contiguous to existing intakes and storage tanks which follow natural drainage
into the American Fork River.
17. The water is used supplementally to the following rights Certificate a-393; Change Appli. Nos. a-5201,
a-5203
18. Water was measured by Ralph R. Murdoch Date 19
(Name of Hydrographer)
19. Water was measured by ~~weir, weirs, or by other means~~ meter
(strike words not needed)

*(Give sufficient data under "General Remarks" to enable State Engineer to check the water measurements. It is necessary that the results of a series of such measurements be given.)

GENERAL REMARKS
(See Instructions on page 4)

The meter records all of the water diverted from the points of diversion except for an overflow located immediately below the diversion works which in time of high flow diverts water into the stream channel which cannot be accommodated by the pipe intake. The diverted water flows continuously through the chlorination system (which requires a continuous flow to function) thru the meter into a 100,000 gallon storage tank. Water for domestic use within the Monument as well as that water used for irrigation purposes flows thru a common outlet from the storage tank with excess water overflowing into a natural drainage that drains into the American Fork River. Meter readings taken since

(General Remarks continued on page 3)

(Fill in blank spaces, but do not sign until proof has been submitted to the State Engineer and accepted as sufficient)

Change Application No. a-5202

Name of Applicant American Fork Irrigation Company

General Remarks (continued)

October 31, 1972, when the meter was installed indicate an average daily diversion of 75,791 gallons. The overflow from the storage tank is not metered, consequently it is not known what part of the diversion flows into the Monument water system. The Monument is entitled to 0.0622 cubic feet per second (40,198 gallons per day) under Application No. 10840 (55-95) as amended by Change Application a-3523 for domestic use. It is estimated that during the irrigation season (April 1, to October 31,) a total of 4,000,000 gallons is used for irrigation of 10.25 acres indicated on the accompanying plat.

FORM 29

IN THE OFFICE OF THE STATE ENGINEER OF THE STATE OF UTAH
REQUEST FOR REINSTATEMENT AND EXTENSION OF TIME
(Before Fourteen Years)

APPLICATION NO. a-5202
STATE OF UTAH
COUNTY OF Utah

William L. Mekeel, being first duly sworn that he is the (agent of the) owner of the above-numbered application; that he knows of his own knowledge of the construction of works completed to date.

Describe briefly the type and extent of construction completed to date; cost of this construction, and the estimated cost of any remaining construction to be done for completion of project and to submit Proof of Appropriation. Give reasons why the work could not be completed and water put to beneficial use within time heretofore allowed.

The project of the National Park Service for which the change application was made is under way and water is being diverted and put to use at the Timpanogos Cave National Monument. Additional time is needed to make full use and development and obtain needed data for proof. Present planning provided for additional use of water and development of water systems at Timpanogos Cave.

Request is made for reinstatement and extension of time for filing proof

from October 31, , 19 74, to October 31, , 19 75

Affiant understands he will be notified of a hearing date, at which time he or his representative must attend, be able to defend data given; and affiant upon oath states that the information given above is to the best of his knowledge true and correct.

Gentlemen:

RE: Appl. No. a-5202 (55-area)

It is noted from our files that you have only fourteen more days in which to submit proof before the lapsing of your application.

This letter is sent to remind you to have your proof or request for extension of time filed in this office before the proof-due date of your application which is October 31, 1974.

Enclosed is a request for extension of time form in case you have misplaced the one previously sent to you.

Yours truly,

Dee C. Hansen

Gentlemen:

RE: Application No. a-5202 (55-area)

To appropriate water in Utah you must receive approval of an application, complete the intended development and submit proof that the water has been put to beneficial use. Upon submission of satisfactory proof, a certificate will be issued, which is your evidence of a water right.

Our records indicate that you have not made proof of appropriation or proof of change on your application. This is due October 31, 1974.

Proof must be prepared by a registered engineer or land surveyor and must be received in this office on or before the above proof-due date. Failure to make proof by the above date shall cause the application to lapse. Blank forms for submitting proof will be sent upon request.

If proof cannot be submitted at this time, an extension of time may be requested by completing the enclosed form and submitting the request in affidavit form on or before the proof-due date. Submission of a request for an extension of time in no way guarantees that it will be granted. An extension will generally be granted only after an applicant has made a showing of diligence before a meeting with the State Engineer. Requests should not be made for unreasonable periods of time beyond that needed to complete the appropriation and proof.

Yours truly,

smb
