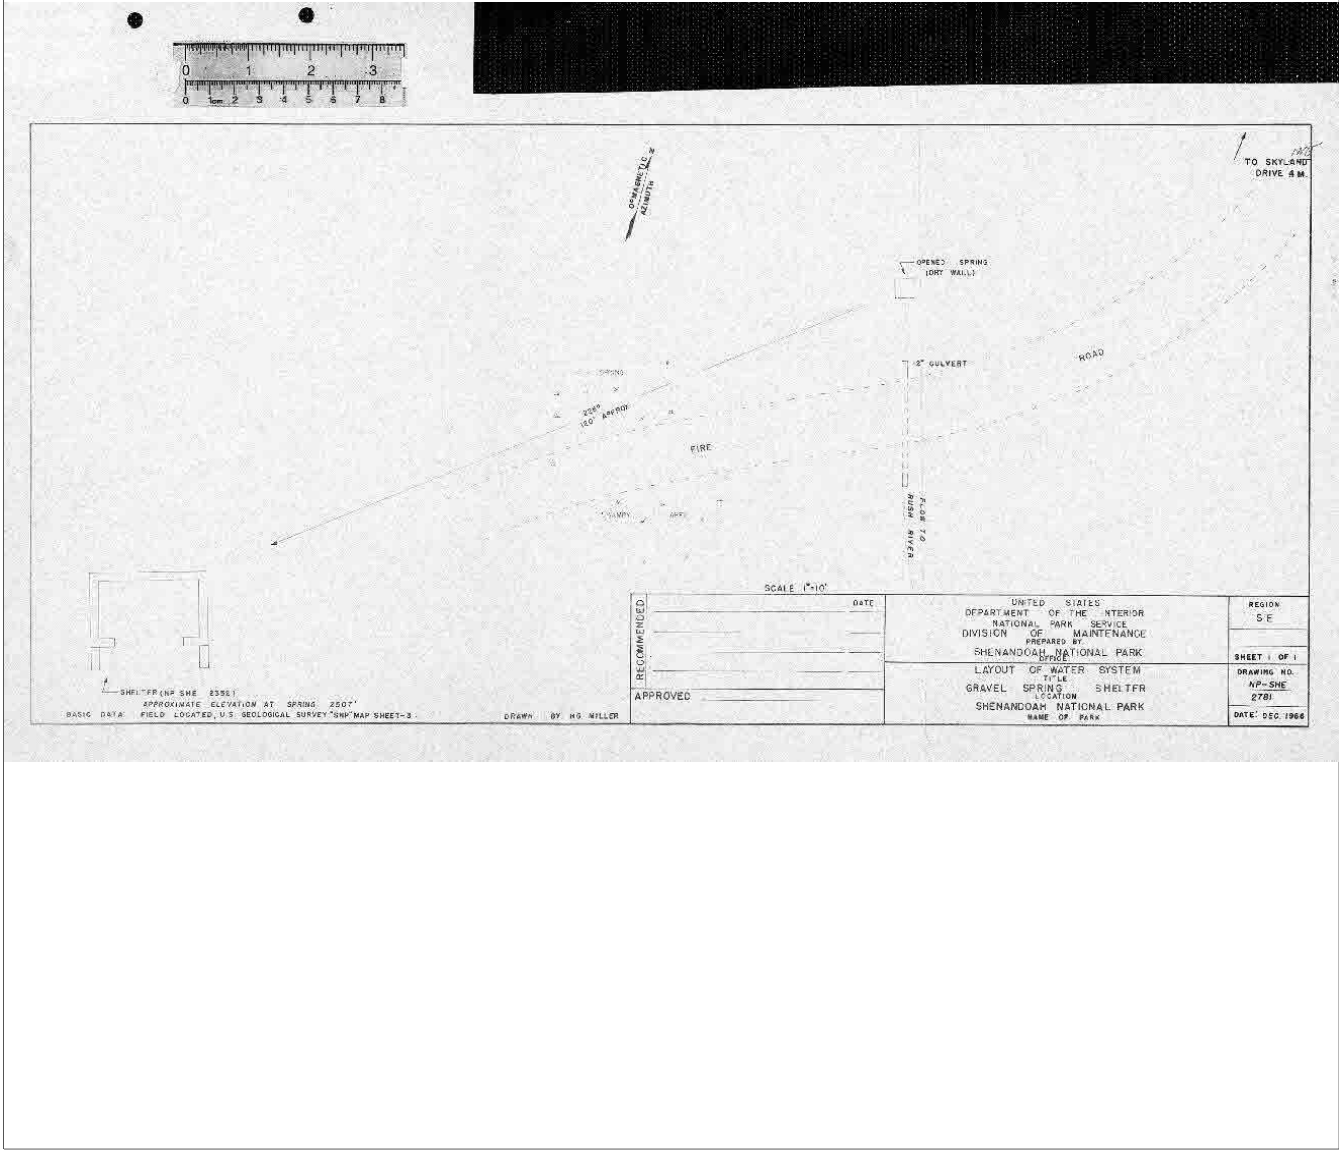

October 3, 1934.

Known as the Bravelly Springs.

Located about $\frac{1}{2}$ mile east of Gravel Springs Gap, on old road to Washington, Va. Spring has been constructed up, both sides and top, with a small opening in front. Water is piped from spring into a wooden trough and from here into a small concrete pool and also into a small masonry house used for keeping milk, etc. Water then goes off down mountain in several different channels. Spring has never been dry. Flow measured and found to be 24 gallons per minute. Temperature 51°.

Flow 22 gallons per minute on 11-13-34.
