IN THE DISTRICT COURT IN AND FOR
WATER DIVISION NO. 5
STATE OF COLORADO

Civil Action No. 1768 COUNTY OF GRAND

Paragraph 12, p. 9.

IN THE MATTER OF THE APPLICATION)	
FOR WATER RIGHTS OF: THE UNITED)	<u>SQUEAK PIPELINE</u>
STATES OF AMERICA)	
IN THE COLORADO RIVER)	RULING OF THE REFEREE
OR ITS TRIBUTARIES--)	
TRIBUTARY INVOLVED:)	ABSOLUTE WATER RIGHT
NORTH FORK OF THE COLORADO)	
RIVER AND SQUEAK CREEK)	
)	
IN GRAND COUNTY)	
)	

The Referee having made the investigations required by
Article 21 of Chapter 148, C.R.S. 1963, as amended, does
hereby make the following ruling, to wit:

1. This application was referred to the Water Referee
of Water Division No. 5 on the 31st day of August 1972.
2. Name of Applicant: The United States of America
c/o Kenneth J. Burke, Trial Attorney
Address: P.O. Box 1656
Denver, Colorado
3. The legal description of the water right claimed is:
The point of diversion is located on the North bank of
Squeak Creek at a point whence the East Quarter Corner
of Section 12, T. 5 N., R. 76 W. of the 6th P.M. bears:
N. 51°17' E. 2,045 feet.
4. The water is diverted through a 10 inch diameter
metal pipeline 360 feet long, having a capacity of
7.75 cubic feet per second of time.
5. Location of point or points of use: The water is
used for domestic and power purposes on property
owned by the claimant in said Section 12.
6. The date of initiation of use: June 26, 1930.
7. The amount of water used is: 7.75 cubic feet per
second of time.
8. The use of the water is: power and domestic purposes.
9. The priority date of the junior-most water right
heretofore adjudicated in Water District No. 51
is: August 31, 1955.

PS. Rocky Mtn NP

10. The date of the filing of the water right
is: December 29, 1971.

11. Pursuant to the Initial Pre-trial Order of the
Master Referee, the priority date is not deter-
mined in this ruling; and the Water Referee
has determined in his discretion not to rule on
the question of whether a valid appropriation of
water has been made by the applicant.

It is accordingly Ordered that this ruling shall be
filed with the Water Clerk and be distributed to all parties
of record; and that in accordance with 148-21-19(2) C.R.S.
1963, as amended (1969), the above-entitled matter be and
is hereby re-referred to the Master Referee for a determin-
ation of the matters referred to in paragraph numbered 11
above.

Done at the City of Glenwood Springs, Colorado, this
6th day of MARCH 19 73.

Water Referee
Water Division No. 5
State of Colorado

IN THE DISTRICT COURT IN AND FOR THE COUNTY OF GRAND

AND THE STATE OF COLORADO

IN THE MATTER OF THE ADJUDICATION	)	CIVIL ACTION NO. 1768
OF PRIORITIES TO THE USE OF WATER	)	STATEMENT OF CLAIM OF THE
FOR WATER DISTRICT NO. 51	)	UNITED STATES OF MAERICA FOR
IN THE STATE OF COLORADO	)	SQUEAK PIPELINE

Comes now the United States of America by its attorneys, and makes
the following statement of claim pursuant to Colorado Rev. Stat. Ann.
148-9-8 (1963):

I.

The name of the claimant is the United States of America.

II.

The post office address of the claimant is Kenneth J. Burke, Trial
Attorney, Department of Justice, P. O. Box 1656, Denver, Colorado 80201.

III.

The name of the structure for which claim is made is the Squeak
Pipeline.

IV.

The source of supply is Squeak Creek, a tributary of the North
Fork of the Colorado River, from which it derives its supply of water,
and diverted therefrom through a metal pipeline ten (10) inches in
diameter for three hundred sixty (360) feet. The grade of said pipeline
is one hundred twenty-six (126) feet per one thousand (1000) feet with a
carrying capacity of seven and seventy-five hundredths (7.75) cubic
feet per second of time.

V.

The point of diversion is located on the North bank of Squeak Creek
at a point where the East Quarter Corner of Section twelve (12), Township
five (5) North, Range seventy-six (76) West bears North fifty-one degrees
seventeen minutes ($51^{\circ} 17'$) East two thousand forty-five (2045) feet.

VI.

No storage involved.

VII.

The survey of the foregoing structure was initiated on June 26, 1930.

VIII.

The total amount of water claimed is seven and seventy-five hundredths (7.75) cubic feet per second of time.

IX.

A map and statement of claim for said Squeak Pipeline was filed with and accepted by the State Engineer of the State of Colorado on August 21, 1930, and was assigned by him, filing number fifteen thousand three hundred twelve (15312).

X.

The character of use for which claim is hereby made is for power and domestic purposes.

The United States seeks to antedate the adjudication dates of earlier decrees insofar as they, in conjunction with applicable statutes, appear or purport to preclude this Court from awarding to the United States its water rights bearing their true priority dates.

Respectfully submitted.

APPLICATION FOR WATER RIGHT

1. Name of applicant: United States of America

Address of applicant: c/o Kenneth J. Burke
Department of Justice
Land and Natural Resources Division
P. O. Box 1656
Denver, Colorado 80201
2. Name of ditch or other structure: Squeak Pipeline.
3. Legal description of each point of diversion or proposed diversion: North bank of Squeak Creek at a point where the E $\frac{1}{4}$ corner of Section 12, T. 5 N., R. 76 W. bears North 51° 17' East 2045 feet, as indicated on the attached map.
4. Description of ditch, pump or pipeline: A metal pipeline 10 inches in diameter, 360 feet long, with a grade of 126 feet per 1000 feet.
5. Source of water: Squeak Creek, a tributary of the North Fork of the Colorado River, Grand County, Colorado.
6. Date of initiation of the appropriation: August 21, 1930.
7. Amount of water claimed by diversion in cubic feet per second of time: 7.75 c.f.s.
8. Use or proposed use of the water: Power and domestic purposes.
9. Date water first applied to above use: June 26, 1930.
10. The United States seeks to antedate the adjudication dates of earlier decrees insofar as they, in conjunction with applicable statutes, appear or purport to preclude this Court from awarding to the United States its water rights bearing their true priority dates.

Re: Civil Action No. 1768, County of Grand: Squash
Pipeline, Paragraph 18, P. 9, Wheeler Ditch,
Paragraph 13, P. 10 and Phantom Ditch, Paragraph 14,
P. 11, Grand Lake Lodge and Ranger Station, Paragraph
15, P. 12 and the Kauffman Ditch, Paragraph 15, P. 11.

Dear Mr. Burke:

As requested by your letter of March 21, we have reviewed the National
Park Service's water rights claims listed above, with the following
result.

The Squash pipeline, the Wheeler Ditch, and the Phantom Ditch claims
were acquired by the National Park Service in 1960, with the purchase
of the Phantom Ranch. There is no evidence to indicate any of these
systems were ever constructed or any diversion of water made. Consequently,
there is no possibility of proving the water was put to beneficial use
either before or after acquisition by the Park Service. Therefore, it
is requested that these claims either not be asserted or withdrawn, whichever
you feel is appropriate under the circumstances.

The Kauffman Ditch claim was acquired in 1954 with the purchase of a
tract of land from Mrs. Belle Kauffman. Our records indicate the original
diversion was made in 1908, and apparently the water was used to a
limited extent for three or four years. However, there is no record of
any use since about 1918. No evidence of the headgate structure or
ditches exists and the possibility of showing beneficial use of the water
either before or after acquisition by the Park Service. It is therefore
requested that this claim either not be asserted or withdrawn, whichever
you feel is appropriate.

The Grand Lake Lodge and Ranger Station Pipeline has been on substantially continuous service since construction in 1920, according to our records. In 1926, an additional diversion was made in close proximity to the first, with provision made for diversion from either point. The amount of water claimed is 0.072 c.f.s. and it appears technically 0.024 c.f.s. should have a priority date of June 1, 1920 and 0.048 should have a priority date of July 1, 1926. If you wish, I will prepare an amended claim since the one previously submitted indicates the total of 0.072 c.f.s. with a priority date of June 1, 1920.

In 1960, the Grand Lake Lodge and 47 adjoining acres of land was excluded from the park by a boundary change. Since that time, the Lodge has continued to use water by a Special Use Permit from the National Park Service. The Ranger Station burned in 1969 and there are presently no plans to replace it; consequently, that part of the water rights has not been used recently. However, we do not intend to abandon that part of this water right at this time.

In regard to providing witnesses to establish beneficial use of the Grand Lake Lodge water right, Superintendent Roger Connor and Assistant Superintendent Wayne Cose can both testify back to 1928 when they were previously assigned to the park. Wayne Cose will be out of the country on an overseas assignment from May 13th to about July 1, 1973, so would not be available during that period. If you feel testimony for a longer period of time would be desirable, there is a good possibility that retired District Ranger Fred McLaren would be available during the summer months. Mr. McLaren spent 35 years on the west side of the park, starting in 1922. He now resides in the State of Washington but generally spends the summer months in Grand Lake.

If you need further information, please do not hesitate to call.

Sincerely yours,

William L. McKeel,
Legal Assistant

Alien Water Rights #53

Memorandum

To: The Director

From: Associate Regional Director, Midwest Region

Subject: Composite Listing of Water Right Docket Outline of
Assemblies, Rocky Mountain National Park, Colorado

This office has prepared a composite listing of the outline of assemblies of water dockets received from the Area and your Office, which shows the comparative contents of water right dockets in each office.

To provide identical contents for each water right docket, it will be necessary to provide many copies of data which are missing from one or the other docket files.

Some of the documents, as shown in the individual outline of assemblies are difficult to identify and some of the items may refer to the same document. In other words, a particular document may be listed in the outline of assembly a little differently by the area, the Regional Office, and your Office.

It appears that each office should review the composite outline of assemblies and provide copies for the files of the other offices which do not list the document. A program of funds to cover these costs should be set up in our annual schedule of projects under M&P Accounts.

We shall appreciate your consideration of this project and suggestions regarding its accomplishment.

(Sgd) George F. Bagley

September 20, 1960

Memorandum

To: Regional Director, Region Two

From: Chief, Water Resources Section

Subject: Acceptance of Option to Purchase from Irwin S. Beattie and Sarah V. Beattie Tract 309 (Phantom Valley Ranch), Rocky Mountain National Park

In his memorandum of August 8 to you Mr. Price stated that I would follow up later on the water right question relating to Filings 14928, 14990 and 15312, Alien Water Rights 51, 52 and 53, because I was on leave at the time.

The option, Contract 14-10-0100-1119 is satisfactory, but there would be less ambiguity if the deed conveyed all water rights acquired, or established by the vender, including those recorded by Filings 14928, 14990 and 15312. I assume that the status of the rights was checked recently enough in the District Court or State Engineer's Office, to be sure that they were not adjudicated in 1959 - the last odd year for such action.

Assuming that the rights are still only evidenced by the filings and the constructed water systems, they will have the same status as other Federal NPS filings in Water District 51 when acquired. The Alien Water Rights 51, 52 and 53 should be reclassified as dockets, and copies of the deed should be added. They, and the Federal claims under Filings 16511, 16658, 16659, 16668 and 17579, Dockets 14, 15, 16, 17 and 20, should all be adjudicated when, or if, the Department of Justice decides to do so. The claims may all need revision before such action.

October 19, 1959

Memorandum

To: Regional Director, Region Two
From: Chief, Water Resources Section
Subject: Water Rights, Phantom Valley Ranch, Rocky Mountain

Attached are three copies of the letter of February 18, 1954, to me from the Office Engineer, State Engineer's Office, Denver, advising that none of the following water rights had been adjudicated at that time. One copy should be filed in each of the alien water rights.

Filing 14928, Phantom Ditch, AWR 51
Filing 14990, Wheeler Ditch, AWR 52
Filing 15312, Squeak Pipeline, AWR 53

In his memorandum of October 1, Mr. Lloyd stated that he had the land inspected and no water systems, or traces of former water systems had been found where described in the filings. Under Colorado law, the filings only record water claims for future adjudication, and advise the clerk of the district court of the names and addresses of water claimants who must be notified of the next adjudication. Many of the filings are in error due to poor surveys, or changes in plans at the time of construction. The standard form also states that a system is constructed although the survey may only have been made for construction. Such matters are corrected at the time of adjudication.

If the designated ditches and pipelines were constructed before, or within one year after the date the filing was made, and the diversion is from the designated stream and used for the designated purpose, the burden of proof is on a protestant to show that the filing does not cover the constructed system. Moreover, the Colorado courts have consistently decreed rights with the claimed priority, but junior to all decrees awarded in prior adjudications even though there may be a number of adjudications between the year of filing and year when the water claim is submitted for adjudication. As a

matter of fact the Department of Justice has declined to adjudicate the rights in Water District 51 for which I made filings 20 years ago, although there have been adjudications in nearly every odd numbered year, but priorities of about 1939 but junior to rights decreed between 1939 and 1959 can still be obtained if the claims are adjudicated.

Accordingly, I believe that the appraisal of the subject water rights will require a map showing each water system as described in the filing and as constructed, showing sources of water and section corner ties, and the irrigated acreage or other development which is served. We should also have the dates of water system construction, and the maximum quantity of water which has been diverted and used.

The water right values will then be the value of rights which might be adjudicated in 1961, based on the extent such water can be diverted and used without protest, less the cost of amended maps and the adjudication. Protests are not very likely in this case. The value may be the difference in land values with and without the water, less adjudication costs of \$1,000 to \$2,000.

October 1, 1959

Memorandum

To: Regional Director, Region Two

From: Superintendent

Subject: Squeak Pipe Line, Filing 15312, Phantom Valley Ranch,
Alien Water Right No. 53, Rocky Mountain National Park

Previous to the start of the recent appraisal of Phantom Valley Ranch, Tract No. 309, we carefully inspected the land area shown on the map and described in the statement on the Squeak Pipe Line Filing No. 15312, accepted in the State Engineer's Office on the 21st day of August, 1930. We found nothing to indicate that any part of the headgate, ditch, settling basin, pipe line, tail race or the transmission line (shown on the filing map) had ever been constructed or used. Filing No. 15312 will be found in your Alien Water Right No. 53 assembly.

After a further field inspection, we will forward a report covering the Phantom Ditch, Filing No. 14928, Alien Water Right No. 51, and the Wheeler Ditch, Filing No. 14990, Alien Water Right No. 52.

July 24, 1957

Memorandum

To: Regional Director, Region Two

From: Chief, Water Resources Section

Subject: Green Pipeline, Docket 40 and Schnoor and Hertel Ditches,
Alien Water Right 48 to be Docket 41, Rocky Mountain

The memoranda of July 11 and 12 from Mr. Robertson are somewhat confusing.

From the former we gather that our memorandum of July 3, with copy of land deed 142 and abstract, which were sent to Region Four in error, have been received by you from Region Four. These should be placed in folder for Alien Water Right 48, even if a temporary folder has to be made.

Attached is a list of Alien Water Rights 38-57, which you say are missing. Alien Water Right 40 should now be found as Docket 22. The rest all seem to have been mailed to you in duplicate on July 10, 1951. You may have placed them in the docket series, or forwarded both assemblies to the Park. Before we make further duplicates, we shall appreciate further check in your Office and the Park.

The Lyons Reservoirs 1 and 2, formerly Alien Water Right 40, now Docket 22, were forfeited as a result of failure to construct and the resulting decree in U.S. vs. Town of Lyons, Case 1952. Attached is an extra copy of the decree, which seems to have been filed with the Federal and State District Courts, but may or may not have been reported to the State Engineer. Filing 7949 might be cancelled, and the Superintendent should determine what the State Engineer has, or may be able to do about it.

The Item I-G in Docket 40, covering the Green Pipeline, is the filing in the State Engineer's Office. The Docket now contains a print of a copy of map made by the Park Service in August 1956, which does not include the file number. We also lack the

one or two pages of the decree describing the water system covered by Priority No. 34 in Case 10077. Assuming that the map was made by Park Engineer, he must have print of the map (with statement of claim and file number) as filed with State Engineer. We should at least like the file number if we are to order the reproducible copies of both instruments from the State Engineer.

Attention: A. van V. Dunn
Chief, Water Resources Branch

Gentlemen:

In reply to your letter of February 15, we find no decree listed in our records for the Phantom Ditch, Wheeler Ditch, and Squeak Pipe Line. It is entirely possible that an adjudication proceeding is open in Water District No. 51 at this time. If such is the case, we will, of course, receive a copy from the Court when the case is closed.

Very truly yours,

A. Ralph Owens

Memorandum for Hydraulic Engineer A. van V. Dunn:

Region IV

Enclosure is made of a rough draft by Commissioner Hackett which attempts to establish and to justify a value for the water rights appurtenant to Phantom Valley Ranch. An attempt is now being made to prepare an appraisal for Phantom Valley Ranch and its existing water rights in order to take advantage of an offer the owners have made to sell under the 50% funds.

We would appreciate your assistance in analyzing and establishing the current value of these water rights, also your opinion as to the expected increase in their value during the next ten years. We feel a clear statement of the need to acquire more water for future use in this park would be an important addition to your appraisal justification.

Our appraisal should reach Washington by January 15. If you find it convenient, we would like to have your opinion a few days before that date in order to fit it into our final total for land and water before forwarding to the Director.

/s/ John E. Doerr

Acting Superintendent

PHANTOM VALLEY RANCH WATER RIGHTS -

The water rights appurtenant to the Phantom Valley Ranch have never been adjudicated and are recorded only as filings in the State Engineer's Office.

The three rights are best described as follows:

1. The Phantom Ditch:

Claims 6.6 cu. ft. per second of time with a date of first use on July 15, 1915. Filed on March 28, 1928, as No. 14928.

2. The Wheeler Ditch:

Claims 1.2 cu. ft. per second of time with a date of first use on September 20, 1927. Filed on August 17, 1928, as No. 14990.

3. The Squeak Pipe Line:

Claims 7.75 cu. ft. per second of time with a date of first use of June 26, 1930. Filed on August 21, 1930, as No. 15312.

The cash market value of adjudicated water rights in Water District No. 51 is mounting at a fast rate due to the scramble for water since the Big Thompson-Grand Lake Conservancy District has laid claim to all unclaimed rights originating above the proposed Granby Storage Reservoir. Adjudicated water rights in District No. 51 are rated on the present market at from \$2000 to \$6000 per second foot in accordance with their priority.

The Reclamation Service, Forest Service, and the National Park Service, are expecting to start an adjudication action in the U. S. District Court at an early date. The National Park Service has several claims ready for presentation in this coming adjudication. If the Phantom Valley water rights could be purchased now, they could be adjudicated with very little additional

expense as our attorneys and engineers will be present to establish our other claims. The Phantom Valley rights could, because of their previous filing and early date of first use, obtain a priority ahead of the Big Thompson-Grand Lake Diversion claims.

It would be difficult for the Government to prove continuous and beneficial use of more than three cu. ft. of water per second of time. If we can successfully adjudicate 3 cu. ft. per second of time it is our opinion it would have a present day value of \$10,000. If water values continue to increase during the next ten years as they have in the past 10 years, by 1950 this water would have a market value of at least \$15,000.

This water, when adjudicated, would soon become a very valuable asset to this park, both as to cash value and as a protection to our many uses of water in Water District No. 51. Rocky Mountain National Park is in need of additional water rights which have a proven early date of first use in order to protect some of our uses which can not show an early date of first use and which have no early priority. If this park continues to grow as fast during the next fifteen years as it has during the past fifteen years, we are going to find our uses exceeding our old established priority right. Now is the time for us to acquire all the water rights we expect to use in the future. The Phantom Valley Water Rights would help fill part of this need providing they can be acquired in time to be adjudicated in the coming hearing.

As the Phantom Valley water rights have their origin above the Grand Lake entrance to the Diversion tunnel, this water could be diverted through the tunnel for use on the east slope by securing a change in point of diversion.
