GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statements of Water Diversion and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockpounds Constructed Prior to 1969"
- "Appropriation of Water in California"

Dear Mr. Overson:

Thank you for your letter dated December 29, 1989.

We received your statements on April 7, 1989. Our appologies for not processing them sooner. The numbers were assigned below from S-13296 through S-13319 for a total of 24.

STATEMENTS OF WATER DIVERSION AND USE - NOS. ~~13296~~ 13296 through 13319

Your statements of water diversion and use have been received and assigned the above numbers. You should refer to these numbers in any correspondence to this office regarding the statements. Copies of your statements are enclosed for your records.

Please notify us of any change in address or ownership.

The law requires that supplemental statements be filed at three-year intervals. We will send you the necessary forms.

Sincerely,

A handwritten signature in cursive script, reading "Koso Nodohara".

P. O. Box 2000
Sacramento, Ca. 95814

Dear Mr. Okada:

Re: 341:SO:678

Enclosed please find Statements of Water Diversion and Use for livestock waters located on the O. X. Ranch. These are all old water developments that have been in use by this ranch since it's development in the late 1800's.

There is one batch of statements with paperclip, that I was not sure of the legal description and wrote it in in pencil. I would appreciate your checking these descriptions as this is one area where I can get very confused.

Also, concerning Dove Spring, Statement of Water Diversion No. 12514, and Carruthers Well, Statement No. 12513, which shows the U.S. Bureau of Land Management as the users; we would like to make a formal objection to this as both of these water developments are located on our private land and are maintained and pumped by us. We would also like the records changed to show us as the users and I have enclosed the Statements to do so.

Your help as I struggle through this paperwork is always appreciated.

Sincerely,
Linda Overson

Dear Sirs,

Last March 29, 1989, we sent to you our Statements of Water Diversion on 24 springs, which are all within the boundaries of our Granite Mountain Ranch. We sent the statements certified with a return receipt, which was signed by Wright. We did however, request that you send us verification of receiving our reports so we would know that they had been assigned numbers.

Please, therefore, send us this verification and the assigned numbers of the Statements of Water Diversion. The Statements were sent on the following 24 springs:

Name of body of water	Place of diversion
Cornfield Spring	NW $\frac{1}{4}$ SW $\frac{1}{4}$ Sec. 12, T10N, R13E, SBB&M
