Docket 003 Washburn Ditch, Wawona
Docket 026 Rush Creek, Wawona
Docket 027 Alder Creek, Wawona
Docket 028 Big Creek, Wawona
Docket 029 Chilnualna Creek, Wawona

July 3, 1996

The primary water supply for Wawona is from the South Fork Merced River, via pipeline. Pre-1914 appropriative rights may apply to the NPS's current diversion. These are documented in YOSE Docket 003. The NPS may or may not have acquired additional appropriative rights in the Wawona area. These are documented in YOSE Dockets 26-29. Papers common to Dockets 003 and 026-029 are filed in Docket 003.

Statement Concerning Claims to Waters of Big Creek

The claims to divert 20,000 inches, which were recorded on pages 253-254 and page 256, on November 4, 1905, seem to be records of two postings of the same claim at the upper and lower portions of the storage reservoir for which claims were recorded at pages 197-198, 204-205, 214-215, and 235-236. The claim to 20,000 inches, as recorded on pages 224, 236, and 237, between February and May of 1905, do not describe the point at which the notice is posted, but are probably earlier postings of the same notice, since they claim the same quantity of water. The claim for 20,000 miner's inches under a 4-inch head is equivalent to a claim for 400 second-feet.

The related claims for the storage of 300,000,000 gallons, like the repetition of claims for the diversion, seem to be duplicated periodically between September 1, 1904, and May 24, 1905. This need for reposting was doubtless due to failure to start construction. The 300,000,000 gallons converts to 920 1/2 acre-feet.

There is a reference to water location at the storage dam, in the storage claim of September 1, 1904, but the first recorded claim to divert 20,000 inches is that of February 8, 1905, at page 224 of Book 2 of Water Rights. However, Mr. Washburn had made two postings as recorded at pages 167 and 193 of said Book 2, for 100 second-feet at an undefined point, which I have assumed to be claims on record and posted when the reservoir was planned.

Apparently no storage was ever provided on Big Creek, and any diversion of the creek flow has terminated. It is to be assumed that these claims have been abandoned.

Notice of Appropriation of Water

The Undersigned Hereby Gives Notice to all Whom it May Concern: 1. That I claim the water flowing here to the extent of 100 cubic feet per second.

2. That the purposes for which I claim it are (a) for irrigation and all household and domestic purposes, and for electrical appliances, and for all power purposes and public uses, and the place of intended use of said water is at Wawona intersection of Big Creek and South Fork of Merced River and in that immediate neighborhood, in the county of Mariposa, State of California.

3. That I intend to divert it by (c) flumes, pipes, ditches, and aqueducts, and the size of same will be of sufficient capacity to divert and conduct said water.

Dated July 17, 1903.

State of California)
County of Mariposa) ss

John S. Washburn,
Claimant.

John S. Washburn, being duly sworn says: I am a white male citizen of the United States and of the State of California, and am over the age of twenty-one years. On the 17th day of July 1903, I posted in a conspicuous place on the banks of Big Creek, to wit: At the point of diversion mentioned in the notice attached hereto, a true copy of said notice.

Subscribed and sworn to before
me this 17th day of July 1903.

John S. Washburn.

Notice of Water Appropriation

Notice is hereby given that the Undersigned, John S. Washburn, of Mariposa County, Calif., does hereby claim 20,000 inches of the water flowing at this intended point of diversion measured under a 4 inch pressure, which said point of intended diversion is within and is a part of Sierra Forest Reserve.

That the said intended point of diversion and the place where this notice is posted is described as follows: on a cotton wood tree on the bank of Big Creek, near the bridge on the Mariposa Road, in Section 10 Township 5 S. R. 21 E. M.D.M. County of Mariposa, State of California.

That the purposes for which the undersigned claim said water is for the purpose of developing power to be used in the generation of electricity or for any other mechanical purpose, for applying the same to mechanical devices for the generation of electric power and other power, and all other mechanical purposes.

That the place of intended use is at the power house to be located at or near the intersection of Big Creek and the South Fork of the Merced River, in the County of Mariposa, State of California.

That the means by which he intends to divert said water is by means of a dam, tunnels, ditches, flumes, conduits and pipe line; the size of said ditches, flumes, conduits and pipe line to be of capacity sufficient to carry said 20,000 inches of water conducted from the said plant of diversion to said power house location; the route of intended conveyance of the water so claimed lies wholly within the Sierra Forest Reserve.

Notice of Location of Reservoir Site

Notice is hereby given to All Whom It May Concern that I, John S. Washburn, a citizen of the United States, in compliance with the revised Statutes of the United States, have this day located as a Dam Site the following described land, situate, lying and being in the County of Mariposa, State of California, and more particularly described as follows, to wit: Commencing at a point $\frac{1}{4}$ mile south of the corner post that marks sections 11, 12, 13 and 14 in Township 5, S. R. 21 E., thence in a southeasterly direction a distance of 2 and $\frac{1}{2}$ miles to a point where the Y. S. and T. Company's road crosses Big Creek, thence in a westerly direction from said point 2640 feet to a post or monument of stone, thence following and paralleling said Big Creek along its natural course for a distance of 5 miles on the westerly bank of said Big Creek to a point where the appropriator of this Dam Site has a water location, thence across said Big Creek in an easterly direction a distance of 2640 feet to a monument of stone, thence in a southeasterly direction to the point that marks the point of commencement. The proposed Dam to be erected at a point to be hereafter determined by practical Engineers, at the most desirable point that may be determined in the N. E. $\frac{1}{4}$ of Section 14, or thereabout, Township 5, S. R. 21 E.

This proposed reservoir is about 5 miles in length, and from $\frac{1}{2}$ to $\frac{3}{4}$ of a mile in width. The average height of said Dam will be about 200 feet from the bed of Big Creek; the width of said Dam, on the top, will be about 300 feet.

This is intended as a location of the basin of Big Creek from the points designated, and covering approximately 300 acres of land, for the purpose of storing the Flood Waters of Big Creek, to the extent of 300,000,000 gallons.

The object of this appropriation is to keep the supply of said water more constant and for the purpose of generating power, and for agricultural and domestic uses to be applied at and near Wawona in Mariposa County, California.

Dated September 1st, 1904.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
Yosemite National Park
California

June 20, 1950 cc Director 6/21/50
H22

Memorandum

To: Regional Director, Region Four
From: Superintendent, Yosemite
Subject: Right to use waters of Big Creek on land acquired by the
United States from E. M. Schneider through Wawona Hotel Company,
Wawona Area, Yosemite National Park

We have not been able to make a positive determination regarding the Snyder diversion referred to in Mr. Dunn's memorandum of February 17. We consulted some old time residents of this locality and are passing on the information we have been able to secure from them.

Mr. Bruce worked at the Wawona fish hatchery about 1901. He helped build a small flume diverting water from Big Creek to the hatchery. Diversion was accomplished by a simple loose rock dam that washed out each year and had to be rebuilt prior to each hatchery season.

He recalls no other water development on Big Creek within the park boundary. He has lived in this area his entire life and has been up Big Creek many times fishing; he feels sure that there has never been any development except the one at the fish hatchery.

Messrs. Henry and Al Skelton and Mr. Jack Davis were consulted and they were of the same opinion that there were no developments on Big Creek except the hatchery developments.

It appears, therefore, that from the information obtained from these old time residents and from a search of the county records, Mrs. Snyder did not make any water developments on Big Creek. It appears from the meager information we have been able to secure that Mrs. Snyder is related to the Stoddards and was not related to John S. Washburn.

We regret that more conclusive evidence regarding the conditions existing at Wawona could not be obtained for Mr. Dunn. If there is any further investigating that we can do to provide Mr. Dunn with clues as to the water development in this area, we will be pleased to cooperate in any way we can.

February 17, 1950

Memorandum

To: Regional Director, Region Four
From: Chief, Water Resources Branch
Subject: Right to use waters of Big Creek on land acquired by
United States from Emma M. Schneider through Wawona
Hotel Company, Wawona Area, Yosemite National Park

The above-mentioned Mrs. Schneider conveyed a large part of Section 3, Township 5 South, Range 21 East, M. D. M., to the Wawona Hotel Company who, in turn, conveyed it to the United States with the Wawona Hotel area. The deed from Mrs. Schneider included appurtenant water rights on Big Creek.

I have copies of nine recorded water claims for diversions from Big Creek where it was crossed by the Wawona Road in the NW $\frac{1}{4}$ of Section 10, Township 5 South, Range 21 East, M. D. M., when the claims were filed between 1903 and 1905. I also have copies of four recorded claims for storage in a reservoir to have extended for five miles up the creek from the point of diversion, also dated between 1903 and 1905. The claims were filed by John S. Washburn.

We should like to know whether the Schneider diversion was near the recorded point--near the center of the NW $\frac{1}{4}$ of Section 10, whether Mrs. Schneider may have been a successor to John S. Washburn, and about when the Schneider water system was constructed. Whether there is any connection between the conveyed rights and the filings or not, we should also like to have a description of the Schneider water system if one can be provided without special survey or investigation.

In further explanation, I am now assembling a record of rights and preparing a report on my inspection of 1947. The data now being requested from time to time is to clarify the preliminary assembly and report. It is not intended to be final. We shall make other provisions for any extensive research which may prove desirable from the assembly and report as first completed.

A. van V. Dunn
Chief, Water Resources Branch
