NAME: Charley Belair

COMPANY: Belair Consulting

ADDRESS: P.O. Box 741, Rockport Tx 78381

TELEPHONE #: 512-729-2948

C. Belair called 7/29/94. He stated Mike Hunt, Bright & Co. had ask him to telephone me and ascertain if Bright & Co. (B+C) could place the sand that was being removed for mitigation, in the .4 acres of wetland takings in the construction of B+C's access road & pad, be placed in/on a white sand dune near ~~the~~ across the road from American Exploration Harboroush Pass facility bunk house. The location being ESE from the bunk house and across the road.

I told him no. The placement of sand in the area would result in filling of wetland adjacent to the white dune. The sand being removed could be place in ~~one~~ two locations. It can be placed along the cypress dune line North & South of the Y. Pass Entrance or used as fill in the construction of the B+C access road & pad. These were the only options. Placing it in the interior of the island without COE consultation and public involvement would not be possible. — Paul

ADDRESS: 6400 Ocean Dr

TELEPHONE #: 994-9005

Spoke to Pat Clements - she ask if I had received the
Bright & Co. COE permit #20050. She will send me a copy
I advise that the was part of the Plan of Op. procedure
for permitting the O/Gas exploration process in 36 CFR 9P.

Told her that a copy of the Plan of Op, EA & Biological Assessment
should reach her office. I would be glad to take anyone
to the location if there were any questions.
