SANTA FE, NEW MEXICO

February 6, 1947.

MEMORANDUM for the Assistant Regional Director.

There follows the narrative report for Naturalists of the Southwestern National Monuments for the months of December, 1946, and January, 1947:

General

The two months were occupied generally with field trips, which to personnel dealing with widely scattered areas are decidedly inspirational. An office man falls in love with the areas all over again and enthusiasm of the field man gives real emphasis to plans for future progress. Custodians and Rangers were found to be alert and optimistic, and new rangers and archeologists are breaking in nicely.

Naturalist King traveled with Regional Archeologist Reed to Chaco Canyon from December 3 to 5; with Archeologist Reed and Assistant Regional Director Davis to Gran Quivira, Abo and Quarai December 11 and 12; and with Archeologist Stuart to Chaco Canyon and Casa Grande on December 23 and 24. From December 25 to January 17, King went unaccompanied to Saguaro, Chiricahua, Tumacacori (twice), Organ Pipe Cactus, Casa Grande again, Tonto, Montezuma Castle, Montezuma Well, Tuzigoot, Walnut Canyon, and Petrified Forest.

Archeologist Charlie R. Steen was on ruins stabilization at Casa Grande until December 16, when he returned to headquarters. He went to Chaco Canyon on official business on December 23, and took annual leave from December 25 to December 29. He spent January 15 through 21st on relief duty at Tumacacori and left the Region Three Office again on January 29 for Chaco Canyon, Grand Canyon and Montezuma Castle.

Administration - Investigation of Boundary Changes

At Tumacacori, King interviewed local land owners in an attempt to make arrangements for the possible donation to the government or acquisition by the government of sufficient land north of the Monument to preserve the ancient lime kilns, which are now outside the boundary. The problem is complicated for the land owner has only one narrow access road to his property, the donation of part of which, including the lime kilns, would cramp him unnecessarily. If one of several plots farther along the highway could be acquired, perhaps access could be had through that land and a trade made for the lime kilns.

Administration - Personnel

Several letters were written to Naturalist Maurice Sullivan of Acadia National Park, who during January decided to accept a transfer from that area to the natural history naturalist position in Southwestern National Monuments. When Mr. Sullivan reports to duty about March 1, he will bring the staff again to full strength.

On January 16, Steen in the Archeologist position P&S-2 was reallocated to P&S-3, while King, in the Naturalist P&S-3 position was reallocated to P&S-4.

Interpretation - Public Relations

Through the Southwestern Monuments Association a request was made to the Custodian, White Sands, to donate several pieces of selenite to the Corinth Free Library, Corinth, New York. These exhibits were asked for by Mrs. A. M. Miller and her son, who have visited almost all of the National Park areas in the West.

Interpretation - New or Unusual Activities

With the respective Custodians of Montezuma Castle and Walnut Canyon, guide leaflets for the Sycamore Trail at the Castle and the Island Trail at Walnut Canyon were planned for the coming season. A leaflet will also be prepared for Montezuma Well, if that property is added to Montezuma National Monument.

Both of the Montezuma leaflets will be mimeographed for this season but the Walnut Canyon one, which was tested last year, will be improved by the addition of photographs and line drawings and will be photolithoprinted by the Southwestern Monuments Association. When a series of several leaflets are thus handled, it is hoped that they can be used as exhibits to obtain sufficient funds from the Bureau of the Budget to handle the program.

Interpretation - Museum Associations

In December a member named Pope brought into the office a remarkable collection of more than 150 shrine sticks found on his property. Arrangements are being made for the possible acquisition of the collection, for deposit at the Bandelier National Monument museum.

In January it was learned that the Palmer Collection at Mesa Verde may now be distributed through its various points of origin through permission by Mr. Palmer's son. This means that the money will be returned to Montezuma Castle, and Casa Grande and Chaco Canyon will receive their respective portions.

Interpretation - Information

Extensive revisions were made on two-fold leaflets for Casa Grande, Canyon de Chelly, Navajo, Casa Grande, Tonto, Montezuma Castle, and Walnut Canyon. The manuscripts were forwarded to the Washington Liaison Office.

Photographs and literature were mailed out in response to 16 letter inquiries including three from publishers who are producing travel books of the Southwest.

A manuscript by Russell L. Caban, of Aztec National Monument was edited for inclusion in the National Park Service issues of Utah Magazine, this coming spring.

Research and Observation - Staff Projects

Continuing attempts to find suitable personnel for a proposed Survey Archeologist job was disallowed because the position had not been approved by the Bureau of the Budget.

Ring, on the long field trip, obtained status of Observation and Fact files in the various national monuments, making suggestions for improvement, and compiling lists of subject headings to be included in a master subject heading list which will be issued in February, it is hoped.

Arrangements were made with the Custodian, Montezuma Castle, to obtain photographs of skulls from the area for inclusion in a paper by Miss Katherine Bartlett of the Museum of Northern Arizona. This paper will appear in the forthcoming publication of the Southwestern Monuments Association on the Archeology and Textiles of Montezuma Castle and Montezuma Well.

Region Three Office Library

Several publications were obtained for field libraries, notably the Santa Fean conservation reports for the Coalition at Tonto. Geological maps were ordered for the branch of Planning and a survey was made of binding needs for the library and an estimate forwarded to the Director.

Accessions were 7 books, 33 periodicals, 12 pamphlets and 3 reprints.

Southwestern Monuments Association

Collaborator A. A. Brabenberg made a donation of $1,600 to the Association. The sum is to be used exclusively for research and experimentation designed to improve the techniques of ruins stabilization.

The book "First Penthouse Dwellers of America" came off the press the middle of December and 700 copies were received by the Association. Most of these books have been distributed to the field by the end of January.

Executive Secretary King addressed an inquiry to Librarian Malcolm G. Wyer, of the Denver Public Library concerning the possibility of the Association joining a cooperative book buying organization which enables non-profit and educational institutions having libraries to obtain publications at 1/3 discount. The Denver Library also maintains a Regional Bibliographical Center, membership in which may prove of much value to the Association.

Reports and Memoranda

The usual reports and 78 letters were written.

Photography and Visual Aids

Forty-three slides, archeological in nature, were sent to Dr. Carl Chapman, Director of American Archeology, University of Missouri, who plans to use them in his classes and lectures. Dr. Chapman is having the slides duplicated and will return the originals to our files.

Visitors

Custodians Wilson and Thoms, Ranger Olsen, Archeologist Sid Stallings, Stanley Stubbs, and Dr. Hers, and Southwestern Monuments Association member Gilbert Maxwell of Farmington, New Mexico, was aided greatly in the acquisition of the Hubbard Mound north of Aztec Ruins National Monument.

Protection - Ruins Stabilization

The extremely valuable contribution of Dr. Buchenberg has been mentioned above. Also he submitted a detailed and excellently thought out plan for outlining reports of structural details of ruins stabilization needs. This report was read and commented upon, and is being held for partial or total inclusion in the forthcoming ruins stabilization manuals.

A standard placard with removable letters was received for use in ruins stabilization record pictures but letters had only one flange, and were returned to exchange for letters with two flanges which would not be whipped off the board by the wind.

Archeologist Steen submitted a detailed report describing the necessary drainage program for the ruins on Casa Grande National Monument, and estimating cost.

Additional recordation sheets were ordered from the Government Printing Office. Steen wrote several letters to manufacturers of preservative materials to obtain information concerning their products. He also wrote for Regional Director Tillotson a memorandum summing up the present status of knowledge concerning preservative fluids which might be used on the crumbling stone carvings at San Jose Mission in San Antonio, Texas.

In general the ruins stabilization activities in almost all of the monuments were hampered considerably by the lack of adequate wage ceilings. Work is going forward nicely at Chaco Canyon but no labor can be hired at monuments like Tonto, Montezuma Castle, and Tumacacori until wage ceilings are raised. This is a dangerous situation for it postpones too much of the program into the spring months, and places us again in the position of having to guard against too much haste.

Projects for February

King will remain in the office during the month handling routine affairs.

Green will place house jacks under the smoking cave ceilings at Montezuma Castle and will make such other trips as are necessary in the administration of ruins stabilization activities.

The Natural History Naturalist position possibly will remain unfilled until near the end of the month.

Arches NATIONAL MONUMENT

Moab, Utah

January 25, 1947

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of January, 1947:

GENERAL: The custodian was absent on annual leave at Salt Lake City, Utah from December 27th to January 1st, inc.

WEATHER: Snow fell on December 27th and the temperature dropped to 1 degree above zero. The balance of the month saw the nightly temperature range between 1 and 10 degrees above zero with very cold days.

TRAVEL: Travel was very slow this month due to extreme weather conditions with only 13 cars and 27 people visiting the area. All travel was from Utah and Colorado.

INTERPRETIVE SERVICES: No contacts were made in the Windows Section and only two people were contacted at headquarters. During a period of annual leave at Salt Lake City three illustrated lectures were given on Scenic Areas of Southeastern Utah.

ROADS: Very little maintenance was accomplished on the Windows road during the latter part of December due to the snowstorm of December 27th. The road is packing well but is developing rough spots. Not much can be done on improvement until our cold weather breaks.

SPECIAL ACTIVITIES: Two contacts were made with officials of the Utah State Department of Publicity and Industrial Development at Salt Lake City, Utah on December 28th and 30th. Estimates were furnished for improvement of present roads to points of interest in this section and also estimates on ultimate development of these areas. A series of color slides were shown to six members of this department.

EMPLOYMENT: Billy Walker, Laborer-Leadman on road maintenance was terminated on December 28th due to weather conditions.

MAINTENANCE AND CONSTRUCTION: Estimates were received from local concerns for construction of two latrines to be installed at the Windows parking area and for painting of headquarters area buildings.

An overhaul job had to be performed on our SXM power unit during the month. It was necessary to take up the connecting rod bearings when it developed a decided knock.

RESEARCH AND OBSERVATION: D. Elden Beck and party from Brigham Young University, whose contemplated survey of plant and animal life during October, 1945 was postponed due to inclement weather, now state that they would like to visit the area during April to accomplish their survey. Arrangements are going forward to this end.

PUBLICITY: The Utah Magazine is figuring on devoting two issues, April and May, to Utah Parks and Monuments. An article and pictures on Arches were submitted for possible use in this publication.

NATURAL BRIDGES NATIONAL MONUMENT: No inspections were made at this area as the approach is closed by snow on the Elk Ridge.

NATIONAL PARK SERVICE

.....NATIONAL MONUMENT
Aztec Ruins,
Aztec, New Mexico,
28 January 1947.

....., 19....

MEMORANDUM for the Regional Director,
Region Three, National Park Service.

There follows the report of activities in Aztec Ruins for January 1947.

WEATHER. Cold weather with a low of minus 9 and high temperatures ranging in the upper thirties seems to have discouraged visitation, and those who did brave the weather quite often found it too cold to join a trip thru the ruins, but contented themselves with the museum and a glimpse of the ruins from the museum building. During several successive days the maximum temperature has remained below freezing with trees and shrubs coated with ice thru day and night. A total of five inches of snow has been recorded for the month.

MAINTENANCE. The major portion of our effort this month has been centred upon the drainage ditch in an attempt to clean out the mud and sand that blocks a considerable portion of its length. We have tried with little success to ram a steel sewer rod thru the blocking material. The sewer rods are now being abandoned and we shall try to use a traveling nozzel which will force water under pressure into the lower end of the blocked pipe, washing away the material as it is encountered.

COOPERATING GOVERNMENTAL AGENCIES. The SCS at Farmington, N.M. has suggested the traveling nozzel in an attempt to clear the drainage ditch. With their help, of which they have given freely and often, help from the City of Farmington Water Dept., and that of the Azte c Water and Fire Dept. we hope to gather together enough machinery and materials to make some effect upon this stalemated situation.

Interpretive Services. There were 118 people conducted in 27 trips thru the ruins and 214 people in 46 trips were shown the museum.

INCREASE IN TRAVEL. A slight increase this month over a year ago is indicated in comparative travel figures; Jan 1947, 214 people in 62 cars from 15 states including 1 member of the armed forces; Jan 1946, 210 people in 58 cars from 15 states including 17 members of the armed forces.

PERSONNEL. Park Ranger Wm. C. Reed reported for duty 2 January 1947.

PROPOSED ACTIVITIES FOR FEBRUARY. Continue drainage ditch operations.

Irving D. Townsend,
Custodian.

AZTEC

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
BANDELIER NATIONAL MONUMENT
SANTA FE, NEW MEXICO

January 29, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Bandelier National Monument for the month of January, 1947.

Weather and Roads

Weather for the month was generally fair and cold with a few light snows mixed in. High for the month was 56° and low was minus 16°. .32 inches of moisture fell.

Roads have been in good condition most of the month. Only twice was it necessary to plow the snow off the approach road.

Maintenance

The project of treating and replacing exposed vigas on all the buildings is about 50% complete. The force account painting and decorating job is progressing rapidly.

Travel

248 visitors came to Bandelier during January, arriving at the area in 72 automobiles. 69 of these cars were original entries. The road to Bandelier has been in fair condition during the month. Nevertheless, it is believed that many bonafide tourists were probably skeptical about traveling this distance from town during this time of year because of fear of road conditions.

11 men in military uniform visited the area.

Interpretation

32 tours to the ruins were conducted with a total attendance of 119. The average duration of each tour was 1 hour and 5 minutes. The return trip from the ruins is being made by coming back through Tyuonyi because of snow on the trails on the floor of the canyon.

The utility of our museum was greatly diminished during the month because of lack of heat in those rooms. It was found that most all visitors were eager to see the museum, but it was too chilly for any of them to spend much time studying it. However, in spite of this, many nice compliments were received about the organization and nature of the museum.

There have been a considerable number of deer seen in the canyon during the month and these provide much enjoyment for the visitors.

Two programs, outside the monument, were presented during the month. Custodian Thomas spoke at a meeting of the Kiwanis Club at Santa Fe and Clerk Glen Rean presented an illustrated talk to Region Three personnel.

Visitors

Naturalist D. E. McHenry, formerly of the National Capitol Parks, visited Bandelier on January 1st. Naturalist McHenry and his family were enroute to Yosemite where he will take up his duties as Naturalist at that area.

State Game Warden T. J. Ramsey, of the State Department of Game and Fish, paid us a friendly visit on January 23. He informed us that his headquarters are in Espanola and he will have jurisdiction over most of the area which borders Bandelier on the north, and expressed his desire to cooperate closely with us on fish and game problems.

S. F. Fraistad, of the Treasury Department, visited the area on January 11.

Free Publications on Hand as of January 29, 1947

Bandelier National Monument Leaflets (old)	875

Surplus Property

We have received considerable property from Surplus during the month. Three good pack mules came from Ogden, Utah. We also received a 25 KW diesel power plant from Ogden. Ranger Eden made a trip to Grand Canyon during the month to bring in a 10 KW power plant, a road

roller and a small oil heater. We will make more trips this month to haul other equipment being transferred to this area.

Personnel

The custodian returned from annual leave January 5. From January 13 to January 28 he was on special detail in the Region Three Office. This area reached another mile stone this month when a full time clerk was put on. Glen Bean of Alamosa, Colorado reported for duty January 2. He spent the most of the month on special detail for training purposes in the Region Three Office and reported for duty at Bandelier January 28.

Canyon de Chelly NATIONAL MONUMENT

Chinle, Arizona

January 25, 1947 19 47

MEMORANDUM for the Regional Director, Region three.

The following is a report of activities at Canyon de Chelly National Monument during the month of January, 1947.

Weather Conditions

Temperatures have been about normal for this period with a minimum of -1 degrees and a maximum temperature of 52 degrees. Although the surrounding areas received quite a bit of moisture in the form of snow and the Spider Rock and Monument Canyon sections of the monument also received a considerable amount, the recorded amount at headquarters was only .15 inches.

Administration

The custodian took annual and sick leave beginning December 23, and returned to duty on January 14.

One trip was made to Gallup New Mexico to meet Rangers Steel and Chittum and help them get over the mountain with a trailer house purchased from the war surplus and to be used as temporary quarters for the permanent Ranger.

Maintenance

During the Custodian's absence, Ranger Benson spent most of the time making building and minor repairs over the area. The Navajo Service Graded the road as far as headquarters and we have drug them as far as White house. New water pump and other repair work was necessary on the Chevrolet Pickup #0. USI-15840. A general inventory of equipment was made after the custodians return, and much time has been spent in taking care of the office work that piled up during his absence.

General Publicity

LOOK magazine for January 21, 1947 featured an article on Miss Maureen Glenby entitled "Artist and Model" in which were several pictures taken at Canyon de Chelly during Miss Glenbys visit here last Summer. The red Sand dunes ajacent to the area were used as a background for the "Glamour" photos.

Interpretive Services

Three conducted tours and one headquarters talk were made during this month. Ranger Benson spent a total of 5 hours with 2 parties composed of 9 persons. Custodian Guillet spent 4 hours with 1 party of three.

Increase in travel

Although January is always the lightest travel month of the year there were still 21 hardy souls in seven cars which is an increase of 50% over January of 1946.

SOUTHWESTERN NATIONAL MONUMENTS
Capulin, New Mexico,
COOLIDGE, ARIZONA

ADDRESS REPLY TO THE SUPERINTENDENT

January 27 1947.

Memorandum for the Regional Director, Region Three,

There follows a report of the activities in and around Capulin Mountain National Monument for the month of January 1947.

Estimated three hundred visitors, for this month, bringing total travel year to date to, 3960 and travel fiscal year to date to 19980,

Roads in the Monument have been in only fair condition this month, The Custodian requested the state highway patrol for a little lift during the fore part of the month and one circle was made with the large maintainer, this did some of the basic and heavier work that I could not do but left the road with a rather an unfinished appearance and is still slightly loose and rough, We hope to get rid of this trouble this week, and get it all nice and smooth again,

Weather

has been about as usual for January with about six or seven night from 2 to 10 below zero and the days running up to around 45 above , two quarter inch snows throughout the month,

Wild life in the Monument is doing nicely the big snow in November looked bad for them but it was soon gone and so far the winter has been no worse than ordinary,

During the month considerable attention was given the boundry fence and repairs were made where the snow in November rode down the wires in several places, some repair was done to the cattle guard and some of the culverts One culvert is going to be removed and replaced, the road is lowering constantly and the culverts need lowering also,

Very Respectfully,
Homer J. Farr,
Custodian,

No. Publ. inventory

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

CASA GRANDE NATIONAL MONUMENT

COOLIDGE, ARIZONA

January 27, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows the narrative report for Casa Grande National Monument for January 1947.

General: As the cotton season finally starts to windup in the valley a check on production indicates that totals far surpass anything on record. Although the price dropped somewhat in the last part of the season for the cotton farmer, it was period of great financial profit.

Weather: For 15 days during the report period our minimum thermometer wasn't functioning prpperly. The first three weeks were cold with maximums averaging around 55. The last week the Arizona sun really blossomed out and the maximums ranged in the 70's. The maximum for the month was 76 recorded on the 22nd.

Inventory of Publications: Casa Grande Nat. Mon.(2 Fold Leaflet) - 1900 Casa Grande National Monument (Spanish Leaflet) - 3150: Southwestern National Monument Folders - 5050: National Park Location Map # 6 - 50. Because of being low on the two fold leaflets we are holding back on issueing them and pushing map of Southwestern National Monuments.

Visitors: January 1947 - 4556; January 1946 - 2708; January 1945 - 1000. Travel year to Date 1947 - 16, 680; 1946 - 8,724, 1945 - 3402; 1941 - 5538. The winter visitor season has really hit and travel totals are again going by the boards. Our travel season to date total is almost double anything we have had on record before. The visitor is of the type that is spending the winter season in the valley and will stay with you on a trip just as long as you will talk to them. All the states in the union are represented in our totals as well as visitors from Cuba, Hawaii, Brazil, Canada, and Alaska.

Interpretive Services: Of the 4556 visitors to the area, 3360 made the Ruins trip, in 231 trips spending an average of 50 minutes at the Ruin. 2558 made the museum trip averaging approximately 30 minutes per trip. Total contacts were 5918. 1196 people came into the area for a quick look but did not make the Ruin trip. 65 members of the armed forces are included in the contact totals.

Maintenance: With the great number of visitors maintenance was routine. Gradually the excess gravel from road resurfacing is being picked up.

Publicity: Howard Pyle, Arizona Highlights Commentator on KTAR, Phoenix Radio Station, gave a brief talk over the air on the Monument.

Talks Given: A twenty minute talk on "The Early History of Casa Grande National Monument" was given for the local Lions Club on January 15, 1947.

Trips Taken: January 2 and 3, Mechanic Stonebocker made trips to Phoenix and Florence in connection with War Assets Surplus materials. January 13, Custodian Bicknell made a trip to Tucson to attend Wildlife Conference and returned Sunday bringing Assistant Regional Director Scoyen with him. On Sunday the 19th. he took Mr. Scoyen up to Phoenix .

Visitors of Note and NPS Visitors: January 3 and 24, Custodian Thomas of Bandelier was in. On the 3rd he stopped in on his way back from visiting his family in California and the 24th. he was in on Monument business. January 9, Associate Naturalist King stopped in to go over Fact File and SMM business. January 16 to 20, Archeologist Steen spent a few days with us recuperating from flue. January 18 and 24, Regional Forester Carlson was in in connection with fire tools and War Assets surplus materials. January 19, Assistant Regional Director Scoyen was in to discuss Monument problems.

Leaves Taken: Mechanic Stonebocker returned to work from approximately a months leave on January 15.

Chaco Canyon NATIONAL MONUMENT

Bloomfield, New Mexico

January 26, 1947

MEMORANDUM for the Regional Director, Region Three,
National Park Service.

There follows the report of activities in Chaco Canyon National Monument for the month of January, 1947.

There were a total of 15 visitors to Chaco Canyon during this past month. They came in 5 automobiles from the states of Colorado - 2, New Mexico - 3. Of these, 9 forming three parties took a trip through the ruins, while six stopped for information only. Altogether, they spent a total of 255 minutes. Guide time - Custodian 85 minutes, Ranger 150 minutes. Seven tickets were sold, but no complimentary tickets issued. At the end of the month, there were approximately 19, 258 free two-fold leaflets on hand, and no sales publications printed at the Government Printing Office.

The coldest weather in several winters struck Chaco on the 16th of January when the mercury dropped to 24 degrees below zero. There were 10 days during the month of sub-zero weather. Almost every pipe in the Canyon froze -- some of them on the coldest night, and seldom more than one on the same day. The warmest was 51 degrees Fahrenheit on the 26th of the month. Besides the cold weather, we had fifteen hundredths of an inch of rain and thirteen inches of snow during the month.

During the cold weather, the Trading Post operator had some of the toughest luck. His pipes froze and burst. He repaired them, and just a week later, they froze and burst again! The other pipes froze, but by building and keeping hot fires they thawed without breaking.

In the coldest weather, the oil stove in the Custodian's residence refused to function. The chimney was changed so that it had more of a flue and a temporary extension put on it. The stove was cleaned and put in better shape from chimney to floor. No more trouble has been experienced with it.

Eleven of the month's thirteen inches snow fell in six consecutive days. Then, the San Juan County road grading equipment came out and cleared the road north,

which made it much easier to travel, so the north approach road has remained in fair shape.

The month has been a busy one with many small and especially inside jobs accomplished.

On the 29th of December, with a good day and a cooperative set of visitors, pictures were taken and sent to Headquarters as requested by the Naturalist's Division.

An inspection trip was made to Pueblo Alto, and the area cleaned of accumulated trash.

In the Office, the floors were cleaned and waxed as was the furniture. In the museum, the floors were cleaned and waxed, and the two chairs were sanded and waxed and they present a much neater appearance.

The paint shop was thoroughly cleaned and rearranged as was the plumbing shop.

In the tool room, it was cleaned and then a substantial rack was built so that the tools now in the boxes outside can be cleaned, oiled and racked. Then, much better care and account can be taken of them. Also, a lumber rack, for our small amount of good lumber was constructed.

Some of the material at the old CCC camp site was hauled down to Headquarters.

As the close of the month comes, we are hoping for an early melting of the snow and some warmer weather. We have lots to do here at Chaco and hate to be held up by having to thaw pipes, repair chimneys and the like. Projects for the ensuing months:- finish hauling the material from the old CCC camp site; clean, grease and sharpen tools; paint the office when the paint arrives; get the fence project started again; paint and letter signs; keep office and routine duties current and get our roads in shape for the summer travel.

There follows the report from Archaeologist Richard G. Vivian on the Ruins Stabilization progress.

* * *

GENERAL

Despite extremely cold nights the days have presented favorable working conditions, free of high winds or snow storms. Seven men are now employed and they have been able to work throughout the month with the exception of one half day. The

first part of January was spent on small jobs at Pueblo Bonito and the remainder of the period, after the advent of cold weather, at Chetro Ketl.

PUEBLO BONITO

Wall repairs were completed on Kivas V and U. Excavation was partly completed around the south quarter of Kiva L on the edge of the plaza to correct deep underground seepage from rooms above and to the east. This is now in abeyance pending materials. On the west side of the ruin, plating which threw surface drainage against the wall of room 122 was removed. One man day was spent clearing large brush from low rooms in the northwest.

CHETRO KETL

The most extensive job here has been correction of the drainage in the east plaza and removal of the old excavating railroad grade which cut this drainage. Surface runoff which formerly drained into the great kiva on one side and into a series of 8 rooms and kivas on the other has been collected and diverted out through a natural opening to the south of the ruin. One large hole probably dug in exploration for lower structures, and undercutting a portion of the front walls here, was been backfilled.

Also backfulled along the front of the ruin were four partially excavated series of rooms. No room had been excavated completely and these cuts had been made only for exploratory purposes.

In the north central section of the ruin, large trenches left by the excavators below the floor level and below the bench of Kiva I have been backfilled. Twenty yards of soil were wheeled in.

Rooms 30, 33, 37, and an unnumbered hole south of I had also been cut below the bases of existing walls in exploration for lower structures. These cuts which left considerable good wall unsupported were also backfilled. Where possible, drainage was provided to the outside. Approximately thirty yards of dirt were wheeled into these areas of difficult access.

Surface drainage has also been corrected in a series of four unnumbered rooms in the northeast section and three in the northwest. (Many of the room numbers are not discernable on the only map we have been able to obtain to date of Chetro Ketl).

In progress at present is removal of the low railroad grade between the east

and west plazas and the placing of surplus dirt in low areas in the west plaza, designed to throw the surface runoff that now collects there farther to the south and away from standing walls.

As a byproduct of backfilling and surface drainage a large supply of building stone has been obtained. Part of this has been hauled to Pueblo Bonito, some distributed handy to contemplated work in Chetro Ketl and the rest stockpiled.

Tests on materials, soil-bitumen, soil-cement and masonry mortar are being continued and the results tabulated for the basis of a report. Some time has also been spent examining and tabulating the results of previous stabilization methods and materials in the Monument.

In the coming month we intend to start major wall repair at Chetro Ketl, complete the materials tests and catch up with the photographic records.

* * *

All's well on the Chaco, and we are looking forward to the greatest travel season in the history of the Monument.

snowfall and a week or so of cold weather o using extra fuel maintenance and time spent thawing water pipes, were the outstanding items in the January activities. Snow clad Dale Ring visited the Monument. Journal is about a fifth greater than this month last year. Portal-Cave Creek road closed due to snow, as usual this time of year.

MEMORANDUM for the Regional Director, Region Three:

Following is a report of activities at Chiricahua National Monument for January.

Weather Conditions. On the second and third of January about 4 inches of snow fell, accompanied by considerable wind and cold. Some of that snow and that of the following week still remains on the north slopes and on trails in sheltered places. Temperatures as low as 15 to 20 degrees above zero occurred regularly at night for the early part of the month at Headquarters. Trees around Massai Point and on the high part of the Monument were covered with frost crystals up to an inch long or more.

Newsworthy Visitors. Naturalist Dale S. King made a brief visit early in the month. Marion Webber, Forest Supervisor from Harney National Forest, Custer, South Dakota, visited Custodian Cooke a few days.

Approaches to Monument Area. Approach roads were in fairly good condition except for a few days during the first week of January when general snows caused muddy roads and slowed down the travel. The Portal - Cave Creek road over the mountains has been closed all month due to the usual winter snow, and probably will not be consistently passable before April.

Interpretive Services. One conducted horseback trip was made by the Custodian, and one group of bus passengers received interpretive service from the Ranger. 589 visitors in 116 parties were contacted at the museum. Several contacts were made by the Custodian and Ranger at Massai Point or on the road in the Monument.

Travel. Travel figures showed a decrease of about 120 visitors from the preceding month. The snow and cold weather undoubtedly caused a decrease in visitation from the normal travel for the month. An increase of almost 25 per cent over January last year was noted.

General. With about four or five inches of snow on January 2 & 3, and more a few days later, considerable time was required to keep the road open to Massai Point. For several days it was passable only to cars with chains, and visitors were advised not to go up without chains. Due to the continued cold we had a little trouble keeping the plumbing thawed out in the headquarters and campground rest rooms, and in the campground laundry. Exposed hydrants froze but there was no breakage. It was necessary to go to Bisbee for a few tanks of petroleum gas as there was a local scarcity probably caused by the cold weather.

Wildlife. Apparently most of the deer and other larger animals are in the lower canyons, as very few tracks were observed on a recent horseback trip over most of the trails. Deer are seen occasionally near Headquarters.

~~El Morro~~ NATIONAL MONUMENT

~~Ramah, New Mexico~~

January 25, 19 47

MEMORANDUM for the Regional Director,
Region Three.

There follows thereport of activities in El Morro National Monument for the month of January.

WEATHER: Although the minimum temperature dropped to 26 degrees below zero on the 16th. we have had unusually warm and fair weather for January. The maximum temperature reached 58 degrees. Eight inches of snow were recorded in three light storms, accounting for .18 inches of precipitation.

APPROACH ROADS: The three light snow storms which occurred during the month made our roads quite rough, but both roads are passable.

TRAVEL: Fourteen visitors in fourcars arrived at the monument during this report period. The tour of the inscriptions was made by eleven visitors in three trips and the total guide time amounted to 3 hours and 45 minutes. Having visitors at this time of the year is unusual for in a normal year the roads are blocked with snow most of the time.

MAINTENANCE: Two loads of coal were hauled from the Indian Service mine. After two months delay in obtaining parts the overhaul job on the battery charger was finally completed. Juniper posts for a new directional sign on the main road were cut, hauled and peeled.

ADMINISTRATION: Two trips were made to Gallup for repairs on the pickup and supplies. Most of the month has been spent working on the files which has turned out to be a major project.

PUBLIC HEALTH: At 10:00PM on the 14th a call was received from the CAA emergency airfield reporting a forest fire on a ridge 15 miles east of the monument. A TWA pilot had seen a large fire and near it's edge a light signalling. A forest fire seemed a little out of season, so we concluded that a plane must have crashed and set out to see if we could locate it. Our first stop was the sawmill where we woke Mr. James who immediately dressed to join us in the search. While dressing

he related in detail how he had heard a plane go over and suddenly it's motors stopped. He even went outside to have a look, so sure he was that something had gone wrong. From the sawmill we went to Oso Ridge lookout, but found the mountains engulfed in a heavy fog. With ceiling zero we decided that nothing could be done until daylight.

Daylight brought little change in the weather except some more snow , but by noon the fog had lifted and the sky was clear. The only new report from the CAA was that the Army was sending search planes, so we decided to do what we could on foot. Mr. James went north from the sawmill with five of his Indians and the El Morro crew went in from the west. From noon until dark the two crews covered approximately five square miles of ridges and canyons without finding any sign of a plane. The morning of the 16th was clear and two C54s flew low over the mountains for two hours. Fresh ground crews were rounded up at El Morro and Mr. James was out again with his Indians. At 10:00 AM Mr. James reported that he had [illegible] a Navajo who had been camped in the mountains for three days and admitted building a big fire on the night of January 14th to relieve a toothache. This ended the search. I have often wondered how the Navajo treats a toothache. I wonder if intense heat is also good for sore feet.

GRAN QUIVIRA

GRAN QUIVIRA, NEW MEXICO

JANUARY 28, 1947

The following is a summary of activities for the month of January, 1947.

Visitors this month totaled 72
Travel year to date 590

Weather. This has been a month of strong winds and some snow. Precipitation in the amount of .55 inches fell this month. High temperature was 54 and low 6 below zero.

Roads. Although road improvement was promised, after the first of the year, by the State Highway Department, none has materialized. All roads are very rough and visitors are again becoming discouraged from making the 52 mile round trip to the monument.

Travel. Visitation figures show a slight increase over the previous month of December. Instate visitors numbered 54 and outstate visitors 18. There were a total of 20 cars with instate numbering 15 and outstate 5. Most visitors are deeply interested in the mission and Indian ruins and plan to make a return trip this summer when they can stay longer.

Guide and Contact Service. A total of 72 visitors were conducted through the ruins on 20 guided tours. The average time spent by each party was 55 minutes. Total contact time of 18 hrs, 30 mins.

Maintenance and Administration. The old refrigerator was taken to Albuquerque for repairs. The repair shop personnel informed me that it would take some time to obtain the necessary parts but eventually, they promised, they would have it in good working order. Work continued on minor restoration jobs on the walls of the missions. New drainage pipes were installed in the kitchen sink to replace the old cloged-up ons and it is now in perfect working condition.

Custodian.

Summary of the January, 1947,
Monthly Narrative Report for
Great Sand Dunes National Mon.

P-1 WEATHER: Very cold winter weather.

P-1 TRAVEL: 110 visitors, 31 cars.

P-1 TRAVEL BY MONTH: For January 1946, 37 visitors, 14 cars.

P-1 ROADS: Dry and rough.

P-1 and 2 ACTIVITIES: Trying to thaw frozen water line. Replaced bloom dome flag pole. Make windows weather tight. Reconvert oil heater into furnace. Report on airfield sites. Post bids for receiving.

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
GREAT SAND DUNES NATIONAL MONUMENT
MOSCA, COLORADO

January 26, 1947

MEMORANDUM for the Director,
National Park Service.

There follows the report of activities in Great Sand Dunes National Monument for January, 1947.

WEATHER. The weather for this report period has been very cold. The new year greeted us with a cold snap that lasted nearly two weeks. During this time, the thermometer dipped way below zero at night, and during the day, the temperature didn't rise above 32 degrees.

TRAVEL. One hundred ten persons in thirty-two cars, visited this area during this report period. For nine days during the coldest part of the cold-wave, there were no visitors brave enough to face the cold northeast wind.

RELEASE ON TRAVEL. The records show that travel figures for January, 1946 to be: Cars, 14; Visitors, 37. Compared to this year's figures, travel has greatly increased.

ROADS. Both monument and approach roads are dry and rough. Little can be done with them until spring.

ACTIVITIES. This report period has been most aggravating - the "Singing Sands" struck a sour note. The new year brought a northeast wind which was bitterly cold - this caused the temperature to drop way below zero and it stayed there for nine days. The cold wave lasted nearly two weeks.

The cold-wave froze up the water line leading to the custodian's residence and todate it is still frozen. Stupidity on our part, assumed that the water line had been properly attended to. When the water stopped flowing, the 2600 feet of line was walked, and it was discovered that 1500 feet in the middle was uncovered. The five foot deep trench was filled with snow and ice. Several hours during the warmest part of the day was devoted to removing this four inch cake of snow and ice in the trench. The water line was exposed in many places. Only 300 feet were uncovered and then another snow ruined the project.

Water has been obtained from Mosca Spring in milk cans. The flow at Mosca Spring is getting low and the next resort will be Mosca Creek. At any rate, when the water line thaws, we will know Spring is here.

The before mentioned northeast wind blew down the flag pole and drifted snow thru the windows (frames) on the east side of the residence. The heating system during this cold-wave was inadequate.

Attention was turned from thawing the water pipe to trying to keep the house warm. Window frames were weather-stripped and puttied in. Consideration was given to converting the oil heater in the basement into a temporary furnace.

A metal hood was built in Alamosa and installed with two pipes leading to openings in the front hall and dining room. This temporary measure has given some greatly needed relief from the cold.

The flag pole was reset; desired information was obtained in regards to airfield sites in the San Luis Valley; and posted bids for gasoline in Mosca and Hooper as requested by Regional Office.

Montezuma Castle National Monument
Camp Verde, ~~Arizona~~ COCONINO ARIZONA

January 24, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows the monthly report of activities at Montezuma Castle National Monument for the month of January, 1947.

Visitors this month - 662; travel year to date, 3,826.
Visitors January, 1941 - 536; travel year 1941, 1,584.

Weather On January 2 we received 2½ inches of snow which lay on the ground for several days.

Administration This January has brought one and a half times as many visitors as we had a year ago. In addition to visitor contacts we attended to our annual equipment inventory and report of items recommended for survey. Considerable attention has been given to matters pertaining to Montezuma Well with a total of 14 trips having been made there for patrol or to acquaint members of the Regional Office with the area.

Maintenance Nine man-days were spent on work on the picnic grounds road, trails to the residences and the Castle trail.

Our new entrance intersection was outlined with rocks to eliminate traffic over the abandoned area.

A temporary support was constructed for the general information sign at our entrance. The old support was torn down when our entrance intersection was altered last month.

One trip was made to Prescott to have our water pump motor overhauled.

Interpretation Suggestions on revising our "Sycamore Trail" booklet were submitted. The dangerous condition of the cliff at the Lower Ruins has necessitated elimination of some of our nature trail.

Twenty five herbarium specimens were mounted on Bristol Board cards and the corresponding file cards were prepared.

A set of shelves were constructed in the basement of the museum building to provide additional space for pottery storage. A collection of 32 pottery vessels from the Osborn Caves down the Verde about ten miles from here has been accessioned and cataloged.

Montezuma Well On December 29 the tenant at Montezuma Well left the key to the residence with us and asked that we check the property occasionally to see that everything was in order until negotiations are complete for purchasing the property. Boundary lines have been checked and plans are being made for administering the area. Location of a proposed stock driveway for watering purposes has been checked with the Forest Service.

Natural Phenomena On January 7 about four tons of rock fell from the cliff onto the visitor trail through the Lower Ruin. Two sections of pre-Columbian wall were shattered but this included a total of only about five square yards of wall. We were not aware this section of the cliff was in danger of collapse as there was nothing to give warning of its weakness. However, there is another section nearby which forms a miniature "Threatening Rock" and to avoid this we plan to alter the trail.

Use of Monument Facilities by the Public This month brought 642 visitors to the monument in 196 cars. For admission to the Castle ten hundred and fifty five tickets were sold; eighteen children paid tax only; eighteen younger children climbed free; and three members of the armed forces climbed free. One other man in uniform visited the area but did not climb the ladders.

Contact Time Total contact hours, 115.80. Hastings, 30.00; Leding, 40.25; Schroeder, 45.25. A total of 85 trips were made through the Castle with 397 visitors. There were 112 groups contacted in the museum including 441 people. Two parties of twelve used the picnic grounds and two people camped overnite.

National Park Service Visitors Naturalist Dale King on January 12 and 13. Regional Forester Carlson on January 14. Custodian Cotter.

NATIONAL PARK SERVICE

Navajo National Monument

Tonalea, Arizona

January 26, 1947

Memorandum for the Director, Region Three.

The are follows the monthly report of activities in this area for January 1947.

Weather Eight inches of snow at this time. On the 15th there were 14 inches of snow. Temperatures have ranged from 47 degrees to 2 degrees.

Visitors The deep snows have discouraged travel. We have not had a visitor car since before Christmas, altho the entrance road has been kept open to cars with chains.

Maintenance and Construction Maintenance is current but there has been no outside construction because of the deep snow. Some inside work has been accomplished on the files and we are in the process of reconditioning all tools and equipment. Correspondence is current.

Projects for February Inspection at Inscription House. If parts become available it is our intent to bring the propane installation up to specifications by removing the sweated solder joints and replacing them with flare and nut joints. The pressure release valve will be installed on the water heater if the contractor can furnish the valve.

ORGAN PIPE CACTUS NATIONAL MONUMENT
AJO, ARIZONA

January 25 19 47

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities in Organ Pipe Cactus National Monument for the month of January 1947.

WEATHER

Winter finally caught up with us here in the south and during the month several days were about as cold as we have ever experienced down here.. High for the month was 75 and a low was reached on the 2nd at 29. One nice shower of .35 inches fell on Jan. 7th. We have had more than customary north wind which seemed to be blowing off of the snow areas this month.

TRAVEL

Travel though slow on some of our cold days has increased considerably with a total this month of 7632 making a total for the travel year of 24859. Camping has taken a big jump with 154 people this month with some stays over 20 days. Need for camping facilities is becoming urgent so that it may be controled to a greater extent.

GENERAL

January seems to have been one of the busiest months we have ever had but little accomplishment shows, visitors take up one man's entire time and patrols are being made as time allows. Several 14 and 16 hour days were put in to keep things current.

One trip was made to Phoenix on Jan. 3 in connection with surplus property. Another trip to Phoenix was made on Jan 15th to meet Associate Regional Director Scoyen to straighten out grazing matters. Two days were spent in Tucson on official business.

Another serious problem has come up this month with the outbreak of hoof and mouth disease in Mexico. 8000 head of cattle are being moved in along our unfenced border from the interior of Mexico so we can safely say that our grazing will increase by 4000 head soon and all subject to disease which can be spread into our wildlife.

Inspections of the area were made by Associate Regional Director Scoyen on the 16th and Regional Forester Carlson 21st to 24th.

Some time was spent with Arthur Halloran, Refuge Manager and Joe Kempton, warden for the Fish and Wildlife Service on mutual problems on adjoining boundries.

Accidents

Two wrecks occured this month in which cows were killed on the main highway. One on December 26 and another on Dec. 30. It is not believed that anyone was hut in the accidents.

On Jan 17 a car pulling a boat trailer hit one of the dips too fast and wrecked. This we have been expecting for a long time as the sand has never been cleared from this dip since the middle of September.

VISITORS

Visitors this month besides those officialy mentioned were, Mechanic Stonebroker and family who camped for several days and Herold Asmussen and wife. Harold Has been temporary naturalist at Yosemite several seasons.
Custodian Thomas stopped in while on Annual leave for a short visit.

Projects for the Coming Month.

It is expected that S&MC fencing projects will get started this coming month and much time will be needed to supervise and survey for this. The rest of the time will be spent on contact and office work with increased patrols in connection with trespass cattle.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

~~Saguaro~~ NATIONAL MONUMENT

~~Tucson, Arizona.~~

~~January 26~~ 19 47.

MEMORANDUM for the Regional Director,
Region Three.

There follows the narrative report of activities at Saguaro National Monument for the month of January, 1947.

WEATHER. Except for a steady 14-hour downpour on December 26, the entire month has been dry, with cloudiness and dull days prevailing until January 16. Cold nights and days averaging in the forties were continuous until that date, but since the 20th we have had the winter weather people leave home in the east and north to enjoy; warm, sunny, clear, and with little wind.

SPECIAL ACTIVITIES. Park Ranger Fulton made one official trip, to Organ Pipe Cactus National Monument, on January 25, for the purpose of borrowing their cement mixer for use in construction of a cess-pool at Headquarters and a cattle-guard and water tank base at Madrean Canyon.

INSPECTIONS. Archaeologist Dale King was in on December 27. Regional Forester Carlson stayed with us from the 18th to 21st, going over fire protection and forestry problems. Unofficial visits were made by Art Thomas, of Bandelier on the 4th and 25th, and by Custodian Cooke, of Chiricahua, on the 5th and 13th.

MAINTENANCE. Rock walls of the parking area at Headquarters were partially rebuilt and straightened, and a protective border of Ocotillo planted around the perimeter. Temporary landscaping and installation of a small arboretum to contain native cacti was again started in the area in front of the Headquarters building; this work has lapsed since July, 1942. Earth for the fills is being obtained by the excavation of a cess-pool in the rear of the building, which is now approximately 40% completed. Floors in the interior of the Headquarters have now been all painted and waxed.

Except for 16 man-days spent on the above work, the trail crew worked all month on Happy Valley Saddle trail; relocation and rebuilding of one-fourth mile to bypass the badly eroded stretch 2 miles above the foot of the trail is completed, and major reconstruction of the lower two miles is approximately 90% finished. The crew spent one day in making improvements in the Madrean Canyon water system and relocating the pump.

APPROACHES TO MONUMENT AREA. The Broadway approach road has been very rough all month, and has produced numerous complaints from visitors. The approach from Vail is fair, and only one party complained of this condition; about one-half the distance to Colossal Cave was maintained by the Pima County Highway Dept. early in January.

TRAVEL AND INTERPRETIVE SERVICES. Travel to this monument exactly doubled over that of December, with six visitors to spare. A total of 2256 persons entered the monument, arriving in 705 cars (and one party of six via horseback, from a Dude Ranch eight miles away). Visitors from 41 states, Alaska, Canada, and New Zealand were registered.

Interpretive service was rendered 711 persons, in 209 parties, who stopped at the Headquarters; forty-five and one-third hours was spent in contact work. Visitor contact was maintained on 30 of the 31 days; at times this record was due to voluntary help of the Custodian's wife, when she remained home to contact visitors, leaving the Ranger and Custodian free for other work.

The most frequent complaint of visitors this past month has been to the effect that they cannot find overnight accomodations in the city of Tucson. It is believed that our travel would have shown many more people if they had been able to remain in town, as past records from 1940 and 1941 show that our 2256 visitor count is below past January figures. The custodian, in attempting to obtain reservations for Mr. Carlson and Custodian Bicknell called at every hotel in town, and over 30 tourist courts, plus an hour spent on the telephone - and no reservations. Some of the hotels will not accept reservations before April, others late in February.

RANGER SERVICE. Considerable time has been spent in attempting to find a qualified local man for short-term employment as a Temporary Ranger. Due to the fact that funds are available for only a month and a half, only one man has been found who will accept the position, and he is not a veteran, although otherwise well-suited. It had been planned to space this employment from about February 10 or 15 until the funds were expended, in order to allow the Ranger and Custodian to work together on pre-fire-season projects, and to enable the Ranger to learn the monument areas before the fire season.

WILDLIFE ACTIVITIES. We seem to have a great increase of Javelins in the cactus area since this custodian left here in 1942. Several parties of visitors reported encountering hords of these pigs, and more have been seen by monument personnel than in the years before the war. Coyotes are noticeably less numerous than in November, and foxes are encountered almost daily.

On January 18 Ranger Fulton and Custodian Eggenmyer attended the annual meeting of the Arizona Wildlife Federation.

PUBLIC HEALTH. Our January 1 water samples from the Madrona Canyon supply came back "red" this month - potentially unsafe. The storage tanks have been chlorinated in accordance with instructions from the State Health Department. Until the creek dries up, in May or June, it will be impossible to complete the sump recommended by Engineer Lassiter, and we shall have to chlorinate heavily.

PUBLICATIONS ON HAND. In accordance with instructions of FO 497, there is submitted below a tabulation of informational literature in stock at this monument on January 25.

Free Publications.	Copies.
Saguaro "two-fold" informational leaflets	6150
Saguaro "two-fold" leaflets, Spanish	1150
Location Map No. 6, Southwestern States	620
Southwestern National Monuments leaflets (out of print)	2050

Sales Publications, Supt. of Documents.

None.

PERSONNEL. Our packer, Mr. Frank Stansberry, was terminated January 15, in accordance with Civil Service regulations covering temporary employment.

NEW EQUIPMENT. Although it is doubtful if they can be classed as "equipment", we proudly report the acquisition by transfer from the War Department of eight mules, all gentle, for use as pack and saddle animals during the fire season. These are "self-leaders", who enter a truck or trailer willingly - a desirable attribute. We are now faced with the necessity of disposing, in one manner or another, of at least three of our older, and useless, mules - Annie, Baby, and Kitten.

Tonto N. M.

January 26,1947

No Pet. inventory

Memorandum for the Regional Director,
Region Three.

There follows the report of activities in Tonto National Monument,for January,1947.

Visitor Statistics: 2122 people arrived in 541 cars from 40 states, Washington D.C.,Canada and Alaska. 532.5 hours of service were given these visitors by Custodian Gipe and Ranger Bull.
Folks seemed unusually well pleased with their trips to the Ruins and Museum. One woman did suggest that the Museum could be improved,wonder where she got that idea?

Park Service Officials: Naturalist Dale King came in on January 10, staying until the next afternoon.We had not seen Dale for a long time and not only was Association business discussed at length but old friends and old times were brought to mind.
Regional Forester Carlson arrived January 16,leaving the next afternoon and we had a chance to get better acquainted as business details were gone over. Mr. Carlson had not been to Tonto since our first year here.
Custodian Thomas,from Bandelier,at present in the Santa Fe office,came January 22 and stayed until the morning of January 24. It was fine,for us, to have someone from Headquarters stay long enough to listen to our troubles and we made the most of the opportunity. Don't know how well he stood it but imagine he may have tire trouble the next time he is up this way.

Weather: January has been very cold with several hard freezes,getting down to 26 degrees on one occasion. Had 2½ inches of snow one night and several flurries since. One long rain storm early in the month and one of short duration since. Sunny days most of the time.

General: The very cold weather this month has kept the wood-wagon on the go most of the time.
A number of trips were made to Globe. The float assembly in the flush tank gave out and a hurried trip was made for a new one.
The long lost drums of propane were finally located in Clarkdale,brought to Globe and two trips were made to haul them to Tonto. Propane was purchased locally while waiting for them and those were hauled in the Tonto pickup.
It was necessary to go to Coolidge to get metal roofing material for work on museum as this material could not be had in Globe.
Emergency tire repairs and a drum of gasoline accounted for one more trip.

Projects for the ensuing month:It is expected to start work on the small office and storage room.

Elmer C.Gipe,
Custodian.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
TUMACACORI NATIONAL MONUMENT
Nogales, Box 3225 Tucson ARIZONA

January 26, 1947.

MEMORANDUM for the Regional Director,
Region Three.

Follows the monthly narrative report for Tumacacori National Monument for the month of January, 1947:

WEATHER CONDITIONS: Precipitation was .51. 12 days were cloudy, seven part cloudy, with considerable bitterly cold windy weather. Maximum temperature was 79 on December 25, minimum was 20 on December 5.

MAINTENANCE: Routine accomplished, including half day spent on repair and adjustment of phonograph for mass diorama.

INTERPRETIVE SERVICES: 1,778 visitors went on 243 guided trips through the mission grounds and the one third of the church which is safe to enter, receiving an average of 33.78 minutes per trip. 2,692 visitors received combined Information and Interpretation Service in the museum lobby, patio garden, and view room. 2,620 persons visited the museum.

INCREASE OR DECREASE IN TRAVEL: 2,792 visitors, in 771 cars, came to Tumacacori. This is by far the highest January travel in monument records, and is the third highest monthly travel record we have ever had.

Some interesting travel figures for comparison were obtained from the Border Patrol, which has a temporary station on the highway between Tumacacori and Nogales to check all north bound traffic. At this spot on the highway they figure north-bound traffic is approximately equal to south-bound traffic. Checking for eight hours daily, January 13 to January 17 inclusive, the Border Patrol counted 497 north-bound cars, with 1,297 persons. During the same period Tumacacori received 97 cars, with 327 visitors. If you double the Border Patrol figures, to get both north and south traffic, it still works out that Tumacacori gets about 12½% of the highway travel as monument visitors, for the period indicated. So it can safely be assumed the old mission is a major attraction.

VISITORS: December 28 - Mr. and Mrs. A. W. Atwood, Jr. He worked formerly as a ranger in Sequoia, and his father is well known.
December 29 - E. B. Yeats, former publisher of the Arizona Republic. On the same day came Dr. and Mrs. Grady Gammage, heading Arizona State Teachers College at Tempe.
December 30 - The Brandeis School for Boys, Tucson, brought a group of 45.
January 12 - 52 soldiers from Davis-Monthan Field, Tucson.
January 18 - The Potter School for Girls, Tucson, with 13.

Visitors closer to home included: January 4 - Eugene V. Stonehocker and family, of Casa Grande National Monument.

January 5 - Custodian Clair V. Cooke, of Chiricahua National Monument, and daughter, Shirley.

INSPECTIONS: December 31 - Associate Naturalist Dale S. King arrived to apply the official stethoscope to the heart and lungs of our interpretive program. He left the following day, but was in again on January 6, and out again on the 8th.

NOTORIETY: The December 28 issue of the Saturday Evening Post carried Oren Arnold's article " I hunt Ghost Gold." Of course he mentioned twice the hidden treasures of Tumacacori, and many tourists have been anxious to learn all about them. The staff here, unfortunately, does not have as replete a fund of treasure knowledge as Mr. Arnold, and had to confess we did not know about the treasure's existence.

ACCIDENTS: On January 21 a middle-aged woman visitor, accompanying the custodian and some other visitors as they left the view-room and stepped into the arcade of the museum which faces the old church, had a fall. There is one very low step, and she did not see it. She fell flat on her face, and was pretty badly shaken up, but declared later she had sustained no real injury.

WILDLIFE: Twice during the month the dignified atmosphere of our old-style Spanish patio garden was richly embellished by the full blown essence of SKUNK odor. This character has been seen a couple of times also, always near the drain which he favors as a place of meditation. We have no doubt this is the renegade who so richly annointed the custodian and wife a few months ago in this same garden.

PERSONNEL: The first ten days of the year the custodian spent on the sick list. Assistant Archaeologist Steen was here to work with Ranger Brewer in running the monument and handling the heavy visitor load, working here from January 6 through January 14. Judy England, a neighbor who is enthusiastic about the mission, worked a few days as WAE guide.

Custodian

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

~~Tuzigoot~~ NATIONAL MONUMENT

~~Clarkdale, Arizona~~

~~Jan. 28~~ 1947

MEMORANDUM for the Regional Director
Region Three

Following is the monthly narrative report for Tuzigoot National Monument for January, 1947.

Visitor Total: By coincidence, 187 cars--exactly the same number as last month--brought 32 people less than in December, but totalled a remarkably high 580, none the less. We are still beating the 1941 totals. Jan.,1941 brought 508 visitors.

Guide and Contact Service: Despite the digging of 1200 feet of ditch for the laying of the new pipeline section, the laying of the first 400 feet of line, and the clamping of several additional breaks in the old line (which froze up for two days), all of which took the efforts of all hands on many occasions, visitor contact work was maintained almost uninterrupted throughout January. Since the pipe line lies within sight of the Monument and the Monument approach road, the Custodian and Ranger would watch for automobiles and hustle out after them. After showing the visitors the place, we would hustle right back and start shoveling and picking again.

Personnel Time: Museum: Museum: 60 hours 20 min. Ruins: 51 hours 35 min. Total time for Ranger Richert: 48 hours ten minutes; total time for Custodian Cotter: 63 hours 45 minutes.

Special Visitors: Jan 13 brought a visit from Naturalist Dale S. King, Region Three. General Monument plant and prospects were discussed, and details for the establishment of a fact file on 5x7 cards were taken up. Fact file material is now included in the Tuzigoot general file.
On Jan.25, Custodian and Mrs. Townsend of Aztec National Monument and their two children visited Tuzigoot for the first time. We were delighted to make their acquaintence and have the chance to try selling them on the Verde Valley.

Stabilization and Maintenance: Ranger Richert and Stanley Jackson, laborer, found their hands full with a stabilization job that almost got out of hand in the top rooms of Unit III near the citidal. Deep undercutting of the walls of several rooms had rendered the masonry dangerous. When the wall supporting the ruins walk in Room 4 was tackled, the bottom section of some 10 cubic feet fell out and Jackson narrowly escaped injury when he was pelted by rocks. The wall interior turned out to be loose fill and (rather oddly) remnants of floor detritus still stratified The ruins top path was immediately closedto visitors, and after two days of work, the path re-opened the 25th.

Preparatory to carrying out stabilization work in the rest of Unit III, the large number of metates and manos stored in these rooms was removed, leaving only a pair of mano-metate sets in each room. The rest, mostly manos, were stored at the museum after cleaning.

Adobe for wall pointing is now being mixed with a ratio of 4 to 1 of cement. Three ounces of red cement pigment is mixed with each wheel-barrow of adobe-cement, and the result has been a fairly close match to the original pointing (also a stabilized adobe) applied by the excavators extensively throughout the ruins. The only permanent, or semi-permanent stabilization must be effected with stabilized adobe pointing in this manner. It is now too late to attempt permeations and sprays of solidifying compounds in almost every case.

Maintenance other than stabilization included a return visit of "Mahetabel", the D.I. pickup to the Ford Garage at Cottonwood for a re-do on her wiring system and a replacement of a window which cracked due to causes unknown sometime during the past two years. No charge was made for the extensive wiring job, since the job was done last month by the same garage unsatisfactorily.

Due to an unanticipated drying-up of the contractor's supply source, only 400 feet of 2-inch galvanized steel pipe was delivered this month on the contract for 1200 feet. Meanwhile, we had worked like bats to uncover the 1200 feet of old line in order to get the job done as soon as the pipe was delivered. Result was, a cold snap froze the old pipe solid for two days (thereby stopping the leaks for the first time in six years), and water was hauled to the Monument. The 400 feet of pipe available was connected and laid by mid-month. Delivery of the balance of pipe is expected the middle of the next month or before, and the job will be finished as soon as it is on the ground. As the new line is cut in, a cleaning compound will be placed in the pipe, and an attempt will be made to flush out the whole line and so improve the quality of water reaching the Monument.

The thanks of all hands at Tuzigoot go to Region Three for the splendid cooperation we received during the emergency of the breaking of the pipeline, and the immediate aid that was rendered by wire and telephone in placing the contract and getting the materials on the spot where it was needed in the shortest possible time. It is really great for us in the "field" to know our friends in Region Three can go to bat for us so effectively on short notice when an emergency like this occurs.

Walnut Canyon NATIONAL MONUMENT
Flagstaff, Arizona

January 25, 1947 19

MEMORANDUM for the Regional Director, Region Three.

The following is a report of activities in Walnut Canyon National Monument for the month of January 1947:

Weather. Rather mild. Two light snow storms that melted rapidly and and two or three days of wind. The last snow though light, drifted enough to close our entrance road except to those with chains and a strong heart. The county snow plow opened our road two days following the storm.

Personnel. Custodian Paul L. Beaubien was called away on an emergency trip to Canon City on the 20th of the month. He is expected to return in about two weeks.

Activities. Two truck loads of coal were hauled during the month. We now have enough on hand to carry us until spring and we no longer worry about being snowed in.

One load of cinders was hauled and spread over the path leading from the parking area to the museum. The path still remains a mud hole due to the melting ice and snow.

Custodian Paul Beaubien made a trip to Grand Canyon to obtain two oil stoves for the office and the comfort station. He also conferred with Mr. Davis who was visiting there. Custodian Beaubiens' trip back was without incident until eleven miles west of Flagstaff he struck an icy spot in the road. The pickup he was driving was quite thoroughly damaged as were the two stoves, but Beaubien suffered no injuries though the car turned over at least once.

Action has been taken to secure a substitute pickup. The two stoves have been straightened but only after turning the office into what sounded like a boiler factory. The stoves are not in use yet as the local tinner is on leave from Flagstaff and we need some reducers, elbows and other fittings that only he can supply.

The Monument library is the current job on hand. We are setting up a card index and file as suggested by Mr. King on his recent visit here. Finishing the library file and working on the 'Fact' file will occupy some time in the coming month.

Several times this month it has been necessary to repair the Monument telephone line. There is logging going on in the vicinity and it seems as though each tree they fell falls on our line.

Walnut Canyon -

Visitors. Mr. King of the National Office spent several days here giving us some new ideas to toy with and helping us out by answering many of our questions.

Dr. Jesse L. Nusbaum and [illegible] Ranger Jack Wade and family of Mesa Verde National Park visited the monument and spent the night.

Publications. There are 2,500 of the free two-fold government leaflets on hand as of the end of the period covered by this report. There are no government sales publications on hand.

WHITE SANDS NATIONAL MONUMENT

Alamogordo, New Mexico

January 21, 1947

MEMORANDUM for the Regional Director:

JANUARY TRAVEL

This Month		Year to Date	
Cars	Visitors	Cars	Visitors
950	3,640	5,003	18,114

January, while one of our coldest months on record, gave us one of our best similar months in the history of the monument. A low of minus four was recorded on the fourth is the lowest recorded since the establishment of our weather station some seven years ago. The high travel figure of the month was in spite of several days when we were forced to close our Sands to the public due to the road conditions. We are experiencing trouble of nightly freezes bringing up sufficient moisture to make our clay road slick each morning after it starts warming up. Big chunks of road bed are also forced up in these freeze effects giving our roadman a great deal of grader work to be done. Heavy winds on several occasions has also been extremely hard on our sand roads.

No official trips were made to any distant points. Local affairs are all running very smoothly. Considerable speculation is going around regarding the Alamogordo Air Base. It seems now that it may be a center retained for a consolidation of several fields. The Press mentions one in Utah and also one in Kansas likely being moved here. It seems, too, that considerable activity is being planned in connection with the White Sands Proving Grounds; so we may again be right in the middle of intense Army and Navy men and their families may come in and we never know they are in either Service.

It was our pleasure to have a brief visit this month from Supt. and Mrs. Libbey of Carlsbad and some friends. This was a hurried trip and we hope before too long we may have them for a longer visit.

Dr. Ortega of the University of New Mexico and Inter-American affairs was in with his family. He too has promised us a return visit of longer duration.

Little has been done on our regular routine this past month. Ranger Steel was on annual leave a larger portion of the month and Elrold Chittum has been giving considerable time to surplus property brought from Marfa for the various monuments. We have yet to go over it all and make

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Miller a record of what we have on hand. Both Harold and Paul are now enroute to Bethelly with a trailer house. We have another to go to Rupatki later. They were purchased from War Surplus and the day we were moving them out the Army decided they wanted them left and would bring in some two hundred more, but since we had already moved one and had the other in the process of moving they let them go. Reeves has been quite busy with a complete revising of our files and keeping current with his daily work. No wonder how we can possibly do all we must do before our heavy travel season, but I guess we will manage.

Known visits are of much longer duration and seemingly much more appreciated now that we have heat. Perhaps it is not true, but it seems we have a much higher type visitor, more interest and appreciation shown than usual.

With all the adverse conditions that have confronted us this month and in spite of it all such heavy travel we wonder what we might expect as soon as the weather favors us. We have no fear of ever reaching a saturation point as far as the area is concerned but we can easily and may soon reach a saturation point as far as our ability to handle the crowds with our present forces is concerned. Long days immediately ahead bring with them a problem of longer use and split shifts, etc.

Any way it is all a part of a grand game we all enjoy playing and the harder our problems are the more we enjoy it.

A brief summary of visitors follows:

Texas led with 197 cars and 814 visitors.
New Mexico was second with 159 cars and 733 visitors.
California was third with 72 cars and 242 visitors.
We had visitors from all states except Delaware, Maine, New Hampshire and South Carolina.
We had 18 visitors from Mexico and 12 from Cuba.

Johnwill Paris,
Custodian.

JP'CAR.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

~~Wupatki~~ NATIONAL MONUMENT

OFFICE OF THE CUSTODIAN ~~Flagstaff, Arizona~~

~~January~~ 29 19 47

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Wupatki National Monument during the month of January, 1947:

Visitors this month: 58, Travel Year to date: 148

Travel: While travel shows no increase over that of January, 1946, there has been a sharp decrease compared to last month. Most business men report this condition, remarking that there is a decided slump in travel for a week or so after each snow storm in the Flagstaff region.

Weather: Exceptionally clear and warm days prevailed during most of the month. Precipitation amounting to less than two tenths of an inch fell in the form of snow. With the precipitation below normal the prospects for cattlemen, farmers and those of us who drink water are not too bright.

Roads: The road maintenance job started early in November was terminated on December 31. One hesitates to say that any job of this nature is complete, since so much remains to be done. To those of us who drove the old road it is a highway. Additional rock removal on the Sunset-Wupatki road is a "must" before the coming travel season.

Approach Roads: Through the cooperation of the Arizona Highway Department the grading at the new entrance was completed on the 7th. This and the carved entrance sign furnished by the Don's Club make for a more attractive approach to the Monument on Highway 89.

Special Activities: An epidemic of "gold fever" seems to be in the making. During the past month two parties have asked for directions to old mining claims. James D. Beard, a local business man, has filed claim and plans to prospect the Lost Padre Mine on the southern slope of Doney Crater. His claim was investigated to make certain that it did not include any of the Monument. Actually the Lost Padre Mine has a history that ties in with Wupatki Ruin. The late Ben Doney was looking for a Spanish mine in a red hill at the base of a blue mountain- he had a map. The presence of a fireplace in the present register room at Wupatki and the discovery of some burials near the ruin which he consider those of white men convinced

him that the Spanish priests had lived in the room. While he had quite a number of claims in this vicinity, he felt that the "blow-hole" in Doney Crater was the collapsed entrance to the mine. To date it has not been proven and no mineral value produced.

At the request of Dr. Colton I accompanied a party from the Museum of Northern Arizona to investigate a report of dinosaur tracks near Marble Lodge at Navajo Bridge. What Mr. Green considers to be tracks appear more like the impressions of "mud concretions" which occur in similar levels of the Moenkopi formation at Wupatki. The discovery will be investigated by competent geologists from the Museum later this year.

The custodian made two trips to Grand Canyon to obtain surplus property, the most important items being two ~~GEN~~ generators.

Water Supply: Spring flow measurements reveal that Wupatki Spring has increased to 738 g.p.d., which is 200 gallons more than last month. Heiser, on the other hand, measures 2107 g.p.d. or 100 gallons less than last month. Heiser Spring has been cleaned thoroughly and a more weatherproof covering installed, but to date there has been no increased flow.

Wildlife: Two factors affecting wildlife in the area surrounding the Monument have been observed: fencing of one of the few water holes and the continuation of the coyote poisoning program. As a result of difficulty between two permittees on the National Forest, Arrowhead Tank has been fenced. This is one of the very few reliable sources of water for wildlife along the southern boundary of the Monument. The loss of this water at present will not seriously affect the antelope. It is hoped that we can persuade Bert Babbitt to open the fence after the stock move off this spring. In the future this difficulty will probably not arise, since the Forest Service does not plan to continue Mr. Kirby's permit.

The coyote poisoning program is in full operation again. One seldom hears a coyote now. Actually the fellow who is doing the work is not in favor of the use of poison and feels that it is an indiscriminate way to kill, but he has to make a living.

NPS Visitors: The only official visitors we had during the month were Ranger and Mrs. Autuchon of Walnut Canyon, accompanied by their daughter. Naturalist King was in Flagstaff where we discussed various problems with him. Incidentally, he did some very nice public relations work for the National Park Service with Mr. George Babbitt of Greater Arizona, Inc. and Mr. Melvin Hutchison, publicity director of Arizona State College. Later in the month we chanced upon Associate Regional Director Scoyen, Harvey Cornell, and Charley Carter in Flagstaff for a few minutes.

Personnel: Mr. A. E. Buchenberg received word of his appointment as a Collaborator.

Cooperating Agencies: A post season fire was reported to the Forest Service via radio to Walnut Canyon. Already this daily radio contact has proven invaluable. The only improvement we can suggest is a device so that one can call when the need arises rather than on scheduled hours only.

The carved thunderbird design now in use on information markers in the state does not appear to be satisfactory to the Markers Committee of Greater Arizona, Inc. They wish to have a design more characteristic of Arizona. In accordance with a request from Mr. George Babbitt we have submitted ideas.

Navajos: The old medicine man, Grandpost, was found guilty of stealing cattle from Joe Kellam and sentenced to 15 months in the State Prison. Grandpost not only took all the blame for himself, but he showed them a box of hoofs of cattle he had butchered during the past two years. It is possible that he will get an early parole because of his advanced age.

Publications on Hand: ~~Portfolio Math. Facts and Komments: 5 copies~~
Sunset Crater Informational Leaflet: 1300 copies
Wupatki Informational Leaflet: 100 "

Region Three Office — Mr. King			

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
REGION THREE
SANTA FE, NEW MEXICO

March 12, 1947.

MEMORANDUM for Assistant Regional Director John M. Davis.

There follows the narrative report for naturalists of the Southwestern National Monuments for the month of February 1947:

Staff Activities - General

Naturalist King was in the office the whole report period, as was Archeologist Steen except for the first eight days of the month. Considerable stenographic assistance was furnished to us and office overhead activities made much progress. We wish to thank the Forestry and Auditing Departments which furnished us the clerical help.

The Fish and Wildlife Service and the Regional Director, Region Two, asked that Naturalist Maurice Sullivan be allowed to stay at Acadia National Park for the month of March to acquaint incoming Naturalist Dondea with the deer problem which Sullivan has been working on there.

Administration - Interpretation

Proposed copies for interpretive leaflets for the Sycamore Trail at Montezuma Castle and for Montezuma Well were received from the field and some correspondence ensued as to whether one or both leaflets might be photolithographed this year. However, it was decided to mimeograph both of them.

Short, key interpretative statements were prepared for the Chiricahua and White Sands two-fold leaflets. Enough text material was deleted so that paragraphs, relating the areas to others of the kind in the National Park System, could be included.

A full length interpretative statement was prepared for Walnut Canyon.

Interpretation - Public Relations

Archeologist Steen prepared a 1,000 word popular article on Natural Bridges for the forthcoming issue of the Utah Magazine.

A variety of material descriptive of Bandelier National Monument was sent to Mr. Wimar E. Suppiger of Webster Groves, Missouri. Mr. Suppiger is related to the late Adolph Bandelier after whom the area was named.

Interpretation - Progress of Exhibit Plans and Projects

An attempt was made to have a display map of Casa Grande drafted for use in the museum lobby there. However, it was found that the only accurate topographical map of the monument is in two sets of sheets with different scales, and the preparation of such a map constitutes a rather major drafting problem. Whenever sufficient drafting help is available, this project will be put into work.

Technical advice from the architects was requested on the proper type of fluorescent lighting fixtures to be purchased to replace the somewhat expensive Luxiline bulbs now being used.

Research and Observations

The Montezuma Castle staff furnished excellent negatives of prehistoric skulls from the collection at the monument. These pictures were enlarged by Photographer George Grant, and will be included in the forthcoming publication on Montezuma Castle by the Southwestern Monuments Association in an article on skeletal material by Katherine Bartlett of the Museum of Northern Arizona.

A follow-up letter was written to the Director to attempt to ascertain the progress of the project regarding the use of supersonic equipment to discourage bats from roosting in several southern Arizona monuments.

Due to several requests from the field, the Director was questioned as to the general policy of who should be appointed collaborators in the National Park Service, and what should be their duties, privileges, and responsibilities.

A request was forwarded from Arches to appoint Dr. M. Elden Beck of Brigham Young University a Collaborator for Arches National Monument to accomplish a biological survey there.

Information concerning the banding of doves in the former bird banding project was furnished to a bander in Chattanooga, Tennessee.

Cooperative Activities

Dr. Ruth Underhill requested and received approximately 30 pictures of Navajo Indian activities for possible inclusion in her future book on the history of the Navajo tribe.

Several books needed by the naturalist at Boulder Dam Recreational Area were ordered through official and Southwestern Monuments Association channels.

Region Three Office Loan Library

Accessions for the month totaled 166: 13 books, 57 reprints and pamphlets, and 96 periodicals.

Archeologist Steen was able to spend a moderate amount of time cataloging and rearranging items in the library.

Because library assistance was inadequate during the war, the card catalog and the photograph file needed considerable checking and rearranging. Glen Haynes, through the courtesy of Photographer George Grant, went through the print card file of the library, adding minor subject heading cards, correcting misplaced cards, and bringing the file generally up to date and in first class condition.

Through the cooperation of Jesse Nusbaum, Miss Blanche Stacy, in her spare time, started the difficult job of correcting and refining the subject heading list in the library, and cataloging incoming publications and photographs.

Miss Dolores Ortiz and Mr. Henry Fuller, loaned to us for about a week each from the Forestry and Auditing Departments respectively, checked and alphabetized approximately 11,900 catalog cards in the library. Many divider cards were added, making the index much easier to work with than previously.

Archeologist Steen performed some bibliographical work, and estimated the library's binding needs, which consisted of 181 books and 106 periodicals, a total of more than $300 of needed binding.

A list of monuments which have no bookcases at all, and others which need a few, was prepared and submitted so that bookcases received from war surplus can be apportioned fairly.

Southwestern Monuments Association

Editor George Fitzpatrick of New Mexico was interviewed and plans made for running a series of articles on National Parks and Monuments in New Mexico in the magazine. When the series is finished in approximately a year, the cuts and halftones, together with those of back files, will be used to illustrate a book on New Mexico similar to "Arizona's National Monuments".

King found a publisher who may be able to print the forthcoming Association book on Montezuma Castle, and spent about 6 hours editing the excavation report by Earl Jackson, and Sallie Brewer. At the end of the month, the manuscript was being retyped for submission to the printer for a bid.

A tracer letter to the Director was prepared to ascertain the present status of acquisition of the Hubbard Mound north of Arbuo Ruins.

Inquiry was made of the Government Printing Office concerning the possible sale of "Flowering Plants and Ferns of Arizona". It was found that the Association would have to purchase 100 or more copies for each in order to obtain a discount, which would be 25%. The project was deferred until next autumn when Association finances will be adequate to make the purchase.

Bandelier National Monument reported pronounced success in selling kodachrome duplicates. Sets of 12 on the canyon country of northern Arizona were purchased from Barry Goldwater, Phoenix, for Walnut Canyon, Montezuma Castle and Tonto. Sets were put together for Casa Grande and Tonto, and an experimental quantity ordered for each monument.

The Master of the Oil Tanker "Chaco Canyon" wrote to the Custodian for literature descriptive of the monument. The Association forwarded to the Custodian two books concerning Chaco Canyon for donation to the archives of the ship.

Gratifying sales were reported of Arizona's National Monuments from dealers. Not only are dealers reordering to replenish their depleted stocks, but persons who bought the book unseen by mail are reordering the book for gifts to their friends.

Finally, and far from the least important happening of the month, was a donation by the Lions Club of Farmington, New Mexico, of $100 toward the purchase of the Hubbert Mound north of Aztec Ruins. This sum, together with the $850.00 donated previously by Mr. Gilbert Maxwell, a member of the club, constitutes half of the purchase price of the property. The organization is to be complimented on its public spirit and generosity.

Visitors

Drs. Walter Taylor and Harry P. Mera of Santa Fe, Mr. Stanley Stubbs, Custodian Paul Beaubien of Walnut Canyon, and Ranger Stein of Bandelier.

Ruins Stabilization

Archeologist Steen spent the first 8 days of the month on the field on ruins stabilization problems, chiefly at Montezuma Castle. At the Castle braces were placed under a cracked ledge on which a portion of the front wall of the cliff dwelling rests. The braces are not completely satisfactory and conspicuous, but there seems no other feasible means of giving support to the weakend ledge.

At Tuzigoot he looked over the stabilization work which Custodian Cotter is beginning there.

Estimates on the cost of materials for the proposed job at Casa Grande were obtained and a plan for the job will be prepared in March.

Various materials and equipment were ordered for ruins stabilization.

Due to the difficulty of mounting photographs permanently in records at Chaco Canyon, because there is no electric power available, directions were given that photographs be sent to this office for mounting with tissue.

Projects for next month

Hing will be in the office for the first two weeks on routine activities, chiefly in the preparation of the annual report for the

Southwestern Monuments Association and possibly some editing work. He will take the second two weeks of the month as annual leave.

Steen will be in the office for the full month, preparing the estimates for the Casa Grande stabilization job and handling routine activities.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

.....Arches..... .....NATIONAL MONUMENT

..... Moab, Utah .....

..... February 27, ... 19 47...

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of February, 1947:

GENERAL: The advent of warmer weather during the latter part of the month caused an increase in travel. U. S. 160 is carrying much more traffic and if warm weather continues our visitors should show a substantial increase.

WEATHER: Rain fell on January 28th and February 17th with 2" of snow on January 30th and the same on February 9th and 10th. We had several days of heavy wind reminding us that our March weather is not far off. The latter part of the month warmed up considerably and there were several days when a coat was too warm.

TRAVEL: Travel was ahead of last month with a total of 15 cars and 60 people. This brings our travel for the year to 457 and for the fiscal year to 1432 people. Numerous requests for information were received and answered during the month.

INTERPRETIVE SERVICES: Three parties containing 8 people were contacted at headquarters during the month. No contacts were made in the Windows section. An illustrated talk on National Park Service Areas in the Southwest was given to a group of 90 children at the Grand County school on January 28th and covered one hour.

COOPERATING GOVERNMENTAL AGENCIES: Grand County has made a request to the Utah State Department of Publicity and Industrial Development for an appropriation of $7,500.00 for improvement of roads within the boundaries of the monument. Grand County to furnish $2,500.00 for a total of $10,000.00 for expenditure on road improvement. Commissioner Taylor stated that he felt sure these funds would be appropriated. Commissioners Taylor and Patterson contacted Governor Maw regarding the condition of the 7½ miles of approach road, which is included in the state system, and were assured by him that considerable maintenance work would be performed on the road this spring.

SPECIAL ACTIVITIES: An inspection was made of the road within the boundary in the Windows section with Commissioners Taylor and Parrett, Mayor Baldwin of Moab and Harry Reed to check on possible improvements should money be made available by the Department of Publicity and Industrial Development. One or two changes between Balanced Rock and the parking area can be accomplished without too much expenditure, which will eliminate several curves, and improve this section of the road to a great extent. Commissioner Taylor wants to spend a portion of these funds for construction of a road from Balanced Rock to the Turnbow cabin on Salt Wash to make Delicate Arch more accessible.

ROADS: Grand County recently completed construction of 5 miles of 16 foot roadway from the Colorado River road to Fisher Towers making this spectacular area readily accessible to visitors. An inspection trip was made over this road on January 30th, while under construction, with the county commissioners.

MAINTENANCE AND CONSTRUCTION: Painted ceilings of two bedrooms, hall, living room and kitchen of quarters. Rented paint spray gun in Moab and gave fence at quarters one coat of white paint. The old office building, warehouse and service yard fence were given two coats of olive drab paint to blend with the surrounding sandstone. Have been unable to obtain white paint in 5 gallon cans to complete painting of fence at quarters and trim of quarters itself. Still hoping for delivery on this from the procurement division, which will enable us to complete painting in headquarters area.

John W. Sullivan of Moab was entered on duty as a carpenter on February 12th and at this date has practically completed construction of two pit latrines for installation at the Windows parking area. They have been stained on the outside but completion and installation will have to wait until white paint is obtained.

Two 500 gallon water tanks have been ordered from the War Assets Administration at Salt Lake City, Utah for use in installing a water system at the Windows section parking area.

GRAZING: A new permit was issued and signed by Emmett Elizando for crossing monument lands in Cache Valley with his herd of sheep for access to water on his lands on Salt Wash.

Crossing permit for Henry Revoir for access to water at Freshwater spring with his sheep was cancelled due to non-cooperation in regard to trespass on monument lands.

NATIONAL PARK SERVICE
AZTEC RUINS NATIONAL MONUMENT
AZTEC, NEW MEXICO

24 February 1947.

MEMORANDUM for the Regional Director,
Region Three, National Park Service.

WEATHER. February has been rather pleasant throughout, with a low temperature of minus 2 and a high of sixty three and a total precipitation of 0.28 inch resulting from one snowfall of 1 inch. Travel has been quite good which no doubt has been the result of the favorable weather.

MAINTENANCE. The south border of the ruins' plaza has been cleared of all brush which job was completed in preparation for continued stabilization work this Spring.

All tools and equipment have been gathered, borrowed, loaned and rented, that will be used in pumping water under pressure into the plugged drainage ditch, and just as soon as the frost recedes from the ditch from which we shall obtain water, we shall start operations. During the past week we have been chopping and digging an access ditch which will carry water to the drainage ditch alligment.

COOPERATING AGENCIES. The goodwill of the local municipalities has been quite well demonstrated by their loan of equipment for us to use in an attempt to free the drainage ditch pipe. Farmington has loaned us a traveling normal and Aztec Fire Department has loaned sufficeint fire hose with suitable couplings to run from a rented high pressure pump to manholes in the drainage ditch. We are anticipating great results with this equipment and hope [redacted] allow us to clear the pipe line.

INTERPRETIVE SERVICES. There were 305 people conducted in 76 trips thru the ruins, and 406 visitors in 104 trips were shown the museum.

INCREASE IN TRAVEL. This year we have had 406 people in 131 cars from 24 states and the Dominion of Canada, in February 1946 we had 286 people in 86 cars, which is about a 30% increase. There were no members of the armed forces, which is unusual.

PERSONNEL. The Custodian was on annual leave from January 27 to Feb 14, during which time we enjoyed a pleasant vacation on the West Coast and in visiting several of the National Monuments enroute.

PROPOSED ACTIVITIES FOR March. Continue drainage ditch operations.

Irving D. Townsend,
Custodian.

AZTEC

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
BANDELIER NATIONAL MONUMENT
SANTA FE, NEW MEXICO

February 28, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of the activities at Bandelier National Monument for the month of February, 1947.

Weather and Roads

There has been exceptionally beautiful weather during the month. On most days the temperature hovered between 50 and 60 degrees. The highest temperature during February was 64 degrees and the lowest 10 degrees. There has been little moisture--only .08 inches until the 27th., when there was a snowfall of .30 inch precipitation.

Because of the dry weather, the road became somewhat dusty and rough. It was impossible to do much maintaining on the surface of the road because of this condition. However, today--the 28th.--after the nice snowfall yesterday, Foreman Wendland is on the road with the Allis-Chalmers maintainer and it is believed will improve the road.

Maintenance

Foreman Edd Wendland and Laborer-Leadman Toribio finished the job of treating and replacing exposed vigas on all the buildings.

Augustine Pino continued his work on the force account painting and decorating job and is rapidly bringing this project to completion.

Travel

793 visitors came to Bandelier during February, coming in 215 automobiles. Of these 215 cars, only 15 were re-entries. It is pointed out that the total of 793 visitors is an increase of 50% over the figure for February 1946. The increase in the number of automobiles was approximately the same percentage. At the end of February 1946 the summary for the travel year stood at 3233. This year it was 3227. However, the summary for the Fiscal Year at the end of February 1946 was 7839 and this year it is 13395. These figures show that for the period July 1 to February 28 there is an increase of 70% so far this fiscal year.

The increase in travel is probably due somewhat to the beautiful weather prevailing here during February, but probably also is an indication of increased travel during the coming season. To be emphasized is the fact that all of the increase has taken place after July 1, 1946.

15 members of the Armed Forces visited the area during the month.

Interpretation

70 conducted tours were made to the ruins, with a total attendance of 499 people. The average duration of the trips was 1.15 hours. The ruins trails have been quite dusty because of the lack of snow or rain during the month. Consequently, nearly everyone needed a shoeshine (yes, if not a bath) after his trip.

There is very little time available for the Ranger on contact duty to conduct people to the Museum but 26.68 visitor participation hours were accumulated in this manner during the month.

Custodian Thomas talked at an assemblage of the Region III In-Service-Training Group during his tour of duty at the Regional Office. About 50 members were in attendance.

Much time is devoted by the Custodian, Rangers, and Clerk to interpretation work in connection with the Museum Lobby. This promises to take the full time of one person when travel becomes a little heavier.

Considerable progress has been made by Ranger Keefe on his project of cataloging the Museum and Library. All of the miscellaneous items in the Museum have been cataloged and arranged in storage. Plans are coordinately being formulated to take measures to treat various specimens with preservatives so as to insure their permanent preservation. Work on the Library continues to be mostly that of preparing the three main types of cards (author, subject, and title) for the card catalog. It is believed that the Library can be cataloged and arranged in time to be used effectively in the interpretative program this summer.

The collection of informational literature from other parks and monuments in the Southwest is now almost complete. A cabinet has been constructed to contain these booklets and is ready for use. The purpose of this project is to provide interested visitors with information regarding other areas. Last season there were numerous inquiries along that line.

Visitors

It was a pleasure to have the following National Park Service people from Region III visit the area during the month: Feb. 2, Henry B. Tuller and family; Feb. 12, "Slim" Ratcliff and his Father and Mother; Feb. 16, Alfonso Gonzales, with his family and friends; Feb. 23, Jack Diehl and

Dale King, together with their respective guests.

Other visitors during the month included Mr. K. Brown and his companion, both of the FHI, on Feb. 8; Professor Muzundar and his student group from Highlands University on Feb. 8; Mr. Joseph M. Grimshaw of the Forest Service on Feb. 11; and Mr. J. W. Hendron of the State Tourist Bureau on February 25.

Two-fold Bandelier Leaflets (Old)	860
Two-fold Bandelier Leaflets (New)	27450

Personnel

The Custodian has been on duty at the Regional Office during most of the month of February.

Ranger James Eden and Maintenance Man Tony Valencia were absent from the Monument between February 16 to February 23, during which time they were engaged in transporting two turret trainer trucks to Casa Grande and returning with an ambulance and other surplus materials from Luke Field, Phoenix, Arizona.

Ranger Eden and Clerk Glen Bean departed Feb. 25 to aid in the further distribution of surplus properties to and from Carlsbad Caverns.

Laborer-Leadman Cresentio Toribio was terminated at 5:00 P.M., Wednesday, February 26.

Lost Persons

Bandelier participated in an indirect way in the rescue of three persons lost and their car stalled in the Jemez Mountains. A young man, Mr. C.E. Nillsen, with his parents visited the Monument at noon, Feb. 19. Mr. Nillsen was heard to remark that he would like exceedingly well to have his parents see the Valle Grande. Knowing the condition of the road, Ranger Keefe cautioned against such a trip at this season. That evening received several calls from a frantic wife and was visited by the Los Alamos M.P. who were searching for the missing group. After a search by horseback from the Boyd ranch and several automobile attempts from this side, the party was finally located by airplane late the next day.

Chester A. Thomas,
Custodian.

NATIONAL PARK SERVICE

Canyon de Chelly ..... NATIONAL MONUMENT

Chinle, Arizona

February 25, 1947

MEMORANDUM for the Regional Director, Region three.

The following is a report on activities at Canyon de Chelly National Monument during the month of February, 1947.

Weather

The month of February has been exceptionally nice as far as weather conditions are concerned, days warm and springlike. The usual high winds and rain and snow did not make their appearance. However, this is not good for the country. Everything is very dry and the warm days have caused much of the snow and ice to melt in the higher country causing a much greater run-off than is normal for this period. We will need more moisture during the spring to avert a bad drought during the summer. Maximum temperatures were mostly above 50 degrees, the highest being 65. Minimum temperatures have been generally below freezing with a low of 15 degrees.

Administration

A general inventory of equipment was submitted, and all required reports called for by FO memorandums. Two trips were made to Gallup New Mexico to get supplies and materials for the Ranger Quarters and repair of equipment. Patrols have been made along the rims of both Canyons as heavy run-off has made canyon travel even by horse impossible.

Maintenance

A greater part of our time has been spent in working over the Trailer house for Permanent ranger Quarters. This unit was constructed for an office, and changing around was necessary. It was placed on a stone foundation, and connections to the water and sewer lines were installed. Electric connections were made, and cabinet work was built for the kitchen and a new Sink and Wickless Kerosene range purchased and installed. It has been repainted all over and is at present ready to move into. All equipment that came with the trailer had to be taken down and cleaned, this included the water closet and lavatory where connections were plugged and rusted out, and the oil heater with forced draft as well as a duotherm automatic oil hot water heater.

General cleanup, and rearrangement has also been necessary. A new sign was constructed, painted and installed at White House turn off.

Inspections

The report of an undiscovered ruin with a leather rope still dangling inspired the custodian to make an investigation. The navajo boy who reported this was to meet me about half way between the Monument and Kaalini. He had Car trouble and didn't show up in time to point out any more than the general location of the Ruin. It may be three Turkey house or it may be an officially undiscovered ruin. He says it is in a side canyon below Three Turkey house. When time permits we will make a more thourough reconnaisance of the area.

During this trip I visited the many storied Frog shrine. For years stories have circulated about the "petrified Frog" of which the Navajos were superstitious and used to grind "Rain-making" medicine. This proved to be a sand stone concretion that greatly resembles a frog. A small mortar has been made in its back for grinding medicine. It is Navajo and not of pre-historic origin according to the Navajo Boy.

Public Health

An epidemic of a virulent type of Measles made its appearance in this area. The hospital at Chinle is overcrowded and Navajos have called on the custodian for help many times. If care is not taken, it seems to develop into Pneumonia. I buried one six month old baby boy for Stephen Charley, and to date have hauled in thirteen very sick children to the Hospital. Although this desease is not serious if adequate care is given, the Navajos do not understand how to take care of them and keep them warm and clean.

Travel

Although travel conditions have been ideal we have fallen below the figure for February 1946. We had 43 visitors as compared with 50 last year. Our travel year to date and Fiscal year figures continue to show a sizeable increase.

Interpretive Service

With the 33 attended visitors a total of 18 hours were spent in ruins trips and interpretive contacts.

Visitors

Gerard Curtis Delano, Artist, whose paintings of the navajo country appear on most of the Santa Fe railway calendars. Mr. and Mrs. C. Guy Denny of the radio station at Gallup, New Mexico.

NATIONAL PARK SERVICE
CASA GRANDE NATIONAL MONUMENT
COOLIDGE, ARIZONA

February 26, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows the narrative report for Casa Grande National Monument for February, 1947.

General: Water, or the lack of it is the big subject of conversation in the valley. Very little snow and moisture of any kind has fallen on the watersheds back of the big dams and with the water table low allready, the agricultural out look is none to good.

Weather: "Wonderful", "grand","exquisite", and "superb", have been adjectives given out by the visitors when describing local weather for the past month. Except for one day, Feb. 18th., when the maximum registered was 69 degrees, all other maximums were over 70. The high for the month was 86 registered on the 16th. Nights as a whole have been cool with 7 nights registering minimums of freezing or below. The low for the month was 28, recorded on the 3rd. and again on the 19th.

Inventory of Publications: C. G. 2 fold leaflet - 1500, C. G. Spanish 2 Fold leaflet - 3123, S. W. N. M. Map Folders - 3000, N. P. Location Map # 6 - 50.

Visitors: February 1947 - 5517: February 1946 - 3637; February 1941 - 2889. Travel year to date 1947 - 17,889, Travel year to date 1946 - 12,361. According to figures released by the Bureau of Plant Industry checking stations in the state of Arizona, the state had a drop of 10% in visitor cars checked in. This is not reflected in our visitor totals as we had an increase of over 50% over February 1946 figures. The visitor seems to have plenty of money to spend as S&M association book sales have hit over $250.00 for the past two months.

Interpretive Services: Of the 5517 visitors to the area, 4105 made the Ruins trip in 241 parties averaging 53 minutes per trip. 222 museum trips were taken with 3206 people averaging 31 minutes per trip. 1412 people came into the area but did not make the Ruins trip. A recap of interpretive service to the Ruins from Feb. 24, 1946 to Feb 1947, shows 2156 trips with 21,880 people, with an average of 52 minutes per trip. A breakdown showing personnel taking groups is as follows: Custodian Bicknell, 667 trips, 5988 people, 571 hours spent: Ranger Schuft, 991 trips, 9744 people, 862

Interpretive Services Continued: hours spent: Archeologist Schumacher, Ranger Fowler, Ranger Sharpe, Ranger Vivian: 598 trips, 6148 people, 467 hrs. All of which indicates that the past 12 months have been busy ones at Casa Grande National Monument.

Maintenance: With the great influx of visitors and extra work connected with surplus materials from War Assets Administration, maintenance has been mostly routine. The floors in Quarters # 1 were given a coat of varnish and the kitchen walls two coats of semi gloss paint. This was done on the Ranger's own time.

Trips Taken: Feb. 10 - 12, Mechanic Stonehocker made a trip to Gallup to pick up surplus trucks. Feb. 19, Custodian Bicknell, made a trip to Phoenix in connection with surplus goods. This trip was made on his own time. Feb. 24, Mechanic Stonehocker to Williams Field to pick up surplus products, and also on the 20.

N. P. S. Visitors & Visitors of Note: Sunday, January 26, Dons Club of Phoenix made their second trek to the area with approximately 250 visitors. Feb. 5, Ansel Adams, NPS Collaborater stopped in to look over the area. Feb. 5 & 6, Ranger Sharpe & wife, and Grader Operater Marble brought in a truck for Walnut Canyon and picked up some surplus materials for Chiricaua. February 8 & 9, and breifly on Feb. 12, Assistant Regional Director Davis and Architect Saunders were in to go over some of our problems with us. Feb. 18 - 22, Ranger Eden and Tony Valencia of Bandelier brought in some surplus trucks from Mesa Verde and Phoenix vicinity and while here helped repair an ambulance to take up to Bandelier. Feb. 8 and again on 23, Ranger Anbuchon and wife were in to visit on their way to and from temporary duty at Tumacacori National Monument.

Leaves Taken: Feb. 17-19, Mechanic Stonehocker took sick leave. January 29, Ranger Schumacher took sick leave.

NATIONAL PARK SERVICE

~~Chaco Canyon~~ NATIONAL MONUMENT

~~Bloomfield, New Mexico~~

~~February 28,~~ 19 47

MEMORANDUM for the Regional Director, Region Three,
National Park Service.

There follows the report of activities in Chaco Canyon National Monument for the month of February, 1947.

There were a total of twenty-seven visitors to Chaco Canyon during this past month. They came in seven automobiles from the states of Colorado-2 cars, 8 visitors; Kansas - 1 car, 2 visitors; and New Mexico - 4 cars and 17 visitors. Of these visitors, 27 took a trip through the ruins. There were seven parties. In all they spent 300 minutes. Twenty-six tickets were sold and one complimentary ticket issued. At the end of the month, there were approximately 10,200 free two-fold leaflets on hand, and no sales publications printed at the Government Printing Office.

Five written requests were answered.

The coldest during the month was 0 degrees on the 30th of January and the warmest was 65 degrees Fahrenheit on the 16th of February. There was 1.80 inches snow on the 28th of January and together with the rain on the 10th of February, formed a total precipitation of .42 of an inch. The severe cold weather of last month made a last gasp and froze a branch line of the water system, thus making it complete -- every pipe in the canyon, except the main line, froze some time during the winter.

After last month's delays, caused by sub-zero weather, heavy snows, freezing pipes, inadequate chimneys, non-functioning stoves, and the like, this month has seen a great amount of good accomplished.

The rack has been built for the fire box, and the fire tool box and contents placed on the rack. Now, the box can be pulled onto a truck with almost any knight body in practically nothing flat....not that a forest fire is expected, but we are getting ready for any emergency.

The loading dock has been nearly completed. Now, the barrels, drums for

butane, and others, sit up on it and it is very much easier to load and unload them; and the place is generally cleaner for the containers are no more down in the dirt and mud, but placed neatly on the rack.

The tool rack for the shovels, picks and like tools, in the tool store room has been painted as has the lumber rack. In the work room, the first rack for tools has been enlarged, another even larger built, and both of them and the work benches painted.

The roads were graded and the rocks taken out of the road. An effort is being made to give the road a better crown. Each time the road is graded, the crown is just a little higher. It is hoped that, because of the drainage then afforded, by next winter the road will not be so nearly hub deep as it was this past (we hope) winter.

An interesting letter was received by the Custodian from the Master of the good ship, "Chaco Canyon". It came through the war still afloat and is now operating for the American Pacific Guam Ship Company. About the time the ship was being built, this Custodian made an effort to locate it in order that some literature concerning the Canyon might be presented to the men of the vessel, but he was unable to locate the ship before he went to war. Now, the Master writes in requesting literature. The ship is 525 feet long and 69 feet wide, is a tanker, and has a capacity of 141,110 barrels. How many other Monuments, or Parks for that matter, have a namesake traveling the seven seas advertising them?

The Trading Post Operator reports that he has taken in more Navajo rugs in the last two weeks them he had in the preceeding month and a half or two months. The sale of merchandise has also picked up, a mere corollary, of course.

In preparation for the large tourist season that is anticipated, he has most of his souvenirs already ordered, is stocking up on soda pop, and is in the process of painting the cabins.

The Trader reports, among others, one amusing yet pathetic incident. One Navajo, having spent all his money and with no immediate prospect for more, came into the store and wanted to pawn his pocket book!!

The only National Park Service visitors in the Canyon during this past month was Charlie Steen, who was in twice, thus making him visitors instead of visitor!

There follows the report of Archaeologist Ric and Gordon Vivian.

* * *

General

Good progress is being made at Chetro Ketl. Though there are 10 men on the

payroll now, sickness, family trouble and the usual Navajo ailments have sometimes cut the crew to four. In spite of this, Al. Lancaster manages to keep the work well organized and he has turned out a great deal of work this period.

One small find was made in cleaning up a fallen wall.

Recording of the work is behind since the first films sent in for processing have been returned only today. We still feel the need of the exposure meter ordered from the manufacturer nearly two months ago and not yet received. Either this or one on loan.

Writing up of materials tests has been postponed while we work on the Chetro Ketl ground plans.

The original and apparently only usable ground plan of Chetro Ketl has been borrowed from Paul Reiter of the University of New Mexico. It is in large scale, roughly five and a half feet by three feet in size and it does not show the last season's excavation. Room numbers have been assigned in the area where we are now working and as the plan is being traced it is also being corrected and brought up to date. (If Hatt Dodge wants a picture of a man in difficulties he should see our drafting room, a splintered piece of plywood 4 x 8 resting between the piles of cement sacks and the blacksmith's bench).

PUEBLO BONITO

An additional man day was spent trying to find the source of considerable subsurface moisture entering the plaza kiva, L. Deepening of the trench disclosed four stone steps of a stairway ascending around the outside of the ventilator shaft. They appear to be the center section of a stairway that started down somewhere around bench level and came up to the surface curving around the shaft.

CHETRO KETL

Backfilling of low areas, removal of the second railroad grade and drainage of the west plaza have been completed. A lot of stone has been salvaged from these operations. Thanks to the cooperation of the custodian we were able to have the soil hauled in for backfilling leveled off with his grader. This saved us a lot of labor.

In removing the railroad grade it was found that it had been built over a very small room left above the cut down plaza level. That is, the excavators back in 1921 had removed a large area of the latest plaza level to a depth of two feet. This small room, 5 x 7, was on the edge of the cut; a part of the east wall had been removed but the room never cleaned out. Subsequently the railroad was built over it and then at a later time the plaza on the other side of it was cut down some two feet also.

It is a curious structure for the last plaza level of Chetro Ketl. Built in part of vertical slabs and for the rest of horizontal, single course masonry, it was unfaced on the exterior and had been to all indications an entirely subterranean room.

The stone and plaster show extensive burning. The floor was covered to a depth of a foot with charcoal but no ash was present. The charcoal was badly broken; it did not come from the roof of the structure and has the appearance of having been burned elsewhere and then thrown into the room. No other material was found with the charcoal.

Selected specimens have been obtained for dating. Photographs and further data will be submitted at an early date.

I might be of interest here to note that in "Art and Archaeology" for 1921, where data on the early excavations was obtained, reference is made to "Navajo corn roasting pits" in the plaza of Chetro Ketl.

Wall repairs have been completed on the first and second story walls of room 85, east, west and south sides. Extensive work was done on the three foot thick south wall. Work on the third story west wall is completed and is in progress on the remaining walls. This work takes a lot of scaffolding.

Repairs and capping have been completed on 87, west and north; the north wall of 86 has been repaired to tie in the corner of 86-104. Also completed were wall repairs in the lower level of 104, north and south. Some concrete work was set here to preserve extensive prehistoric remodeling of doorways. In progress on these rooms is repair and capping of 104 south, upper level, and rebuilding of the corner of 104-70.

Also in progress is repair of a full story break in 101, east wall and a partial break in 103.

Complete repairs were made to the south wall, lower level of 94. Two other walls here require extensive work and this is being held until the work on 103 which adjoins it can be brought up and tied in.

This room, 94, had been excavated down about two levels on the west and left full of debris on the east. The excavated half of the south wall was in bad condition and had not been cleaned off by the excavators. A broken niche was found here and on the floor of it portions of what is likely a medicine man's outfit. This includes: (1) a triangular shaped wand of sticks, the center of the triangle filled with yucca fibre quilted and sewn to sticks with cording, (2) several sections of reed in good condition, (3) a wrapped feather from a prayer stick, (4) a large fragment of chert.

(5) a nodule of azurite, (6) a "problematical" object of unbaked clay that looks as if it might be a jar stopper or a spindle whorl without the hole, (7) a few strands of cotton cord.

These objects will be described more fully, photographed and deposited with the custodian as time allows.

* * *

The artifacts mentioned in Gordon's report have just been presented to the Monument, but have not yet been catalogued.

Projects for the ensuing months:- buy paint and paint and letter the signs; paint the Office when that paint arrives; get the stream erosion control project started; get the fence control project started, keep Office and routine duties current.

Irving McNeil, Jr.
Custodian.

February 25, 47

SUMMARY of Monthly Narrative Report for February, Chiricahua.

Dry weather, increased travel, visit by Mr. Davis and Mr. Saunders, Custodian's wedding, visit by Ansel Adams, are the chief topics of this report. Medic schedule started with Saguaro and Organ Pipe, road open from Portal through Pinery Canyon are further events.

Charles C. Sharp
Acting Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Chiricahua NATIONAL MONUMENT

Dos Cabezos, Arizona

February 25 47

MEMORANDUM for the Regional Director, Region Three.

Following is a report of activities at Chiricahua National Monument for February:

Weather Conditions. The month of February has been quite dry, with no precipitation recorded here, and has been warmer than usual. On only a few nights has the temperature dropped to freezing, and daily temperatures usually have been between 50 and 60 degrees. Not much cloudiness occurred during the month. Some snow remains on the north slopes on the Monument and considerable snow is visible on the Chiricahuas south of Massai Point. The whole area is the dryest it has been in 25 years, with prospects of a water shortage limiting campground use unless it rains a lot.

Special Activities. The outstanding event of the month was, on February 22, the wedding of Custodian Clair V. Cooke and Miss Elinor Worthington of Illinois, at Bisbee. Mr. & Mrs. Cooke left on a trip which will take them to Grand Canyon and northern Arizona. They plan to return about March 15. Among more prosaic activities, Ranger Sharp and Operator Marble made a trip to Casa Grande National Monument to deliver the Ford pick-up which was transferred to Walnut Canyon, and to bring back bookcases and other supplies. Custodian Cooke gave an illustrated talk at the Gadsden Hotel in Douglas on the night of February 17.

Inspections. Assistant Regional Director Davis and Architect Saunders visited Chiricahua on February 18, and inspected the area with the Custodian. We were glad to see Mr. Davis again and to welcome Mr. Saunders on his first visit to Chiricahua.

General Publicity. A news item is carried each month on travel and events of interest at the Monument, by the Douglas and Bisbee papers.

Approaches to Monument Area. The approach roads from Douglas, Bisbee, and Willcox are in good enough condition, though rough due to dry weather. In the past week, several cars have come through the mountain road from Portal over Onion Saddle. Natives report the road not bad, but some drivers not accustomed to mountains say it is a bit rough. Unless we receive another snowfall, that road will remain open all summer.

Interpretive Service. Most contacts were made at Headquarters, though the Ranger spent several hours on patrol each Sunday, most of it in talking with visitors at Massai Point. With the increase in travel, much of the service is in giving information as the cars are checked in. One trip was made with a Keating charter car party, including a hike into Echo Canyon. Considerable time is spent with interested visitors in the museum and the forested area near Headquarters, answering questions on the vegetation and wildlife.

Travel. Travel this month showed an increase of two and a half times last months' registrations, and two times the number for the same month last year, with 340 visitors coming in on the Sunday after Washington's birthday. If that trend continues, this summer will show a strain on facilities and personnel on peak days. The dusty Monument road is already a hazard around Headquarters, with the small size of the parking area contributing to traffic difficulties at times. Campground use shows the expected increase as spring nears, and we get many inquiries about camping here next summer.

Visitors. Ansel Adams, camera artist and Park Collaborator, looked in for a day, on February 24, to scout out the possibilities of the Monument .

General. Custodian Cooke spent considerable time working out the Forest Protection Plan requested by the Regional Forester's office. PCB sheets are being prepared for a fence project and an enlarged parking area at Headquarters. We have started to prepare for the Fire Control Conference to be held here early in April. The Custodian painted one room in his house. A regular radio schedule with Organ Pipe Cactus and Saguaro Monuments has been started for the season, with broadcasts at 8:00 a.m. Sunday mornings for the present.

~~El Morro~~ NATIONAL MONUMENT

~~Ramah, New Mexico~~

~~February 28,~~ 19~~47~~

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in El Morro National Monument for the month of February.

WEATHER: The badly needed February snows did not fall and this section of the country is as dry as it has ever been. Only 2½ inches of snow were recorded during the month when a normal fall of one or two feet can be expected. There was just a trace of precipitation as high winds caused very rapid evaporation. Temperatures were above normal, rising to a maximum of 58 degrees and dropping to only 1 degree below zero for a minimum.

TRAVEL: The abnormally dry weather brought us a record visitor count for February, 84 visitors in 31 cars. A total of 68 made the tour of the inscriptions in 24 trips and the guide time amounted to 29 hours and 10 minutes. Sixteen visitors came for information only.

MAINTENANCE: During the custodian's absence on annual leave Mabon Barnes did an excellent job of waxing floors and painting walls and woodwork in livingroom, diningroom and kitchen. With the unexpected high travel count I was amazed to find this job so complete and was also pleased to find a note from the party complimenting Mabon on his courtesy. Mr. DeRuiter spent a full day on the files which are now beginning to show some semblance of order.

APPROACH ROADS: Dry, still rough, but passable. With other representives from El Morro, Ramah, Grants and Gallup the custodian attended a conference with Burton Dwyre, State Highway Engineer, on February 5, at which time a request for the improvement of State Highway 53(Grants to junction of 53 & 32) by proper grading, drainage and surfacing, was presented and considered feasible by Mr. Dwyre. On February 7 with representives from Gallup and Grants, another trip was made to Santa Fe to attend a conference with the State Highway Commission. At this conference Mr. Dwyre presented our request and recommended a standard of $5000 to $8000 per mile. Our request was approved 100% by the Commission. We haven't seen any center line stakes yet, but feel certain that we will eventually have a loop road from Grants to Gallup over which a person can travel without an extensive knowledge of navigation, rigging, etc. It was also learned that Highway 32 from Gallup to Ramah Lake was on the approved list.

LEAVE TAKEN: Annual leave was taken from February 8 through February 23. Pasturing out the children Edie and I drove to Guaymas, Sonora, Mexico where the fishing was excellent, roads as bad as El Morro's, prices higher than in the U.S. and after quite a struggle with the first one, a taste for raw oysters was acquired

GRAN QUIVIRA

GRAN QUIVIRA, NEW MEXICO.

FEBRUARY 25, 1947.

The following is a summary of activities for the month of February, 1947.

Visitors this month totaled	162
Travel year to date	552

Weather. This has been a month of clear, cloudless, dry days. There was no precipitation of any nature. High temperature was 67 and low 13.

Roads. The State Highway Department has been unusually active during the past two weeks and as a result both approach roads are in good condition. The entrance road to the monument was also smoothed by the highway crew and is now in good shape.

Travel. If visitor travel to this monument is any indication of general travel throughout the country, all signs point to heavy visitation this coming spring and summer. Travel to the monument more than doubled that of the previous month of January. Instate visitors numbered 122 and outstate visitors 40. There were a total of 45 cars with instate numbering 33 and outstate 12.

Guide and Contact Service. A total of 162 visitors were conducted through the ruins on 45 guided tours. The average time spent by each party was 57 minutes. Total contact time of 43 hrs, 05 mins.

Maintenance and Administration. Outside of the 43 hours and 05 minutes given to interpretive service the entire remainder of time during the month was spent restoring the walls of the mission and convento.

Everett M. Wright

Custodian.

SUMMARY of the FEBRUARY, 1947,
MONTHLY NARRATIVE REPORT for
GREAT SAND DUNES NATIONAL MON.

P-1 GENERAL: Three days annual leave.

P-1 WEATHER: Usual winter weather with one week almost spring-like.

P-1 TRAVEL: 235 visitors, 72 cars.

P-1 INCREASE IN TRAVEL: For February 1946, 72 visitors, 32 cars.

P-1 ROADS: Dry and rough.

P-1 PUBLICATIONS: 169 leaflets.

P-2 ACTIVITIES: Attempt to produce man-made thaw on frozen water line; weather-stripped windows on southwest side of custodian's residence; customary hauling of water and wood; obtained repaired dump truck and left pickup for repairs.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
GREAT SAND DUNES NATIONAL MONUMENT
MOSCA, COLORADO

February 25, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in Great Sand Dunes National Monument for February, 1947.

GENERAL. Three days annual leave were taken.

WEATHER. The weather during this report period has been both warm and cold. One week of spring weather was immediately followed by winter.

TRAVEL. Two hundred thirty-five visitors in seventy-two cars, visited this area during this report period. Fifteen people took advantage of nice weather to picnic in the campground. One written request was answered.

INCREASE IN TRAVEL. For February, 1946, the records show 31 cars and 72 visitors.

N.P.S. VISITORS. Glen T. Bean of Bandelier National Monument and Perry B. Tullar of Region Three Office on February 8. Sorry to have missed you fellows.

ROADS. Both monument and approach roads are dry and rough. The county will blade them whenever enough moisture falls to enable starting this work.

PUBLICATIONS. There are on hand, one hundred sixty-nine mimeographed informational leaflets.

PRIVATE LAND. Mr. John Williams has been cutting and hauling a considerable amount of timber from his land. He has also paid his fee for driving cattle through the monument.

STATUS OF WATER RIGHTS. Another trip was made to the county court house in Alamosa for additional information regarding Mosca and Morris Gulch Springs.

WILDLIFE. Ten mule deer were observed browsing at Mosca Spring. A bear and cub were reported by men cutting timber on the William's land.

ACTIVITIES. The "Singing Sands" are still moaning low. The water line remains frozen - Mosca Spring ceased flowing and water is now obtained by the bucket-full from Mosca Creek. It is hoped this water is pure, as to our knowledge there are no cattle at present around the northeastern boundaries of the monument.

An Aeroil Burner was borrowed from a friend in Denver in an attempt to produce a man-made thaw on the water line. All remaining ice and snow was removed from the trench. The burner was put into action and it did thaw the ground enough to allow digging and probing for the pipe.

One hundred feet of pipe was uncovered - it was buried under from 2 to 6 inches of frozen dirt. The burner was applied and water ran in the house for at least 15 minutes. However, this only went to prove that the line is frozen above this point (2,000 ft) and the heat only melted the ice in this 100 foot section.

Winter weather set in again and this project will continue when weather permits. It is quite surprising how handy the HOWP has become with a short handled shovel.

Mr. Heide kindly loaned this area a new 55 gallon drum and fittings which was installed in basement as a storage fuel tank for the oil stove. This has saved some wear and tear on the custodian, as he now only has to fill it once a week. A copper tube leads to the stove from the tank and a constant flow of oil results. During the installation, the basement received a cleaning-up job.

On February 8, the repaired dump truck was taken from the Heide Garage in Mosca and the monument pickup was left for repairs. The luckiest thing to have happened to me was the fact that the pickup kept running. When the clutch was removed, it was found that the plate was paper thin - its a wonder that it held together as long as it did. The pickup should be repaired by the first of March.

A barrel of gasoline was obtained under the new contract issued; also kerosene for the Aeroil Burner and fuel oil for the stove.

The windows on the southwest side of the Custodian's residence were weather-stripped.

The following items were also received: one tire, two sets of tire chains, electric light bulbs, paint brushes and fire extinguisher.

Ted C. Sowers,
Custodian.

Montezuma Castle NATIONAL MONUMENT

Camp Verde, Arizona

February 24, 1947 19

MEMORANDUM for the Regional Director, Region Three.

There follows the monthly report of activities at Montezuma Castle National Monument for the month of February, 1947.

Visitors this month - 1417; travel year to date, 5243.
Visitors February, 1941 - 518; travel year, 1941, 1902.

Weather Our weather has remained ideal for travel with no moisture throughout the month. Dry leaves in the creek bottom are already presenting a fire hazard.

General Six hundred and thirty-three visitors were guided through the Castle in February. This was almost twice the total travel for February, 1941 when 318 visitors were counted and 154 entered the Castle.

Administration This has been a busy month with a record-breaking number of visitors for February and several minor projects to occupy our attention. Thirteen trips were made to Montezuma Well to patrol the area and secure data desired by the Regional Office. Although we have no accurate count, it is evident numerous visitors are stopping there, thirteen car loads having been counted one Sunday afternoon. No vandalism has been noted but there has been some trespass by stock and several stray animals have been driven out. A campaign has been started to clear the area of trash and junk as we have the opportunity.

Ranger Schroeder completed the rough draft of a booklet that we propose to use in connection with a self-guiding trail at Montezuma Well.

An extension to provide more display space was made for the back of our publications case. Our three post card views and the following pamphlets have been made available to the public on a "serve yourself and make your change" basis: Arizona Highways Magazine for July, 1946, Prehistoric Man in the Southwest, The Archaeologist at Work, Oak Creek Canyon, A Visit to Montezuma Castle, and Montezuma's Castle. The first day the plan was in operation we checked out thirty-five cents short and the second day a youngster who had failed to pay was

apprehended with about a dollar's worth of publications. In three and one-half days the plan has been in operation there was a turnover of $16.35 worth of publications. We collected $13.77 and are $2.58 short.

Pictures that are made annually to show the effectiveness of our fence were taken and sent to the photographic contractor.

National Park Service Visitors Custodian Townsend and family were here January 28. Assistant Regional Director John M. Davis and Architect Kenneth M. Saunders visited this monument and Montezuma Well. While here Mr. Davis took a boat ride across Beaver Creek to study a water-gap problem. Ranger Kennedy and family from Grand Canyon.

Outside Contacts On January 31 Custodian Hastings demonstrated the operation of soda and acid fire extinguishers to the science class of Camp Verde High School.

Maintenance All soda and acid fire extinguishers were discharged and refilled. We sanded the pick-up and gave it a coat of black enamel. It was rather difficult to sandwich this project in between other jobs for which the truck must be used.

The kitchen at Residence No. 2 has been redecorated and the project started for the bathroom.

Ruins Stabilization Archaeologist Steen arrived February 4 to install three house jacks and complete the stabilization project on the cliff under the Castle. The jacks he had received from Surplus Property were the 25 ton size - far too large for our purpose. Iron pipes were substituted for the jacks and these have been concealed with masonry. The project was completed February 19.

Attention was then turned to providing a hard surfaced trail from the register stand to the foot of the Castle ladders. This trail traverses part of the refuse dump and under heavy traffic, dust would become more than an inch deep. At the suggestion of Archaeologist Steen stabilized soil was used for surfacing material. The trail is quite steep and it was intentionally left very rough with diagonal grooves made to provide better traction.

Montezuma Well On patrol trips to the area an effort is made to advance minor maintenance items. The lock to the museum door has been repaired and the roof cleared of leaves. An irrigation ditch supplying the lawn and yard has been cleaned of leaves and the lawn watered. Three pickup loads of dirt have been used on the worst part of the approach road near the museum.

Use of Monument Facilities by the Public On February 1 we had 21 Boy Scouts from Flagstaff who camped overnight.

This month brought 1417 visitors to the monument in 422 cars. For admission to the Castle 503 tickets were sold, 62 children paid tax only, 65 chidlren climbed free, and 3 members of the armed forces climbed free.

Contact Time Total contact hours, 180.80. Hastings, 55.50; Leding, 60.15; Schroeder, 65.20. A total of 139 trips were made through the Castle with 633 visitors. There were 176 groups contacted in the museum including 799 people. Teh parties of 94 people used the picnic grounds and 5 parties of 27 people camped overnight.

NAVAJO NATIONAL MONUMENT

TONALEA, ARIZONA

February 24 1947

MEMORANDUM for the Director, Region Three

There follows a report of activities in this area for February 1947.

WEATHER: Generally the weather has been moderate and the snow is melting rapidly. Only the shaded areas remain covered.

ROADS: The entrance road is no longer covered with snow or ice but is deeply rutted and rough.

VISITORS: Only one party of visitors reached this area this month. This party of 3 was guided to Betatakin and brought out on the prehistoric hand-and-foot trail.

MAINTENANCE AND CONSTRUCTION: Additional work was performed in reconditioning tools and equipment. One man day was spent cleaning and removing soot from all reachable parts of the furnace. One and one half man days was spent on the automatic controls of the water heater, which is now functioning perfectly.
Large juniper posts were hauled in to be used in extending our roadside directional signs to Kayenta and the Betatakin-Rainbow Bridge road junction. Some of these timbers are to be used in the construction of the proposed wayside exhibits, when the approved plans are received.

PROJECTS FOR MARCH: Pour a concrete foundation for the propane tanks.
Repair a broken foot-trail sign on the Betatakin trail.
Start work on additional roadside directional signs.
Inspection at Inscription House.
Pump water. (?)
Scrape the ruts out of the entrance road--This item will be handled coincidental to trips for and with mail.

J.W.Brewer, jr.,
Custodian

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
ORGAN PIPE CACTUS NATIONAL MONUMENT
AJO, ARIZONA

February 25, 47.
19

MEMORANDUM for the Regional Director,
Region Three.

There follows a report of activities in Organ Pipe Cactus National Monument for the month of February, 1947.

WEATHER:
February has been dry with no rain falling during the entire month. What looked like another splendid flower year has now become doubtful as the vegetation is badly in need of moisture to produce the blooms. High for the month was 85 on the 15th while a low of 30 was reached on the 20th.

TRAVEL:
February has been our largest travel month, with visitors showing much more interest as a whole than previously encountered. A great many of those contacted hiked along our makeshift nature trail while Alamo Canyon received its share of campers, picnickers, and hikers. Cars representing 22 states were contacted at headquarters. Week ends have required the time of both custodian and ranger on contact alone.

GENERAL:
While most time was spent on contact, Ranger Ringenback has been able to repair and paint most signs and place a few needed new ones.

It was expected that during the month our S.&M.C. fencing would be started but due to delays in materials and the International Line fencing problems, work has been temporarily held up.

The hoof and mouth disease outbreak in Mexico is now our greatest problem here. Latest reports show constant increase of the disease in Mexico with it expected to reach near the Border within the next few weeks.

The Arizona State Board of Sanitary Inspectors has informed us that they expect to put patrols on the Border to prevent cattle crossing. Permission has been granted them for patrol on the monument and our assistance has been offered them in this project.

One official trip was made to Phoenix where some much needed equipment was located for the area.

Assistant Regional Director Davis and Architect Saunders spent two days at the area on inspection.

OTHER AGENCIES:

We have been informed that the U. S. Immigration station, which has been located just north of our entrance, will return to offices at the International Line during March. This will be an improvement as there was much confusion in the mind of the visitor being stopped to find where he was born before entering a national monument.

Development on the Lake Scenic easement strip is progressing rapidly with construction about 75% completed.

ACCIDENTS:

While no serious accidents occurred this month several minor ones have, due mostly to road conditions.

PUBLICATIONS:

Informational 4-fold pamphlets on hand, English version 21,300
Spanish version 3,450

PROJECTS FOR THE COMING MONTH:

We hope to get the S.C.S.M.C. project started this month and to receive and place in use some of our equipment acquired from surplus.

William R. Supernaugh,
Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

~~SAGUARO~~ NATIONAL MONUMENT

~~TUCSON, ARIZONA~~

~~February 26~~ 1947.

MEMORANDUM for the Regional Director,
Region Three.

There follows the monthly narrative report of activities at Saguaro National Monument for the month of February, 1947.

WEATHER. Another month of warm to hot days, almost completely cloudless skies, and windless days; it has now been two months since the last rain. Temperatures have been mostly in the low eighties, with the nights seldom being cool enough to need a coat. Water runoff in the Sabino Canyon area has been gauged at 2½ % of normal for this time of the year. With the total absence of the normally expected winter rains, it is probable that wildflowers will be few this spring.

SPECIAL ACTIVITIES. One official trip was made during the month by the Custodian and the two Barney brothers, when surplus War Department equipment obtained at Consolidated-Vultee Field was taken to Coolidge. On this trip the Saguaro stake truck burned out a bearing, and had to be towed the last thirty miles; then, when starting the motor for Mechanic Stonebocker to estimate damage, the connecting rod came through the block - finishing an already almost useless vehicle. The Barneys also accompanied Mr. Stonebocker to Gallup on February 10, to return two Chevrolet trucks to Coolidge.

INSPECTIONS. Assistant Regional Director Davis and Architect Saunders arrived at Saguaro on the 14th, remaining until the 17th. Ranger and Mrs. Ambuchan, of Walnut Canyon, were in for two hours on the 21st.

MAINTENANCE. After five months of futile attempts to rent road equipment, the Coronado National Forest came to our rescue, providing not only a patrol grader, but the operator and a two-man crew. They began work on the Loop road February 15, and completed the work on the 24th, grading not only the Loop, but the road in to Madrean Canyon on the south side of the monument. Our own two-man trail crew worked with them, cleaning culverts and opening ditches, and in addition cutting out brush which has grown into the right-of-way. During the same period the Pima County Highway grader worked over the greater part of the Broadway approach road, so for once we are really enjoying complaint-free contacts with visitors.

Work of excavating the cess-pool at the headquarters was completed, and we started the rock walls, but on the second batch the cement mixer borrowed from Organ Pipe broke down, and this work is now held up pending receipt of a new drive sprocket.

Other maintenance included repainting of the floors at Madrona Ranger Station, part of the Headquarters kitchen walls painted, and a new coat of tar applied to the barn roof at Madrona Canyon. Several man-days were spent grading the front yard at Headquarters for a temporary arboretum, but this work is only about 75% complete at present. In preparation for the arrival of the new 3 KW light plants, a temporary power line from the Ranger Station to the Madrona bunkhouse was erected, and in the near future the bunkhouse will be wired. One ton of grain, and six tons of hay were purchased and hauled from Tucson to the Madrona Canyon barn.

Seven man-days were spent in making the old tin-roofed shack in the cactus area habitable; this work will continue, as only the barest possible facilities, including a cooking and a heating stove are usable at present.

TRAVEL AND INTERPRETIVE SERVICES. Travel increased by almost six hundred persons over that of January, with a total of 2852 visitors arriving in 959 cars, two motorcycles, two busses, and nine others on horseback. People from 38 states, Canada, India, France, England, Newfoundland, and Venezuela registered at the Headquarters.

Of the above total, 888 visitors, in 264 parties, were contacted at the Monument Headquarters; an even 50 hours was spent on visitor contact work. Service to visitors was maintained on all but one days during the month.

Visitors continue to remark that overnight accomodations in the city of Tucson are almost unobtainable. The already strained resources of the hotels and tourist courts were stretched even more by the annual stockmen's convention, followed by the mid-winter Rodeo held from the 21st to 23rd.

RANGER SERVICE. Mr. William L. Howenstine was appointed to the Temporary Ranger position, and entered on duty February 9. Bill recently graduated from the University of Arizona, where he majored in Social Science, with a minor in Botanical Sciences. In addtion to making it possible to maintain full time visitor service, the addition of Mr. Howenstine to our small staff should provide the custodian with a chance to brush up on local taxonomy and botany.

PUBLIC HEALTH. The February 1 water samples from the creek in Madrona Canyon continue to be reported as potentially unsafe. With the lack of rain, and the present low flow of the stream, this condition will prevail until the creek dries up - which will not be long delayed if rainfall does not occur in the near future. Present indications are that we may have to haul water for stock and personnel at Madrona Canyon within the coming month.

PUBLICATIONS ON HAND. In accordance with instructions contained in FO 497, the following tabulation of informational literature on hand as of February 25 is submitted:

Free Publications.

Saguaro "two-fold" informational leaflets	5200
Saguaro "two-fold" leaflets (Spanish)	1150
Location map No.6, Southwestern States	600
Southwestern National Monuments leaflets (obsolete)	2000

Sales Publications, Supt. of Documents.

None.

FOREST FIRE PROTECTION. On February 11, a telephoned report from the Sabino Ranger Station of the Coronado National Forest advised that a smoke had been seen just below Spud Rock, on the north side of Mica Mountain. As this smoke was reported to be heavy, black, and enduring for only a few minutes, we concluded that it might be another plane crashed in the area. After investigation at nearby "Dude Ranches" to be certain that none of them had any parties in that vicinity, the custodian and Ranger Fulton rented a plane and flew over the area. No signs of either a fire or a recently wrecked aircraft were found, so we are at aloss to explain the origin of the smoke, which was seen by three of the Forest Service employees, all experienced in fire control work. Incidentally, only two days afterward the Coronado Forest had their first fire of the year, which confirms our belief that conditions for burning are apt to become serious early in the spring if we do not receive rain in the near future. At this time of year, the snow on top the Rincons should be from 3 to 4 feet in depth, but only scattered small patches were seen while flying over the area.

Don W. Egermayer
Custodian.

****

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Sunset Crater NATIONAL MONUMENT

OFFICE OF THE CUSTODIAN Flagstaff, Arizona

28 February 47

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Sunset Crater National Monument for the month of February, 1947:

Visitors this month: 260 Travel Year to date: 2975

General: Two brief inspections were made during the month. It is noted that Sunset Crater does not show the increase reflected at Wupatki. This is due to weather conditions and to the fact that quite a number of the visitors to Wupatki were advised against taking the road to Sunset because of the snow at the base of the crater.

Logging activities have begun east of Sunset Crater and it will be necessary to block off the "back road to Wupatki" very soon. It is felt that the heavy logging trucks create a hazard which might well be avoided by our visitors.

The "Thunderbird" milepost marker at the entrance on Hiway 89 has disappeared. It is difficult to understand why anyone would take it as a souvenir.

A revised informational leaflet is being prepared for Sunset Crater and will be submitted next month.

David J. Jones
In Charge

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Tonto NATIONAL MONUMENT

Roosevelt, Arizona

February 25 19 47

Memorandum for the Regional Director,
Region Three.

There follows the report of activities in Tonto National Monument, for February, 1947.

Visitor Statistics: 983 cars brought 3964 people to this area during the month of February and 306 hours were spent with them by Custodian Cipe and Ranger Ball. Groups to the Ruins numbered 690 and to the Museum, 890. This is, I believe, the largest number of persons ever to visit this Monument in any one month.
New cars are seen in increasing numbers and the people using them showing much interest in the areas they are visiting.
The Dons Club finally ventured to bring up a small tour of 45 cars, with 225 people and by parking the cars along the side of the road to well below the bridge, all went well.
At the same time two large busses with 20 members of the Armed Forces each, reached the Monument. The boys piled out and helped with the parking problem and had a swell time doing it.

Park Service Officials: Assistant Regional Director John M. Davis and Architect Kenneth Saunders were here on February 11. They spent the day here and Monument Problems were thoroughly gone over.

General: Several trips were made to Globe to get material for the temporary storage and office room and one to Coolidge for the same reason.
Several trips have been made also in the endeavor to find machinery to level off a place for Ranger Ball's trailer, with no success.
Gravel was hauled for the piers for the office room.
A number of inquiries for informational literature have been answered and the ever increasing paper work attended to as rapidly as possible.

Projects for the ensuing month: With the number of visitors to are now having very little can be done on anything but as much as possible will be done on the addition and trailer space.

Weather: Cold most of the month, considerable cloudiness and no moisture.

Elmer C. Cipe,
Custodian

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
TUMACACORI NATIONAL MONUMENT
Nogales, ARIZONA

February 25, 1947.

MEMORANDUM for the Regional Director,
Region Three.

Follows the monthly narrative report for Tumacacori National Monument for the month of February, 1947:

!FLASH! Tumacacori travel records show that this monument is no longer in the bush league class. 3,481 visitors came to the area this month. This exceeds by far any previous travel month in the history of the monument, with the exception of April, 1939, which was the month our museum was dedicated, and was not a normal travel period. Gross revenue also reached a new high this month, with income from ticket sales and taxes of $532.00.

WEATHER CONDITIONS: Severe drouth conditions prevailed all month, with precipitation of .02. There were four cloudy days. Maximum temperature of 81 occurred on February 5th. Minimum temperature of 19 occurred on January 30.

MAINTENANCE: In addition to routine maintenance and janitor work several acres of dead weeds were raked, burned, and hauled away. Poor soil in the patio garden was hauled away and replaced with rich sandy loam from the river bottom. Considerably more of this remains to be done. A new hot water tank was installed in the custodian's residence. An unsightly old pump jack was pulled from an old well, and the well is in process of being filled up. (It is not a historic well). Two varieties of flowering plant seedlings have been planted in the patio garden to bolster the coming spring display. Several plants have been dug up from crowded areas and replanted. Extensive pruning has been done on oleanders in the patio garden.

INTERPRETIVE SERVICES: 1,964 visitors, went on 273 guided trips through the mission grounds and the one-third of the church which is safe to enter, receiving an average of 37.61 minutes per trip. 3,350 visitors received combined Information and Interpretation Service in the museum lobby, patio garden, and view room. 3,271 persons visited the museum.

INCREASE OR DECREASE IN TRAVEL: See "!Flash!" above.

VISITORS: February 1 - Tucson Indian Training School, with 10 pupils.
February 8 - Boy Scouts of Troop 27, Nogales, with 15 boys.
February 10 - Mr. and Mrs. Joe Joffe. He is Assistant to the Superintendent, Yellowstone.
February 20 - Custodian and Mrs. Bates E. Wilson, El Morro.

GENERAL PUBLICITY: February 14 - Harold Mackin and Jeremy Fedor, Albuquerque photographers, took pix for a popular book on Arizona and New Mexico missions.

February 22 - Max Kegley, Arizona photographer of considerable fame, took more mission pix.

INSPECTIONS: January 28 - Chief Clerk Castellum was in for a brief early morning visit, to ask if we had any special problems in his line that needed quick answers.

February 17 - Assistant Regional Director Davis and Architect Kenneth Saunders spent half a day here going over a variety of problems.

DONATIONS: Through the generosity of William Neil Smith, II, of Tucson, Arizona, our museum now has an excellent small collection of Seri Indian ethnological material.

TUMACACORI TREASURE FOUND: On February 6 the custodian, acting on a telephonic tip from the worried owner, found a diamond ring which the lady had lost in the trash container of the womens' rest room.

DAMAGE TO RUINS: Another portion of an irreplaceable old canale has fallen from the north wall of the mission church. There is certainly a crying need for this building to have an over-all surface treatment with something which apparently hasn't yet been invented, to stabilize and waterproof earthen walls without being conspicuous.

PERSONNEL: Judy England worked a day and a half as a per diem guide.

Ramon Orozco worked most of the month doing maintenance labor and grounds cleanup.

Ranger John Anbuchon, of Walnut Canyon National Monument, helped us for ten working days during this extremely busy month. The brief stay of the Anbuchons was much appreciated and enjoyed.

GENERAL: Visitors have received a high standard of service throughout the month. Need for a full-time maintenance laborer and a six months' winter seasonal ranger have by now become clearly evident. For the first time since this custodian has been in the Service there has been such a press of other duties that the ponderous mass of paper work has gotten behind.

Earl Jackson,
Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Tuzigoot NATIONAL MONUMENT

Clarkdale, Arizona

Feb. 28 19 47

MEMORANDUM for the Regional Director
Region Three

Following is the monthly narrative report for Tuzigoot National Monument for February, 1947.

Visitor Total: This month brought the amazing total of 1139 visitors as compared with 492 for February of 1941 and 638 for February of last year. Every party arriving during visiting hours (and quite a few who did not) received guide service, thanks to the additional services of Ranger Richert. It is now possible to give full contact service every day of the week.

Guide and Contact Service: Although all visitors during visiting hours were contacted, the greatly increased demands of contact work show that atthis rate, we shall have all we can possibly handle just to meet all comers when the summer rush arrives. We are still hoping to complete all necessary maintenance and repair jobs, including ruins stabilization, water line to Clarkdale and re-roofing before the main visitor impact.

Personnel Time: Museum: 102 hours 10 minutes. Ruins: 91 hours. Total time for Ranger Richert: 89 hours 10 minutes. For Custodian Cotter: 104 hours.

Special Visitors: Tuzigoot welcomed Assistant Regional Director John M. Davis and Architect Kenneth M. Saunders on Feb. 7. Archeologist Charlie Steen from Region Three and District Ranger W. J. Kennedy from Grand Canyon and his family were visitors later in the month. Mr. Leslie N. Gooding, well-known botanist, was in Jan. 26. We were glad that the Monument herbarium received his blessing and promise to aid us whenever we might be stumped.

Stabilization: Ranger Richert spent all his time which was not devoted to contact work in helping Felix Macias sling adobe in the stabilization work at the ruins. Excellent results are now being obtained with a mixture for pointing the walls consisting of 1 part cement in four. The adobe thus made (plastic cement instead of ordinary portland is used) is tinted with venetian red cement pigment so as to approximate the original adobe, and exactly match the adobe-plaster employed by the excavators in the original pointing after the excavation. On the adobe still representing the original pueblo work that still stands we hope to try some of the solidifying mixture recently proposed by Charlie Steen, if a supply can be obtained. A photographic record is being made of all stabilization.

TUZIGOOT FEBRUARY 1947 MONTHLY REPORT--2

Maintenance: Unforseen difficulty with suppliers has prevented the Verde Hardware Co., contractors for 1200 feet of 2 inch galvanized steel pipe for the water line to town, from delivering more than 500 feet, so far. The pipe which has been delivered was coupled and laid in the ditch now opened above the old pipe to be replaced. We have had assurance that the balance of the order will be delivered early in March. Meanwhile, the repair of the old line goes on apace, and we are barely able to keep ahead of the leaks and maintain the water supply to the Monument.

The Custodian and Ranger have put in several hours during the slack part of the morning clearing rubble from the rooms of Unit IV where the reconstruction was demolished several years ago. Since the mass of this debris is too great to be hauled away by the men on duty without slighting the visitor contact program, we are throwing the rubble from the rooms in the rear of Unit IV, out of visitor sight, there it can be hauled away later.

Additional work on the truck, mainly upon the wiring system had to be done during the month, at a local garage. Because of the exorbitant charges of local garages, it has been determined to move the truck down to Casa Grande for any future extensive repairs.

Plans have been completed for the re-surfacing of all trails with a bitumuls-gravel mix, and three barrels of bitumuls have been obtained. It now remains to wheedle a supply of gravel from the State Highway Dept.

Work is progressing on the fact file, "Final Opinions" file and slide descriptions.

Free Literature Supplies. All supplies of all types of free literature are completely exhausted at this Monument.

John L. Cotter
Custodian

...Walnut Canyon.....NATIONAL MONUMENT

Flagstaff, Arizona.

.....February 27.....1937.....

MEMORANDUM for the Regional Director, Region Three.

Weather. Very mild for a February in this vicinity. The roads remained in good condition most of the period as is attested by having six times as many visitors this year as the average for the preceding twelve years.

Personnel. Ranger Ambuchon returned from Tumacacori the 24th, the same day that Beambien returned from taking annual leave. Hopathki's Ranger Upton was in charge while Ambuchon and Beambien were gone.

Activities. With only one man on duty, little was accomplished beyond the usual chores and some cleanup of picnic area.

Ambuchon took the wrecked pickup to Casa Grande and returned with a loan pickup. Today he left for Big Bend Nat'l Park to get a Dodge pickup from surplus.

Accidents. At least two people fell on the porch steps of Administration Building. We learned of one accident through a local doctor who treated the injury.

Donations. Sixteen copies of Mesa Verde Nat'l Park's "Mesa Verde Notes" were received for the library. Don Watson donated a copy of his "Cliff Palace, The Story of an Ancient City".

N.P.S. Visitors. Assistant Regional Director Davis and Architect Saunders were here on an inspection trip. Custodian Townsend and Naturalist Steer visited this area in passing.

Publications. 2,250 2-fold leaflets are on hand. No government sales publications are carried.

Paul L. Beambien

WHITE SANDS

Alamogordo, New Mexico

February 21, 47.

VISITATION:

	This Month	Travel Yr. To Date	Fiscal Yr. To Date
Total Visitors	5,592	25,705	57,221

This is the largest February travel since accurate records have been maintained. February has forced itself into one of our heavy travel months; and in spite of several cold spells which always tend to slow traffic. There were 10 days of the month when the thermometer registered a low of 15 deg. The warmest day of the month was on the 16th with a high of 69 deg. We were favored by visits of two special groups, one from the Teachers Association of Juarez, Mexico and the other being the Highway 54 Association with representatives from towns along Highway 54. These groups entered in chartered buses and seemed highly pleased and impressed with the area. We were also favored by a visit from the Assistant Regional Director, accompanied by a representative of the Landscape Division, checking on our repair and rehabilitation program and conditions in general. It was our pleasure to be able to put on a demonstration of rocket firing for their special benefit and which we understand from press notices was highly successful in the accomplishment of the purposes desired. It was our pleasure to list among our visitors Hap Arnold formerly of the A.A.F., along with many noted officials visiting the rocket experiment station at the White Sands Proving Grounds, including one British Empire official. Several outstanding photographers have been in for pictures, and probably one of the most enthused was Ansell Adams who was in on a special assignment.

COOPERATING GOVERNMENT AGENCIES: An official trip was made to the White Sands Proving Grounds in connection with firing schedules as submitted by that unit. Relief was given from the tight schedules and we feel very much repaid for the trip. We also investigated rumors of a launching platform being erected on our area as well as reports that numerous rockets have landed within our boundaries. We find that no construction other than authorized has been done within our boundaries, nor is any contemplated, and only two, and possibly fragments of two more, rocket heads have landed within the boundaries of the monument proper.

PLANS, MAPS AND SURVEYS: We were very much pleased to have received the Master Plan for the White Sands National Monument, and were certainly proud of the technicians' finished product.

4. GENERAL PUBLICITY: Our publicity has been, and is, somewhat greater than usual in that our increased visitation demands some attention, and, too, the annual Play Day as sponsored by the local Chamber of Commerce and held at the White Sands has already been planned and press releases issued regarding the 1947 Play Day which is to be April 12.

5. COMPLAINTS: There have been no complaints received from any source to the knowledge of this office, although several suggestions have been given regarding minor conditions both within and without our monument area.

6. MAINTENANCE: Maintenance on buildings has been neglected over a considerable period of time and is reaching a state which necessitates our inaugurating some action. This was planned, however, and bids are being circulated to cover many of our repair needs. Early seasonal winds with exceptional cold spells has made our road maintenance problem almost beyond our power to overcome. We still have hopes of early relief through the War Assets Administration in obtaining more efficient equipment.

7. CONCESSIONS: The White Sands Service Company has experienced one of its best comparable months in its history. The present location has several times this month proven inadequate, and measures are being considered for relief on heavy days or on special occasions.

8. MUSEUM: The heavy visitation has, of course, increased the number of museum visitors; and with the museum heated we have received many fine compliments on this phase of our activity.

9. RANGER SERVICE: Ranger service is already stretched to the breaking point and it will soon be necessary to split shifts to accomodate the longer hours of visitation. The handling of surplus materials in cooperation with other areas has strained our ranger activity with its additional burdens connected therewith. Plans are under consideration for Ranger Steele to attend the fire training program of Region Three, although just where has not yet been determined.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Wupatki NATIONAL MONUMENT

OFFICE OF THE CUSTODIAN Flagstaff, Arizona

28 February 19 47

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Wupatki National Monument during the month of February, 1947:

Visitors this month: 233 Travel Year to date: 781

Travel: Visitor use for the past month increased almost 100% over that of any previous February, a trend which is consistent with reports from other sources in Arizona. Business men are planning on very heavy traffic this coming summer.

Weather: The weather during the past month has been entirely too clear and too dry for the good of the country. The winter has been one of the driest on record, but there is still time for us to get some badly needed moisture.

Roads: None of the visitors to date have had any difficulty on the roads, but we can expect it in the not too far future. The cinder is drying out rapidly, the new entrance road is badly "washboarded" and contains dust holes about which very little can be done until we have some moisture.

General: The work routine for the month was somewhat upset by the temporary assignment of Ranger Upton to Walnut Canyon for more than two weeks in the absence of both Custodian Bonubien and Ranger Aubuchon. Immediately following this assignment it was necessary for him to leave for Big Bend National Park to obtain surplus property. Custodian Jones took both Upton and Aubuchon to Saguaro National Monument to join the group leaving for Big Bend. Pickup 13820 was exchanged at Casa Grande for the reconditioned Wupatki pickup. At Casa Grande a rear wheel came off of 13820. Had this happened enroute a serious accident might have resulted.

A set of four kodachromes of paintings made at Wupatki was received on loan from Artist E. M. Craven. These kodachromes are being forwarded to the Regional Office to illustrate the possibilities of working up a lecture on this aspect of the inspirational values in our parks and monuments. These values are intangible, but make an important contribution to the enjoyment of our visitors. Artists express this inspiration in a concrete form whereas most of our visitors do not.

Activities of Cooperating Governmental Agencies: A field party from the Bureau of Reclamation group investigating Coconino Dam site has been working on the Little Colorado in the vicinity of Black Falls. The completed study

should be finished in the near future. It is now the opinion that while water may eventually back up to Black Falls it will not form a lake upon which we would have to consider a recreational development.

Grazing: The use of grazing land under permit by the C O Bar Company has increased considerably this year. Our counts indicate between 300 and 400 head including calves. This use has been made possible partly by the installation of a water tank just outside the boundary on North Mesa. Water is hauled from the Deep Well Tank, a distance of approximately three miles. This is the first concrete evidence that the permittee intends to more fully utilize his permit. Local cattlemen say that they can afford to haul water about three miles in normal times, but that they can now haul up to ten miles.

Observations: One of the local Navajos, Emmett Lee, constructed a new hogan in Wupatki Basin. In the Moenkopi slabs which he used for the base are some very well preserved tracks which are quite different than those previously observed. The quarry has been located and will be brought to the attention of the University of California paleontologist who will be here this summer.

Water Supply: Flow of the springs remains at low record. Heiser Spring is particularly disconcerting in that it should be on the increase rather than decreasing. Wupatki Spring remained the same as for last month, 738 gallons per day, while Heiser has dropped to 2009 g.p.d. or 100 gallons less than in January. The cement storage tank at Heiser was cleaned thoroughly and the roofing weatherproofed.

NPS Visitors: Archeologist Steen paid us a brief visit on the 1st, enroute to Grand Canyon for supplies. Assistant Regional Director Davis and Architect Ken Saunders accompanied by Custodian Brewer visited the area on the 5th. Regional Archeologist Hood was contacted in Flagstaff on the same day.

Publications on Hand: Due to the shortage of Wupatki leaflets none are being distributed to visitors, as they are more urgently needed to answer requests for information.

Informational Leaflet-	Wupatki	75 copies
" "	Sunset Crater	1200 "
Portfolio of Nat'l Parks and Monuments		5 "

Activities of SWMM Stabilization Laboratory: Collaborator Buchenberg has been concentrating his activity this past month upon developing techniques for making "cinder block" drainage tile. At the same time he has been experimenting with the manufacture of cinder blocks and soil cement bricks as a possible material for building construction.

Signs: Through the cooperation of Professor Bjorg of Arizona State College cut-out letters are being made for new signs at both Wupatki and Sunset Crater. Lack of materials is causing delay.

As done by N.P.S. naturalists

Arizona Archaeological Center Library

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
REGION THREE
SANTA FE, NEW MEXICO

April 11, 1947.

MEMORANDUM for Assistant Regional Director John M. Davis.

There follows the narrative report for Naturalists from the Southwestern National Monuments for the month of March, 1947:

Staff Activities - General

Naturalist King was in the office the first two weeks of the month, and took the latter two weeks on annual leave.

Archeologist Steen was in the office the whole month.

Naturalist Sullivan, it was learned, probably will not be able to report for duty until sometime in May.

Administration - Interpretation

Requests for information and photographs have increased to the point where staffmen cannot handle them, and clerical assistance must be asked from other branches. Considerable assistance was rendered during the month by Clerk Tuller, loaned from the office of the Auditors.

Efficiency ratings were accomplished for Mobile Unit personnel.

Interpretations - Overhead

The usual reports and 54 letters were written.

The mimeographed leaflet for interpretation of the Sycamore Trail at Montezuma Castle was re-issued for use at the monument this summer season.

Progress on Exhibit Plans and Projects

The Custodian at Tumacacori furnished label copy for 54 museum labels which was forwarded to the Museum Laboratory in Washington for printing.

Accessions, other than library

In response to an inquiry from the Custodian of Tonto National Monument, it was determined that only one bird study skin was prepared before the war for the collections of that monument. Casa Grande, Saguaro, and Organ Pipe Cactus National Monument collections were circularized but no Tonto skins were discovered and the records of Preparator Philp show definitely that no collections other than the one mentioned were made there.

Research and Observations

Continuing attempts were made to obtain an Archeologist and funds for the initiating of archeological surveys in various monuments. At the end of the month the project still had not materialized.

Letters were written to obtain historical library material for Montezuma Castle National Monument.

Cooperative Activities

Correspondence was carried on with the object of obtaining collaborator status for Dr. D. Elden Beck, Brigham Young University, for biological work at Arches National Monument.

Various Indian tribal names for calendar months were compiled for possible use by Editor Raymond Carlson of Arizona Highways Magazine, in response to a request from him.

Current policy concerning collection of vertebrate mammals in National Parks and Monuments was furnished to Mesa Verde National Park for use in answering a request for the collecting of chipmunks on Colorado National Monument.

Region Three Office Loan Library

Accessions for the month were 12 books, 4 reports, 16 pamphlets, 71 periodicals, and 29 file letters and memoranda. The total was 132.

Southwestern Monuments Association

The long overdue annual report for the period July 1, 1945 through June 30, 1946, was issued and distributed to Custodians and Board Members by Executive Secretary King. It, in general, showed healthy growth, listing gross sales at more than $3,200, net earnings at about $900, donations at $200, and inventory of sales publications at $5,800.

Arrangements were made with a local auditor in Santa Fe to perform an audit on the books for the same period. It will be accomplished sometime in April.

Turn-ins for the current fiscal year indicate extremely heavy sales in the monuments, and this fiscal year should show a gratifying increase in activity and gain.

Ruins Stabilization

Continuing justifications were prepared in the attempt to complete the equipment needed for the mobile unit at Chaco Canyon, as well as by crews operating in other monuments.

A sample experimental drainage tile made from cement and cinders was received from Collaborator A. E. Buchenberg at Wupatki National Monument. The sample appears very practical and may prove an answer to our difficul-

ties in obtaining file for the proposed drainage improvement at Casa Grande and possibly at Tumacacori National Monuments.

Archeologist Steen completely revised the P.C.P. program for Ruins Stabilization in Southwestern National Monuments, and submitted it to the Regional Landscape Architect.

The project for repairing the room on the Great Kiva at Aztec Ruins National Monument was reopened, and technical advice was given to the Custodian at Montezuma Castle concerning the laying of asphalt floors in Montezuma Castle.

Technical Aid in Administration

Further correspondence occurred concerning the monument boundary line near Kin Biniola Ruin on Chaco Canyon National Monument, and also concerning the proposed boundary change at Aztec Ruins National Monument.

Projects for next month

King will be in the office by himself during the entire month, handling routine affairs.

Steen will go to Tonto the first of the month to relieve the Custodian there who is retiring.

Because of the short-handed condition of the staff, no projects or any magnitude can be attempted.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

.....Arches..... NATIONAL MONUMENT

.....Moab, Utah.....

March 26, ... 1947...

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of March, 1947:

WEATHER: Rain fell on February 27th with both snow and rain in evidence on March 23rd. Heavy wind blew on three occasions during the month but the continuous March wind did not materialize this year. The days were exceptionally warm and the trees at headquarters have started to leaf out.

SPECIAL ACTIVITIES: The custodian was absent from the monument from March 2nd to 11th on an official trip to Big Bend National Park to take delivery on army surplus equipment. Stops were also made at Carlsbad Caverns National Park and White Sands National Monument for surplus property for various areas.

TRAVEL: Travel took a decided jump this month with a total of 44 cars and 176 people visiting the area. This is A large increase over 60 people for February, 1947 and 90 people for March, 1946. Most of the travel was from Utah and Colorado but Washington, Idaho, North Dakota, California, Michigan, District of Columbia, Nebraska, Oregon and Wisconsin, were also represented.

INTERPRETIVE SERVICES: No trips were made with parties into the outlying sections and no contacts were made at the Windows. Forty four people were contacted at headquarters and 176 people visited the Windows section unattended. Numerous requests for information were received and answered during the month.

Numerous complaints were received from visitors last year concerning the lack of knowledge of Arches National Monument displayed by local business houses on requests for information. With the cooperation of Mr. L. L. Taylor, Editor of the Moab Times-Independent and Mayor Baldwin of Moab educational trips are to be taken to various points of interest, with parties made up of local business men and women, so that they will be prepared to furnish visitors with accurate information. The first trip is to be made to the Windows section on the afternoon of March 30th. If we can develop enough interest additional trips will be taken to the Devil's Garden and Delicate Arch and also Dead Horse Point and Fisher Towers.

COOPERATING GOVERNMENTAL AGENCIES: I was recently advised by Grand County's senator and representative, who have recently returned from the 1947 legislative session, that the budget approved for the Department of Publicity and Industrial Development contained a $10,000 item for road improvement in Arches National Monument. They were assured by the commissioners of this department that the money would be appropriated during the summer. Grand County Commissioner Taylor has written this department requesting an agreement to be completed in the near future so that work can be started before the heavy travel starts.

ROADS: The entrance road into the monument is in excellent condition and many compliments have been received regarding same. The State power grader has recently been repaired and it is hoped that with our first spring rains that we can get it graded and in shape for the summer travel. There are several stretches that will require a shale surface during the dry weather to eliminate heavy sand.

MAINTENANCE AND CONSTRUCTION: Installation of the two pit latrines in the Windows section was completed on March 25th.

White paint was finally received and the painting of the outside trim at quarters and the fence is now complete. At this writing weather-stripping is being applied to all windows to try to eliminate the sifting sand. Renovation of the office is about 75% complete.

Our water project at the Windows has struck a snag. Two 500 gallon water tanks were supposedly shipped from Salt Lake City on February 28th but have not arrived yet and I have been unable to locate them. Hope to get delivery on them during the coming month and complete this much needed project.

The new 10 KW, AC power unit was installed during the month. On one occasion, during my absence at Big Bend National Park, it developed an oil leak and the oil pressure dropped below normal but the automatic features contained in the set-up cut off the plant before it was damaged. On March 21st it again ceased to function and I have not had a chance to check the trouble but believe it is a clogged gas line.

RESEARCH AND OBSERVATION: Dr. D. Elden Beck and party of Brigham Young University have signified their intention of carrying out the first stage of their survey of plant and animal life at Arches from April 24th to 27th inc. Application has been received from Dr. Beck for appointment as Collaborator for the Service.

ACQUISITIONS: Delivery was received on a ½ ton Dodge 4 x 4 Army pickup at Big Bend National Park on March 6th for assignment to Natural Bridges National Monument. This truck was in good shape and the trip from Big Bend to Arches was made without trouble. Various smaller items of equipment were also received during the month.

PUBLICATIONS: The following free publications are on hand:

Arches Mimeographed Leaflet	576
Natural Bridges do	460
Glimpses of our National Parks	79
N. P. Location Map No. 5	5
do No. 6	832

Aztec Ruins NATIONAL MONUMENT

Aztec, New Mexico,

26 March 1947 19

Summary, monthly report of Aztec Ruins for March 1947.

Weather. Fair, charactorized by sudden changes, adversely affecting travel.

Maintenance. Clearing of drainage dith completed. Trouble with domestic water system.

Travel. An increase by 1 visitor over that of a year ago.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Aztec Ruins NATIONAL MONUMENT

Aztec, New Mexico,

MEMORANDUM for the Regional Director, 25 March 1947 19
Region Three, National Park Service.

There follows the report of activities in Aztec Ruins for March 1947.

Weather. The usual erratic March weather characterized with sunshine and clear, warm days, then high winds and cold days has apparently discouraged travel, for it has failed to keep up with that of last month. We enjoyed one 2 inch snow storm and 2 very light showers which totaled 0.26 inch precipitation.

MAINTENANCE. Of first importance to us is the cleaning of the blocked drainage ditch by use of a stream of water under high pressure. The ditch is now clear of any obstruction and we shall make every effort to keep it so. The completion of two new manholes, which we found necessary to construct in clearing out the pipe line, are all that remain in placing the drainage ditch in proper condition.

We have experienced considerable trouble with our domestic water line which was broken, in the water pump which needs an overhauling, and in the water softener which had to be removed and disassembled for cleaning and overhauling.

SPECIAL ACTIVITIES. The custodian presented colored slides and a short talk on Aztec Ruins to the local Lion's Club, March 17. A similar talk was made to the students of Rio Vista School on the 25th. On March 20, we listened in on the talk Dr. Nusbaum made before the Farmington Lions Club.

INTERPRETIVE SERVICES. There were 245 visitors conducted in 83 trips thru the ruins and 409 people in 114 trips were shown the museum.

INCREASE IN TRAVEL. Our total visitation of 430 people, comparing to 429 a year ago, arrived in 124 cars from 26 states. There was 1 member of the armed forces.

PROPOSED ACTIVITIES FOR APRIL. Complete our repair work on the drainage ditch and upon the domestic water system.

Report of GOVERNMENT PUBLICATIONS.

AZTEC

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
BANDELIER NATIONAL MONUMENT
SANTA FE, NEW MEXICO

March 30, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of the activities at Bandelier National Monument for the month of March, 1947.

Weather and Roads

Weather for the month was generally fair and warm with several light snows and light rain showers. High temperature for the month was 75° and low was 8° above zero. 0.49 inches of moisture fell.

Roads have been in good condition most of the month. Foreman Mandland bladed the road from headquarters area to the Otowi Section during the first week of the month following the light snows which fell at that time.

Maintenance

The force account painting and decorating job has continued throughout the month and is almost completed. A temporary partition is now being constructed in the office to provide additional room for the new clerk. Roads and trails work is scheduled to increase April 1. Two new location signs were constructed and placed at strategic points at the junction of the approach road with the Los Alamos highway and three mileage markers were put along the entrance road.

Travel

Travel to Bandelier was somewhat discouraged during the first part of the month by inclement weather. However, during the remainder of the month the weather was nice and the monthly total was equivalent to that of the same period of last year. 847 people visited the area in 192 cars. One fellow rode in horseback. 20 of the automobiles were re-entries. Visitors are primarily of the bonafide tourist type as evidenced by the small number of re-entry permits issued.

Interpretation

51 conducted tours were made to the ruins with a total attendance

of 289. The average duration of each tour was 1.2 hours. Many people hiked on beyond the regular tour to the Ceremonial Cave. Evidence of travel on the road to Tsankawi and the Fire Lookout indicates that there is continued visitation to those points of interest.

Visitors

Dr. Marie Warrington, Curator of Anthropology of the Colorado Museum of Natural History and Dr. Edward H. Hall, Department of Anthropology of the University of Denver accompanied a group of University students on a field trip to Bandelier during spring vacation at the University. A group of Adams State Teachers College students were brought to the monument on March 3 by Professor Ernest Lyckman.

Charlie Steen of the Region Three Office visited Bandelier on the weekend of March 22 and 23.

Personnel

The Custodian has spent most of the month on special detail in the Region Three Office. Ranger James M. Eden has been promoted to the position of Junior Administrative Officer at Grand Canyon National Park. "Jim" married Margaret M. Cass of the Region Three Office on March 5 and made the transfer to Grand Canyon on March 23. Thomas B. Onstott, formerly of the SERA, is scheduled to fill the vacant ranger position.

Surplus Property

Bandelier personnel have spent most of the month on the road hauling surplus equipment for the Southwestern National Monuments. Trips made during the month were Ranger Eden and Clerk Bean to Carlsbad and White Sands; Ranger Reefe to Big Bend; Ranger Eden, Maintenanceman Valencia, and Laborer-leadman Pino to Zion; and Clerk Bean to Grand Canyon.

Lodge

Preparations are now underway to open the lodge on May 1. Surplus property secured for use in the lodge include a reach-in refrigerator, food-chopper, dishwasher, and drying tumbler.

Canyon de Chelly NATIONAL MONUMENT

Chinle, Arizona

March 26, 1947

MEMORANDUM for the Regional Director, Region three.

The following is a report of activities at Canyon de Chelly National Monument during the month of March, 1947.

Weather Conditions

The usual high winds and dust storms have been absent during March and the weather has been much warmer and dryer than years previous. In fact, the weather has been ideal for visitors but much too dry to suit the needs of the country. There has been a steady flow of water in the canyons but as yet not enough to fill the reservoirs at many Farms or Rock point. Even the stock tanks, usually full at this time, are dry. Unless spring rains bring much needed moisture then the Navajo indians face a season of drouth and many fields will not be cultivated this year. A heavy spring run-off in the canyons is unlikely. One light storm brought a total of .17 inches of moisture. Maximum temperatures were mostly above 60 degrees, the high being 72 degrees. Minimum temperatures ranged mostly between 25 and 30 degrees dropping to a low of 18 on only one night.

Administration

The Custodian was absent from the area for eleven days while making a trip to Big Bend National Park for surplus equipment. Carlsbad Caverns National Park, and White Sands National Monument were also visited and Surplus Items picked up.

Maintenance

Considerable time has been spent during the month making repairs on equipment and generally straightening up the area. On my return from Big Bend, I found that The Transmission Housing had been broken on the Chevrolet Pick-up. This was removed but the transmission was so worn that it would not be worth repair. New packing was installed in the Water Pump. All cleanable parts were removed from the Dodge Pickup obtained from War surplus and it is functioning well at the present time. The Office has been cleaned and redecorated with work of redecorating the Residence well under way. Changes and improvements are being made on the visitors Rest Room. The outside painting of all buildings has been completed.

Soil and Moisture

During the rebuilding of the revetment at antelope house last Fall , another channel was opened up on the far side of the wash to divert the water and facilitate the work on the structure. This channel has served its purpose well and has continued to carry the water from several fairly heavy run offs and at present very little water is getting over to the protected area. This should give our plantings a better chance to take hold.

Public Health

The Measles continue in this area as well as Influenza and Pneumonia. 17 Navajo Children have been brought in to the Hospital. One small child of three years died a short distance from headquarters. The custodian prepared it for burial, obtained lumber from the Indian service and after building a burial box, helped dig the grave and conducted burial service as the child was of Catholic parents but had not been baptized, the Franciscan Fathers would not conduct the burial.

Travel

There were 63 people in twenty cars visited the area during the month. The greater part of these visitors were bona fide tourists and is quite an increase over the 39 visitors who came last year. Or travel year to date is still above last years figure, 686 to 617, but our Fiscal year shows nearly a hundred percent increase, figures being 1947-1,239, 1946- 686.

A total of 21 hours in guide and contact time was spent with visitors.

Visitors

J.R. McGibbeny, well known for his color photography and work with the Salt Lake City Chamber of Commerce, Brought his brother D.A. McGibbeny and son, to see the beauties of Canyon de Chelly(Navajo and Scenic). Mr. Mc.Gibbeny has been in Gallup working on material for the Indian issue of Arizona Highways Magazine which will be out in July.

ADDRESS REPLY TO
SUPERINTENDENT

March 25, 1947.

Memorandum for the Regional Director,
Region Three,

There follows a report of the activities in and around Capulin Mountain National Monument for the Month of March 1947.

Visitors are estimated to be about three hundred bringing total visitors travel year to date four thousand two hundred sixty, and fiscal year to date nineteen thousand two hundred sixty.

The Custodian was on leave up to the tenth of the month, having spent his vacation in south Texas, did not enjoy that down there as much as one might think, Had to hug the stove just about like we do here at home otherwise had a wonderful nice trip, south texas having had the coldest February in the history of the weather bureau.

Roads in the Monument are again in fair condition, The Custodian found them in a state of bad repair upon his return but got right after them and they are again in good order.

Weather has been rather bad most of this month here and has been extra cold up until the 20th then much warmer with considerable wind.

Around or near.

The Monument on the east side some local people in conjunction with some parties from Pueblo Colo are taking some cinders for making blocks for building, About one or two Cars per daye are moving out, being loaded at Folsom and shipped from there to various, Their workings are on State land just east of the Monument and is quite a nice little enterprise.

Some damage has been done this winter by the porcupines but the writer has been unable to locate any of them this month.

Very Respectfully,

Homer J. Farr
Custodian.

SUMMARY OF CASA GRANDE NATIONAL MONUMENT MONTHLY
NARRATIVE REPORT.

March - 1947

General: Lack of water in watersheds becoming dangerous.

Weather: Summer just around the corner as 93 degree temp. Registered.

Visitors: 38.6% increase over March 1946.

Interpretive Services: 2985 people in 227 Parties make Ruins trip.

Trips Taken: Six trips made from area to pickup surplus materials.

Nature Notes: Desert just starting to burst into bloom.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
CASA GRANDE NATIONAL MONUMENT
COOLIDGE, ARIZONA

March 25, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows the narrative report for Casa Grande National Monument for March, 1947.

General: Spring finds the farmers and ranchers in the valley with a very pessimistic outlook. In 1946 most of the farmers had to take in their belts and get along with a minimum of water and they thought that was the worst it could get. This year finds them starting their planting season with even less water behind Coolidge Dam and prospects for enough water to finish out the season are none too good.

Weather: .48 inches of rain were recorded during the first part of the report period and one severe dust storm was experienced. Outside of that the balance of the month was clear and warm. A touch of summer was felt on the 21, when a maximum of 93 degrees was recorded. No temperature below freezing was registered. A minimum of 34 degrees was registered twice on the 1 and 14.

Inventory of Publications:	Free.

	Received, Jan. Feb, Mar.	- 796
	Sold during " " "	- 296
	On Hand March 24, 1947	- 730

Visitors: March 1947 - 4193; March 1946 - 3025; March 1941 - 2739. Travel year to date, 1947 - 22,082: 1946 - 15,386: 1941 - 11,221. The increase over March 1946, which was the highest number of visitors recorded for that period before, is 38.6%. This is a decrease from Feb. 1947 but is seasonal and is to be expected, with the visitor who is spending the winter here, allready gone or leaving the area. The type

Visitors: Continued : of visitor now is the transient who is just going through and wishes to just take a swift look as they have to make El Paso or Yuma, in time to get a place to stay at Night. Also the type that is here to see the cacti in bloom has made it's appearance.

Interpretive Services: Of the 4193 visitors to the area 2985 made the Ruins trip in 227 parties averaging 47.8 Minutes per trip. 2569 made the museum trip in 202 parties staying an average of 25.1 minutes. 1208 came into the area for a quick look, to picnic, or to bring other people but did not go over to see the Ruins. 89 members of the armed forces in uniform are included in the above totals. Ticket sales to date this year have been 15,246, bringing in revenue amounting to $4573.80.

Maintenance: A new weather station was obtained, put together, and setup with the old one being removed. Woodwork and doors in quarters #1 were touched up with paint and new canvass placed on shutters and screen replaced in Quarters # 6. What maintenance there was, was done on the Custodian's and Rangers own time. Archeologist Schumacher has revised the museum library and has it up to date.

Trips Taken: February 25 to March 5, Mechanic Stonehocker was absent on a trip to Marathon, Texas, and Big Bend National Park to pick up War Assets Surplus materials. Five trips were made to Luke Field and the Goodyear plant Near Phoenix, by Ollie Barney of Saguaro to pick up Materials. He was accompanied on two of these trips by Mechanic Stonehocker.

NPS Visitors & Visitors of Note: Feb. 26, R. Baram of the Los Angeles Weather Bureau Office, was in to check over our weather observation station. Feb. 28, Ranger Ball of Tonto National Monument, and a party of friends was in to visit the area. Feb. 28, Custodian Jones of Hupatki was in to get his pickup. Feb. 28 & March 5, Rangers Aubuchon and Fulton were in on their way to and from Big Bend National Park to pickup surplus materials. March 5, Regional Naturalist Dodge and Custodian Supernaugh were in on Monument business. March 17, Custodian Supernaugh was in on business in connection with surplus products. March 18 and 24, Ranger Steele of White Sands brought in War Surplus materials. March 19, Ranger Rickenbech of Organ Pipe Cactus National Monument was in to pickup the Auto Tractor to go to Grand Canyon, and Zion National Parks to get War Surplus materials.

Leaves Taken: From March 12 Through March 19, Mechanic Stonehocker took sick leave to get over an attack of flue.

Nature Notes: Bat activity in the Ruin was noted on March 5 with the first flight observed on March 17. The no. of bats in the flight was small. Feb. 28, along the East boundary of the Monument in Mesquite trees 3 mourning dove nests with 2 eggs in each were observed.

Nature Notes Continued : In NW corner of Monument along the washes many coyote tracks were seen and in the thickets there were many chicken feathers indicating that coyotes had been doing their feeding there. They are heard howling almost every night but to date none have actually been seen, on the monument. Feb. 26, there was a large barn owl in the Ruins shelter and he has been seen up there several times since.

Feb. 28, Apricot Mallow, Primrose, Bladderpod, and Creosote bushes all were in bloom.

March 17, Ocotillo on South end of administration building bloomed.

March 5, First horny toad of season picked up on Monument.

March 23, Hedgehog cactus, and Staghorn Choya buds almost ready to break into bloom.

March 23, Prickly Pear Cactus buds are just starting to form.

A. T. Bicknell,
Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Chaco Canyon NATIONAL MONUMENT

Bloomfield, New Mexico

March 26, 1947

MEMORANDUM for the Regional Director, Region Three,
National Park Service.

There follows the report of activities in Chaco Canyon National Monument for the month of March, 1947.

There were a total of 71 visitors to the Canyon this past month. The number of persons visiting the canyon this month more than quadruples the number of visitors in January and nearly trebles the number for February. It is hoped that this rate in increase will continue. They came in 19 automobiles from the states of Colorado - 5 cars, 19 visitors; Connecticut - 1 car, one visitor; Minnesota - 1 car, one visitor; New Mexico - 7 cars, 33 visitors; New York - 1 car, 2 visitors; Oklahoma - 2 cars, 8 visitors; Tennessee - 1 car, 2 visitors; and Wisconsin - 1 car, 5 visitors. 62 persons took the trip through the ruins, and formed a total of 14 parties. 71 persons visited the museum and formed a total of 14 parties. 58 tickets were sold, but no complimentary tickets issued. A total of 20 hours and 5 minutes were spent with the visitors.....Custodian - 6 hours, Ranger 14 hours and 5 minutes. At the end of the month, there were approximately 10,100 free two-fold leaflets on hand, and no sales publications printed at the Government Printing Office.

Two written requests were answered.

The coldest during the month was 16 degrees on the 13th and 25 th of the month, while the warmest was 71 degrees Fahrenheit on March 21. There was a trace only of rain on the 27th of February, the 1st, 2nd and 24th of March, and .07 of an inch on the 28th Of February, and .20 of an inch on the 9th of March, forming a total of .27 of an inch of moisture. The wind blew with enough violence to blow the top off the wire storage room on Sunday, 23rd of March.

In last month's report, it was mentioned that the master of the ship, "Chaco Canyon", had been contacted. In the mail today, much information has been received concerning the ship. One part of the information is an itinerary of every trip the ship has made, except one which has been lost; another part is extra copies of the master's voyage reports and extra copies of the vessel's port logs. The master has promised us a picture of the ship to hang in the museum.

The Custodian took annual leave from March 5 through March 9, and married Miss Sylvia Sanford of Shawnee, Oklahoma. A trip was made to Aztec on March 15, to pick up surplus property, and two trips in one was made to Gallup, New Mexico and Albuquerque to pick up surplus property and lumber. A trip was made to Grand Canyon

National Park to pick up surplus property. Next month, there will be more trips:- one to Grand Canyon, one to Aztec, one to Albuquerque and four or five trips to Gallup, to pick up surplus property, material bought by contract, etc.

The men on the fence job are again working hard and fast, after a shut-down period during the cold weather. They are very proud of their work. Today, the Custodian was out near the fence, and the Navajos insisted that he go over and take a look at a new section just finished. Roy Newton, the foreman, went along and proudly asked the Custodian to sight down the fence. It was just like sighting down a gun barrel! The foreman said, "We put it up straight, not crooked like white boys". (He had reference to the men who put in the original fence -- not NPS men). The Navajos have three fifths of the west side of section 26 taken down and some concrete blasted from the brace posts. Two thirds of the east side of section 26 has been taken down and concrete blasted from one half of the strain posts. Two fifths of the south side of section 25 has been fenced completely and one fifth of the same section line has the posts placed.

The stream control crew is out planting willows now, and are working well. Each day, lately, we have been taking them several miles up the canyon, heeling in plants enroute. Then, they work back towards headquarters all day.

Considerable trouble has been experienced with the water pump and engine. They were ordered, delivered and installed during the war when there were few permanent residents in the canyon and few visitors. Now, with the permanent residents increased 400 per cent, 15 Navajos working 5 days a week and a large increase in visitors, the small pump and engine are fast wearing out. It is getting so that it is necessary to overhaul the engine and/or pump nearly every time water is pumped. However, a new one has been ordered.

The Trader reports that Navajo rugs are still coming in at a better than average rate, and of course, his sale of merchandise is up.

As the tourist season is nearing, he has finished painting all the cabins, part of the front of the store building and the gas pump. Just this week, a large stock of jewelry has been brought in, and is now on display. He has arranged with the local Navajos for them to make small items of interest to the tourist such as ash trays and cradle boards, and has had a few of each already delivered. The sale of the last mentioned items, so far, is good. Other souvenirs have been ordered and delivery expected soon.

There follows the monthly report of Archaeologist Richard Gordon Vivian.

* * *

GENERAL

The entire month has been spent on major wall repairs at Chetro Ketl. Most of the work has been concentrated on the repair of large breaks at floor level in the north three tiers of rooms. This is an area of two and three storey rooms where a patch in time save ten to twenty feet of wall above it.

Capping and smaller repairs are being made at the major breaks are completed.

Correction and tracing of the Chetro Ketl ground plan is now complete. Prints of the first two sheets have been received and are much appreciated, being used for reference and the keeping of completion records.

Al Lancaster has been absent on annual and sick leave for 11 days.

MAJOR REPAIRS

47- North, south and west walls at base of two storeys, one doorway filled, beam levels repaired and the south wall strengthened and capped to hold back adjacent fill.

52- Unsupported base of one storey wall rebuilt, repair of one lower doorway and beam level.

55- Filling in of large hole at base of two and a half storey wall, repair of beam levels at one storey and strengthening and capping of south wall at fill line.

48- Repair of two large breaks at base of one and a half storeys.

43A- Patching of large hole in north wall, small break in west wall, both down one and a half storeys.

42- Filling in of large break completely through the wall at base of two storeys.

Kiva J, Exterior- Repair of broken doorway and slumped area, base of one storey.

MINOR REPAIRS

86-87- Capping and patching.

80- West and south walls patched and capped. Patching of north wall in progress.

84- South, patching and capping in progress.

103- East and south walls capped.

88- Catching in progress.

Work which was in progress last report and now finished: rooms 94, 101, 103, 104.

MISCELLANEOUS

Timbers in one rooms where they will not be seen by visitors have been treated with the wood preservative recently received. The color is an objectionable green. Further tests will be made using other dilutents for the preservative.

Several roofing mats were encountered in room 65. They are of a small, quick growing woody plant, possibly willow. The rods average ¾ inch in diameter and 40 inches in length. They are held together by splitting and sewing through with cord. Some of this cord shows on the surface.

Some of the mats are made entirely of peeled rods and others of alternate bands, 9 to 12 rods wide, of peeled and unpeeled sections. Portions of eight mats have been recovered. They are being cleaned and fastened to a temporary backing as time allows. Mac will need a new museum if he shows all of these.

FOR NEXT MONTH

Wall around the extremely deep excavation underneath Kiva G will be taken care of next. A slight amount of settling is taking place here. The east wall of room 35 has cracked badly and a small area fallen within the past month. A large blister is forming in room 29 and Kiva G itself shows cracking around the north wall.

Projects for the ensuing months:- paint office and out buildings when the paint arrives; paint signs; finish hauling material into headquarters; install light plant; get roads ready for summer travel; continue stream control and fence projects and keep office and routine duties current.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

CHIRICAHUA NATIONAL MONUMENT

Dos Cabezos, Arizona

March 26, 1947

MEMORANDUM for the Regional Director,
Region Three.

Following is a report of activities at Chiricahua National Monument for March.

Weather Conditions. March has continued dry in the Chiricahuas and Sulphur Springs Valley area, with .35 inches rain at the Monument weather station, and slightly more in the valley. A few patches of snow are still visible on the higher mountains south of the Monument. Night temperatures average about 40 degrees, days run up to 75 degrees. Considerable strong winds prevailed during the month. An early fire season is indicated so far.

Special Activities. Considerable letter writing in connection with surplus property acquisitions, and in preparation for the Fire School here in April, has occupied both the Custodian and Ranger. Operator Marble and Ranger Sharp made a trip to Fort Huachuca to inspect a motor grader there. Operator Marble made a trip to Benson for dynamite for road work. Gravel was hauled for the base of the new power plants when they get here. Regional Naturalist Dodge and Ranger Sharp attended the Chamber of Commerce school at Bisbee. Mr Dodge showed Park Service movie reels. He also ran the reels at the Silver Spur guest ranch. Custodian Cooke returned from annual leave, taken in Northern Arizona, March 11.

Inspections. Ward Webber, Chief, General Engineering Division and J. R. Lassiter, Regional Engineer, were here Saturday, March 23 and discussed various problems and projects with Custodian Cooke.

General Publicity. In addition to the usual new items in the local papers, two staff members of Holiday Magazine, which recently lifted it's face and raised its sights, spent a day of their Arizona survey at Chiricahua. Mr. De Lardi, photographer, made an all-day horseback trip to the Heart of Rocks with Custodian Cooke, and Mrs. Delores Taylor Scott, writer, gathered material for the article.

Approaches to Monument Area. Local roads continue good, but dusty. Many cars now come over the Portal-Onion Saddle route, and the road is open clear to Rustlers Park. Cars started coming over this road in Februarey, which is about two months ahead of the usual time. The very light amount of snow in the mountains made this possible.

Interpretive. Most of the interpretive service is given at Headquarters, with some contacts on patrol Sundays and holidays. Interpretation here is on a hit and run basis, with the visitors eager to head for the campground, or for Hassai Point to see all they can and still get to Los Angeles before night. Considerable time is spent with the relatively few who are really interested.

Travel. Travel this month was slightly less than that of February but was twice the travel of March last year. Local travel will no doubt increase greatly as summer weather approaches and the natives seek the coolness of the mountains.

Visitors. Beside the already mentioned Mr. De Lardi and Mrs. Scott of Holiday and Engineers Nebber and Lassiter, Mr. and Mrs. Weldon Heald, former director of the Sierra Club, were in for a-while, arranging for the later visit of 100 members of the Sierra Club. Rangers Fulton and Howenstine of Saguaro brought some Venetian blinds over, and made a good hike over Chiricahua's trails. Also two gentlemen from Stockholm, Sweden, spent several hours in the Wonderland of Rocks.

General. Much time is used in talking with visitors at Headquarters and the usual struggle to stay ahead of office work takes several days each week. Surplus property correspondence and fire school preparation have helped keep us busy. The radio schedule with Saguaro and Organ Pipe remains on a once-a-week basis as yet. More inquiries are coming in about the use of the campground for large and small groups later on in the season. The water supply still holds out, but we are a bit apprehensive for the situation as summer travel increases.

Free Publications on hand - Page 2

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

El Morro NATIONAL MONUMENT

Ramah, New Mexico

March 26, 19 47

MEMORANDUM for the Regional Director, Region Three.

There follows the report of activities in El Morro National Monument for the month of March.

WEATHER: Seventy one days have now passed without a measurable precipitation and thirty days of dry, high winds have increased this very dry condition. Maximum temperature reached 64 degrees on the 25th and the minimum was 12 degrees above zero on the 7th.

TRAVEL: March travel increased 282 per cent over 1946 and is mostly due to the dry condition of the approach roads. The Monument was visited by 129 people arriving in 41 cars. A total of 117 made the tour of the Inscriptions in 28 trips and the guide time amounted to 29 hours, 25 minutes. Twelve people arrived requesting information on the following subjects; roads, land for sale, where to seine minnows, and the shortest route to Highway #66.

APPROACH ROADS: Dry and rough, but passable. The last information received on March 22, from Mr. Burton Dwyre, State Highway Engineer, concerning the improvement of Highway #53 was that the project had been set up and that work should start in the very near future. Survey work on the nine mile detour, State Highway #32, south from Gallup, has been completed and we hope to see earth-moving equipment on the job soon. A new sign at the turnoff to the Monument on Highway #53 was erected and we hope this will help the confused traveller to distinguish between the town of El Morro and the Monument. An interesting report on the use of volcanic cinder as road material was received from N. M. State Highway Department Bureau of Materials. The report stated that the cinders meet all their highway construction requirements for ballast, leveling course and oil processing after an addition of 15 to 20 % of sandy filler. As cinders are the only surfacing material found in any quanity near this area, the results of the laboratory test are very encouraging.

SPECIAL VISITORS: On March 12th five men representing The United Artists Motion Company visited the Monument on a location trip. The contemplate using the Rock as a background for a picture based on the novel Paso Por Aqui. Their return is expected the end of this month for a more detail study of the area.

RECEIVED

GENERAL: Two trips to Gallup and one to Grants were made to pick up supplies and surplus property. About half of the surplus property from Grand Canyon has been received. During the last trip to Gallup I became a member of The Elks Lodge, surviving the initiation with only a few minor scratches.

GRAN QUIVIRA

GRAN QUIVIRA, NEW MEXICO.

MARCH 26, 1947.

The following is a summary of activities for the month of March, 1947.

Visitors this month totaled	182
Travel this year to date	734

Weather. Occasional snow flurries during the first part of the month. Strong winds accompanied by much dust prevailed throughout the latter part of the month. High temperature was 68 and low 13.

Roads. Both approach roads from Carrizozo and Mountainair are now in fair condition since considerable rock moving and grading has been done by the State Highway Department. A recent allotment of roads and trails funds has been used on the three-quarter mile entrance road to the monument. This was a much needed job because it has been several years since any major work has been done on this road. Work consisted of widening, making new drainage ditches, opening up of drop inlets, clearing out weeds and brush growth, removal of rocks and slide material, straightening and smoothing.

Travel. Visitation still continues to show an increase. 11 per cent over the previous month of February and 227 per cent over the corresponding month of March 1946. Instate visitors numbered 159 and outstate visitors 23. There were a total of 61 cars with instate numbering 50 and outstate 11. 11 people walked out to the monument.

Guide and Contact Service. A total of 182 visitors were conducted through the ruins on 61 guided tours. The average time spent by each party was 59 minutes. Total contact time of 59 hrs, 55 mins.

Free and for-sale Government Publications. No publications are on hand at this area. However, a supply has been ordered for distribution.

MAINTENANCE AND ADMINISTRATION. Continued work on restoration of walls of the new mission and adjacent convento. Repainted kitchen of residence with interior white enamel. Considerable work has been done on the water sump pump unit and air compressor at deep well. Worked on trail leading to ruins. Tied down roof of tool shed to keep wind from blowing it away. Gave monument area a general cleanup and repaired boundary fence in several places.

Edward W. Wright

Custodian.

SUMMARY of the MARCH, 1947,
MONTHLY NARRATIVE REPORT for
ORSAT SAND DUNES NAT. MON.

P-1 SPECIAL: Frozen water line appears to be thawed.

P-1 WEATHER: Blustery March weather-much wind; many snow flurries.

P-1 TRAVEL: 256 visitors, 82 cars.

P-1 INCREASE IN TRAVEL: March, 1946, 98 visitors, 42 cars.

P-1 ROADS: Rough.

P-1 PUBLICATIONS: 119 leaflets.

P-1 WILDLIFE: Deer, bluebirds, pinon jays, magpies and one lone chipmunk.

P-1 SPECIAL ACTIVITIES: Trip to Texas and New Mexico for surplus government equipment.

P-2 ACTIVITIES: Work on water line; customary hauling of wood and water; obtained repaired pickup; two tires for dump truck; barrel of Zone roofing material; and completed stabilization report for Pueblo Bonito.

UNITED STATES

NATIONAL PARK SERVICE
GREAT SAND DUNES NATIONAL MONUMENT
MOSCA, COLORADO

March 26, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in Great Sand Dunes National Monument for March, 1947.

SPECIAL. At 3:30 P.M., on March 25, the water line opened and we now have water in the custodian's residence!

WEATHER. It was a typical March month with a great deal of wind and many snow flurries. Approximately eight days during this report period could be classed as ideal spring days. The uncertain weather kept many visitors away from the sand dunes

TRAVEL. Two hundred fifty-six visitors in eighty-two cars visited the area during this report period. Twenty-five people took advantage of the picnic grounds and of these, three brave souls from Iowa camped over-night. Two written requests were answered.

INCREASE IN TRAVEL. For March 1946, the records show 42 cars and 98 visitors.

ROADS. Both approach and monument roads are in rough and dry condition. It is hoped that some moisture falls enabling the county to begin grading the roads.

PUBLICATIONS. There are on hand, one hundred nineteen mimeographed informational leaflets.

WILDLIFE. Deer are frequently seen around Mosca Spring. First sign of spring was the appearance of a lone chipmunk in the back yard. He is our good luck sign, since he showed up March 25, the day the frozen water line thawed. Many bluebirds are seen around headquarters and the usual flock of magpies and pinon jays hang around for handouts.

SPECIAL ACTIVITIES. From March 2 to 12, the custodian was on a field trip to Texas and New Mexico for surplus government equipment. Custodians Mahan and Guillet and Ranger Keefe were included in party making trip. Many difficulties were encountered and it was finally necessary to take wheels from the pickup going to this area, to enable Custodians Mahan and Guillet to return to their areas with spare wheel and tire. The Sand Dune pickup is now in Albuquerque, New Mexico waiting for the ordered wheels and tires.

ACTIVITIES. Upon return from trip and weather depending, the majority of time has been spent again on the water line. Sections were dug up exposing pipe and then the Aeroil Burner was applied. Snow was removed from the 1500 foot trench by same method. On several occassions, sufficient ice was melted and it was possible to save what water entered the pipes in the residence.

However, on March 25, at 3:30 P.M., the water line coughed up mud and sand and for several minutes it was touch and go. Enough water came to fully wash away the dirty deposit and we hope its safe to say the Singing Sands are in tune again and will continue their sweet song.

An enormous amount of work remains to put the water line in good functioning condition again. This means checking the entire line for leaks and then covering the 1500 foot trench. This should take the entire summer and put the line in excellent shape for the following winter.

It is also hoped that something can be done with the present pipes to ensure a proper pressure for house and the rest-rooms for visitors. From exposing the pipes entering the residence, it appears that some children laid the line and were having one heck of a good time in playing around with angles, plugs, nipples and assorted sizes of pipe which ruin the pressure.

The repaired pickup was obtained from the Hoide Garage prior to taking the trip and thus enabling the HCWP to haul water during my absence.

Fuel oil and gasoline were also hauled prior to trip.

A trip was made to Hooper to pick up two tires, badly needed for the dump truck.

The wheels and tires were removed from the dump truck and remounted. All tires were changed around so as to give the best results. The wheels and tires were also changed on the pickup.

A barrel of Zone roofing material was picked up in Mosca.

The photographs were received from Region Three office, enabling me to complete the stabilization report for Pueblo Bonito for last June, 1946. These reports were mailed to the proper offices.

Little seems to have been completed or accomplished this month, but evidently efforts were not wasted on the water line. If luck continues with this line, many things can be accomplished next month that have been put off for a long time.

Ted C. Sowers,
Custodian.

NATIONAL PARK SERVICE

Montezuma Castle NATIONAL MONUMENT

Camp Verde, Arizona

March 24, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows the monthly report of activities at Montezuma Castle National Monument for the month of March, 1947.

Visitors this month - 1194; travel year to date, 6437.
Visitors March, 1941 - 600; travel year, 1941 - 2502.

Weather This month has been satisfactory for travel. The maximum temperature was 80° with most days registering in the 70's. The minimum was 22° and the total precipitation .22 of an inch. According to reports released by the Weather Bureau, Arizona has received only about one-fourth its normal moisture for the year.

General Travel figures continue to climb with 275 more visitors than the 921 counted in March last year. Our travel year to date is 1900 visitors or 41.9 per cent ahead of last year and 157 per cent ahead of March, 1941.

Administration Copies have been made of correspondence pertaining to Montezuma Well and files established for that area. Nature observation files and a Fact File are also being established for that area.

Archaeologist Schroeder has spent considerable time between visitor contacts in combing through all copies of the Monthly Report on file for information that might be of interest. Our bound volumes of reports begin with May, 1932 and many interesting items on the history, administration, and personnel changes at this monument have been brought to light. This information has all been recorded in our Fact File.

A collection of sherds from Montezuma Well was sent to The Museum of Northern Arizona for identification and comment.

Inquiries were posted in the local and neighboring post offices to learn who might be interested in our temporary ranger position for the coming summer. A deadline date was set at March 22 and only one application was received.

Four special trips were made to Camp Verde to find Indian laborers who had been working when our new wage scales became effective. They had to be signed off the old rate of 60¢ per hour and signed on the new rate of $1.00 per hour.

Several items secured from Surplus Property were delivered by truck on March 20.

Publications sales in the museum have climbed sharply since our "Serve Yourself" plan was initiated. It was learned that visitors often overlooked our small price tags so more conspicuous tags were made. However we are still losing about 10 per cent on the literature removed. Only non-Federal publications are offered on this plan.

Montezuma Well Patrol trips were made to Montezuma Well on February 26 and March 2, 5, 8, 10, 16, 19, and 23. Stray stock was driven from the area on nearly every trip. The yard and lawn was irrigated and efforts are being continued to clear the area of trash. Negotiations to purchase the property are still not complete.

Maintenance and Construction The project to gravel trails around the residences was terminated February 25 when we ran out of funds. About 50 feet more surfacing is needed to bring the trail to the parking area.

A new tool rack was completed in the garage.

Mud mortar was used to camouflage the masonry buttress constructed by Archaeologist Steen to support the cliff under the Castle.

One-half day was spent repairing our water pump.

The bathroom at Residence No. 1 was redecorated.

National Park Service Visitors Custodian and Mrs. Clair V. Cook were here on February 24 from Chiricahua.

Custodian and Mrs. James Cole of Joshua Tree National Monument were here on February 25.

Ranger Paul Steel of White Sands was here to deliver a load of surplus property.

Newsworthy Visitors The Hiking Club from Arizona State Teacher's College at Flagstaff was here March 8.

Mr. L. N. Gooding, well-known southwestern botanist, was here March 9.

Use of Monument Facilities by The Public We had 1194 visitors who came in 373 cars and trucks. Tickets sold, 415; tax but no ticket, 18, children who climbed free, 44; armed force visitors who climbed, 1. There have been several times this month when we could not accommodate all visitors who wanted to climb into the Castle.

Contact Time Total contact hours, 155.50. Hastings, 50.50; Leding, 48.25; Schroeder, 56.75. Trips through the Castle, 118 for 478 visitors; museum groups, 205 for 754 visitors. Information service outside the ruins or museum was rendered to 141 visitors. There were 17 picnic parties including 85 people known to have used the area and signs of several parties not

contacted. Two camping parties including four people stayed over night.

Accessions Archaeologist Schroeder has donated our library a copy of his thesis. "A Stratigraphic Survey of Pre-Spanish Trash Mounds Of The Salt River Valley, Arizona". He also included a reprint of the article "Prehistoric Canals In The Salt River Valley, Arizona" reprinted from American Antiquity.

Protection of Exhibits A new supply of para-dichlorobenzene crystals was placed in our herbarium cases and study collection storage cases.

Lost and Found We have a detachable part of our general information sign at the visitor register which reads, "No Guided Trips At Noon". This disappeared some time ago and was returned via parcel post from Cottonwood with a note which read, "Dere Ranger: i done rong. i swiped your sine under the influence of liker. Now i feel real bad. Youren frend."

NATIONAL PARK SERVICE

Navajo National Monument
Tonalea, Arizona
March 26, 1947

Memorandum for the Director, Region Three.
There follows a report of activities in this area for the month of March.

Weather Generally fair with no traces of snow at this time. High winds have been on the increase for the past five days.

Roads Three man-days were spent shovelling and dragging the entrance road. We are happy to report the road as rut-free and better than average.

Visitors Only three parties of visitors reached this area and all were bound for Betatakin only, also , all were contacted.

Maintenance and Construction The pressure relief valve was installed in the hot water line above the new heater unit.
The service porch floor was given a coat of varnish.
The Betatakin foot trail directional sign was repaired.
Bathroom walls were washed of the winters accumulation of soot.
We got some licks in on the Master Plan and the PCP.
Additional work was accomplished in reorganizing the filing system.

Patrol Routine inspection was made at Inscription House on the 24th.
Every thing there was found in good order.

Inventory of Government Publications Two-fold leaflets, Navajo National Monument 1275, Sunset Crater National Monument 179, Walnut Canyon National Monument 47, other, National Park Location Map #6 28, The National Park System 28, (June 30, 1946).

Projects for the Coming Month A thoro-going spring cleaning inside and out is expected to require most of our time this month. Keeping the road open across the wind-blown sand dunes is a routine April chore. Upon arrival of the pump parts now on order we will overhaul the sorry pump.

About Spuds The fame of our wild potatoes has reached the sovereign state of California. Dr. H. L. Mason, Professor of Botany, Director of the Herbarium, University of California requested a pressed specimen. Having an extra specimen on hand we were happy to forward it (Solanum Jamesii Torrey) to Dr. Mason. Can you imagine giving potatoes away in these times of inflation? Our careful consideration will weigh any further requests for our spuds to separate the scientific from the epicurean. Let it be known that these acorn-size potatoes are definitely not inflated.

~~ORGAN PIPE CACTUS~~ NATIONAL MONUMENT

~~AJO, ARIZONA~~

March 25, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities in Organ Pipe Cactus National Monument for the Month of March 1947.

WEATHER.
This month has been warm the whole period with a high of 92 on several days during the month. A low of 32 was reached on the 7th though for such a short time that no ice was noticed. Only one small shower amounting to .05 fell on the 17th.

TRAVEL.
Travel continued to be heavy with a great many out of state visitors coming to see the flower displays which this year is dissapointing. Due to the very dry winter flowers have not come out only in a few moist places. This has been one of our heaviest camping months with our make shift camp-ground running over most of the time. Before another travel year come better camping ficilities will have to be arranged.

370 persons were given interpretative service at the headquarters and as they arrive one car at a time it keeps one man confined to this work so that is it hard to keep up with petrol and outside work. Each contact requires from one half to one and one half hours.

GENERAL.
One trip was made to Grand Canyon by the Custodian to get the S&MC pick-up to be used on the fence job here. The two light plants were obtained at the same time, which were transfered from surplus.

We were able to find time to get one plant installed and put into operation last night and while not as handy as the old plant a great improvement was noted in power and light.

Ranger Ringenbach is now making pickup and delivery of surplus materials from the northern areas.

Regional Naturalist Dodge spent two days one the monume t checking future interpative needs and securing many needed photographs.

Little has been heard of the foot and mouth disease in Mexico this month, though in checking we find it still spreading and the needs still great for the border fence.

A small crew was hired and much of the plesdiralr work of the SAHC fencing job has been accomplished so that with the coming month we hope to get the actual construction going good.

PUBLICATIONS

Informational four-fold pamphlets on hand, English version 21,050

NATIONAL PARK SERVICE

~~SAGUARO~~ NATIONAL MONUMENT

~~Tucson, Arizona.~~

March 26, 1947.

MEMORANDUM for the Regional Director,
Region Three.

There follows the monthly narrative report of activities at Saguaro National Monument for the month of March, 1947.

WEATHER. Most of the month continued warm, even hot, with very little of the wind we usually expect in March. The drought of the past three months was temporarily broken on March 17, when .50 inch of rain marked the first precipitation since December 26. Since that date, we have had two light showers with only a trace recorded. The Forest Service, thoughout Arizona, is anticipating an early and severe fire season, and radio warnings are already being broadcast to forest travelers to use midsummer caution with fires. The Rincon Mountains, within the monument, are very dry, and Rincon Creek, two miles south of Madrona Canyon Ranger Station is already dry - over a month ahead of normal.

SPECIAL ACTIVITIES. March 1 to 6 the custodian, Ollie Barney, and Richard Barney made a trip to Marathon, Texas, and Big Bend, to assist in returning five transferred ex-Army vehicles and other equipment to several Arizona monuments. Ollie Barney also spent March 10 and 11, and the week of March 17, on five trips between Coolidge and Phoenix, transferring War Surplus property to Casa Grande National Monument.

INSPECTIONS. Regional Naturalist Dodge was in on March 2, and discussed various monument problems with Ranger Fulton.

MAINTENANCE. Due to travel in connection with transfer of surplus property, no work on the trails was attempted during the month. The Loop road in the cactus section was dragged once, and continues to remain in good condition after the grading of last month. An inside toilet, lavatory, and shower-bath were installed in the Headquarters building, and a new jet type pressure pump and 50-gallon storage tank obtained from surplus were installed in place of the old reciprocating pump system. Sewer lines to the cess-pool were laid, and the cess-pool completed except for pouring the top. This last project was delayed by two breakdowns of the cement mixer borrowed from Organ Pipe. Only four man-days of work was expended on the arboretum to be temporarily planted in the front of the Headquarters building, and approximately six more truck loads of dirt will finish this grading; the cacti will be transplanted after the blooming season.

APPROACHES TO MONUMENT AREA. The past week the Pima County Highway crew graded the Broadway approach road, but the soil was so dry that two days travel again resulted in the wash-board surface which has prevailed all winter. The road to Colossal Cave was also maintained, but the stretch from the Cave to Vail and Highway 80 remains very rough.

ACCESSIONS. New equipment received during the month included a 1½ ton, stake-body, Ford 6-cylinder truck, 1943 model; a steel desk, stracing cabinet, a 3/4-ton two-wheel trailer, a two-drawer steel filing cabinet, 12 "Blitz" cans, 12 steel folding chairs, 8 wooden bunk beds, springs, and mattresses, 1 set of steel furniture for a first-aid room, and numerous smaller items. One twenty-man fire tool box, complete with tools, was transferred from Casa Grande warehouse.

TRAVEL AND INTERPRETIVE SERVICES. Travel decreased almost six hundred persons from the February high. A total of 2279 visitors, arriving in 737 cars, one motorcycle, one bicycle, and 18 horseback riders, made up the travel, and registered from 37 states, D.C., Canada, Switzerland, Sweden, Hawaii, and England.

Inspite of the decreased travel, the number of visitors contacted at monument Headquarters increased, with informational service being rendered 905 persons, in 270 parties. Forty-nine and one-half hours was spent on contact work, mostly by Seasonal Ranger Howenstine.

POLICE PROTECTION. While on routine boundary patrols during the javelina season, Ranger Fulton encountered two instances of violation of the mining regulations. One prospector, who had been camped near the base of Rincon Peak, was removed from the monument area. The other party had opened a shaft in the Tanque Verde Mountains, near the south boundary; they were advised that they were operating in viotation of regulations, and would be required to fill in the shaft, clean up the surface workings, and vacate the property. This has been done.

WILDLIFE PROTECTION. Week-end patrols have been maintained through the month, which is open season for javelina. No instances of violation have been encountered, but several parties hunting near the south and west boundaries of the monument have been warned.

PUBLICATIONS ON HAND. In accordance with instructions of F0497, the following tabulation of informational literature on hand March 25 is submitted:

Free Publications ——— N.P.S.
- Saguaro tw-fold informational leaflets ——— 4500
- Saguaro two-fold leaflets (Spanish) ——— 1150
- Location Map No. 6, Southwestern States ——— 600
- Southwestern National Monument leaflets ——— 1450

Sales Publications — Supt. of Documents.
- None.

Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Sunset Crater NATIONAL MONUMENT

Flagstaff, Arizona

29 March 19 47

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Sunset Crater National Monument for the month of March, 1947:

Visitors this month: 402 Travel Year to date: 3377

Travel: Visitation has shown a decided increase over last month. This no doubt is due to the fact that the entrance road has been open during the entire month and is in general good condition.

Roads: The entrance road from Highway 89 is in good condition. The Saginaw Manistee Lumber Company has been hauling logs to their mill in Flagstaff over the entrance road. Constant maintenance has kept it in general good condition. On the other hand the presence of large logging trucks on a narrow road results in a certain amount of hazard to passenger cars. Visitors have been warned against attempting the road to Wupatki because of the very narrow road through the deep cinder. Signs have been erected and notices have been placed in the local newspaper. At such time as logging operation are discontinued it is hoped that this road may be used by the visitor again.

General: Six inspection trips were made during the month. On the 12th Regional Naturalist Dodge, accompanied by Ranger Upton, made a photographic trip to Sunset Crater. Points of interest included the 'Squeeze-ups' and the crater rim. The day was a success in spite of the high wind that threatened to blow them from the summit.

Publications on hand: Sunset Crater 2-fold Informational Leaflets on hand - - - 1000 copies.

Tonto NATIONAL MONUMENT

Roosevelt, Arizona

March 25, 1947.

Memorandum for the Regional Director,
Region Three.

There follows the report of activities in Tonto National Monument, for March, 1947.

Visitor Statistics: 2496 people came to this Monument in 657 cars. 633.1 hours of service were given by Custodian Cipe and Ranger Bull. States represented, 41, also Canada and South Africa.
The visitor count dropped rapidly this month due to, we have been told, many people returning home earlier than usual. Rumors that this and that was going to happen made it seem wise that they be at home if or when it happened.

Park Service Officials: Regional Engineer James R. Bassitor called for a few minutes, March 23 and that same day, Naturalist Dale S. King and several members of his family picnicked here and visited for a short time.
Also on the 23rd. Mr. P.E. Evans of the Bureau of Federal Supply, San Francisco, looked us over briefly and spoke very highly of our area.
Stan Davis of the Lollesgard Specialty Company, Tucson, was in to take a few more pictures, March 14.

Weather: Had a fine rain the night of February 27 and snow flurries during the d day. There were also light showers, March 6 and 17.
The whole month has been cold and considerable wind. A heavy frost the night of March 1. A quick change took place March 23 and summer seems to be here.

General: A little more than usual has been accomplished this month.
The temporary office and storage room completed March 21 and is now in use.
The site for Ranger Bull's trailer house was leveled off by hand and the trailer can now be moved there when it arrives. The work is not entirely finished as the exact width cannot be determined until the trailer is on the spot. The remaining work can be done as time permits.
A number of trips were made to Globe. Material had to be hauled for the tent house for laborer Bean and some old lumber taken in to be sawed for rafters. The tent house was put up, made livable and the Beans moved in. They are very comfortable and well pleased with the accomodations.
Went to Coolidge and drove back the army truck assigned to this Monument. The Ford broke down and had to be left there. I have since taken the truck to Globe for a grease job and new bolts for the battery cable.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Tonto NATIONAL MONUMENT

Roosevelt, Arizona

March 25 1947

Glass was obtained for protection of the textiles and has been installed in three of the drawers.

Flora: Many flowers are in bloom but unless more rain comes soon the season wi will be short. Some of the shallow rooted plants are withering.
Have seen a few Hedgehog Cactus in bloom and buds on most of the others.
The Lupines and Brittlebush make a blue and yellow combination very lovely to look at.

Wild life: The air is full of bird songs and some are already nest building.
The Quail have begun to dust atop the wall by the front door, a sure sign of spring.
A Gila Monster was seen on the parking area and rattlesnakes are reported every day.
Javalinas travel around the house at night and a Ringtailed Cat walks all over Ranger Bull's shiny new car almost every night.
The prize sight was a full grown Mountain Lion walking boldly up a small canyon north of the museum, with the trail full of people going up and down. I was standing in the museum door and could see him plainly but he was too low down for the people on the trail to get a look at him. A lion hunter came up the next day and told us he probably was run out across the lake as they were hunting them over there with hounds.

Projects for the ensuing month: The road and trails will probably take up most of the time for April.

Free Government Publications on hand.

SUMMARY OF

The March, 1947 Monthly Narrative Report for

Tumacacori National Monument

Maintenance in patio garden resulted in development of attractive cactus hill. Considerable planting done in garden. - Page 1.

March travel increased 15 percent over the previous high for that month. - Page 1.

A. T. Mercier, President of the Southern Pacific Railroad, was a visitor. - Page 1.

General drouth conditions and lowering of water table cause concern among cattlemen and others. - Page 2.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
TUMACACORI NATIONAL MONUMENT
Nogales [redacted] ARIZONA

March 26, 1947.

MEMORANDUM for the Regional Director,
Region Three.

Follows the monthly narrative report for Tumacacori National Monument for the month of March, 1947:

WEATHER CONDITIONS: Precipitation was slightly below the average for the past eight years, with .36 of an inch. Maximum temperature was 80, minimum was 27.

MAINTENANCE: The lobby of the museum was given a floor treatment of two coats of Horn Ducorex, to settle dust and preserve bricks. The soil in the west end of the patio garden was turned, and sand and bat manure added. Calendulas, verbenas, and poppies have been planted, some from seedlings, and the verbenas are now blooming.

A giant Maguey was dug up from an abandoned farm (with permission) and hauled in a borrowed trailer and planted in the space between the parking area and the museum building. This plant probably weighed 800 pounds, and it required all the musculature of our laborer and two good friends of the monument who donated their aid, to get the thing moved and in place. It is a strikingly attractive addition to the monument.

One section of the patio garden has always been a cactus garden. It was flat ground, and not attractive, and the plants didn't do too well in it. We now have built a hill in its stead, using a covering of rich hillside soil and rocks. The cactus plants and a nice ocotillo are now planted in this well aerated soil, and the cactus garden is now as pretty as it should be, and, we think, very natural in appearance.

INTERPRETIVE SERVICES: 1382 visitors went on 201 guided trips through the mission church and grounds, receiving an average of 36.79 minutes per trip. 2469 visitors received combined Information and Interpretation Service in the museum lobby, patio garden, and view room. 2427 persons visited the museum.

INCREASE OR DECREASE IN TRAVEL: Our total of 2,571 visitors was by far the highest March travel on record, seconded by March 1937, with 2188 visitors.

VISITORS: March 2 - A. T. Mercier, President, Southern Pacific R.R.
March 3 - Regional Naturalist Dodge, for a few minutes, but the custodian did not get to see him (Mr. Dodge was leaving some publicity material for us).
March 22 - Ranger and Mrs. Charles C. Sharpe and Grader Operator and Mrs. Jess Marble, of Chiricahua.
February 26 - The Sopori School, with a group of 25.

GENERAL PUBLICITY: On March 6, a photographer for "Holiday" magazine took pictures to submit for the 40-page article on Arizona, planned for their October issue.

During the month, Arizona photographers Chuck Abbott and Jack Breed each made trips to Tumacacori for pictures; Jack Breed was after a recent photograph requested by "National Geographic".

DONATIONS: Mrs. Edith Hipple, of Tucson, gave us some welcome additions to the fish pond in the patio garden, consisting of giant snails and five varieties of water plants.

TREASURE HUNTERS: On two occasions in the last three weeks people have told us they know just where the "pot of gold" is buried in the mission, and requested permission to dig it up. Permission was not granted, inasmuch as they lacked proper credentials. Anticipating possibility that some over-zealous treasure hunter might invade the grounds for surreptitious nocturnal removal of the "treasure," an occasional night prowl has been instituted through the church and grounds.

GENERAL: Southern Arizona cities are becoming very cognizant of value of best possible relations with Sonora, and various civic groups have gone into Sonora cities on good will visits recently. Nogales Sonora will have a tourist boom when the paved highway is finished through to Guaymas. Nogales Arizona is becoming more industrialized with the recent completion of a large tomato packaging and processing plant.

Continued drouth is causing concern among cattleman and ranchers. Cattlemen are finding many water holes drying up. The water table continues to drop rapidly in this county. In 1945 Santa Cruz County pumped water out of the ground at one and a half times the rate it comes in. National publicity has turned a spotlight on Arizona's serious need for more water and better water conservation practices.

Clarkdale, Arizona

March 26 19 47

MEMORANDUM for the Regional Director
Region Three

Following is the monthly narrative report for Tuzigoot National Monument for March, 1947.

Summary

Visitor total for March, 1947 breaks all records for previous years - Page 1

Plans to increase motor travel through the Verde Valley indicate unprecedented demands on Monument personnel this summer. - Page 1

The most keenly appreciative visitor to Tuzigoot--and the most observing--was an elderly lady who was blind. - Page 1

Tuzigoot Museum and ruins were inspected by Ward P. Webber, Chief, General Engineering Division, Chicago in company with James R. Lassiter, Regional Engineer, Region Three. - Page 2

Over half the immediate stabilization requirements of the ruins have been met. - Page 2

Supplier failure leaves 700 feet of pipe still to be delivered before water supply to Monument can be assured. - Page 2

Removal of 36 tons of rubble from Unit IV of ruins completed -Page 2

New interpretive exhibit of Tuzigoot excavation photos completed - Page 2

MARCH, 1947 MONTHLY NARRATIVE REPORT FOR TUZIGOOT NATIONAL MONUMENT

Visitor Total: 1055 visitors broke the record for March travel at Tuzigoot. Past highs of 654 for 1941 and 289 for 1946 were completely outclassed. All visitors arriving at the Monument within duty hours were contacted, and many more were oriented or conducted at noon and after closing time.

Guide and Contact Service: Maximum service was given to the visiting public—an average of 19.5 minutes each for 226 ruins parties and 20.1 minutes each for 275 museum groups—with paper work, filing, fact file and nature observation notes, cleaning, grounds maintenance, pipe line repair, rubble removal at Unit IV all filling in the "spare time" that remained. We find that with two men working steadily, there is remarkably little spare time. If present plans to draw even more visitors into the Verde Valley by a campaign to publicize Alternate U.S. 89 and the projected "Black Canyon" highway from Phoenix follows through, Tuzigoot will soon have greater visitor demands made upon it in the peak season than two men can handle. We are thinking that a summer ranger could be very profitably employed even this coming summer.

Personnel Time: Museum: 91 hours 5 minutes. Ruins: 73 hours 25 minutes. Total time for Custodian, 84 hours 30 minutes; for Ranger Richert: 80 hours.

Special Visitors: There was one visitor Tuzigoot was particularly honored to entertain this past month. She examined the metates and manos, the shapes of the pottery, the delicate features of tiny obsidian points, the polish of ancient turquoise jewelry. Despite her advanced years, she accepted our aid and visited the ruins, observing closely the texture of the adobe, the sizes and shapes of the rocks. Her comments upon our description of the valley, the many other companion pueblos and the pueblo of Tuzigoot were keenly intelligent. When she left, thanking us warmly for showing the Monument to her, we knew Tuzigoot had found one of its most meticulous and appreciative visitors. She was blind.

On March 5 a group of 35 youngsters representing the 3rd, 4th, 5th and 6th grades of Jerome Public Schools visited the Monument with their sponsoring teacher. In a detailed program worked out for the group by Ranger Richert, the story of The Verde Valley and its ancient inhabitants was presented so that each child could take back the story to present to his or her class room. This program was the fulfillment of several conferences with Superintendent Mullen and various teachers at the Jerome schools, and we believe the result was worth the effort, since the visit to Tuzigoot gave the children considerably more than a routine "sightseeing" roundof the museum and ruins. Later in the month, we were pleasantly surprised by an unscheduled visit of 20 Jerome school children who had contrived to get down to Tuzigoot "on their own" (many walked or found rides) on a Sunday afternoon to meet a teacher who had agreed to supply all comers with crayons and paper for drawing museum objects. The kids had such a fine time that we were delighted they came—even though we contacted 112 visitors that afternoon.

On March 16, eight Eagle Scouts and their Scoutmaster of Troop 33, Phoenix

were given a special tour and talk at the Monument. This was as fine a group of men as we ever expect to have visit Tuzigoot.

Visiting Park Service Personnel included James R. Lassiter, Regional Engineer in company with Ward P. Webber, Chief, General Engineering Division, Chicago, Ranger Paul Steel, who brought a load of Army surplus in the White Sands truck for us to cull, and the Paul Beaubiens from Walnut Canyon.

Stabilization operations at the ruins progressed rapidly and efficiently with no time lost because of weather. Felix Macias, laborer on the job, well earned an increase in wage status to $1.00 an hour, since he is now fully trained and expert in the work, and his ingenuity can be relied upon to meet the exacting requirements of the job. Over half the immediate stabilization requirements of the ruins have now been met. A complete before-and-after photographic record of the work on each room wall is being kept.

Maintenance: The Verde Hardware Co. of Cottonwood is still unable to fill the remaining 700 feet due on our order of 2-inch galvanized steel water pipe because of failure of suppliers. Assurrences have been given by two of the firm's suppliers of ultimate delivery. To Ranger Richert goes principal honors for the completion of removal of an estimated 36 tons of rubble debris from the interiors of Rooms 3, 5 and 7 of Unit IV, representing the demolition of the restoration on the original walls. The fruit of this back-breaking work is a clean and trim prospect of the Unit from the visitor approach, with all rubble we have not been able to haul away now concealed in places where the fill represents stabilization for interior walls. Plans are now complete for the construction of bitumuls-gravel paths and path repairs at the ruins next month.

Museum Exhibits: A new exhibit of photographs showing phases of the excavation of Tuzigoot in 1933-34 by The University of Arizona project was constructed and installed to facilitate the graphic interpretation at the museum.

Free Literature Supplies: All supplies completely exhausted at Tuzigoot.

Custodian

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
Walnut Canyon NATIONAL MONUMENT
Flagstaff, Arizona

March 27, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities in Walnut Canyon National Monument for the month of March, 1947:

Weather. Unusually mild and dry. The USFS have had a few fires, and the Lookout which overlooks Walnut Canyon was manned last week.

Inspections. Engineers Ward Webber and J. R. Lassiter spent a day on Walnut's engineering problems. They were principally concerned with the water system and the proposed electric system.

NPS Visitors. Rangers Ringenback and Steel were in with surplus equipment. Evan Byrd and H. Nelson of Mesa Verde, Custodian and Mrs. Cotter of Tuzigoot, Custodian and Mrs. Jones of Wupatki, Custodian Brewer of Navajo, Naturalist Dodge of the Regional Office, Ranger and Mrs. Upton of Wupatki, Ranger and Mrs. Richert of Tuzigoot, Glen Boam of Bandelier, NMM Custodian and Mrs. McNeil of Chaco Canyon, and Custodian and Mrs. Cooke of Chiricahua were contacted either at Walnut or along the nearby roads.

Acquisitions from Surplus. A Dodge truck, a book case, an office desk, an office table, a hospital bed with mattress, pipe stock and dies for pipe over one inch, and a few minor items of equipment were received during month.

Activities. Except for receiving and storing surplus equipment, the month was mostly spent on routine duties. At this season, we only have about ten parties of visitors a day, but their time of arrival is so spaced that we generally have one party at the Observation Point at any given time. One man on duty to contact visitors has little time for any other duty.

About five man-days were spent making temporary repairs to telephone line.

Government Publications On Hand. 1,800 2-fold leaflets, 500 Location Maps #6, 300 NPS Briefs Maps and 14 Glimpses of the Nat'l Parks.

Paul L. Beaubien
Acting Custodian

WHITE SANDS

Alamogordo, New Mexico

March 20, 47.

MEMORANDUM for the Regional Director,
Region Three:

Following is our monthly narrative report for the Month of March:

VISITATION:

		This Month	Travel Yr. To date	Fiscal Yr. to date
Total visitors	1947	5,351	23,966	62,482
	1946	4,614	26,323	

Visitors for the month are again far in excess of previous years, for the same period. With the exception of last year, we have almost doubled any like period in the history of the area. This has worked considerable hardship on the checking ranger in that during the month our ranger staff has been used for several trips on surplus property, leaving us sorely undermanned.

COOPERATIVE GOV'T. AGENCIES:

We have been very fortunate in our relations with the Bureau of Reclamation regarding the possibility of electric power for the unit. It is a pleasure to experience the cooperation offered by their regional office at Amarillo.

MINES, MAPS & SURVEYS:

No inspections were made by me during the past month, although Joe Shepard with the Regional Engineer made an inspection of the Dog Canyon water.

WEATHER CONDITIONS:

The weather for the month has been generally favorable with a slight tendency toward cold snaps. The road was impassible on a couple of occasions, but the moisture was of considerable worth from other angles.

PUBLICITY:

General publicity has run almost wild with the added publicity always given to Play Day. The New York Times gave us a story on Sunday, March 9 which was reprinted in the El Paso Times which, in itself, gave us considerable publicity.

A movie set is scheduled for next month and some of the advance agents were in on preliminary work as well as routine in obtaining a permit.

COMPLAINTS: No complaints have been received on either the Service or the Concession to the knowledge of this office.

ROADS & TRAILS: Road maintenance has been rather heavy and continuous and is still a major problem as always at this season of the year. We still have hopes of obtaining a larger grader which will ease this situation materially.

MAINTENANCE: Bids are to be opened today for some of our rehabilitation work and we surely hope that we can secure some service through these channels.

CONCESSION: While I have not received any direct report from the concession, I am sure that his business is equal or exceeds similar periods in the past.

RANGER SERVICE: Ranger Steel is out on a surplus property trip which will require about ten days time. Ranger Chittum has just completed a fire training course with the U.S. Forest Service held in Ruidoso. We appreciate their allowing this area to join them in this training, and know that Ranger Chittum will profit from his experiences.

SPECIAL ACTIVITIES: Our Clerk has spent several days in digging out material from the files and the preparation of an Index to communications often used. In one instance your office has seen fit to have this information mimeographed and distributed to the field; which, of course, makes us feel very happy.

ACCIDENTS: One first-aid trip was made to the scene of a wreck about ten miles from the headquarters in which a tourist from Michigan was hurried to the hospital in Alamogordo, but died enroute. He seemingly suffered a heart attack, and we were unable to revive him on the spot. The wife was not hurt seriously although the car turned over on the highway.

VISITORS: Mr. Ward Webber, Chief, General Engineering Division, accompanied by his wife, and Mr. J.R. Lassiter, Regional Engineer, were in for a short visit, and we attempted to show our problems as best we could.

With Play Day in the offing, and Easter sunrise services proposed, our immediate future is beset with many problems, as both of these affairs require considerable preparation. We still have hopes of repairs to picnic tables, shades, etc. in time to take care of our normal increase in travel which follows this season.

Johnnie Faris,
Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Wupatki NATIONAL MONUMENT

Flagstaff, Arizona

29 March 1947

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Wupatki National Monument during the month of March, 1947:

Visitors this month: 170 Travel Year to date: 951

Travel: Visitation for the past month shows a slight decline from that recorded for March of last year. No doubt the condition of the entrance road has had a definite influence on the visitor use. Business men of Flagstaff and vicinity report that travel continues to increase along Highway 66 and 89.

Weather: Winds and only traces of precipitation have again been the order for the past month. One of the most serious droughts of recent years now threatens. It is still hoped that some moisture will come before the summer arrives.

Roads: The absence of moisture continues to work havoc with the entrance road. Travel is rapidly grinding it into powder which in turn is blown away by the wind, causing chuck holes in the road. Some of the contacted visitors have complained of the roughness and high centers. Reports from a number of sources in Flagstaff have also relayed complaints of visitors who have started into Wupatki and turned back because of the dust and road condition. We pray that the rain gods may look upon us with favor so that we may soon start some repair and maintenance.

General: The transporting of the recently acquired surplus property has occupied a great deal of the time for the month. Ranger Upton returned from Marathon, Texas with a Ford 1½ ton stake truck and a Dodge pickup on the 8th. Some small equipment arrived from White Sands and Casa Grande a few days later. Custodian Jones made a trip to Grand Canyon on the 28th to obtain generators and miscellaneous equipment for monuments in this vicinity. There still remains another load at Grand Canyon and some items at Zion.

A number of beautiful mounted enlargements of points of particular interest at Wupatki as well as those of the local Navajos were received from Photographer Rex Fleming. Mr. and Mrs. Fleming had visited at Wupatki for several days during the early part of January. They were much enthused with Wupatki and promised to return in the early summer for another short vacation. The enlargements received were the fruit of that first trip.

Special Activities: Plans have been completed by Superintendent H. C. Bryant for the Natural Resources Course at the Arizona State College. Custodians of both Walnut Canyon and Wupatki will participate.

The Custodian attended a conference at Grand Canyon on March 3rd where Wage Board matters were considered.

Further investigation was made during the last week of March on the status of lands within the monument in an effort to clear the title.

Grazing: Grazing counts taken during the month indicate that the C O Bar Company are holding their grazing to 300 to 400 head including calves. Kirby who during the winter has grazed 90 head on the Forest south of the monument is moving back to the summer range. He found the cinder to be so dry the cattle developed sore feet. This resulted in improper ranging and the stock suffered as a result. This bears out the observation repeatedly made, that the deep cinder country is of little use to the cattleman even when he can afford to haul water.

Water Supply: Both springs indicate the influence of the lack of rainfall for the past year. Both remain at low record. However Wupatki Spring did show an increase of about 100 gallons over last month, with 822 g.p.d. for March. On the other hand Heiser Spring with 1878 g.p.d. for March continues to drop. It showed a decrease of 151 gallons from that recorded for February.

NPS Visitors: Regional Naturalist Dodge stayed with us at Wupatki for four days early in March. For once the weather favored the plans for the day and Matt was able to have nice clouds and good lighting for the pictures he took of several of the larger ruins, including Crack-in-the-rock. Sunset Crater was the chief subject for the last day of the visit. Regional Highway Road Maintenance Engineer Paul M. Miller, Mrs. Miller and son Paul M. Jr. stopped enroute to Grand Canyon. Surplus Equipment problems were discussed. We shall all miss Paul, but we wish him luck in his new job. On the 20th Ranger Paul Steele of White Sands National Monument visited at Wupatki for a few hours before going on to Grand Canyon. Engineer Ward P. Webber of the Branch of Development, Director's Office, Mrs. Webber and Regional Engineer J. R. Lassiter visited the area on the 26th in their tour of the monuments in northern Arizona.

Signs: Letters for three of the cut-out type signs have been completed. The balance of the letters are being held up because of lack of materials.

Activities of SWRM Stabilization Laboratory: The laboratory was moved about the middle of the month to the Heiser Spring area. The old mess hall foundation and floor are now being put to good use as the site of the workshop. Parts of a couple of the remaining buildings are also in use. Experiments with cinder block tile, soil block, and cinder block are continuing, following the suggestion of Region Three personnel. Collaborator Buchenberg has erected sample walls of both the cinder block and soil block. On the 28th a trip was made to Grand Canyon to obtain samples of soil so that experimental

stabilization mixtures can be made for that area. Without doubt one of the high points in the history of Wupatki resid[illegible] is the arrival of the 'Jeep' Station Wagon that arrived on the [illegible] to take the place of the gray Chrysler. Buchy is proud of it and he has a right to be envied. It certainly will be put to good use and will serve him well.

Publications on Hand: Because of the shortage of informational leaflets on Wupatki, none are being distributed to the visitor. The few that remain are being used as literature for informational requests.

Region Three Office—Mr. King			

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
REGION THREE
SANTA FE, NEW MEXICO

May 15, 1947.

MEMORANDUM for Assistant Regional Director John M. Davis.

Following is the narrative report for Naturalists of the Southwestern National Monuments for the month of April, 1947.

Staff Activities -- General.

Naturalist Dale King was in the office during the whole month on routine activities.

Archeologist Charlie Steen left Santa Fe on April 1 for relief duty at Tonto National Monument.

The Natural History Naturalist position remained unfilled, although word was received that Naturalist Maurice Sullivan will report for duty from Acadia National Park on May 14.

Administration -- Interpretation.

Two new desks obtained from War Surplus were moved into the office to care for expanded activities.

Materials were assembled, and some work was done on a rough draft for a proposed Employees Manual for Region Three.

The usual reports and fifty letters were written.

A map for the White Sands twofold leaflet, corrected by the Custodian, was forwarded to the Washington Liaison Office.

Applications for seasonal ranger positions were answered and forwarded to the field where indicated.

Public Relations and Extension Services.

A set of photographs of prehistoric and historic Indian pottery of the southwest was furnished to a graduate student.

Exhibits Plans and Projects.

The field was circularized to obtain information of needed improvements in museum lighting at Tumacacori, Montezuma Castle, Tuzigoot, White Sands, and Bandelier. It is hoped that some funds will be available in June to purchase modern fluorescent lighting to replace obsolete and ineffective lighting at these locations.

Research and Observation.

Printing of herbarium forms was requested of the Director. Several monuments need genus folders, and an unsuccessful attempt was made to purchase them from a scientific company. Other companies will be tried.

Cooperative Activities.

National Parks Magazine is planning an issue on national monuments for July, 1947. Articles on Casa Grande, Aztec, and Montezuma Castle, were revised by custodians, and additional editing and photographs were added in this office.

Further correspondence ensued with a scientist who is proposed as a collaborator for Regions Three and Four.

The rough draft of a manuscript by Mrs. Marie Wormington Volk on the archeology of the southwest, treated popularly, was reviewed and corrected. The booklet will be printed by the Colorado Museum of Natural History of Denver, Colorado.

Region Three Office Loan Library.

Accessions for the month totaled 107: Sixteen books, nine reports, forty-seven pamphlets, and thirty-five periodicals. Miss Blanche Story of Dr. Eusbaum's office was able to spend a short time correcting classification numbers.

Southwestern Monuments Association.

The major advance during the month was the appointment of Alan C. Vedder as part-time recording secretary. He started work on April 21, and spent most of his time alphabetizing and arranging in proper chronology the Association correspondence files, the letters "A" to "H." Many new folders were created, and the files expanded. He also learned the procedure for making out purchase orders and the operation of the addressing machine.

Mailing list cards were alphabetized and assorted according to their source areas.

Receipt of new photographs from a commercial concern will make possible the improvement of miniature sets for Wupatki, Tuzigoot, Sunset Crater, Walnut Canyon, Montezuma Castle, and Tonto National Monuments. All future miniature sets to be sold by this Association will include a caption card on which it will be possible to include considerably more interpretive material than was possible when captions were printed on the face of each picture.

Several books were donated to field libraries, and herbarium labels were donated to Walnut Canyon. We will be able to make an increase in number of donations from now on, because under terms of the Western Joint Purchase Agreement we are able to get books for members from the A. C. McClurg Company at a discount.

At the end of the month, the audit for the two previous fiscal years was well under way.

Photography and Visual Aids.

Proof prints were received of a series of excellent photographs taken by Mr. Stanley Davis of Tucson, Arizona, on the following national monuments: Tuzigoot, Montezuma Castle, Montezuma Well, Walnut Canyon, Wupatki, and Sunset Crater. These pictures are available for the use of the National Park Service, and form a valuable addition to our files.

Visitors:

Custodians Bowers, Thomas, Parr, E. Guillet, and McNeill. We also had the pleasure of a visit from Bill and Sallie Lippincott, proprietors of Wide Ruins Trading Post, Arizona.

Ruins Stabilization.

Permission was received from the Director to purchase from stabilization funds some much needed equipment which will place the Mobile Unit at Chaco Canyon pretty well on its feet. Already ordered are a 1½-ton dump truck and a half-ton pick-up. A small concrete mixer, of the only type available, is being purchased in Santa Fe.

An additional allotment of $325.00 was authorized to Tuzigoot National Monument to complete stabilization for the year there.

An excellent stabilization report in triplicate on work done from May 1 to November 8, 1948, was received from the Custodian, Aztec Ruins. When pages are numbered consecutively from the numbers used in the last report, these three copies will be sent off to be bound by a commercial bindery, the binding being donated by the Southwestern Monuments Association.

Correspondence ensued concerning the attempt to obtain steel portable scaffolding for the use of the Mobile Unit at Chaco Canyon and at other places. It appears that this cannot be purchased, but can be rented.

Correspondence also was carried on in a continuing attempt to obtain ultra-sound equipment for discouraging of roosting bats which are damaging prehistoric structures. Discouraging news has been received from the Navy, which apparently cannot use any existing equipment, and although we have been referred to a commercial concern, we are afraid that the cost will be beyond our means.

Several purchases were made by the Custodian, Wupatki, and Mr. A. P. Buchenberg as deductions from Mr. Buchenberg's donation fund to the Southwestern Monuments Association. Mr. Buchenberg and the staff at Wupatki are doing an excellent job in research for better techniques in ruins stabilization.

Projects for Ensuing Month.

King probably will remain in the office for the entire month on routine affairs, although the arrival of Naturalist Sullivan will necessitate considerable orientation and training activities during the latter part.

If Steen is able to leave Tonto during the month, he probably will make a swing through monuments accomplishing ruins stabilizations to insure that funds will be expended as planned during the last quarter of the fiscal year.

(SGD) Dale S. King

Dale S. King,
Naturalist.

Approved for Distribution:

(SGD) JOHN M. DAVIS

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
Arches
NATIONAL MONUMENT
Moab, Utah

April 27,, 19 47

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of April, 1947:

GENERAL: Application has been made by the Colorado River Scenic Tours for a franchise to operate scheduled bus trips from Salt Lake City, Utah on a circle tour through Capitol Reef, Natural Bridges and Arches National Monuments. Hearing was held on April 15th at Salt Lake City but no decision was handed down due to exceptions presented by the Denver and Rio Grande Railroad and another company interested in concessions development in this section.

TRAVEL: Our travel for this month was beyond all expectations with 139 cars and 569 people visiting the area. One hundred and thirty two people signed the register at the Windows on Easter Sunday and at one time I counted 28 cars in the area. We had representation from 24 states and the District of Columbia.

INTERPRETIVE SERVICES: A total of 49 parties and 177 people were contacted at headquarters and 16 parties of 75 people were contacted in the Windows section of Easter. Two trips were taken into the area with 14 people and one illustrated talk was given to the 8 members of the Brigham Young University party. Eight requests for information were received and answered.

Our community educational trip to the Windows on March 30th received very poor response, only 14 people availing themselves of the opportunity. Trouble with the truck enroute to the area caused inconveniences but all who attended seemed to enjoy the trip. Mayor Baldwin of Moab assisted in making arrangements and furnished his car to transport a portion of the party. Since this trip I have had several requests for a repeat performance so we are going to try it again on April 27th.

STATUS OF PRIVATE LANDS: Word has been received from the State of Utah that a request has been filed for an exchange of school lands included in the monument and is now pending approval in Washington, D. C.

ROADS: On April 10th the State maintenance crew performed work on the approach road and road within the monument. The entire length of the road

was graded and 10 loads of shale were hauled to sandy spots. This road is now in the best shape it has ever been but doubt whether it will stand such heavy traffic as was experienced on Easter Sunday.

WEATHER: Rain fell on April 8th and 9th and at this writing it is again threatening. Heavy winds have been the rule throughout the month in contrast to the excellent weather experienced during March. The cacti are starting to bloom as well as the paintbrush, phlox, penstemon, primrose and verbena.

MAINTENANCE AND CONSTRUCTION: Maintenance work on buildings at headquarters was suspended on March 28th so that available funds could be transferred to the headquarters equipment account to help carry the burden of cost of war surplus equipment acquisition and distribution.

The water pumping system was given a thorough overhaul during the month and it is hoped that it will carry us through the heavy summer use period with a minimum of trouble.

The 2 - 500 gallon water tanks for the Windows section water installation were finally received on April 18th. One tank has been prepared for underground installation and will be placed after May 1st, when the temporary ranger enters on duty. This will be a welcome addition for the convenience of visitors who enter the area during the hot summer months.

RANGER SERVICE: No luck yet on the filling of the permanent ranger position for Arches and Natural Bridges National Monuments. Will enter temporary ranger on duty at Arches May 1st.

SPECIAL ACTIVITIES: An investigation was made on April 12th of unauthorized excavation of dinosaur remains in the vicinity of Dalton Wells, 16 miles from Moab. It was found that Mr. Cole Sedsey, owner of a small private museum at Idaho Springs, Colorado , had hired local boys and was collecting some very good specimens on public domain. After learning that he did not have the necessary permit I advised him that he could not rightfully remove the collection until he had received permission from the Bureau of Land Management, who control the lands. The specimens were unloaded and he returned to Moab to contact representatives of the Bureau. This deposit should have protection to prevent recurrence of this type of promiscuous collecting as it will eventually make an interesting exhibit.

RESEARCH AND OBSERVATION: A party of Brigham Young University professors and students, 8 in all, are making a three day survey of plant and animal life in the monument. They left headquarters on May 25th, with a string of 19 horses, for the base camp site at Freshwater Spring. They intend to return late on the evening of April 27th. Check lists will be made up and submitted to the Service at an early date.

Russell L. Mahan

MEMORANDUM for the Regional Director, 24 April 1947 19
Region Three, National Park Service.

There follows the report of activities in Aztec Ruins for April 1947.

WEATHER. Generally warm and pleasant weather has been rudely interrupted by an occasional day of high winds and sand storms which however, have not adversely affected travel. Precipitation resulting from 2 light storms totals 0.19 inch.

MAINTENANCE. Continued effort has been expended upon the drainage ditch, in trying to clean out settled sand in the pipe line and in building a surface ditch along the up side of the ditch backfill in an effort to prevent additional water from running into the fill, which might result in blocking of the pipe line.

The pump, motor and pipes in the domestic well were removed, disassembeled, worn out parts replaced, cleaned and reassembled and replaced.

SPECIAL ACTIVITIES. An inspection of the drainage ditch project was made with Ray Decker, Regional Engineer, SCS on the 10 April. Mr. Decker and others of the SCS have shown much interest in the drainage ditch and have frequently visited Aztec in this connection.

On the 19 and 20 April the Custodian and Mrs. Townsend visited Monument Valley, Natural Bridges and Hovenweep National Monuments. Because of the general inaccessibility of these areas little evidence of travel was encountered. All roads were quite easily negotiated except for that which runs from Shiprock via Mexican Water to Kayenta where the road could only be recommended for light cars with short wheel base or pickups.

DONATIONS AND ACCESSIONS. The area comprising Hubbard's Mound has been cleared by the owner of fruit trees in preparation for acquisition by the National Park Service.

INTERPRETIVE SERVICES. There were 501 visitors conducted in 124 trips thru the ruins and 824 visitors in 252 trips were shown the museum.

INCREASE IN TRAVEL. There were 824 people in 167 cars from 31 states and Washington, D.C. including 7 members of the armed forces. This is an increase of 77% over a year ago.

REPORT OF GOVERNMENT PUBLICATIONS.

NATIONAL PARK SERVICE

April 29, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of the activities at Bandelier National Monument for the month of April, 1947.

Weather and Roads

Normal spring weather prevailed for the month, although cool Sundays somewhat hampered weekend travel. The maximum temperature for April was 83° and the minimum was 16°. Precipitation occurred on only two days to total 0.10 inch for the month, and high spring winds soon dissipated that small amount.

The approach road between the Otowi Section and Frijoles Canyon has become progressively rougher and dustier as a result of the dry weather, but little improvement can be made until the advent of more moisture. Repair work by per diem labor on the oiled section leading into Frijoles Canyon is now underway preparatory to the application of a seal coat later in the spring. Contract work on the surfacing of the road from Pojuaque to Otowi has begun.

Travel

2003 visitors came to Bandelier in 489 vehicles during the month. Two visitors came on foot, and two came on horseback. Weekday visitors are predominantly tourists, although Sunday travel consists to a large extent of local people, particularly from Los Alamos. Only 16% of the April entries were re-entries.

Interpretation

126 conducted tours through the ruins were attended by 1082 people. The average duration of the trips was cut to 68.5 minutes so that the ranger on duty could return promptly to headquarters for the trip the following hour. However, a great many people continued on unattended beyond the regular tour to Ceremonial Cave.

Forest Fire Protection

The dry weather and spring winds throughout April resulted in moderate to high fire danger throughout the whole month. The fire weather station was placed in daily operation April 12, and the entire staff has been "fire conscious". Fire suppression equipment has been thoroughly checked and prepared, and telephone lines repaired.

Personnel

Thomas B. Chatott entered on duty April 4 to fill the vacancy created by the transfer of James M. Bien to Grand Canyon. "Tommy" then left on April 9 for White Sands National Monument to assist in conducting the annual "Playday" and returned via Casa Grande National Monument in order to haul surplus equipment.

Crescencio Toribio reentered on duty and Romolo Cordero entered on duty March 30 as per diem laborers.

The Custodian has again spent considerable time on special detail in the Region Three Office.

Inspections

Engineers Monteith and Webber of the Director's Office visited Bandelier on April 2 with Regional Engineer Lassiter on problems related to the installation of a new power house and electrical equipment and inspection of the water system. Architect Lyle Bennett of the Region Three Office visited the Monument April 8 with special regard to the kitchen facilities in the Lodge.

Visitors

The Koshare Club of Texas Tech, Lubbock, Texas made their annual pilgrimage to Bandelier on April 3. The party consisted of Dr. W. C. Holden and a group of 48 girls in 2 chartered buses. Region Three visitors of the month were Dr. Rusbaum, who escorted Mrs. La Fell Dickinson (National President American Association of Federated Woman's Clubs), Mrs. E. T. Seeyon, and Mrs. Lee Wang on a tour of the ruins, Paul Balch and family, Miss Alvina Zimmerman with Mrs. Lucille Lovelady and Mrs. Lovelady's mother. Custodian Theodore C. Sowers of the Great Sand Dunes National Monument visited us on April 15 to 16 on business concerning surplus equipment.

Lodge

Mrs. Evelyn C. Frey has Frijoles Canyon Lodge in readiness for opening May 1. Work is now underway constructing a walk-in refrigerator for use with the Lodge.

Maintenance

The water storage tanks were thoroughly cleaned during the month and the chlorinating system overhauled and put into operation. The picnic

tables were repaired and the campground, lodge area, and roadside were cleaned up. Work on repair of the road into the canyon is now in progress.

Canyon de Chelly NATIONAL MONUMENT

Chinle, Arizona

April 26, 1947

MEMORANDUM for the Regional Director, Region three.

The following is a report on activities at Canyon de Chelly National Monument during the month of April, 1947.

Weather Conditions

High winds and dust storms long overdue arrived during this period but without the moisture that usually accompanies them. The drouth continues and the streams in the canyons are lower than they have been at this time for many years. Trees are leafing out a little earlier than usual. Only .05 inches of rain this month with a Maximum temperature of 80 degrees and a minimum of 23 degrees.

Administration

2 trips were made to Gallup, New Mexico for supplies and surplus equipment, and one trip was made by the custodian to the Regional office on April 21-22-23.

Maintenance

Work on the repair and rehabilitation of physical improvements has continued during the month. One of the surplus light plants was installed. Signs were retouched and considerable work was necessary on the War surplus Dodge pickup. Some work on the roads and trails was accomplished. The Indian Service ran a blade over our road from Whitehouse turn-off to Sawmill.

Visitors

Travel continues to show an increase in travel and Fiscal years to date although our monthly travel fall below April of 1946. Windy weather and Dust were partly responsible as roads have been in fair condition.

Inspections by N.P.S. Officials

Assistant Regional Director Davis, Regional Landscape Architect Cornell, Archeologist Roe and Architect Bennett were in the area April 2 to 4 going over the master plan and Concession layout.

Service to Public

As the water in the canyon at White house was much lower than usual more visitors took the trip into the canyons. There were 19 conducted tours attended by 55 persons with a duration of 62½ hours. 57 persons in 11 groups were given orientation talks at Headquarters for a total of 6 hours contact time.

ADDRESS REPLY TO THE SUPERINTENDENT

April 26 1947

Memorandum for the Region Director
Region Three, National Park Service,
Santa Fe, New Mexico,

There follows a report of the activities in and around Capulin Mountain National Monument for April 1947,

Visitors are estimated to be about twelve hundred for the month, bringing total travel, Travel year to date five thousand four hundred sixty and total travel fiscal year to date twenty thousand four hundred sixty,

Weather has not been at all good this month, and at least eight snow storms during the month and ten cloudy days and six partly cloudy ones, approximately two inches of precipitation, as a whole the month has been cooler than common, probably account of the moisture,

We now have fourteen thousand informational pamphlets describing this Monument,

A Mr and Mrs Cock from London were visitors on the 21, of the month with a (I say old Choppy ! Jolly well like your Monument and we could Jolly well use some of your sunshine in Dear auld London, Cheerio). Great folks., Those fog bound Londoners, . got a great kick out of them.

Roads on the Monument are again in good condition and Visitors seem to enjoy the smoother road, Attempt is being made this spring to widen the road at some places and it is expected that this will be complete by the end of the fiscal year,

The Custodian made a very enjoyable visit to the Regional Headquarters on the seventeenth, renewing his memory with the good old gang at Santa Fe, I get down Santa Fe way about every five years and I surely do enjoy calling upon the folk down there, I wish Santa Fe had some of our wet,

Very Respectfully,

Homer J. Farr,
Custodian,

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

April 25, 1947

MEMORANDUM for the Regional Director
Region Three.

There follows the narrative report for Casa Grande National Monument for April, 1947.

General: The Custodian attended a Fire-Weather Meeting called by the Weather Bureau in Phoenix. In attendance were representatives of the Weather Bureau; Indian, Forest, Reclamation, and Park Services. All agreed that we are facing the worst fire season in many years, and should the season start with dry lightning storms, there will be a rugged season ahead. That along with holding the Fire School at Chiricahua this month makes fires and the dangers of them the predominant subject of conversation.

Weather: The first 100 degree temperature of the season was recorded with an indication that there were plenty more to come. Compared to other years the month was about average with the low minimum of 37 being recorded on the 10th. With the exception of one week, running from the 14 to 21, all the maximums were under 90.

Inventory of Publications:		
	CG 2 fold leaflet	1200
	CG 2 fold leaflet (Spanish)	3100
	SCRM Map Folders	2200
	NP Location Map # 6	50
	Gov't. 16 page Booklet (Sales)	637.

Visitors: April 1947 - 3703; April 1946 - 2846; April 1945 - 1453; April 1941 - 2421. 1947 travel year to date - 25, 785. 1946 travel year to date - 18, 232. Totals continue to break all records. A check on how many of our visitors were in a hurry when they first came into the area was made. 40 % of them would state before we had a chance to ask that they were in a hurry. When asked how much time they wanted to spend 30% replied about 10 minutes, 50 % between 15 and 30 minutes, 10% between 30 and 45 minutes, and 10 % set no time limit. The average trip length for the day was 45 minutes and only 5 % left the trips before they were over. All of which proves, we think, that Casa Grande National Monument is an interesting place. High temperatures have caused somewhat of a let up in travel but cool days still find them pouring in.

Interpretive Services: Of the 3703 visitors to the area 2331 made the Ruins trip in 198 parties averaging 49 minutes per trip. 1577 made the Museum trip in 182 parties staying an average of 26.1 Min. 1372 people came into the area for a quick look, to picnic, or to bring other people over to see the Ruin, but did not make the trip themselves. 14 members of the armed forces are included in the above totals.

Maintenance: Archeologist Schumacher fired up and repainted the botanical labels and the Desert Trail Signs. Plans, specifications, and bid forms were distributed for the repair of roofs in the utility area.

Trips Taken: March 31 - April 4, Mechanic Stonehocker to Grand Canyon to pick up trailer and fencing, then to Organ Pipe Cactus and return. April 8 - 13, Mechanic Stonehocker to Saguaro, White Sands and return with surplus materials. April 15 - 17, Mechanic Stonehocker to Tonto with the trailer house. April 17, Custodian Bicknell to Phoenix to attend Fire-Weather Conference. April 7 - 11, Ranger Schuft to Chiricahua National Monument to attend Fire School. April 21, Ranger Schuft to Phoenix in connection with bids for reflashing of utility area buildings. Archeologist Schumacher on his own time attended the Yaqui ceremonial dances in Tucson.

NPS. Visitors & Visitors of Note: April 2, Mr. Pratt & Reed of WAA Los Angeles office were into check over some materials that they are handling disposal off. Apr. 2, Ranger Naturalist Lee Haines and family of Yosemite were into visit the area. April 2, Tech. Asst. and Mrs. James B. Rasbach of Jefferson National Expansion Memorial, St. Louis made the Ruins trip. Apr. 2, Ranger Ringenbach of Organ Pipe was into pick up surplus materials. April 12, Ranger Richert and his wife were in for a brief visit on their way back from the Fire School. April 14, Forester James of Region Three office and Walker of the Chicago office stopped to renew acquaintances and look over the area. April 13, Ranger Onstott of Bandelier was into pick up surplus materials.

Nature Notes: First Banded Gecko, Gridiron Tailed Lizard, Gila Monster, Gopher Snake, and Red and Black Phase racers, of the season were noted, during the period. First flowers of the season were noted on Alfilina, Mesquite, Staghorn Cholla, and Prickly Pear. Saguaro cactus has big buds on it but not yet in bloom.

A. T. Bicknell,
Custodian.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Chaco Canyon NATIONAL MONUMENT

Bloomfield, New Mexico

April 26, 1947

MEMORANDUM for the Regional Director, Region Three,
National Park Service.

There follows the report of activities in Chaco Canyon National Monument for the month of April, 1947.

There were a total of 171 visitors to the Canyon this past month. The number of visitors more than double the number for last month, and more than sextuple the number for February. The visitor registration is growing by leaps and bounds. It is hoped that next month will show an even greater increase. The people came in 49 automobiles and one airplane. The cars were from the states of:- California - 7 cars, 20 visitors; Colorado - 7 cars, 16 visitors; Iowa - 1 car, 2 visitors; Massachusetts - 1 car, 2 visitors; Michigan - 2 cars, 3 visitors; Minnesota - 1 car, 2 visitors; Missouri - 1 car, 3 visitors; Montana - 1 car, 3 visitors; New Mexico - 19 cars, 33 visitors; New York - 1 car, 3 visitors; Ohio - 1 car, 2 visitors; Pennsylvania - 1 car, 2 visitors; Texas - 2 cars, 5 visitors; Washington - 2 cars, 7 visitors; West Virginia - 1 car, 2 visitors and Utah - 1 car, 3 visitors. The airplane was from New Mexico and contained three visitors.

Of these visitors, all 171 took a trip through the ruins and formed a total of 40 trips. One hundred and fifty-four persons listened to the museum lecture and formed a total of thirty-six parties. Total time 57 hours and 20 minutes: Custodian - 26 hours and 45 minutes; Ranger - 30 hours and 35 minutes. One hundred and twenty full admissions were sold and forty-one tax only tickets issued, most of the latter went to a party of 36 Amerinds.

At the end of the month, there was on hand:-

Free two-fold leaflets on Chaco	9900
Southwestern Monuments folders	275
National Park Location Maps	650

There are no publications from the Government Printing Office for sale.

Five written requests were answered.

The coldest was 17 degrees on the thirteenth of the month and the warmest was 78 degrees Fahrenheit on the twentieth of the month. The precipitation consisted of a trace on the third and .05 of an inch on the ninth of the month. The wind blew almost every day of the month.

Several official trips were made. One to Albuquerque, several to Gallup to pick up cement, one to Aztec to pick up hay, one to Zion National Park to pick up surplus property and one to Santa Fe to the Regional Office. Also, several trips were made to Bloomfield for sand and gravel.

National Park Service visitors included Paul Balch, Regional Soil Conservationist, Bill Reed, Ranger, Aztec Ruins National Monument and Ora M. Clark, former seasonal ranger at several Monuments.

Trouble is still being experienced with the water pump, but another has been ordered; it is hoped that the old one will last until the new one arrives.

The fence crew has continued to work well and now have all but a few feet on the mesa completed for the south side of section 25. The west side of the same section is almost closed. They have completed the north fence of section 23. All the fence in the canyon on the east and west side of section 26 has been taken down and the posts blasted, and the same for a good part of the north of the same section.

The stream control crew have finished planting the willows which were bought at the Soil Conservation Service Nursery at Bernalillo, and have planted some willow cuttings.

The Trader has finished painting the front of the Store. He reports that Navajo rugs are coming in at a reasonable rate. Wool season is rapidly approaching and he expects the number of rugs to increase after the season is over.

The mocking birds are back in the canyon, and are serenading us daily with their beautiful songs. The antelope squirrels are seen often, and, the snakes are out, too, for the first one was seen, a bull snake, on the 19th of the month.

Dr. Paul Reiter and a crew of students were here on Easter week-end, and started getting things in shape at the University of New Mexico Field School for the summer session. They spent most of their time cleaning the well. They were a fine group, and we are looking forward to seeing them again next summer.

Projects for the ensuing months:- continue to work hard with the fence crew and try to finish by June 30, get the roads in better shape, paint the signs, paint the office and out buildings, install the light plant, install the water pump, etc., and keep office and routine duties current.

There is attached, the report of Archaeologist Richard Gordon Vivian of the Mobile Unit.

Irving McNeil, Jr.
Custodian

REPORT OF STABILIZATION UNIT FOR THE MONTH OF APRIL, 1947

GENERAL:

Working conditions have been fair except for days when the wind blew the stone out of the men's hands before they could get them laid in the wall.

Some spare time has been put in on the Chetro Kevl ceiling mats. One has been prepared and is on display in the museum. Two others have been cleaned, patched and are stored.

An additional set of timbers have been treated with the pentachlorphenol wood preservative. The color while not as objectionable as that first obtained is still too dark.

The first photographs of completed work have been returned and compilation of the record sheets will take considerable time from now on. Data and photographs for a section of the stabilization manual have been assembled.

PUEBLO BONITO:

Repairs to foundations have been made in five rooms on the west side. These are previously unrepaired rooms.

The preliminary work, hauling gravel, trenching and setting of forms has been done for a major repair job on the back wall. This is right next to the fallen Rock and a large bulge developed there this winter. The wall some 15 feet high is badly cracked a horizontal distance of 15 feet.

CHETRO KETL:

The major portion of the work here has centered around the deep excavation in Kiva H and its superimposed Kiva G.

Here on the rim of this deep hole the walls of rooms 35 and 23 were straightened and strengthened with reinforced concrete cores tied into cross walls. A bulge was removed and the wall rebuilt in room 28 and extensive patching done in 27.

Room 17, west and south was shored up and a foundation installed where the excavation had left them unsupported.

Niches at the base of Kiva H were filled with concrete and faced

with masonry in the hopes of stopping further settling. Work will be continued here on the walls, bench and top of Kiva G.

Kiva J received complete repairs: capping, patching of wall surface, repairs and capping of bench, repair of ventilator shaft and floor features.

In progress is complete repair of the entire north wall of the site at the former balcony level. From one to three feet of facing have fallen at the balcony line a horizontal distance of some 250 feet. Repairs are completed through rooms 83,85, 93, 95, 94, 101.

Capping, repair of wall breaks, repair of sockets and beam levels has been completed further eastward in the three story rooms 478, 643, 545, 615.

In the coming month we intend to do the big job on Bonito, complete the work around Kivas H and G, straighten the leaning wall in room 90, completely repair Kiva I and follow this with capping. If possible we may get to some of the worst walls in Pueblo Del Arroyo.

Gordon Vivian
Archaeologist

NATIONAL PARK SERVICE

CHIRICAHUA NATIONAL MONUMENT

Dos Cabezas, Arizona

April 27 1937

MEMORANDUM for the Regional Director,
Region Three.

Following is a report of activities at Chiricahua National Monument for April.

Weather Conditions. Weather has remained very dry and windy. One rain of .40 inches fell on April 4.

Special Activities. The The fire school was the outstanding activity of the month. In addition to the Chiricahua force there were 11 visiting custodians, rangers and fire control aides and 5 Santa Fe and Chicago officials.

The custodian made a trip to the prison camp near Tucson for lumber for a new roof on the oil house and for various other repairs. About 1500 feet of lumber was secured and an overnight stop was made in Tucson to have 1000 feet of this lumber tongue and grooved and surfaced. A stake truck was borrowed from Saguaro for this trip and Ranger Sharp returned the truck and secured some repairs for our panel truck in Tucson.

Inspections. Architects Lovelady, Saunders and Alleman spent part of April 22 and 23 on the monument, going over master plans along the roads in and around headquarters and the camp ground, with the custodian.

Plans, Maps and Surveys. In connection with the above inspection plans were made for some slight changes in the Administrative Building parking area. A site was also agreed upon for the proposed camp fire circle.

General Publicity. The Natural History Magazine, published by the American Museum of Natural History in New York, contained a seven page article on Chiricahua in the April issue. Story was by William Carr and pictures by George Geyer.

Maintenance. Our water system dropped to a low of 6 cu. ft. per hour and several days were spent by Operator Marble and Ranger Sharp investigating the same. A somewhat larger flow was secured by by-passing the regular intake, but the condition still is so critical that we have written the Sunday School groups that were planning on using the campground in June informing them that there would not be sufficient water for their use.

We hope that maintenance of light plants has eased up for some time as we secured two new ones from Army surplus. A new cement floor was

poured in the power house and the plants installed. We feel much more closely connected with civilization now that we have electric lights every night.

Approaches to Monument Area. Approach roads are getting very rough and dusty as a result of the prolonged dry spell.

Interpretive Service. With the visit of the Sierra Club on April 2, we did a fair business in interpretation. Ranger Sharp took 57 members of the Club on a 2 hour hike on the Echo Canyon trail, and Custodian Cooke took 24 on a 3 hour trip around the Heart of Rocks and up Echo Canyon. The following day Ranger Sharp took 8 of the group on a photographic trip around the Heart of Rocks. Custodian Cooke made a campfire talk to the Club in the evening. They seemed like a group who were very willing and able to absorb interpretation. The usual contacts were made in the museum and on Sunday road patrol to Massai Point.

Increase in Travel. Travel of 1577 makes this month about the same as the last two months, with about a 50% increase over April of 1946. Our lead over last year's travel is now 63% for the travel year and 82% for the fiscal year.

Visitors. Mr. Weldon Heald, former director of the Sierra Club, paid us two visits. One of these was with a group of 81 Sierra Clubbers. Mr.Heald is a very good friend of the Park Service and has written various articles on conservation. He recently purchased the Flying H ranch near Bisbee where he is developing an aboretum in an attempt to grow all of the conifers. He has collected several hundred species to date.

Forest Fire Protection: Forest conditions are much drier than usual this year both on the Monument and on the Adjoining National Forest.

Publications on Hand.

2-fold leaflets - English - none.
2-fold leaflets - Spanish - 1825.
Location map No. 6 - - 90
Location map No. 5 - - 23
National Park Briefs - 190

Considerable difficulty is experienced in getting our English speaking visitors informed about the Monument , with no folders or leaflets in English.

Clair V. Cooke,
Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

El Morro NATIONAL MONUMENT

Ramah, New Mexico

April 28, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows the report of activities in El Morro National Monument for the month of April.

WEATHER: Three very light snow storms occurred on the 5th, 9th and 12th, but by sundown all traces of moisture had gone with the wind. This makes a total of 102 days without a measurable precipitation. Maximum temperature reached 72 degrees on the 20th and the minimum was down to 18 degrees on the 25th.

TRAVEL: The continued increase in travel shows April 75 percent over 1946. The monument was visited by 184 people in 67 cars and one airplane. A total of 171 made the tour of the inscriptions and 12 of this total went on top. The guide time amounted to 52 hours and 25 minutes. Thirteen people arrived for information only. The one visitor via air landed in a nearby field and was transported to the monument by the very obliging land owner who supplied sand bags and all the necessary tackle for anchoring the plane.

APPROACH ROADS: The road from Gallup to the airport, four miles west of the Monument, was bladed on April 15th by the McKinley County maintainer. The work was done mainly for the benefit of the motion picture company who will be driving back and forth while making their film here at the Monument. The constant high winds have made the road to Grants almost impassable for a passenger car which has little clearance. All loose soil has been blown away from the lava rocks, making a great many high centers. It was learned last week that the improvement of State Highway #53 will not be included in the State Highway Department's 1947 program. This is discouraging but we are not giving up hope or the battle.

NPS VISITORS: We enjoyed very much meeting Mr. and Mrs Ward P. Webber who visited the Monument with Mr. J.R. Lassiter on March 28th. Our unsatisfactory water supply was inspected and an underground storage tank was recommended as a solution. Paul L. Balch arrived early the morning of the 19th. and a complete inspection of the 1942 soil erosion work was made.

SPECIAL VISITORS: The five men representing Harry Sherman Pictures, Inc. returned on April 3rd. to make definite location plans. Four hours were spent with them in working out in detail the use of the area. They plan to return on May 10th and will complete their filming about May 14th.

GENERAL: Two trips to Gallup were made during the month for supplies and Surplus Property and one trip to attend a meeting called by the Forest Service for the purpose of working out local cooperative agreements on forest fire suppression. Representives from the Indian Service(Navajo & Zuni), the County Agent Office, and the Forest Service were present. Mr. Stanley Wallace of the Forest Service Regional Office was present and I discussed with him the moving of the telephone line north of the Rock. He was very much in sympathy with our problem and said there was no reason why the line could not be moved. It was suggested that we wait until we were sure exactly where the new road line would be. On April 15 Mr. Fred W. Townsend, Sanitarian, Health District #11, visited the Monument, taking two samples of the water for bacteriological examination. One sample was taken at the Pool and one at the doping tanks.

Custodian.

Number of copies of free publications on hand as of the end of April 1947.

2-fold Spanish edition(free)—3855

2-fold English edition(free)—2926

16-page Booklet (free)————9417

GRAN QUIVIRA

GRAN QUIVIRA, NEW MEXICO

APRIL 26, 1947.

The following is a summary of activities for the month of April, 1947.

Visitors this month totaled	220
Travel year to date	954

Weather. Strong winds prevailed throughout the month with frequent heavy dust storms. On April 9 high hard winds almost reached hurricane proportions and visibility was reduced to absolute zero in some areas. No precipitation except one light snow on April 4, otherwise the entire month has been very dry. High temperature was 77 and low 18.

Roads. The road to Mountainair is in fair condition. However, the road to Carrizozo has been blocked to traffic for at least half of the month due to drifted sand. One silt bed was about four feet deep and extended for a distance of about five miles.

Travel. Visitor travel still continues to show an increase. 18 per cent over the previous month of March and 31 per cent over the corresponding month of April 1946. Instate visitors numbered 185 and outstate visitors 35. There were a total of 69 cars with instate numbering 51 and outstate 18. 3 people walked out to the monument.

Guide and Contact Service. A total of 220 visitors were conducted through the ruins on 69 guided tours. The average time spent by each party was 72 minutes. Total contact time of 82 hrs, 40 mins.

Free and for-sale Government Publications. No publications of this nature are on hand at this monument.

N.P.S. Visitors. Messrs. Carlson, Walker and Janss visited the monument on April 4.

Maintenance and Administration. Received new refrigerator to replace the old one that was sent to Albuquerque for repairs. Spent considerable time working on gas engine of deep well pump. This pumping unit has seen many years of service and requires constant attention and repairs to keep it in operation. April 9, 10, 11, 12 and 13 was spent going to and from and assisting custodian Faris in the annual Play Day activities. Continued work on trail leading to mission.

Custodian.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
GREAT SAND DUNES NATIONAL MONUMENT
MOSCA, COLORADO

April 26, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in Great Sand Dunes National Monument for April, 1947.

WEATHER. Fifteen snow flurries have occurred since the last report period. Three of these were of almost blizzard proportions. The infamous water line froze again on April 12, but was thawed by blow-torch. The rain of April 18 turned into snow before morning. Days have been spring-like between snows and the warmest day was around 60 degrees. The Sangre de Cristo range is heavily covered with snow, and although the San Luis Valley proper is very dry, the winter's accumulation of snow on this range should produce enough water for the irrigation canals.

TRAVEL. Three hundred eighty visitors in one hundred six cars visited the area during this report period, and two visitors came by motorcycle. Four states and Alaska were represented. Sixty-nine people took advantage of the picnic grounds and of these, two boys camped there for two nights. One written request was answered.

INCREASE IN TRAVEL. For April, 1946, the record shows 85 cars and 222 visitors.

ROADS. The county graded about 15 miles of the approach road into this area, but the road was too dry to do a proper grading job and there is no improvement to report. The monument road is very dry and rough. A surplus drag located at Chaco Canyon National Monument has been requested, in order that the monument road may be worked on when weather conditions permit.

COMPLAINTS. With the increase in visitation, there have been received many verbal complaints concerning the unfinished rest-room facilities at the headquarter area. Visitors are directed to rest-rooms located two miles from the headquarter area, in the camp-grounds. This condition has been called to the attention of Region Three Office.

ARCHAEOLOGY. An article in the Rocky Mountain News, dated April 4, states that permission has been granted the Alamosa State College to excavate for traces of prehistoric man on the Linger Ranch. It is understood that Professor Worman and students will soon start on this project and this office will make a special effort to keep up with the results of their excavations.

LAND STATUS. This office received a copy of the Proclamation signed March 12, 1946, by President Truman, "Redefining the Area of Great Sand Dunes National Monument, Colorado". The proclamation gives the total acreage as 44,810 acres and does not include the 240 acres purchased from the Linger Brothers. The Director's office has been written to determine if this area has 44,810 acres or 45,050 acres.

SPECIAL ACTIVITIES. From April 12 to 16, the custodian made a trip to Bandelier National Monument, Santa Fe and Albuquerque, New Mexico, to obtain the Dodge 4x4 pickup which had been left at the Forest Service Garage for a month. Wheels, tires and a battery were finally obtained, thus enabling the final delivery of this surplus piece of equipment to this area. Other surplus equipment was also hauled to Sand Dunes in the pickup. This included the much needed new light plant and two oil stoves as well as smaller pieces of equipment.

ACTIVITIES. Again the water line took up most of my time this report period.

Several days after the line thawed, a bad leak was discovered in the line. The entire section of pipe was uncovered, and a twelve inch split was found. Rubber tubing, cement and clamps were tried, without success, to stop the leak. A new twenty-one foot section of pipe was then installed. Having only an eighteen inch pipe wrench, it was quite a job getting the union tight enough to eliminate leaking. However, a hammer and a center punch will do the job. Another small leak was discovered, and this was easily repaired by rubber tube and clamps.

While the storage tank was drained by the major leak, it was then possible to thoroughly clean the tank. The horrible discovery was made that the tank is much smaller than is shown on the blue prints. The storage system is shown to be a 5,000 gallon reservoir: height, 6 feet; width, 11 feet and length, 11 feet. While cleaning the tank, measurements were taken and they are: height 5 feet, 2 inches; width, 9 feet, 6 inches and length, 9 feet, 9 inches. According to my mathematics this tank would only hold approximately 1600 gallons.

During the three months when the line was frozen, 47 trips were made to Mosca Creek. This amounted to 94 miles and on each trip 35 gallons of water were hauled. A total of 1645 gallons were hauled and used during the three months.

Photographs were taken of the water line for the fact file.

Usual routine of hauling wood, fuel oil, gasoline and garbage was accomplished during this report period.

It was also necessary to help visitors dig their cars out of the sand in the picnic area. A great deal of work must be done here, in order that this area be safe for cars to drive in and out.

After returning with the surplus equipment, much time has been spent setting up the light plant and oil stoves.

It was a major project to unload and transfer the 450 pound, 3KW, 110 volt plant to the light plant room. This meant pulling and dragging it thru the garage by means of planks and rollers. It is functioning in fine condition and waffles and toasted sandwiches are now a treat. This plant arrived in the

nick of time as the 1½ KW plant was acting up and was in need of major repairs.

One small oil stove was installed in the hall of the residence. This certainly would have been welcome last January, when it was so bitterly cold. No doubt it will be put to good use next winter.

The larger oil stove was installed in the office, but cannot be placed in operation until a butterfly control valve is obtained. This area is far too windy to properly operate a stove without this valve.

All office furniture was removed to the unused rest-room in preparation to painting ceiling, walls and floor in the office.

Two new foam type fire extinguishers were filled and one placed in house and the other in the light plant room.

The dump truck was taken to the Heide Garage, Moses, for new rings and valve grinding job. When the engine was torn down, it was discovered that the oil rings had not been properly installed and were of course not functioning. This caused the accessive use of oil.

The gasoline motor for the air compressor was also in the Heide Garage for minor repairs.

One entire day was spent in trying to open up the drain for the laundry tubs and kitchen sink. The laundry drain was stopped up when we first arrived, and todate nothing has succeeded in removing the obstruction. The kitchen sink drain was successfully cleaned when the garden hose was attached and force of water cleaned out this drain. Further work will be done on drain of laundry tubs.

The front yard of headquarter area was thoroughly raked and all dead grass and weeds were removed and burned to eliminate this fire hazard.

Tod C. Sowers,
Custodian.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Montezuma Castle National Monument
Camp Verde, Arizona

April 24, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows the monthly report of activities at Montezuma Castle National Monument for the month of April, 1947.

Visitors this month - 2003; travel year to date - 8440.
Visitors April, 1941 - 829; travel year - 1941 - 3431.

Weather Extremely dry weather has prevailed throughout the month. Promising clouds sometimes rise in the sky but still we get no rain. The maximum temperature was 91° on April 15 and 17 and the minimum was 30° on April 23. There was a trace of moisture on April 9.

General Travel figures continue their upward trend with this travel year to date fifty-nine per cent ahead of the same period in 1941. This month we guided more visitors through the Castle than the total travel counted in April, 1941.

Approach Roads A large and conspicuous sign advertising attractions in the Verde Valley has been erected by the Verde Valley Chamber of Commerce at the edge of Flagstaff where Alternate Highway 89 leaves Highway 66. Co-operation is being sought from Prescott and Flagstaff citizens in routing visitors through the Verde Valley. The Chamber of Commerce has also petitioned the County Board of Supervisors to oil the road from the Coconino county line through Big Park to the Beaver Creek road and thence by Montezuma Well to the Cornville-Camp Verde road. Coconino County now has an improved road from Flagstaff to the county line.

A contract has been let for the fourth section of the Black Canyon Highway from Phoenix to Prescott and the Verde Valley. Work is now under way on about thirty-five miles of this highway from Phoenix to Rock Springs.

Administration Considerable time has been devoted to matters pertaining to Montezuma Well.

Custodian Hastings and Ranger Loding attended the Fire Control Training Conference at Chiricahua April 8-11. During their absence Jack Mc Cracken of Camp Verde was hired as a WAE guide.

Difficulty has been encountered in locating a qualified veteran candidate for our temporary ranger position.

Staff conferences for the personnel of this monument were initiated March 17. We plan to hold a short conference each Sunday morning to discuss administrative problems of general interest.

Montezuma Well Patrol trips were made to this area on March 25 and 30 and on April 1, 4, 5, 15, and 20.

It has been learned that the Montezuma Well property passed into Federal ownership on April 4 and that full responsibility for administration, protection, and maintenance now rests with the National Park Service. Plans are underway to drill a well, and to renovate and modernize the quarters. April 1 was a busy day at Montezuma Well with Assistant Regional Director Davis considering administrative problems, Archaeologist Reid interpretive matters, and Landscape Architects Cornell and Bennett giving attention to development plans.

Many visitors to Montezuma Well were not finding the feature because they did not expect to climb a hill to find a spring of water. We have placed a sign at the bottom of the foot trail which reads, "Up Hill to Well".

On April 4 Custodian Cotter phoned to say that some visitors had been charged a fee at Montezuma Well by an unauthorized person. An immediate check-up with a follow-up the next day failed to reveal who was making the charge.

Protection On two occassions stray cattle were driven off the monument. The extremely dry weather has so reduced forage outside the area that we anticipate increasing difficulty in keeping cattle from trespassing.

The fence was repaired near the picnic ground and also near our south cattleguard.

Two new carbondioxide fire extinguishers were received from the War Assets Administration.

Service To The Public A lady who grew faint and pale had to be given special help in getting down our ladders on March 30. For awhile it looked as though we might have occasion to use our basket stretcher.

Also on March 30 we had one visitor, Mrs. C. G. Mahaffey, whom we tried to discourage from climbing our ladders. She stated she had been to Tusigoot and Tuzigoot and would be disappointed if she could not examine the Castle. Her daughter assured us that Mother could go anywhere and even though blind since birth, she made the entire trip and expressed keen interest in her visit. She is collecting information for an article she plans to send to a publication for the blind.

We had 2003 visitors who came in 597 cars, trucks, and busses. Tickets sold, 731, tax but no ticket, 97, children who climbed free, 100, members of the armed forces who climbed, 3.

Contact Time Total contact hours, 219.25. Hastings, 61.50; Loding, 82.25; Schroeder, 73.00; McCracken, 22.50. Trips 169 for 951 visitors who went through the Castle; museum partion, 316 for 1245 visitors. Information service outside the ruins or museum was rendered to 263 people. There were 11 picnic parties including 58 people and 3 parties including 6 people who camped over night.

Fauna The first rattlesnake reported on the monument this season was found and killed by a party of visitors on April 20. It was a 30 inch northern black-tained specimen.

National Park Service Visitors Engineers Webber and Lassiter were here March 24.

Dale King and his father were here for a short visit on March 29.

Messrs. Davis, Reid, Cornell, and Bennet were here on April 1 to study problems pertaining to Montezuma Well.

Mr. and Mrs. J. B. Rasbach of the Jefferson National Expansion Memorial were here on April 6.

On April 2 Ranger and Mrs. L. Brainerd from Muir Woods National Monument were here.

Newsworthy Visitors Alfred A. Jordi, photographer, was here on March 24 to get pictures for Holiday Magazine.

A bus load of Boy Scouts from the Pasadena-San Gabrial Valley Council were here on April 3.

Mr. Stan Davis and Mr. H. Lollesguard of the Lollesguard Studios, Tucson were here to take pictures for use on picture post cards or picture packets.

Accessions Mr. Thompson, hybrid corn grower from Cottonwood, donated a booklet "Corn Before Columbus" to our library.

NATIONAL MONUMENT
Moab, Utah

April 27, 1947

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Natural Bridges National Monument for the month of April, 1947:

GENERAL: It is hoped that a temporary ranger can be entered on duty at this area on May 1st, as visitors are making the trip over the Elk Ridge despite the snow and mud encountered on the approach road.

ROADS: The State of Utah has maintenance equipment working on the road from Blanding to the monument and it should be in good shape by May 1st, or shortly thereafter.

TRAVEL: John Wiley Redd of Blanding reports that several cars of visitors have contacted him regarding the road to the monument and have made the trip to visit the area. It is estimated that 6 cars and 28 people made this trip during the month.

NAVAJO NATIONAL MONUMENT

TONALEA, ARIZONA

April 24 19.47

MEMORANDUM for the Director, Region Three

There follows a report of activities in this area for the month of April.

WEATHER: Very dry and windy weather has prevailed all month. A sparse cover of Russian Thistle on the sand dunes is, in some places, keeping the dunes from moving onto the road.

VISITORS: Nine parties of visitors reached this area-totaling 27. Five parties made the trip to Betatakin, four parties used Sandal Trail and one party of two horsebacked to Keet Seel.

Visitors, Official: Ranger and Mrs. Aubuchon of Walnut Canyon National Monument visited this area using their days off to help us haul a load of NAA equipment. Aubbie also went to the tunnel and helped us install new parts in the pump. In addition to our appreciation for the help rendered we enjoyed having these folks here.

MAINTENANCE AND NEW CONSTRUCTION: New parts were put into the water pump and no improvement is noticed.

A 1½ Kw. Kohler light plant was set in operation for residence #1. The plant is installed inside the tool house.

Trenches were forged and fitted to all sub-level water drain valves.

The kitchen walls were washed.

NAA stock bins were erected in the tool house and all of our hardware, pipe-fittings, etc., were sorted and stored in the bins.

82 man hours were spent in road repair and dragging.

Three days were spent on the water pumping plant.

INVENTORY OF GOVERNMENT PUBLICATIONS:

Two Fold leaflets; Navajo National Monument 1184
Sunset Crater National Monument 159
Walnut Canyon National Monument 47

National Park Location Map # 6—19
The National Park Service System (June 30, 1946) 26.

GENERAL: After a healing ceremony held for Mattie Austin in the hogan near the camp-ground we were able to obtain some of the sand-painting equipment. For the ceremony the pulverized sands, white, yellow, red and blue were carried in and out of the hogan on trays made of Pinyon bark. We added four of these trays, each with its colored sand, to the museum display case. Also two, red and yellow specimens of the sand stone from which the sand is ground.

~~Organ Pipe Cactus~~ NATIONAL MONUMENT

~~Box 38, Ajo, Arizona,~~

April 26 19 47

MEMORANDUM for the Regional Director,
Region Three.

There follows a report of activities in Organ Pipe Cactus National Monument for the month of April, 1947.

WEATHER:

No precipitation recorded. High winds occurred on the 12th, 13th, and 21st; maximum temperature of 97 degrees reached on the 17th and minimum of 38 degrees on the 6th. Clear sunny days prevailed throughout the month with two days noted as partly cloudy and one day as cloudy.

TRAVEL:

260 persons received interpretive service during the month, and general travel trend indicated little decline in spite of the mounting temperature. Special patrol trips were made with four individual parties.

SPECIAL ACTIVITY:

The Region Three Annual Fire Training Conference at Chiricahua National Monument was attended by Ranger Ringenbach and the Custodian from April 8 to 11 inclusive.

INSPECTION:

Mr. George Walker, Forester, Chicago, and Mr. Bill James, Forester, Region Three, spent April 14 to 16 inspecting and outlining forestry problems of O.P.C.

GENERAL:

The State of Arizona established 4 border inspectors on the International Line, one camp at Quitobaquito and one at the Sonoyta Custom House for the express purpose of preventing mexican drift stock from entering the U.S. This is part of the State program for control of the Foot and Mouth disease.

The Soil and Moisture program got underway this month with a six-man crew beginning construction on the west boundary fence project.

Dr. A.L. Melander and Mr. and Mrs. John L. Sperry, of Riverside, California, collected and made moth and fly studies for monument records and collection.

PUBLICATIONS:

Informational four fold pamphlets on hand. English version - 18,000
Spanish version - 3,450

PROJECTS FOR THE COMING MONTH:

Continuation of the fence project, additional road maintenance, and as much patrol as time permits.

NATIONAL PARK SERVICE

SAGUARO NATIONAL MONUMENT

TUCSON, ARIZONA

APRIL 27 19 47.

MEMORANDUM for the Regional Director,
Region Three.

There follows the MONTHLY NARRATIVE REPORT (1mi) of activities at Saguaro National Monument for the month of April, 1947.

WEATHER. Except for two cold days April 24 and 25, the entire period was warm to hot, with a maximum of 94 degrees. Precipitation, in the form of 8 inches of snow, occurred at Manning Camp Ranger Station on the night of April 2; at the same time a trace of rain fell at Headquarters, and other lower portions of the monument. Official Weather Bureau records show this to be the driest winter since establishment of the Weather Station in Tucson, 53 years ago. Although we usually expect winds and sandstorms in March, this year they came a month late, with almost daily high winds, which, in the city, usually obscure vision with accompanying dust and sand storms.

SPECIAL ACTIVITIES. On April 2 and 3, the Custodian and Ranger Fulton rode to Manning Camp, Mica Mountain Tower, and the three secondary lookout points. It was our first (and highly discouraging) trip through the area burned in the 1943 fire; many of the trees killed are now down, with trails blocked, and telephone line down for much of its length in the plateau area north of Man-Head. The Custodian, Ranger Fulton, Laborer-Leadman Ollie O. Barney, and Laborer Richard Barney attended the sub-Regional Fire-Training Conference at Chiricahua from April 8 to 11, inclusive.

Forest Walker, of the Director's Office, and Forester James, of Region Three, were here on field investigation April 17 and 18. Also, Architects Allemon and Lovelady, of Region Three, were in on the 24 and 25, in connection with studies for initiating a Master Plan for the area.

MAINTENANCE. The Loop Road in the cactus area was dragged, and remains in very good condition. Approach road to the Madrona Canyon area should also have been dragged, but the Ford Dump-truck used for this work broke down again, and is still unusable. Ranger Fulton and Leadman Barney spent a total of five-man-days on the telephone line between Madrona Ranger Station and Manning Camp, but much work remains to be done on top of Mica Mountain before we can expect to use the mountain section of the line. The cess-pool was completed, and our inside plumbing put into operation; apparently we need a professional plumber's services, since the new toilet refuses to work.

MAINTENANCE - (continued).

The radio antenna masts were moved, and a new antenna installed on the 19th; radio communication between Headquarters and Organ Pipe Cactus and Chiricahua National Monuments was reestablished on the 20th, for the first time since last fall - while the Headquarters set was out of service, Ranger Fulton kept up the weekly contacts from the installation at Madrona Canyon.

NEW CONSTRUCTION. An overhead power line was constructed at Madrona Canyon between the barn and the bunkhouse, the old line from the barn to the Ranger Station replaced, and the two new 3-KW generator units installed and tested.

TRAVEL AND INTERPRETIVE SERVICES. Travel decreased, as is usual at this season, approximately 15 % from last month; with a total of 1782 persons arriving in 575 cars, 1 motorcycle, 2 busses, and two horseback parties totaling 7. These visitors came from 34 states, the District of Columbia, Canada, Hawaii, England, Cuba, and Argentina.

Visitors receiving informational services at Monument Headquarters numbered 740, making up 221 parties. Contact time totaled 44 hours, mostly by Ranger Nowanstine. It is noticed that our past winters visitors seem to be more generally in a hurry than before 1941; spend less time in the monument, ask fewer questions, and appear to be less interested. It is harder to gain, and keep, their interest, and most of them seem content merely to receive road information. Part of this is due to location of Headquarters, but there does seem to be a difference in visitors.

VISITORS. Dr. Lake S. Gill, of the Bureau of Plant Industry, on April 3, and Dr. Hartley, of the same agency, on April 20. Custodian Hastings, Mrs. Hastings, and Ranger Lodine, of Montezuma Castle, and Ranger Richart and Mrs. Richart, of Tumigoot, stopped in for a cactus tour on their way home from the Fire School. We also enjoyed an afternoon visit with Mr. and Mrs. Gano Santschi, of the Nordberg Diesel Corporation, Milwaukee; Mr. Santschi is a Swiss, and an early associate and private secretary to Rudolph Diesel, coming to this country with the first Diesel engine designs in 1914.

WILDLIFE. The famous (or infamous) javelina sub-adults were removed from the vicinity of Madrona Ranger Station on April 1, the day after the end of the open season on this species, and were released two miles northeast of Monument Headquarters. They found the "old" Cactus Ranger Station in less than a week, and moved in on Ranger Nowanstine, until forcibly discouraged. On the 25th they failed to appear, and evidence pointing to pignapping was found, and we believe that the parties removing them are known. Our problem is to decide whether or not it is worth while to make an issue of this, resulting in the return of the pigs, and continuing to suffer their presence in one or another of the residential areas on the Monument.

FOREST FIRE PROTECTION. Considerable time has been spent during the month by the Custodian and Ranger Fulton in preparing for the fire season, which officially begins May 1. Almost a week was spent in attempting to locate a qualified packer, but no applications have been received except from young boys, or totally inexperienced college students. A portion of the supplies needed are on order, but as we lack information as to allotments for equipment, purchases of needed items has not been made. Bids for hay and grain were circulated, and will opened April 28; we understand that hay has taken a decided price drop locally. Part of the desired cooperators outside the monument have been interviewed, and expressed willingness to act in emergencies, but do not wish to bother with formal appointments, and the inevitable "papers". Mules were brought in from pasture on April 25, and will be shod before the first, but there is a probable delay of one or two days in taking the first Fire Control Aid up the mountain, as we wish to make another effort to obtain a packer.

The Coronado National Forest has had their lookouts and patrols on duty for the past three weeks, anticipating one of the worst fire seasons in recent years, due to drought, and increasing recreational travel in the mountains of this part of Arizona.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

~~Sunset Crater~~ NATIONAL MONUMENT

Flagstaff, Arizona

28 April 19 47

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Sunset Crater National Monument for the month of April, 1947:

Visitors this month: 815 Travel Year to date: 5192

Travel: The total number of visitors for the month, although slightly below that recorded for April of 1946, shows a 100% increase over last month. Thus it appears visitation is following closely the parallel of travel reported from points on Highway 66 and 89 which is consistently on the increase. Observation of only a couple days this month indicate that the present method of estimating the non-registrants, using the 30% figure is very conservative. No change in the ratio to be used will be made until study can be given over a much longer period.

Roads: The Saginaw Manistee Lumber Company discontinued the use of the entrance road about the middle of the month. This removed the hazard to the visitor of having to meet the large logging trucks on the narrow cinder road. The company's road crew bladed the road from Highway 89 through the monument and past the east boundry continuing some distance down on the Wupatki back road. This left the entrance road in fair shape. However in the deep cinder the road is very soft with a number of deep chuck holes. Due to the disturbance of the road bed the Sunset - Wupatki connecting road is now impassable to the average visitor. They will be discouraged in attempting the back route until such time as work and weather permit some type of maintenance that will pack the bed and remove the soft cinder shoulders thrown up by the blade. At the present time it is almost impossible for a car to turn out of the single track. This continued closing of the inter-connecting road, without doubt is having a definite influence on both the Sunset and Wupatki travel.

General: Plans for temporary housing are progressing slowly. Work will be completed on the tent houses as soon as materials and the tents are available. A tentative location for the housing has been chosen.

During the latter part of the month Ranger Upton has been driving from Wupatki to Sunset on week ends giving interpretative information to the visitor.

Work on the letters for the Sunset cut-out-type signs will begin as soon as material can be obtained.

One mile Thunderbird markers have been re-erected on Highway 89. Stabilization of the entrance marker foundation will be required where water has washed away part of the supporting road shoulder as soon as the job of getting settled at Sunset permits.

Interpretative Services: Pending establishment of living quarters, interpretative services were offered on the last two week ends of the month. Bob and Bee drove up to Sunset on the 20th and 27th, remaining for the day. From one to six cars were in the area almost all of the time. Of this number of visitors only a small percent registered. The ice cave came in for as great a share of interest as did the crater itself. This is possibly due to the long established type of advertising and of the local interest in the cave. At such time as trails leading to other features can be developed, considerable more interest will be aroused and greater appreciation of the monument will develop. A number of parties climbed to the summit in spite of the high wind and disagreeable weather.

Publications on Hand: Sunset Crater 2-fold leaflets on hand - - - 900 Copies.

Robert F. Upton
Ranger In Charge

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

~~Tonto~~ NATIONAL MONUMENT

Roosevelt, Arizona

25 April 1947 19

Memorandum for the Regional Director.

Following is the monthly Narrative Report for Tonto National Monument for the month of April, 1947.

TRAVEL - 1912 persons visited the monument during the month; of these 1097 visited the Lower Ruin and 10 the Upper Ruin. 38 states were represented, two Canadian provinces plus Sweden, Belgium, England and France.

PERSONNEL - Custodian E. C. Cipe was forced to resign, because of illness, on 5 April. Charlie Steen arrived at the monument to relieve him on 2 April.

N.P.S. officials. - Assistant Chief Forester Walker and Assistant Regional Forester James were here on 13 April to look over the proposed fence change. Mechanic Stonehocker arrived with the long awaited fancy trailer on the 15th. We took two days to unload the trailer and get it into position. At one point in the game, when both trailer, tractor and the trailer house were teetering on the well known brink, none of us would have given more than four bits for the whole works but we finally got the job done.

OTHER GOVERNMENT OFFICIALS - H. K. Townes , Entomologist for the Department of Agriculture: Miss Peg Inness and E. L. Perry, U. S. Forest Service: District Ranger Pomeroy of the Tonto National Forest.

WEATHER - Temperatures have been fairly low for this time of year and most days have been windy. Traces of rain fell on the 3rd and 4th; not enough to settle the dust. Roosevelt Reservoir is very low and is being drained. The level of the reservoir is falling about eight inches a day. Apache and Canyon Lakes are being kept near the capacity mark at the expense of Roosevelt for the former are deeper and narrower and less water is lost by evaporation. There is talk of rationing both water and power in the Salt River Valley this summer.

GENERAL - Ranger Bull attended the Chiricahua Fire School and was gone from the monument from the 7th to 12th inclusive. The exhibit room has been pointed and painted; a small shelter built for the 3 Kw generator; the fire wall of the exhibit building painted with Aquella; some hand work done on the entrance road; and we have started to work on the trailer house.

WILDLIFE - The birds, bugs and beasts are about to crowd us out of the canyon. The hills are swarming with all sorts of pleasant and unpleasant wildlife. Two javelinas were seen by Joe Bean last week and a rattlesnake and several Gila Monsters have been seen on the trail to the ruins. A coral snake was caught on the steps in front of the exhibit building on the 23rd. Within the past few days two batches of young quail have been seen - about fifteen in one and ten in the other. There are young phoebes, canyon wrens and swifts in the cliff over the Lower Ruin.

ACT OF GOD - One hot afternoon the grease soaked canvas cover tied over the gasoline powered washing machine decided that it had had enough and started to burn. Before the fire was discovered and put out the rubber rollers had become a total loss. Otherwise I believe the machine is not much damaged. The machine has been out of commission for several months.

PROJECTS FOR NEXT MONTH - We shall put the house trailer in habitable condition and connect power plant to dwellings. The house trailer is in excellent condition and needs little more than some tightening and painting.

UNNECESSARY COMMENTS BY THE ACTING CUSTODIAN - This was my first station when I entered the Park Service some thirteen years ago. I arrived at Tonto with an official inventory which included only one Coleman stove, one Coleman lamp, a hammer and a saw. In addition to that there were a few picks and shovels left here by the S. P. which the Service knew nothing about. Travel in those days was about one sixth the present travel and I seem to recall many a pleasant afternoon when there was nothing to do but twiddle my fingers and look at the beatiful view. Now, I find, those days have departed - down the drain no doubt. What with all the modern improvements (one is constantly out of order) there is enough to keep three of us busy. This is not the good old days and I am tired of a custodian's life. There is much too much to do.

Charlie R. Steen,
Acting Custodian

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
TUMACACORI NATIONAL MONUMENT
Box 2225, Tucson, Arizona
Tumacacori, Arizona

April 27, 1947.

MEMORANDUM for the Regional Director,
Region Three.

Follows the monthly narrative report for Tumacacori National Monument for the month of April, 1947:

WEATHER CONDITIONS: Precipitation was .20. Maximum temperature of 92 occurred on the 16th and 17th. Minimum of 30 occurred on the 23rd. Weather has been unusually dry, quite windy, and colder than usual. The late freeze on the 22rd was distinctly unseasonal.

MAINTENANCE: The floor of the north arcade of the museum building was hornited. Young Arizona Cypress and Eucalyptus trees were planted in the residence area. A sotol was planted west of the museum. An old tool cache was altered and made into a very acceptable paint shed, so that combustibles are now out of the museum in this shed. The patio garden fish pond was given its thorough annual cleaning. A screen was built between the door of the men's comfort station and the residence driveway.

INTERPRETIVE SERVICE: 1130 visitors went on 212 guided trips through the mission church and grounds, receiving an average of 36.67 minutes per trip. 1885 visitors received combined Information and Interpretation Service in the museum lobby, patio garden, and view room. 1955 persons visited the museum.

INCREASE OR DECREASE IN TRAVEL: April travel of 2080 visitors was much higher than in recent years, but has been twice exceeded, by the 2571 for April 1938, and 4,850 for April, 1939 (the month the museum was dedicated).

VISITORS: March 31 - Professor Glenn E. Nelson, of the University of Arizona history department.
April 3 - Sahuarita School, with 36 pupils and teachers.
April 4 - 15 members of the famed Sierra Club.

GENERAL PUBLICITY: On April 15 Mr. and Mrs. Herbert Ullman, of River Forest, Illinois, were in taking colored movies for Coronet Instructional Films. They will have sound added, will be part of the movie "Spanish Influences in the U. S.," and will be released to U. S. primary and secondary schools.

Considerable publicity came out in Southern Arizona papers regarding the new post office at Tumacacori.

Letters to the editor were written to the editors of the two Nogales papers, asking for donations of old dated prints of Tumacacori, to help complete our photographic record of Tumacacori. The publication of these letters has to date resulted in receipt of two old photographs, with promise of some others.

INSPECTIONS: On April 23 and 24 Architect Kenneth M. Saunders was in to go over development problems, and specifically to confer with the contractor who is to rebuild the roof over the nave of the church.

GENERAL: After only 287 years of European culture in southern Arizona, Tumacacori now has a post office. We are on the map! The post office opened on the 16th of the month, in the Mission Store, a couple of hundred yards from the mission, and its existence is due largely to the enterprise of the energetic store proprietor, Raoul Valenzuela.

~~Tuzigoot~~ NATIONAL MONUMENT

~~Clarkdale, Arizona~~

~~April 28~~ 1947

MEMORANDUM for the Regional Director
Region Three

Following is the monthly narrative report for Tuzigoot National Monument for April, 1947.

Visitor Total: 1296 visitors hit Tuzigoot hard enough this month to break both previous April highs--896 in 1946 and 890 in 1941. The museum was open to the public 9 hours each day, and contacts were made of every party which visited the museum, and every party seeing the ruins during visiting hours.

Guide and Contact Service: An average of 19 minutes each for 284 ruins parties and 21 minutes each for 341 museum parties kept all hands busy. During the week of Fire School at Chiricahua attended by Ranger Richert, Custodian Cotter contributed two days to keep the service at the museum uninterrupted the whole seven days.

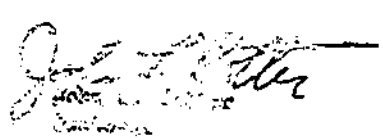
Personnel Time: Museum: 118 hours 55 minutes. Ruins: 83 hours 40 minutes. Total time for Custodian, 125 hours; for Ranger Richert: 82 hours 20 minutes.

Park Service Visitors: Park Service personnel and friends of the Park Service included Technical Assistant James E. Rasbach of Jefferson National Expansion Memorial, St. Louis, Missouri (from whom it was learned John M. Weidman, 1946 Summer Ranger at Tuzigoot has just received an appointment as Historian at the Jefferson National Expansion Memorial), Naturalist D.S.King of Region Three who introduced us to his father, W.R. King, and Mr. A.E. Buchenburg, whose further suggestions and advice regarding our stabilization problems at the ruins were greatly appreciated. Tuzigoot was also visited by the mother of the U.S. Ambassador to Great Britain. Mrs. Douglas, who has long been a friend of Tuzigoot and the Verde Valley, recalled that on her previous visit in 1943, the Custodian was concerned over the imminent arrival of his first offspring, and was amused to discover her next visit found him equally concerned--over the second.

Stabilization: Tuzigoot faces the loss next month of the services of our expert repair man and adobe specialist, Felix Macias, who is leaving for California. His place will be taken by a Yavapai Indian who worked on the original excavation and "stabilization" in 1933-34. Stabilization progress meanwhile has been excellent, with the 4-1 adobe-cement mix, plus gravel temper and venetian red tinting to kill the cement color, working the best yet. Photographs of progress are being kept current.

Maintenance: Tuzigoot is still up against the failure of the contractor to furnish the remaining 700 feet of 2-inch pipe needed to complete replacement of the worst section of the water line to the Monument. Luckily, with the end of the frosts, the line has suffered fewer breaks, and we have managed to keep it in operation.

Work has begun on the development of the trails system at the ruins in keeping with the Master Plan, and bitumuls mixtures and crushed rock surfacing is being laid. A dangerous slope on the west side has been eliminated and a retaining wall for the new grade conttructed at the edge of the hill. By next month, it is hoped that all but wheel-chair invalids can make their way around the ruins and even see Tuzi, the 700-year-old baby.



We are pleased to report the additional receipt of Army surplus, including a large office desk, file cabinet, "jerrycans" and a pair of 8-foot boat hooks. With our new equipment in place, we have observed that it is now possible to cross our combined furnace room-and-office without touching the floor.

Last week, with the aid of a hot tip from a youngster whom we slipped four bits, we located the purloined directional sign missing now two months. It had been used as a surf board by some imaginative kids and had ended up stranded on a rock dam half a mile down the Verde from the bridge. By painstaking unwarping and repainting by Ranger Richert, the sign is now remounted at its old stand.

Project Completed: Just as she had completed the Herbarium the day before the first Miss Cotter was due, the HCWP has again won a thrilling race--this time to complete a new slide talk on The Indians of Arizona for Region Three before the arrival of our second infant. More darned excitement.

Project to be Promoted: The Custodian has used the prospects presented by the fine new Master Plan for Tuzigoot, just completed by Region Three, to arouse a mighty desire on the part of the Verde Valley Chamber of Commerce and Yavapai County leaders including State Senator Sam Head, Ernel Garrison and V.V.C.C. Secretary Thomas R. Jones to see the new road projected for access to Tuzigoot from Highway 89 completed. If no way can be found to use Federal funds for this road it is hoped that the chief land owner, who is already interested, will be persuaded to give a right-of-way to the County for the construction of the road over his property.

Free Literature Supplies: All supplies of this material are now completely exhausted at Tuzigoot.

Walnut Canyon NATIONAL MONUMENT
Walnut Canyon National Monument,
Flagstaff, Arizona.
April 27, 1947

19

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities in Walnut Canyon National Monument for the month of April, 1947:

Weather. Dry and windy. Fire danger is higher this year than any of the 53 years the Weather Bureau has been operating in Arizona. The average winter snowfall for Flagstaff is nine feet, but we have only had 1.74 inches of precipitation this year.

Visitors. 1,099 of the 1,658 visitors were contacted at t he Observation Point and sixty botany students from the Arizona State Teachers College were conducted on the ruins trip. About 909 visitors made the ruins trip unattended, and 161 picnicers, in 33 parties, used the picnic area.

Noteworthy Visitors. Jack Cotter; A. E. Buchenburg; David Jones; Bob Upton; Jimmy Brewer; Don Erskine; H. Lellesgard and his photographer, Stan Davis; Hunter Stratton, former employee at Chiricahua, and Mrs. Stratton; Bill and Katherine Wilson of Rainbow Lodge; and, Homer Hastings.

Activities. A light plant was installed and temporary light fixtures are in service at both residences; a telephone was installed at the ranger's residence; the custodian spent two days, and the ranger spent one, at the USFS fire school; the boundary fences were inspected and some repairs made; the ranger spent four days helping Custodian Brewer move and set-up some surplus equipment at Navajo; considerable spring cleanup of grounds and picnic area was accomplished; the custodian spent several days acquiring information concerning the proposed physical improvement program of rehabilitating the roofs of comfort station and administration building, rehabilitating the water line, rehabilitating the telephone line, installing an electrical distribution system, and improving the picnic area.

Government Publications On Hand. 1,500 2-fold leaflets, 450 Location Maps No. 6, 275 NPS Briefs Maps and 10 Glimpses of the Nat'l Parks.

Paul L. Beaubien
Acting Custodian

WHITE SANDS

Alamogordo, New Mexico

April 21, 47

MEMORANDUM for the Regional Director,
Region Three:

Following is our monthly narrative report for the month of April.

VISITATION:	This month	Travel Yr. To date	Fiscal Yr. To Date
Total Visitors	11,961	40,927	74,443

April has been outstanding from the standpoint of the number of visitors, the total exceeding all records in the history of the monument for a like period. This has been in spite of unusually heavy winds which always cut in on our attendance. The figures of course include our Easter sunrise services and Play Day activities. Play Day attendance, we feel, was cut at least in half by adverse weather conditions. Assistance from other agencies and from the City of Alamogordo made possible our Play Day without any delay, which seemed inevitable with blocked roads but two days before. The event was again staged without any major accident or injury. We were favored with visits by Hon. Thos. J. Mabry, governor of the State and Mrs. Mabry; also the State Supt. of Public Instruction, Mr. Rhodes, and Associate Regional Director E. T. Scoyen. The assignment of additional service personnel from adjoining areas assisted materially, and to their help is due much of the success of the event.

We were favored with a visit by Foresters George Walker, Stew Carlson, and Bill James, which we enjoyed; and we sent these boys merrily on their way in one of our pick-ups, the Regional car being left in the garage here for repairs. The car is now again in the hands of the Foresters and enroute to Big Bend.

Several visits were made by army personnel on inspection trips, and various government and state officials passing through. One visit from the Army resulted in a request for permission to bivouac two regiments from Fort Bliss the latter part of the month. Permission was, of course, granted and we expect these visitors the next few days.

PLANS, MAPS & SURVEYS: We are attempting a general clean-up with a view to disposing of all remaining surplus property and getting the material which we have obtained from surplus up in top shape. We have only minor items now left, and it is hoped distribution may be made of this in the near future.

PUBLICITY: General publicity for the area has been beyond all reasonable expectation, with Play Day and Easter services being featured in newspapers throughout the entire Southwest.

COMPLAINTS: No complaints, either written or verbal, have been received on either the Park Service or the White Sands Concession.

ROADS AND TRAILS: The heavy winds previously mentioned have, with the extremely dry weather, given us considerable road trouble. There has been only a trace of moisture which increases our road maintenance problems materially. On several instances we have had to close off portions of the loop because of drifting sand. The City of Alamogordo, Prestridge Lumber Company, and the Army Air Base all came to our rescue with road patrols and operators for a two-day period. We estimate that the workdone in these two days by all of this donated equipment would equal a minimum of two weeks work with our own equipment. The antique Weir in its lack of efficiency is certainly dramatized when working right along beside the modern road machines. One can scarcely realize the difference without actually seeing the results.

CONCESSION: The White Sands Service Company has experienced a month almost parallel to that of our own experience; and in spite of the cold and wind on Play Day all of the booths made a nice profit for their efforts.

RANGER SERVICE: Ranger service has been held to a minimum from the standpoint of contacts, with all of the outside work necessary to carry on. Fire training was given Ranger Chittum in connection with the Lincoln National Forest school at Ruidoso, and Ranger Stool is enroute to the Big Bend fire school. Museum contacts have been merely as we could snatch a few moments; and certainly has not been consistent with the service desired.

It is very probable that with the increased visitation we shall have to design split-shifts to take care of the increasing number of visitors who come after closing time. It is hoped that the Temporary Ranger will relieve the strain on the regular ranger force.

UTILITIES: It is very probable that with the very dry condition existing throughout the entire region our water problem in Alamogordo may become drastic. A check on the Dog Canyon springs indicates a flow much less than has been observed in the several years over which we have watched it. It is, however, no less in proportion, if as much, as other springs supplying the supply of Alamogordo. With this minimum flow Dog Canyon will supply an excess of water for White Sands for many years to come. We have been questioned several times of late by Army personnel regarding this flow, and I suspect they may again be considering the possibility of using this water to supplement the dwindling amounts obtained from the City. We shall keep in close touch with this water situation and advise your office in case of any new developments.

TRIVIA: It was necessary for Carroll Reeves, our clerk, to resign due to the heavy winds and dust conditions, leaving us without a clerk once more. Carroll hopes to seek a location where there is less dust and more moisture than has been experienced during his five-months here. He will probably never know the thrill of living in the Southwest once one gets by the first 40 or 50 years.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Wupatki NATIONAL MONUMENT

Flagstaff, Arizona

28 April 1947

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Wupatki National Monument during the month of April, 1947:

Visitors this month: 396 Travel Year to date: 1947

Travel: The total of visitors for the month has shown a slight increase over April of last year. In spite of the poor condition of the entrance road, the interested and the most appreciative continue to come. Vicinity reports all indicate a consistent increase in visitor travel and it bids fair to be a travel year of record.

Weather: Winds and dust storms remind us that the windy months are here. Only traces of precipitation are recorded. How we wish April had brought its proverbial showers instead of this super-abundance of 'warm, dry and clear.'

Roads: With the absence of rain the entrance road continues to grow worse. Visitors complain of the rough and dusty road. However after the situation is explained nearly all leave in a much more agreeable mood than upon their arrival. Reports still come from Flagstaff of visitors who after starting in a short way have turned back because of the road condition. Because of the roughness of the road and the dryness of the deep cinder it was felt advisable to keep the back road from Sunset to Wupatki closed. As a result no travel has come in from that way, except for the occasional brave soul that comes down in spite of the road signs.

General: Electricians worked one day at the Custodian's residence completing wiring, tracing old lines and getting the installation in shape. Thus Wupatki has entered a new era, for the day of gas and oil lamps is past and electricity has taken their place.

Plans for the construction of temporary housing for Sunset is taking shape. This work will be completed as soon as necessary materials can be obtained and the tents arrive.

Considerable effort has been made to find a Temporary Ranger. Several students at Arizona State College, Flagstaff had expressed some interest. However because of the opportunity of summer work with better pay or the necessity of continuing school during the summer session, no applications have been received.

One mile Thunderbird markers were erected at the entrance of the monument on Highway 89. This completes the erection of highway entrance signs.

Publication service cards provided by the Southwest Monuments Association have been made available to the visitor. These have been placed in an appropiate location near the registry desks.

Mr. and Mrs. Rex Fleming, Photographers from Santa Barbara, California made a return visit to Wupatki the latter part of the month. Winds and overcast skies contrived to make this visit most discouraging. The Flemings last visit was in early January of this year. At that time they were able to get some excellent photographs of points of interest, both in color and in black and white.

Grazing: The C O Bar Company are moving their cattle out early this year. A count taken about the middle of the month showed a reduction from last month's 400 head to about 200 including calves. They advise that due to lack of rain and the resultant dry grass it has become necessary to move the stock to the summer range earlier than they had previously planned.

Water Supply: Both springs continue to show a decline in their flow. Heiser Spring fell from 1878 g.p.d. for March to 1763 g.p.d. for the current month, a drop of 115 gallons. Wupatki Spring, which has been showing a consistent monthly increase since January, has suddenly dropped from 822 g.p.d. for March to 467 g.p.d., a decrease of 355 gallons from that recorded for the previous period. It is evident the drouth is taking its toll of our springs.

N.P.S. Visitors: Ranger and Mrs. Aubuchon stopped for a short time at Wupatki on their return from Navajo to Walnut Canyon.

The Custodian met with Assistant Regional Director Davis, Regional Landscape Architect Cornell, Regional Architect Bennett and Regional Archeologist Reed on March 31 at Flagstaff for a short conference.

Signs: Letters for the remaindor of Wupatki cut-out type signs are in the last stages of completion.

Activities of S.W.N.M. Stabilization Laboratory: Additional work has been done toward the installation of running water at the new laboratory site in the Heiser Spring area. On the 11th Collaborator Buchenberg went to Grand Canyon to make further preliminary examination of the Tusayan Ruin, preparatory to recommendations for its stabilization. Mr. Buchenberg has given generously of his time in assisting with the electrical installation at Wupatki.

Publicity: At the request of Editor Platt Cline of the Arizona Daily Sun, Mrs. Jones is submitting local news items for publication in Flagstaff's daily paper.

Richard VanValkenburg in a recent issue of Desert, gave a description of a curing ceremony of some of the local Navajos. This took place during the CWA excavation at Wupatki in 1933-1934.

Publications on Hand: The few remaining issues of the informational leaflet are being held in reserve for use as literature for informational requests.

Information Leaflet -- Wupatki - - - - - - - - 45 copies.

Region Three Office--Mr. King			

the Fort Apache Indian Agency, Whiteriver, Arizona, who asked for advice from the National Park Service on the proposed stabilization work at Kinishba ruin on the reservation.

King handled publicity for a Boy Scout Jamboree which was held in the Santa Fe Plaza on May 17. Organizational arrangements and committee work was donated by Region Three Office personnel to the Boy Scout Committee, headed by Chairman E. T. Seoyan, and Honorary Chairman M. R. Tillotson.

A letter was written attempting to coordinate preparation of radio scripts from the National Park Service areas around Flagstaff to be used in a proposed series of broadcasts this summer by the local station.

Further correspondence ensued with a scientist who is proposed as a collaborator in Regions Three and Four.

Accessions - Other than Library

A quantity of excellently printed herbarium labels was received from Eastern Museum Laboratories.

Research and Observations

Steen accomplished further work on the report of excavations at Tonto National Monument before the war. He mailed several textiles to Mrs. Kent at the University of Arizona, including one specimen, of very fine weave, which was possibly of modern origin. Inspection of the fiber and thread manufacture showed it to be prehistoric.

Sullivan had correspondence with a scientist who applied to collect vertebrate mammals at White Sands this summer. He also furnished for the Custodian at Montezuma Castle information concerning requirements for Christmas check lists of birds.

Region Three Office Loan Library

Accessions for the months totalled 85, included 18 books, 36 pamphlets and 34 periodicals.

There was received from the Custodian of Casa Grande a copy of a pamphlet written by the first Custodian of that Monument. This pamphlet forms a valuable addition to the history of the monument, and the Casa Grande staff is to be complimented for their alertness in obtaining it.

Further correspondence was had with the Director's office concerning an attempt to obtain historical library material for Montezuma Castle.

Southwestern Monuments Association

The warranty deed and abstract of title for the Hubbard Mound property near Aztec Ruins were received from the Custodian, Aztec. These papers were reviewed by the lands division of the Region Three Office.

and were forwarded by Executive Secretary King to the Director for review. Thus changes and corrections can be made and the documents put into acceptable shape before the Association actually completes purchase of the property for eventual donation to the United States Government for addition to the Monument.

Recording Secretary Allan Vedder worked three days per week throughout the month handling all Association work, and considerably relieved the burden formerly carried by Executive Secretary King.

The final draft of the manuscript, the cropped illustrations, and the dummy of "Poisonous Dwellers of the Desert" by Matt R. Dodge were prepared by King and forwarded to a printer on May 28, for a quotation price to publish. An attempt will be made to obtain two other quotations. It is hoped the booklet may be issued within a very few weeks.

Unusual Activities - Conferences

Members of the Archeological and Natural History interpretive staffs of Southwestern National Monuments and Region Three Office met with administrators in a conference concerning the suggested closing of Montezuma Castle to visitors, due to progressive deterioration of the ruins and danger to visitors. Definite decision was to limit visitors in the ruin at one time to ten people. The decision to close the ruin was deferred pending further study and comment from the field and from the Director's Office.

Planning

Conferences were held with members of the Landscape Architect Division on Master Plans for Saguaro, Chiricahua, Tonto, Sunset Crater, and Wupatki.

Visitors

Custodian Bright, Ranger Onstott, Ethnologist Alice Marriott, Former Regional Geologist Gould, and Mr. and Mrs. Horace M. Albright.

Ruins Stabilization

Steen spent May 15 through 30 mostly on stabilization affairs, including the preparation of records of Aztec Ruins for binding.

A letter of instruction regarding stabilization recordation was prepared to the Custodian, Tuzigoot. A suggestion was made to the Custodian, Wupatki, that the objectionable restoration at Nalakihu be removed, if possible, during this fiscal year. Arrangements were made to send Archeologist Aide Lancaster to Tumacacori for the month of July to supervise stabilization work there and to provide relief guide duty during the custodian's absence.

An additional $400 of stabilization funds were allotted to Tuzigoot.

Steen took delivery on a small cement mixer purchased locally, and will deliver it to Chaco Canyon the first week in June.

Projects for Ensuing Month

King will remain in the office handling reports due at the end of the fiscal year and other routine.

Steen will leave the office during the first week of the month on a week trip to Chaco Canyon, Aupatki, and the Fort Apache Indian Reservation.

Sullivan will spend the first two weeks of June at Organ Pipe Cactus aiding in a cattle count there and becoming acquainted with the area, and then will visit the Santa Rita Range Reserve, Tumacacori, Chiricahua, White Sands, and return to Santa Fe on June 22. The remainder of the month he will spend on routine activities as well as rearranging and cataloging the pamphlet and reprint files of the library.

Dale S. King,
Naturalist.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Arches NATIONAL MONUMENT

Moab, Utah

May 27, 1947

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of May, 1947:

GENERAL: The Board of Director's of the Denver and Rio Grande Western Railroad are planning a trip through the scenic areas of Southeastern Utah, which will include Arches National Monument. The trip was originally planned for May 30th to June 1st but has been postponed until probably the middle of June. It is being sponsored by Mr. Charles Redd of LaSal, Utah, who will be assisted by the various civic organizations in the vicinity.

TRAVEL: Our travel for the month was more than double that for May, 1946 with a total of 117 cars and 397 people. This brings our travel year to date to 1589 visitors and the fiscal year to 2564. We had representatives from 24 states, as well as Italy, British Columbia and the Canal Zone.

INTERPRETIVE SERVICES: Thirty eight parties containing 90 people were contacted at headquarters, 25 parties of 78 people were contacted in the Windows section, four guided trips were taken with 17 people and consisted of trips to the Devil's Garden, Delicate Arch and Windows sections. Two of these trips were community educational trips for Moab business people, one to the Devil's Garden and one to the Windows. The response was small but those who attended enjoyed the trips and it will help considerably in getting accurate information for visitors in Moab. Three illustrated talks were given by Ranger Walker during the month, one to a group of Boy Scouts, and the other two to interested visitors. Fifteen persons were in attendance.

ROADS: The Utah highway department installed regulation junction and directional signs at the Windows road junction during the month. No extensive maintenance work was performed on the approach road, which is still in good condition.

MAINTENANCE AND CONSTRUCTION: Mileage and directional signs at headquarters and the Windows road junction were repainted. Picnic tables were repainted and garbage cans installed at the picnic area and parking area in the Windows section.

On May 15th, with the help of Ranger Redd of Natural Bridges, the 500 gallon water storage tank was put in place at the Windows parking area . During my absence at Mesa Verde, Ranger Walker made the distribution line installation and now that we have the stake truck back from Chaco Canyon, we should be able to complete the installation and haul water for same. We hope that our visitors will have water available there within the next week.

A spur telephone line was strung from the quarters to the office, by Ranger Walker, and we now have a phone there, thanks to the Midland Telephone Company who kindly loaned us an army field set until we can get proper equipment for a permanent installation.

RESEARCH AND OBSERVATION: The group of Brigham Young University professors and students making a plant and animal survey of the monument returned to headquarters on April 27th after what was stated by them, to be an enjoyable three days. Word recently received from Dr. D. Elden Beck, a member of the party and collaborator with the Service, states that spiders and birds collected have all been identified and that the identification on mamual and insect collections is going forward rapidly. Plant collection has been sent to the National Museum for determination.

WEATHER: Rain fell on April 27th and May 9th, 10th, 14th and 15th. Heavy winds have blown intermittently all month and the thermometer registered close to 90 degrees on several occasions.

MISCELLANEOUS: Estimates were submitted for Arches and Natural Bridges National Monuments for the fiscal year of 1949.

RANGER SERVICE: Billy Walker of Moab, Utah entered on duty as temporary park ranger on May 1st at 8 a. m. Arches will now be a two man monument for the balance of the season.

NATIONAL PARK SERVICE VISITORS: Superintendent Rose of Mesa Verde National Park and Messrs Cornell, Bennett, Lassiter and Thomas of Regional Office visited the area on May 7th.

Howard Young and Phillip Kearney of Regional Office stopped by during my absence at Mesa Verde and then again on May 20th on their way back to Santa Fe.

Assistant Regional Director Davis and family stopped by on the 22nd of May, enroute to Washington on annual leave. I was at Mesa Verde at the time and was certainly sorry to have missed them.

Custodian Brent Finch of Colorado National Monument and his wife stopped on May 19th and 23rd and I missed them on both trips.

SPECIAL ACTIVITIES: A trip was made to Chaco Canyon National Monument on

May 9th to pick up war surplus equipment assigned to Arches and Natural Bridges National Monuments. Heavy rain occured on the night of May 9th and I slipped and slid into Chaco at 2 p. m. on the 10th. It took me 4 hours to drive the 26 miles from Blanco Trading Post to headquarters. Equipment was loaded and I left Chaco at 8 p. m. accompanied by Custodian McNeil and Ranger Guillett in the Chaco pickup. After covering 12 miles in 2 hours we gave up the ship and returned to headquarters in the pickup. It looked like it would be three or four days before we could move the truck so I returned to Arches in the Chaco pickup, thanks to "Rawhide" McNeil, on May 11th. Ranger Guillett drove the truck load of equipment to Mesa Verde for the fire training conference and we exchanged trucks there. I had heard many stories about the Chaco mud but had to experience same in order to appreciate their authenticity.

The custodian was absent from the monument from May 19th to 23rd inc. in attendance at the Fire Training Conference at Mesa Verde National Park. The meeting was a great success and I returned sadder but wiser, I hope, as I found that the participants have no use for a Sergeant-at-Arms or his assistant.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
AZTEC RUINS NATIONAL MONUMENT
AZTEC, NEW MEXICO

24 May 1947

MEMORANDUM for the Regional Director,
Region Three, National Park Service.

There follows the report of activities in Aztec Ruins for May 1947.

WEATHER: Our April showers failing to appear during that month have certainly come during May when we have had 8 days of recorded rainfall with a total precipitation of 1.97 inches. Generally speaking we have had ideal tourist weather and altho our travel is slightly under that of a year ago we have not had the large attendance of school children which we had during May 1946.

MAINTENANCE. The drainage ditch has been functioning quite well with little attention beyond flushing, required.

The adobe-cement wall at the residence is undergoing repair by placing a new coat of cement-sand mixture over its entire surface. With no maintenance during the war years the wall was in quite poor condition.

Monument entrance signs were stained and varnished.

SPECIAL ACTIVITIES. The 8 May Engineer Diehl and Architect Barnett surveyed the "Hubbard Mound" area for acquisition by the Southwest Monuments Association to be added to the Monument. The 17 May we transported the model "Casa Rinconada" from Farmington to Chaco.

VISITORS. Foresters, Walker, Carlson and James visited the 18th. Chief Ranger Brown, Grand Canyon and Mrs Brown were in the 24th.

Interpretive Services. There were 499 visitors in 121 trips shown the ruins and 855 were visitors to the museum in 198 trips.

Increase in travel. We have had 855 people in 262 cars from 37 states, Wash. D.C., Norway, Switzerland, Japan, Germany, Holland, Africa. These visitors from foreign countries are bona fide residents, not returned "GI's". Travel during May a year ago was greater by 136 visitors, but for the current year travel increases regularly.

AZTEC

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
BANDELIER NATIONAL MONUMENT
SANTA FE, NEW MEXICO

May 28, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of the activities at Bandelier National Monument for the month of May, 1947.

Weather and Roads

Precipitation for the month of May was slightly above the 13 year average of 1.35 inches with a total of 1.80 inches being recorded this May to date. The maximum temperature was 95° on May 3 and the minimum was 35° on May 12. Thunderstorms were experienced on 7 days. Generally warmer weather was experienced during the first week than during the rest of the month.

Road conditions have improved as a result of the precipitation. Maintenance-man Wendland graded the entire approach road following the showers of May 4 and 6 and again after May 11. The roads and trails crew continued repair work on the oiled surface section leading into the Canyon.

Travel

Travel was light during the first two weeks as a result of the weekend storms and cool weather but increased the latter part of the month to total 2534 visitors. This figure is 398 less than that for May, 1946. 573 motor vehicles, two bicycles, and six horses were used as transportation by visitors. 432 visitor days were reported by Frijoles Canyon Lodge.

Interpretation

105 conducted ruins trips averaging 61.8 minutes each were attended by 1050 people. Visitation to the Stone Lions, Painted Cave, and Ceremonial Cave is beginning to increase. Preparations for the training of three seasonal rangers for interpretative work have been completed in anticipation of their arrival by May 30.

Fire School

The Bandelier fire school was conducted May 14 and 15 by Forester Walker of the Director's Office, Regional Forester Carlson and Forester

James of the Region Three Office. Custodian Ted Sowers of Great Sand Dunes, Custodian Everett Bright of Gran Quivira, and the entire Bandelier staff attended the schools. The general consensus was that the new plan of conducting fire schools produced more complete training of the monument staff than did the centralized schools attended by key personnel.

Forest Fire Protection

The fire control crew reported for duty May 1. Nine days of high fire danger marked the period April 28 to May 27, with the fire danger meter zooming close to the explosive zone on April 28 and May 3 to start the fire season off with a bang. Showers during mid-May reduced the danger for a time, but drying winds have nullified the benefits of the moisture and the danger is again rising.

Radio equipment to be used for communication during fire season to supplement the undependable telephone system has arrived. Technicians from Los Alamos are making the installation.

Personnel

Fire Control Aids Samuel A. Crem, Ollie A. Wendland, Crescencio Toribio, and Katherine M. Keefe entered on duty May 1. Mrs. Keefe resigned May 20 so that she might devote full time to the care of Joseph Clarence, newly adopted son of Ranger and Mrs. Joe Keefe. Mrs. Margaret F. Custott was appointed to fill the position.

Rubel Duran and Jose Reuben Quintana began work May 14 as per diem laborers on roads and trails. Edd Wendland, foreman, was appointed to the recently approved position of maintenance-man, roads and trails, on May 28.

Visitors

Naturalist Sullivan of the Region Three Office visited us on May 18. Charles H. Gould, former Regional Geologist, spent May 28 at Bandelier. C. B. Talbott, Travel Editor for the Cleveland News, spent May 28 at Frijoles Canyon Lodge.

School groups visiting Bandelier during May included two groups from St. Michael's in Santa Fe, two bus loads from St. Catherine's Orphanage in Santa Fe, two groups from Pojoaque, and the Indian Life Class from Adams State College in Alamosa, Colorado.

Visitors from the following foreign countries registered at Bandelier during May: Gatun, Canal Zone; Nassau, Bahama Islands; Lima, Peru; Basel, Switzerland; Paris, France; England; Puerto Rico; Holland; and Los Alamos.

Frijoles Canyon Lodge

The Lodge opened all facilities for public use, except the saddle horse concession, on May 1. Mr. Bob Anderson came on May 15 to operate the saddle and pack horse concession for Mrs. Frye. Only 161 visitor days have been reported by the Lodge to date, but reservations for almost all available space have been made for the Memorial Day weekend.

Construction of the walk-in refrigerator room has been completed and we are now awaiting the installation of the compressor and cooling system by Alfords of Albuquerque.

Electrical System and Power House

Approval of an allotment of $6000 has been made by the Director's Office for an addition to the power house to house the additional equipment we now have to furnish the necessary electrical current for the Lodge and monument facilities. Plans have already been drawn.

The shop has been rewired for 3 phase motors and the power drill, grinder, planer, circular saw and band saw obtained from surplus have been installed. Meters have been installed in the power house and collection from the Lodge for current used by the concessioner will be made effective May 1. Overhead fluorescent units have been installed in the offices and plans made to install fluorescent lights in the museum should funds become available.

Buildings and Grounds

Four tents have been erected in the campground for use by per diem laborers, fire crew members, and seasonal rangers. Installation of a "Stop" sign by the portal by the office is being made for protection of pedestrians visiting the comfort stations. Weeds in the ruins area have been treated with "Ammate" weed killer.

CANYON DE CHELLY NATIONAL MONUMENT
CHINLE ARIZONA

May 29, 1947

MEMORANDUM for the Regional Director, Region three.

The following is a report of activities at Canyon de Chelly National Monument during the month of May, 1947

Weather

The early part of the month was dry and hot with a Maximum temperature of 95 degrees. The canyons stopped flowing much earlier than usual and travel was possible May first. On May 7 we had the first of much needed rainfall which continued thru May 8 for a total of .81 inches. Another nice shower came on May 23 which filled most of the tanks and raised the spirits of everyone. Nights have been cool with a Minimum of 37 degrees.

Administration

Office work connected with the approach of the end of the fiscal year has consumed some time. One trip was made to Gallup New Mexico to pick up equipment transferred to this area. The Custodian was absent from the area while attending Forest fire training conference at Mesa Verde National Park from May 19 to 27. Two days of annual leave were taken in order help open the Fishing season.

Maintenance

New signs were constructed for the Spider Rock area and for the new approach road which by-passes the Chinle School. A red went out of the Dodge Army 2x4 while in the canyon on Ruins stabilization work. By the use of our Dump truck and equipment and able help of Mechanic Art Freeman of the Indian Service we were able to Tow it thru seven miles of the Canyon. A new motor was installed at the Consolidated Indian garage with both the custodian and Ranger Benson assisting when time permitted. Roads have been graded to White House, And some work was done making a passable route as far as Mummy Cave. The curve north of the Headquarters was widened and the material used to surface other sections of the ruins road. Maintenance of roads and buildings has been carried out as time permitted thruout the month.

Changes were made in the Sewer line in the custodians residence and they may now be cleaned and unplugged with a great deal less effort.

Ruins Stabilization work was done at Mummy Cave with the building of a trail bypassing the talus slope, and the stabilization of weakend walls caused by undermining of squirrels and rats.

Visitors

Dr. Thomas B. Noble Jr. and Mrs. Noble arrived during the early part of the month to accompany and assist the custodian in making a reconnaissance and ruins Survey. It was necessary for him to return to Indianapolis sooner than he expected but he will return in the Fall. Dr. Noble is a photographer of note and has done some very fine work in photographing the Canyons. He has graciously offered us the use of any of his pictures for publication.

Mrs. Mary C. Wheelwright also visited the area in search of more etimological and Navajo folklore information.

N.P.S. Visitors

Charles Carter, Landscape Architect from the regional office arrived on May 27, and was shown over the area by Ranger Benson.

Travel

A continued increase is shown over last years travel with 268 visitors this month as compared with 181 last year. Both travel and fiscal years continue to show diseable increases.

Of the 268 visitors, a total of 168 persons comprising 16 parties were guided to the ruins or in the canyons. 36 were given interpretational talks at headquarters. A total of 57 hours was spent in contact work.

General

While the Custodian was at Fire school, A Mrs. W.R. Berger of Fort Worth Texas was nipped by a Navajo Dog belonging to Billy Jake. A more detailed report will be made when I have more fully investigated the Accident. Mrs. Berger was taken to the Indian Service Doctor for treatment where it was found that the skin had not been broken.

Two trips were made into the canyons to bring out sick Children. One was dead by the time Ranger Benson reached the Hogan. The other was brought to the Indian Service Hospital and is still seriously ill.

SOUTHWESTERN NATIONAL MONUMENTS
Capulin Mt. NM
COOLIDGE, ARIZONA

ADDRESS REPLY TO THE SUPERINTENDENT

May 25, 1947

Memorandum for the Regional Director,
Region Three, National Park Service,
Santa Fe New Mexico,

There follows a report of the activities in and around Capulin Mountain National Monument,

Visitors are estimated to be fifteen hundred for this month.

Bringing total travel year to date six thousand nine hundred sixty, and total travel, fiscal year to date twenty one thousand nine hundred sixty,

Many schools have visited the Monument this month, the largest of which was from Claude Texas, This was the Claude Texas high school which had thirty seven pupils, several chaperons and bus operator this group all came in one bus and as far as I know was the largest bus ever to drive up to the top. The operator told me it was a thirty thousand pound rig and fourty four passenger, He had no difficulty at all in making the trip,

Special Vitibor,

Mr Sullivan was a welcome visitor to the Monument for a few days during the latter part of the month, was making some pictures for the Service, This was Mr Sullivans first trip here and if I don't miss my Guess He's a good Egg, Welcome back,

Pamphlets on hand for free distribution — Eleven thousand,

Weather,

Has been some cooler than average possibly account of the many rains during the period Six good rains totaling one and three fourths inches making extra lush vegetation and Ranchers tell me that we now have the finest grass for this time of year that we have ever had,

Roads on the Monument have been kept in first cl, class condition all during the month,

All the five markers with their inserted descriptions glassed in and puttied are now complete and some are in place, This in the past has proved to be very interesting to tourists and many have told me they were very very good

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
CASA GRANDE NATIONAL MONUMENT
COOLIDGE, ARIZONA

May 25, 1947.

MEMORANDUM for the Regional Director
Region Three.

There follows the narrative report for Casa Grande National Monument for May, 1947.

General: Water, or rather the lack of it is the main topic of conversation amongst the people of the valley. The water table is still dropping gradually, although it has had some relief because of the shortage of electricity causing fourty pumps to stop pumping. .06 inches of rain on the 21st. was the only moisture we have received since January.

Weather: The really hot weather is upon us, and it has been noted in the decline of our visitors to the area. The first days of the month brought us record temperatures. 113 degrees temperature on May 3, made this a degree hotter than our maximum temperature of last year. The Weather Bureau says this is the hotest weather experienced in May in the last 52 years. A low minimum of 43 was recorded on the 28th. of April. All our maximums have been over 83 degrees.

Administration: The Bids for the refinishing of the untility area buildings were opened in the Regional Office on May 8th. The one bid was too high for the amount of money alloted for the work. Therefor architect Saunders visited the area on May 24th., and he along with the Custodian, inspected the roofs. The Cant Board was found to be in place and we believe now that we may be able to re-submit bids which will be within reason, and thus use the money alloted for the job.

Maintenance-Man, James L. Beahr retired on May 1, and shortly thereafter left for St. Louis. Thus with this retirement, position No. 4 was terminated, and maintenance position No. 6 was established and filled by Carroll Dale Barnett. Mr. Barnett is a veteran who was captured by the Japanese on the third day of the war and was a prisoner of war until the occupation of Japan. He and his wife are occupying quarters No. 2-4.

Chief Clerk Louis Castellum spent four days here with the Custodian and Ranger Schuft straightening out the Casa Grande inventory. In this connection, Ranger Schuft worked on the inventory here until May 20, and departed the following day for the other Monuments and eventually for the Regional Office where he will be on duty for approximately two months.

Visitors: May 1947 - 2043; May 1946 - 2062; Travel year to date - 1947- 27,828; 1946 - 20,294. This is a slight decrease over May 1946. This is also a decrease from April 1947, but is to be expected when the hot weather sets in. Also, it is to be noted, that the visitors are unwilling to spend as much time out at the ruins due to the heat.

Interpretive Services: Of the 2,043 visitors to the area, 979 made the Ruins trip in 130 parties averaging 41.6 minutes per trip. 778 made the Museum trip in 127 parties staying an average of 24.6 minutes. 1,064 people came into the area to picnic, look through the museum, or bring friends, but did not visit the ruins. 4 members of the armed forces are included in the total of visitors who went through the ruins.

Maintenance: The outdoor doors and window shutters and the main gate were creosoted, and the various large trees were prunned of dead branches. The coolers in the administration building were put in condition for the summer season.

Trips Taken: Mechanic Stonehocker made a two day trip on the 6th. and 7th. to Organ Pipe Cactus Nat. Mon., and back, delivering the grader; and another trip to Phoenix on May 21, to distribute bid forms for the dump trucks.

N.P.S. Visitors and Visitors of Note: May 4, Supt. and Mrs. Bryant, Asst. Supert. Garrison of Grand Canyon, and Mr. and Mrs. Metzger were in for a brief visit. May 5th., Archeologist Steen was in to pickup the balance of the Surplus Equipment for Tonto Nat. Mon. May 10, Custodian Egermeyer of Saguaro Nat. Mon. dropped in on his way to Organ Pipe Cactus Nat. Mon. May 12, Mrs. Ella Whitemore Gamble and party visited the ruins. Mrs. Gamble is the daughter of the first Custodian here at Casa Grande from 1889 to 1899. May 12-15, Chief Clark Castellum was in the area, to set up the new equipment accounting record and inventory our non expendable equipment. May 14, Custodian Baubien of Walnut Canyon delivered Mr. Castellum's car. May 22, former Directors and Mrs. Horace Albright visited the Monument for a few hours. It was our first visit with them since they left Yellowstone some 18 years ago. May 24, Architect and Mrs. Saunders were here, He was here inorder to check over the roofing job in the utility area.

Leave Taken: Archeologist Schumacher took sick leave for one day, on May 9.

Nature Notes: The tall Saguaro on the trail to the ruins had two large flowers on May 7, and it is still full of buds. All the other

ocotii have stopped blooming, but there are a few blooms still on the Ocotillo. A large Barn Owl was chased into the middle room of the Casa Grande on the morning of the 24th., by several hawks.. Several young of the latter have been noticed around the ruins this month. Due to the cool nights, the bats have been rather scarce during the past two weeks. Archeologist Schumacher has brought the archeological fact file, and the fauna and flaura files up to date, and slightly revised them. When Mrs. Ella Whittemore Gamble was here, Mr. Schumacher interviewed her, and copied the pamphlet in her possession concerning the ruins and her father.

~~Chaco Canyon~~ NATIONAL MONUMENT

Bloomfield, New Mexico

May 26, 19 47

MEMORANDUM for the Regional Director, Region Three,
National Park Service.

There follows the report of activities in Chaco Canyon National Monument for the month of May, 1947.

There were a total of sixty-four visitors to Chaco Canyon this past month. The number of visitors is less than those for March of this year, and only about one third the number for April. The people came in 30 automobiles from the states of California - 5 cars, 11 visitors; Colorado - 3 cars, 7 visitors; Michigan - 1 car, 2 visitors; Minnesota - 1 car, 2 visitors; New Mexico - 11 cars, 27 visitors; New York - 3 cars, 4 visitors; Oregon - 2 cars, 4 visitors; Texas - 1 car, 1 visitor; Utah - 1 car, 1 visitor; Washington - 1 car, 2 visitors; and Wisconsin - 1 car, 3 visitors.

Of these visitors, all sixty-four took a trip through the ruins, and formed a total of twenty-seven trips. Forty-one visitors listened to the museum lecture, and formed a total of eighteen parties. Total time, 38 hours and 15 minutes, Custodian - 23 hours and 45 minutes, Ranger - 14 hours and 30 minutes. Fifty-nine admissions were sold, and no complimentary tickets issued.

One written request was answered.

The coldest during the month was 30 degrees on the 30th of April, and the warmest was 92 degrees Fahrenheit on the 4th of May. An unusual amount of moisture fell during the month. The Navajos state that the grass is the best that they have seen in years. There was .32 of an inch of rain fell on the 7th, .99 of an inch on the 10th, .44 of an inch on the 11th, and .42 of an inch on the 23rd of the month. Altogether, nearly a fourth of an usual year's rain fell during the month. As a result, the roads were a quagmire on more than one occasion. Custodian Mahan of Aztec National Monument started out with a loaded truck on the evening of the 10th, but bogged down about 10 miles from Chaco. He borrowed the Chaco pickup and went home. It was seven days before the loaded truck could be recovered. The trucks

were exchanged at fire school. The bad roads have discouraged visitors. They have been seen nearing the turn-off on the oiled roads, but one look at our approach roads, and on they go down the oiled roads. One car of visitors arrived just as the rain started on the evening of the 9th, and were not able to get out until the morning of the 13th. (He plans to carry chains after this!)

Usual routine jobs were done during the month, plus some others. The light plant has been installed in the power house, and is functioning perfectly. The roads have been graded and the two large signs were painted. A new roof was placed on the wire room. It had blown completely off during a strong wind storm.

Ranger Guillet attended the Fire School at Mesa Verde National Park, and reported a fine conference. Trips were also made to Aztec, Farmington and Gallup.

Custodian Townsend, from Aztec Ruins National Monument, arrived one evening with a model of Casa Rinconada which is a gift for our museum from the Museum of New Mexico. Archaeologist Vivian, at Chaco, made the model, several years ago.

The fence crew struck more solid rock than was anticipated on the east side of section 25 which delayed them considerably. They now have the east and south side of section 25 complete, and have taken down part of the south side of section 20, and have again struck tough going, more rock than was expected, on the west side of section 29.

The Trader proudly reports that the Navajos are finding it profitable to trade at his post and are coming in to do business from further and further away. The wool season is about over. Most of it he sold, but some of it he kept so that the Navajos will not be out of wool while making rugs later in the year. Though he did get a few, due to the wool season rugs came in slowly this past month.

Projects for the ensuing months:- install the water pump when it arrives, paint the office and out buildings, get the roads in good shape after the rains, try to push the fence job to completion.

At the end of the month, there were on hand:-

Free two-fold leaflets on Chaco Canyon, approximately.....9800
Southwestern Monuments folders....."..... 250
National Park Location Map, number 6....."..... 600

Irving McNeil, Jr.
Custodian

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Chaco Canyon ..... NATIONAL MONUMENT

Bloomfield, New Mexico

May 26 ..... 19 47

MEMORANDUM for the Custodian,
Chaco Canyon National Monument.

There follows the report of Mobile Unit activities in your area during the month of May, 1947.

GENERAL:

Work has been somewhat expanded with the hiring of additional men. Good ones are hard to find now! One left us for a job herding sheep, eight man days were lost to shearing a nd one and a half work days were lost to rain.

Three jobs are now going: Chetro Ketl, Pueblo Bonito and Pueblo Alto. Lack of transportation is hampering us somewhat; Al Lancaster is spending most of his time at Pueblo Alto, I'm looking after the work at Chetro Ketl and Bonito and the days we haul sand from Bloomfield everybody is on foot.

Some additional work has been done on the ceiling mats and one broken jar found on the surface at Pueblo Alto has been restored. We are ably assisted here by Sylvia McNeil.

Better service is being given by the photographic contractor and prints have been assembled for the record sheets.

CHETRO KETL:

The biggest single job here has been repair of the back wall at balcony level for a distance of 180 feet. The wall is offset at this point and from one to three feet of it have been rebuilt. Minor repairs have been made to the rest of the wall surface, doorways and beam sockets. One additional room to the east remains to be done.

Wall patching, repairing of beam sockets, replacement of lintels and capping was completed on the three story rooms numbers 53, 54, 59 and 46.

North walls of the two story rooms, 49 and 50, have been repaired and capped and the east wall of 63 where the ceiling mats were recovered has been repaired and the room partially backfilled to prevent ponding of surface water.

PUEBLO BONITO:

Six man days were spent in clean-up the first part of the month. Weeds were cut from all rooms and the visitor trail.

Work was started May 1st on the extensive repair job to the back wall. This is an area of two unnumbered rooms north of 87.

PUEBLO ALTO:

Despite the transportaion difficulties it was deemed advisable to make emergency repairs here at this time. No capping or minor patching is being done, all work being confined to large breaks at ground level.

Two large breaks in the west wall where beams appear to have been dug out are now repaired. In the interior three overhanging sections have been supported.

Two large wall breaks have been repaired with reinforced integral members so that the walls will retain their original broken appearance. A third break, large enough to walk through upright, is now being stabilized in this same manner.

In the coming month it is planned to complete the work at Pueblo Alto, possibly in the first two weeks, finish the back walls of Chetro Ketl and Bonito and get to room 70 in Chetro Ketl which we missed this month. We also hope to start on emergency repairs at Del Arroyo.

Gordon Vivian
Archaeologist

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Chiricahua
NATIONAL MONUMENT
Dos Cabezos, Arizona

May 26, 19 47

MEMORANDUM for the Regional Director, Region Three.

Following is the Narrative Report of activities at Chiricahua National Monument for May, 1947.

Weather Conditions. Three very light rains have fallen during the month, but the weather can still be considered very dry. The first five months of 1947 have been much the driest of the seven ~~months~~ years last recorded here.

Approaches to Monument Area. Approach roads are all rough and dusty but are in fair shape otherwise.

Interpretive Services. 951 visitors were contacted in the museum in 222 parties.

Increase in Travel. 1076 visitors arrived at Chiricahua this month. While this is a drop from last month, it compares favorably with May of 1946 when only 635 visitors were recorded. Travel continues to run far ahead of any previous records, being 64% ahead of travel last year.

General. A small group of Girl Scouts from Tombstone, under leadership of Mrs. Clifford Plew, is making a short stay in the campground. Due to the water shortage, this small group is the only one scheduled for the season so far.

Special activities. Custodian Cocke made a trip to the Heart of Rocks with Stan Davis, photographer for Lollesgard Specialty company, who does a lot of photographic work in the Parks and Monuments. Ranger Sharp made a trip to Tucson and Bisbee to get small butane tanks which could be packed up to the lookout via burro, and to get other materials & supplies.

Police Protection. Much of the afternoon of April 27, Sunday, was spent by the Custodian and Ranger in getting a pick-up load of Drunks off the mountain and off the Monument, where they were endangering the considerable number of Sunday visitors. Since there was little likelyhood of their being prosecuted by the US court in Tucson, they were turned loose with a sober person to drive, and told to leave the Monument.

While in Bisbee, Ranger Sharp discussed cooperation in law enforcement by local authorities, with Sheriff Pruitt of Cochise County. The Sheriff was cooperative and apparently will help out with our traffic violations at least. " Just tie 'em to a tree and call us up " was his comment.

Maintenance. Another painful trip was made over the telephone line to Portal (18 miles , on foot), by Ranger Sharp and Operator Marble, early in May, to get the line in shape for fire season. It worked perfectly for one night, was out the next morning. Investigation showed that a pack rat had gnawed through the insulation of the wires beside the lookout, and these were repaired. The line has worked so far.

Publications on Hand.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

El Morro NATIONAL MONUMENT

Ramah, New Mexico

May 25, 1947

MEMORANDUM FOR the Regional Director, Region Three.

There follows the report of activities in El Morro National Monument for the month of May, 1947.

WEATHER: The long dry spell in this vicinty was broken by four days of rain on May 6th. 9th. 10th. and 11th. with a total precipitation of 1.25 inches. Maximum temperature reached 88 degrees on May 3rd. and the minimum dropped to 25 degrees on April 28th.

TRAVEL: 229 Visitors, in 71 cars, from 19 states and one foreign country visited the monument. A 2% decrease is noted in the number of visitors as compared with the same report period of 1946, but a 4% increase appears in the number of cars. A total of 221 visitors made the tour of the inscriptions and the guide time amounted to 51 hours and 45 minutes. Seven people arrived for information only.

APPROACH ROADS: Both roads from Gallup and Grants are dry, but very rough, due to the lack of maintenance after the recent rains. A letter from Senator Sidney Gottlieb states that the survey for the re-alignment of Highway 53 will be started this fall.

SPECIAL ACTIVITIES: After a great deal of uncertainty concerning the exact date of their filming, The Harry Sherman Pictures Inc. finally arrived on May 25th. and spent two days shooting a great many action scenes using the Rock as a background for all their shots. Joel McCrea and Frances Dee were the feature actors, being supported by Charles Bickford and Joe Callela. The company, 130 strong, were especially careful in observing all regulations of the area, but this lone Custodian had many a headache in herding the hordes of spectators. Never again without enough personnel to cover the whole area.

GENERAL: One trip to Albuquerque was made to interview my seasonal Ranger. Two trips to Gallup were made for supplies and repair of the pickup. Several attempts were made to contact Chaco Canyon by radio and on one occasion Chaco was received, but apparently Chaco was not receiving El Morro, so it was definitely a one sided conversation. More difficulty has been encountered with the old battery charger and consequently contact will not be made until I can charge the batteries.

Number of copies of free publications on hand as of the end of May, 1947.

GRAN QUIVIRA

GRAN QUIVIRA, NEW MEXICO

MAY 26, 1947.

The following is a summary of activities for the month of May, 1947.

Visitors this month totaled 223
Travel year to date 1177

General. Temporary duty assignment of three days, May 5, 6 and 7, were spent in the Region Three Office discussing various problems relating to this monument. Also attended the annual fire control training meeting at Bandelier National Monument on May 14 and 15. Both assignments were highly beneficial to the custodian and much needed information and training was received.

Weather. Strong winds and frequent dust storms again prevailed throughout the month. Only one light shower of .25 of an inch fell on May 23. The remainder of the month has been very dry. High temperature was 92 and low 36.

Roads. Both approach roads are in very poor condition. Sands have drifted so deep in some sections that travelers find it necessary to use the open fields to reach the monument. Very little maintenance work is now being done by the State Highway Department.

Travel. Visitor travel remained about the same as for the previous month of April. Instate visitors numbered 182 and outstate visitors 41. There were a total of 66 cars with instate numbering 53 and outstate 13. 5 people walked out to the monument. From all available information many travelers are discouraged from making the trip to Gran Quivira due to poor roads.

Guide and Contact Service. A total of 223 visitors were conducted through the ruins on 66 guided tours. The average time spent by each party was 55 minutes. Total contact time of 60 hrs, 55 mins.

Maintenance and Administration. USDI 1-13850 was taken to Mountainair for a general overhauling and it is now in good running condition. Received and answered several inquiries regarding the monument. In spite of a very dry season a bumper crop of weeds is in full sway and constant deweeding of the ruins rooms is necessary to keep them in a presentable condition.

Publications Report. 1050 two-fold leaflets on hand. No other free or for sale publications on hand at this monument.

Everett W. Bright

Custodian.

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
GREAT SAND DUNES NATIONAL MONUMENT
MOSCA, COLORADO

May 26, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in Great Sand Dunes National Monument for May, 1947.

WEATHER: Usual spring weather has occurred with considerable moisture falling. Snow fell on April 27, May 11 and 15. We have had twelve days of rain, several lasting all day. Winds have been moderate. Warmest days have been around 75 degrees. Snow still covers the tops of the Sangre de Cristo range and the San Luis Valley is now flooded with water from canals and the artesian wells. It would appear to be a good season for the farmers and ranchers. Grass in sheltered places is about five inches high. With the Medano Creek having a heavy flow which extends to the edge of the south section of the Sand Dunes, all cottonwood trees are leafed out and many wildflowers along this creek are in bloom.

TRAVEL: One thousand and sixty-five visitors in one hundred ninety-nine cars visited the Sand Dunes during this report period. Fourteen states and Mexico were represented. One member of the armed force was counted. Five hundred fifty-two persons took advantage of the camp and picnic grounds and of these fifty-five camped overnight. Five written requests were answered.

INCREASE IN TRAVEL: For May, 1946, the record shows 84 cars and 338 visitors.

ROADS: Roads continue rough and dry. The county has done no grading during this moist spell. A drag has not yet been obtained from surplus material at Chaco Canyon National Monument, and the monument roads are in poor condition.

COMPLAINTS: Verbal complaints are still pouring in because of the unfinished rest-rooms at the headquarter area. Its unnecessary to remark that its extremely lucky for headquarter area to be located in a wooded section. No further action in regards to these rest-rooms has been received from Region Three Office.

Many complainta have been received concerning both county and monument roads. Most embarrassing situation has developed in the camp-ground where many cars become stuck in the sand. It is hoped that a drag may be found and with a great deal of manual labor, this section may be made safe.

ARCHAEOLOGY: The Alamosa State College found their first Folsom point at the blow-out site they are excavating on the Zapata (Linger) Ranch. This announcement appeared in the Alamosa paper.

NATIONAL PARK SERVICE VISITORS: Messrs. Cornell, Bennett, Lasciter and Thomas visited this area on May 12. The entire day was spent in going over various sites for Master Plan studies.

NEWSWORTHY VISITORS: The Cheyenne Mountain School of Colorado Springs with a group of forty students, who camped overnight; a Boy Scout Troop from Pueblo of fifteen, who also camped for one night; the Geology Class from Western State Teachers College, Gunnison; the Fort Garland School with two hundred pupils and ten teachers, who held their annual school picnic at the Sand Dunes; and Mr. and Mrs. Clem Collins of Denver.

SPECIAL ACTIVITIES: A trip was made to Bandelier National Monument on April 29. The Sand Dune pickup I-13834 was delivered to Bandelier for further transfer to the Montezuma Well addition of Montezuma Castle National Monument. One day was spent in loading surplus equipment on the Bandelier stake truck. This surplus equipment consisted of two desks, filing cases, book case, chairs, one 3 KW light plant, blitz cans, tool boxes and a bench vise. Returned to Great Sand Dunes in the stake truck with Clerk Bean, who helped in the unloading.

On May 5 a talk was given to the Mosca, Hooper and Moffat Service League at Mosca, Colorado. Fifty slides on "Monuments of New Mexico" were shown to fifty people after a banquet. Great interest was evident and request for a repeat performance was made for a later date at the town of Blanca, Colorado.

The Bandelier National Monument Fire Control Training Conference was attended from May 13 to 16. This meeting was a success and a great deal was learned and accomplished.

ACTIVITIES: Little has been accomplished this report period because of trips and the tremendous increase in number of visitors.

Routine jobs and duties were performed around headquarters and the two camp-grounds.

The repaired dump truck and air compressor were obtained from the Heide Garage. The compressor was set up and is functioning in A-1 condition. The new rings and valve grinding job have put the dump truck in excellent shape.

The Dodge 4x2 was taken to the Heide Garage and it was necessary to tow it part of the way as it refused to function. Necessary repairs are being made.

The monument typewriter was taken to Bandelier National Monument and from there it is to be sent to Santa Fe for cleaning and repairing.

A rough floor was laid in the outside storage shed and a new roof now makes the shed usable. Tar paper was nailed to the four sides and then shelves and racks were built to house all fire tools for the monument.

The garage was cleaned for storage space of surplus equipment, until office is painted and all material can be properly located.

The camp-ground was posted with fire warning signs, and one was placed on the bulletin board at headquarters.

A start was made on filling up the exposed water line.

The light plant room was cleaned and cleared for the alternate 3 KW light plant. It is hoped that time can be found to install this plant in the near future.

The ceiling and walls of the office received their first coat of paint. As weather, wind and sand allows, the floor will receive its first coat of paint, and the office equipment can be moved in.

The Globe-Wernicke folders which were ordered in February for the filing system have at last arrived.

Proof-read and checked an article on Chaco Canyon National Monument, from the National Parks Association in Washington, D.C.

PUBLICATIONS REPORT: There are on hand, 80 informational mimeographed leaflets. Leaflets were mailed to the Rocky Mountain Motorists, Inc., at Denver, Colorado Springs, Greeley and Pueblo, Colorado, upon request. At the request of Region Three Office, leaflets were sent to Salt Lake City, for the Utah Centennial Exposition.

NATIONAL PARK SERVICE

Montezuma Castle National Monument
Camp Verde, Arizona

May 24, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows the monthly report of activities at Montezuma Castle National Monument for the month of May 1947.

Visitors this month - 1515; travel year to date - 9958.
Visitors May, 1941 - 847; travel year 1941 - 4211.

General May has been another busy month with brisk travel and several unusual activities. Travel for this month is below that for April which is typical of the trends at this monument. However, the total for this month is 669 ahead of the 847 counted in May, 1941.

Weather Storms in the week of May 10th - 17th brought our first moisture since November. Total rainfall for the month was .59 of an inch. The maximum temperature was 106° and the minimum 37°.

Approach Roads A considerable portion of the road from Roosevelt Dam via Pine and Payson is under construction and very rough. The road from Flagstaff via Mormon and Stoneman Lakes is reported to be in good condition. Approaches via Alternate Highway 89 from Flagstaff or Prescott are in excellent condition.

Signs A sign stating "Montezuma Castle via oiled road - 32miles" was erected at Sedona. Another sign stating "Open 8:00 - 5:00 daily" was added to one of our signs where the Cornville cut-off leaves Highway 89. These signs were furnished by the Arizona Highway Dept.

Administration A Ford pick-up, I-13821, was received from Walnut Canyon for use at Montezuma Well. We also received an office desk, a chair, and a transfer case for use at that area. Two fire buckets, two pike poles, and an electric grinder intended for industrial use came from Walnut Canyon.

Our supply of two-fold informational leaflets is reduced to less than 100 and since April 28 they have been given to those who write or ask for them.

Two trips to Prescott and one to Flagstaff have been made in behalf of Montezuma Well.

A seperate file to be kept at this monument but covering matters pertaining to Montezuma Well has been established.

William L. Howenstine reported for one month's assignment beginning May 5. Mr. Howenstine had just finished an assignment at Saguaro

National Monument and he quickly adjusted himself to our routine.

Ranger Schroeder made an over night trip to Seligman to confer with W. B. Back on numerous matters pertaining to Montezuma Well.

Park Ranger Pete Schuft was here May 22 to check our inventory and apply "Decal" numbers to all accountable equipment.

Publication sales for the Southwest Monuments Association totaled $93.53 for the month with a lost of $1.61. The loss was derived from shortages in the change box used by the visitors for making their own change.

Protection A stray horse was rounded up and driven out with the help of the Indian laborers on May 13.

Montezuma Well Cloth warning signs were posted on five buildings at Montezuma Well and cloth boundary signs at two different points.

Someone has recently done some digging in the back of the upper room in the cave bordering the Well. About a handful of coarse grass stems and dry brown leaves resembling corn leaves and two corn cobs were removed and left at the cave mouth.

A contract to drill a well to a maximum depth of 200 feet near the residence has been awarded to Riley Lee of Cottonwood and operations are expected to begin in a few days.

Bids have been circulated for a project to rehabilitate and modernize the quarters.

A new wire gate was constructed and a sign reading "Please Close Gate" was posted.

The semi-annual Pioneer's Picnic was held at Montezuma Well May 4. The Morome High School Band was present and it is estimated that 70 people attended including the band. There were speeches commending the "old timers" and encouraging activities in the Verde Valley.

Patrol trips were made to Montezuma Well on April 27 and May 3, 4, 9, 11, 17, 18, 21, 22, and 23. As soon as our seasonal ranger has reported for duty it is planned that Archaeologist Schroeder will devote his attention mainly to Montezuma Well.

Ruins Protection The Castle Dwellers had earth floors in their rooms and for many years the grind of visitor traffic has been reducing them to dust. This finally had accumulated to a depth of an inch or two and this was carried out on the clothing of both visitors and guides on every trip.

With the aid of four Apache Indians the dust was removed and lowered in buckets down the cliff where it was carried to the truck. The dust was replaced with a three inch layer of soil and bitumuls mixture.

After this was dry it was coated with undiluted bitumuls and a liberal application of sand. This treatment was given to eight rooms and the area on the fifth story balcony where visitors walk. The project was completed except for two man-days of work on May 16. We still have to sweep up excess sand on the floors and remove it from the building.

Newsworthy Visitors Mr. A. E. Buchenberg and party were here. Mr. Buchenberg was interested in checking the samples of experimental soil mortars supplied this monument several months ago.

Mr. Smith of the Desert Museum, Palm Springs, California was here. On the same day we had two representatives of the Burton Holmes travelogue.

Mr. Charles E. Fisk, pioneer in Grand Canyon and Zion Canyon paid this monument a visit.

National Park Service Visitors Chief Clerk Castellum was here May 10 to check our records and give instructions on clerical matters. When he departed we followed him nearly fifteen miles to make sure he could get back to Tuzigoot in their "Theezy" truck.

Foresters Walker, Carlson, and James were early morning visitors on Sunday May 11. They took a routine trip through the Castle and spent considerable time at Montezuma Well.

Ranger Pete Schuft was here on May 22.

Service To The Public Travel dropped slightly this month to give us 1518 visitors who came in 468 cars. Tickets were sold to 498 people, complimentary admission tickets were issued to 39 people, 33 children climbed without charge, and 4 members of the armed forces were admitted free.

Contact Time Total contact hours, 188.00. Hastings, 38.50; Leding, 49.50; Schroeder, 42.00; Howenstine, 58.00. Guided trips were made 143 times for 572 people and 862 visitors were contacted in the museum in 225 groups. Information service outside ruins or museum was given to 297 people. There were 8 picnic parties for 66 people.

3 - Montezuma Castle.

Montezuma Castle National Monument
Camp Verde, Arizona

May 25, 1947.

MEMORANDUM for the Regional Director, Region Three.

Attached is Archaeologist Schroeder's report of activities at Montezuma Well for the month of May, 1947.

Homer F. Hastings,
Custodian.

Montezuma Well
Rimrock, Ariz.

May 24, 1947

MEMORANDUM for the Custodian, Montezuma Castle.

There follows the monthly report of activities at Montezuma Well for the month of May, 1947.

General Six trips were made to Montezuma Well during the month, one by Custodian Hastings and five by the undersigned. Visitor contact records were started May 4.

Visitors this month - 333.

Administration Considerable time has been devoted to clean-up and miscellaneous repair.

Boundary and protection signs were placed at various points and on buildings on the property.

A wooden shed was cleaned out and a lock put on the door so that it could be used fro storage purposes.

A wood gate, to be used for diverting water from the irrigation ditch onto the lawn, is in the process of construction. After its installation, it will eliminate the necessity of going ¼ mile up ditch to open the headgate whenever water is required for the lawn.

Mr. Hummel, a contractor from Prescott, surveyed the quarters on the property in order to draw up his bid for its renovation.

Protection A barbed wire gate was made to replace the old pole and wire gate on the entrance road and a temporary "Please Close Gate" sign was posted. Considerable cattle have been wandering onto the property through the old gate which often was left open by the public when the property was unattended. It is hoped that the new gate and sign will be a step toward eliminating this trouble.

Vandalism Custodian Hastings reported April 27 that signs of recent digging were evident in the large cave in the Well near the outlet. It appears that it was restricted to a small area near the doorway of one room and was barely below surface in its disturbance.

Research A trip was made to Seligman, Arizona May 19 and 20 to interview Mr. William Back, one of the heirs to the Montezuma Well property. Considerable information was obtained in regard to the history of the property as well as archaeological and geological data that he collected during his residence here.

Research was also conducted in the county records on this trip to obtain information concerning the water rights of Montezuma Well.

Service to the Public On May 4, the Verde Valley Pioneer Association held its semi-annual picnic at the picnic grounds a report of which was submitted on that date. An estimated 300 attended.

Contact Time Total actual contact hours, 8 hours during 5 days. Schroeder, 8 hours. We had 333 visitors who came in 81 cars, trucks and buses.

Award of Bid Notification was received that the contract for drilling the household well at the residence was awarded to Mr. Lee of Cottonwood, Ariz.

National Park Service Visitors Forestors Carlson, Walker and James visited the Well May 11.

Newsworthy Visitor Mr. Harold Weight, associate editor of the Desert Magazine, was here for a short visit May 11.

Accessions Mr. William Back of Seligman donated a book "Three Happy Vagabonds" by C. H. Shole to Montezuma Well. A chapter is devoted to Montezuma Castle and Montezuma Well. Though not a book reviewer, Mr. Back remarked that it was "A fairy tale of consifierable misinformation." After reading the above chapter, the undersigned can find no better way to express it.

Publications on Hand None have been assigned to this area.

Arches NATIONAL MONUMENT

Moab, Utah

May 30, 1947

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Natural Bridges National Monument for the month of May, 1947:

GENERAL: Ranger Rodd was absent from the monument from May 19th to 23rd, inc in attendance at the Fire Training Conference at Mesa Verde National Park.

TRAVEL: Travel for the month lists 18 cars and 50 people. A total of 74 people had signed the register during the period October 24, 1946 to May 16, 1947. Estimated travel for the same period on Form 10-157 was 60 people. Travel from May 16th to May 24th totalled 36 people.

ACCIDENTS: On May 8th I received a telephone call from Mrs. John Wiley Rodd of Blanding advising me that a visitor had died while on the trail in the monument. Upon investigation it was found that Mr. Dale S. Deane of Denver, Colorado, member of a party of four, had passed away at the spring near Owachomo Bridge. The doctor's report listed cerebral hemorrhage as the cause of death. Mr. Rodd assisted members of the party in the removal and shipment of the body.

WEATHER: Heavy rains occured on May 10th and 11th. The balance of the month was c.. and warm.

ROADS: The state maintenance crew graded the road from Blanding to the base of the Maverick Point hill during the first part of the month. The heavy rains on the 10th and 11th caused some damage and they again made a trip over the road with the grader. At this writing it is again in good condition.

RANGER SERVICE: John Wiley Rodd of Blanding, Utah entered on duty as Temporary Park Ranger on May 15th, at which time he made a trip to Arches for trunk and equipment for the area.

INTERPRETIVE SERVICES: Personnel was on duty only four days during the month. Four parties containing 36 people were contacted at headquarters and two parties consisting of 7 people were accompanied on trips to the bridges. Fourteen people visited the area unattended.

MEMORANDUM for the Director, Region Three

There follows a report of activities in this area for the month of May.

WEATHER: Fair and warm. 0.84 precipitation, including 0.32 snow on the 11th. High temperature was 90 degrees on the 3rd--low 32 degrees on the 10th and 11th.

VISITORS: 60 visitors arriving in 25 cars registered at the Headquarters area. 24 hiked to Betatakin in 10 parties, 21 in 7 parties viewed Betatakin via Sandal Trail, and 3 trips took 7 visitors to Keet Seel. Campground usage totalled 66 visitor days.

NATIONAL PARK SERVICE VISITORS: The following National Park Service visitors appeared here in this order: Irv. and Virginia Townsend on the 3rd--Bill and Trudie Bowen on the 10th--Fullers four on the 16th--Lon and three Garrisons on the 17th-- and C.D.Carter of Region Three Office on the 23rd to 27th.

FIRE CONTROL SCHOOL: The Custodian attended the Fire Control Conference at Grand Canyon National Park on May 6-7-8.

IMPROVEMENTS: Following the Fire Control School at Grand Canyon National Park Bill Bowen volunteered his days off to drive the Wupatki stake truck to Betatakin delivering the 950 gallon water tank to be installed here as an underground gas tank.

The power line from the tool house to Residence #1 is being elevated.

The entrance road was dragged between Shonto and Contact Station twice.

Two directional signs were repainted.

The pump required more attention.

PROJECTS FOR NEXT MONTH: Contacting visitors.

ORGAN PIPE CACTUS NATIONAL MONUMENT
AJO, ARIZONA

May 25 19 47

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities in Organ Pipe Cactus National Monument for the month of May 1947.

WEATHER:
The first week of the month broke all existing records for heat in Arizona. The first six days of May were over 100 degrees with a high of 108 on the 2nd and 3rd. It has now returned to normal with our average day about 90 to 93. Low for the period was 45 on the 12th and 13th. Although showers fell around us none was reported anywhere on the Monument.

TRAVEL:
May brought a distinct drop in travel here which is normal though at this time of year with visitors starting to seek the cooler climates. A few visitors continue to come and camping is popular at this time of year. Total travel for the month was 6257 bringing the travel year to 55575.

General:
Some much needed equipment was received this month, including a power grader. While this is in need of repairs it is usable and has been put into operation getting some of our roads ready for the summer rains.

We received word of approval of the full time maintenancemen position and we are now looking for a suitable man to fill it. Perry P. Bowden has been hired temporarily to catch up some of our much needed work.

A quonset hut was received and is is hoped to soon get it erected so that housing for all may be had at headquarters.

The Soil and Moisture Control fencing is getting along well, with a very good crew this year. About three and a half miles of fence has been built so far through very hard going. Word of $1500.00 additional allotment was welcomed as this will allow us to complete through the Agua Dulce Mts.

New cloth boundary signs have been placed along the most needed sections and more will be put up as time will allow. Several signs were repaired and painted.

Our horses were transfered to Saguaro for the fire season being picked up be Custodian Ogermeyer and Ranger Fulton.

VISITORS:

Visitors this month included Dr. Slevin and Dr. Wood from the California Academy of Sciences and Dr. Van Rosen of U.C.L.A. and Dr. Phillippe of Arizona University.

Projects for the Coming Month.

Our long awaited cattle count will be started on June 1 in cooperation with the grazing permittees. It is estimated this will take about two weeks

~~Saguaro~~ NATIONAL MONUMENT

~~Tucson, Arizona.~~

~~May 26~~ 19~~47~~.

MEMORANDUM for the Regional Director,
Region Three.

There follows the MONTHLY NARRATIVE REPORT of activities at Saguaro National Monument for the month of May, 1947.

WEATHER. Midsummer temperatures arrived on May 5, when 105 degrees was recorded at Monument Headquarters. This day was followed by a week of hot, windy, weather, which ended a cooler period, with a light rain on May 15 (snow, sleet, and hail at Manning Camp R.S.). Since that time we have had almost daily cloudiness, with frequent late afternoon or evening thunderstorms, accompanied by light precipitation, usually only a trace. Precipitation on 11 days since our weather station was put into operation at Mica Mountain Lookout on May 5 has totaled .30 inch. This type of weather is most unusual before the first week in July.

Special ACTIVITIES. On May 10 the Custodian made a trip to Casa Grande and Organ Pipe Cactus National Monuments, bringing back one of the O.P.C. horses for use during the fire season. On the 12th, Ranger Fulton made a trip to O.P.C. to bring up the other horse. Considerable time, and several hundred miles of driving made necessary by the telephone strike, was expended in attempts to obtain a qualified man to employ as Packer; most of the men who were able to do this work were unwilling to work for us a they expected another moving picture company in this vicinity during May. Considerable time and travel also were needed to later find a man willing to take a Trail Laborer job.

INSPECTIONS. Chief Clerk Castellum, of the Region Three Office, was here on May 16. His trip cleared up many of our problems, but we wish that he could have remained another day, to assist in several other matters pertaining to the mounting volume of paper work.

STATUS OF PRIVATE LANDS. Mrs. Marjorie L. Ellison, owner of Section 29, immediately north of the Monument Headquarters and within our boundaries, was in on May 2, to inquire as to the possibility of the National Park Service purchasing her holdings. She stated that it was her intention to list the property with real estate agents in the near future, as she most urgently desires to sell. In the Custodian's absence, Mrs. Egermeyer referred her to the Regional Director's Office.

MAINTENANCE. Work this month has been concentrated within the forested section of the monument. The telephone lines to Manhead and Mica Mt. Lookouts, and to Spud Rock and Manning Camp Ranger Stations were cleared of trees which fell during the winter, radio sets installed at Manning Camp and in the Mica Mt. Tower, antennae strung, and new leads for both telephone and radios run up the legs of the tower. Telephones were changed at Manhead and Manning Camp, but still the communications are very poor, failing after every rain. The Patrol Loop Trail on top of Mica Mt. was cleared of windfalls, and some work done on the trail to Spud Rock Secondary Lookout. All fire tools were overhauled, and the summer tool caches set up. All pack and saddle stock were gathered and shod, also are in the process of being shot for distemper, which seems to be prevelent in the valley this spring. The Fire-weather station was moved from Manning Camp up to Mica Mt. Tower, and put into operation May 6. One of the Windchargers was packed up the mountain, and installed inside the tower frame, at a point 45 feet above ground; this is now operating well, which renders it unnecessary to pack storage batteries from the tower to Manning Camp for charging. The evaporative cooler was brought from storage and installed on the roof of the Headquarters building. Cut-off switches for the light plant at Madrona Canyon were installed in the Ranger's residence and bunkhouse.

TRAVEL AND INTERPRETIVE SERVICES. Visitation to the area took a sharp drop after the hot weather set in. Only 1131 visitors, from 27 states, the District of Columbia, and England, arriving in 372 automobiles and one motorcycle, came out to see the Saguaros in bloom. Of these, only 220 persons, in 75 parties, were provided informational services at the Monument Headquarters. Due to termination of our temporary Ranger, and the work necessary to the beginning of the fire season, we have been unable to provide contact service on ten of the past thirty days, and only part-time contact on several other days, which would partially account for the drop in percentage of visitors contacted.

RANGER SERVICE AND OTHER PERSONNEL ACTIONS. Temporary Ranger William Howenstine was terminated on April 31, with sincere regret on the part of the Custodian. Bill had been a very fine contact man, well-trained in local botany, and extremely competent in handling visitors. He is presently filling in for a month at Montezuma Castle.

George W. Hilliard entered on duty as Packer May 6, and is doing very well on what, to him, is a new type of work. Experienced packers are just not obtainable, at least by us, this year, and George is learning the packing the hard way. He is well qualified to handle stock, and is rapidly picking up the rudiments of slinging packs, and says that he enjoys what, to him, is the easiest job he has had since his discharge from the Army. Andrew J. Rushing, who prefers to be known as Tex, was employed as Trail Laborer on May 22, and received a rude introduction to fire-fighting the following day. Richard R. Barney, who was terminated as Laborer on April 16, returned to duty as the SP-4 Fire Control Aid on May 1.

FOREST FIRE PROTECTION. The Custodian, Ranger Fulton, and Maintenanceman Ollie Barney packed up to Manning Camp on May 2, meeting Richard Barney, who had ridden up from their ranch the previous day. The following three days were spent in opening up the station, packing tools to the caches, installing radios and checking telephone lines and installations. Richard Barney began regular patrols on the 4th. Bi-weekly pack trips have been made since the 9th, principally to deliver hay and grain supplies to the storage shed at Manning Camp.

Daily lightning storms commencing on the 15th, finally resulted in a Class "A" fire which started the evening of May 22nd, discovered at 9:15 A.M. on the 23rd, and out by 2:50 P.M. of the same day. Total area burned was reported as .05 acre. With only one Aid on detection duty, and two other men available for suppression work, it was thought advisable to supplement detection coverage and at the same time determine if additional help would be needed to suppress the fire, so the Custodian and Ranger Fulton rented a plane and flew over the entire area, assurring the fact that only the one fire had started, and that it was apparently under control when observed from the plane. We have had no other fires since, but last night's storm resulted in four fires on the Coronado Forest's Catalina District north of us, one of these still not being under control 24 hours later. Fire danger readings have averaged in the lower portion of Class 3, with one days getting into Class 4; this is due largely to the small amounts of precipitation, which have kept the humidity up fairly well, and to light winds except on two days of the month.

ACCIDENTS. On May 16, while returning to Headquarters from Madrona Canyon, the Custodian, driving Regional Office Lincoln No. 13829 and accompanied by Chief Clerk Castellum, collided with a private car owned and driven by K. F. Hayden, of Tucson. No one was hurt, and damage to both cars was slight, consisting of one ripped fender on each. Cause of the accident was a blind hilltop, and the fact that the Chevrolet station-wagon was in the middle of a narrow road.

NEW EQUIPMENT. An 8 cubic foot Servel Electrolux was received and installed in the Madrona Ranger Station quarters, the old Perfex kerosene refrigerator being moved up to the bunkhouse. Two 4-pound CO-2 type fire extinguishers were received for building-fire protection.

PUBLICATIONS.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Sunset Crater NATIONAL MONUMENT

Flagstaff, Arizona

May 28, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Sunset Crater National Monument for the month of May, 1947:

Visitors this month: 995 Travel Year to date: 4187

Travel: A substantial increase in visitor travel for the month of May is shown with 13% more visitation than for the same month a year ago. Total travel for the year is also ahead. It shows an increase of 17% over the previous travel year. The method of estimating travel remains the same. It is noted however that a large proportion of the visitors do not register. A great deal of this may be due to the absence of a 'Register' sign. The previous one was removed by vandals last winter.

Roads: With the lack of maintenance, the entrance road has become very rough and "washboardy". If it could be worked once with a blade the road could be kept in fair condition with an occasional dragging. The back road to Wupatki is still closed to the visitor. Recent showers have helped the cinder some but the road bed is still soft and unsafe to travel. Visitation at both Sunset and Wupatki will be noticeable increased when the "back door" can be reopened.

General: Progress on the construction of the tent houses has been slow. Shortage of building materials, the necessity for other hauling and required road work at Wupatki have caused delay. But it is moving along in good time now and the first dwelling at Sunset Crater will within a few days be a reality.

The week end trips have been continued this month. Interpretive information has been offered the visitor on Sundays.

Information has just been received regarding materials for the signs that are planned for the area. The proper material has been located and construction should get under way shortly.

Ranger Upton attended the fire school at Grand Canyon the second week in May. Mrs. Upton accompanied him and made the most of the few days for an enjoyable vacation. A most cordial reception was given to all visiting personnel throughout the entire time they were there.

Bob brought back the Sunset Crater Thunderbird four mile marker that has been roaming around the country. It had been missing since last winter and

finally came to rest, with others of its kind, near the campground of Petrified Forest National Monument. It was discovered a few days ago and Chief Ranger Dinsmore brought it along with him when he came to the fire school. After a new paint job it will be re-erected at the entrance.

NPS Visitors: Landscape Architect Alleman spent about a day at Sunset the first week of the month. This study was preparatory to the drawing up of the Master Plan for the area.

Publications on Hand: Sunset Crater National Monument 2-fold leaflets on hand - - - - - - - - - - - - - 850 Copies.

Tonto NATIONAL MONUMENT

Roosevelt, Arizona

May 25 19 47

Memorandum for the Regional Director.

Following is the monthly Narrative Report for Tonto National Monument for the month of May, 1947.

TRAVEL. 743 visitors arrived at Tonto during the month of May, coming from 32 states, Hawaii, and Austria. Of this number 385 visited the Lower Ruin and 2 the Upper Ruin.

PERSONNEL. Early Sunday morning, May 11, Charlie Steen and Family left for Santa Fe. At the present Joe Bean and Self are holding the Fort.

N.P.S. Officials. Engineer Carter stopped for a short visit on his way to Phoenix last Sunday. Ranger Pete Shuft of Casa Grande Spent Tue Evening and Wed, Monday May 20-21, Checking Property on Way to Santa Fe

WEATHER. May started out with record heat wave; but, after a .61 inch rain the 9th and 10th, cooled off and the entire month has been very pleasant. Showers also fell on the 21st and 22nd.

GENERAL. With the coming of hot weather the travel has slowed to a near standstill. This is giving time for the work on the trailer and as there is no carpenter available, much time goes into it. The remaining time is spent in trying to accustom myself with the routine of office work and rearrange the files.

FLORA. The arrival of May brought with it great masses of Saguaro Blossoms on every large plant. A number of the plants have yet to bloom.

PROJECTS FOR JUNE. We hope to have the trailer liveable, change the propane system, and install the wireing for the power plant.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
TUMACACORI NATIONAL MONUMENT
Box 2225, Tucson, Arizona
Tumacacori, Arizona

May 25, 1947.

MEMORANDUM for the Regional Director,
Region Three.

Follows the monthly narrative report for Tumacacori National Monument for the month of May, 1948:

WEATHER CONDITIONS: Precipitation - .89. Maximum temperature - 104, on May 3. Minimum temperature - 38, on April 25. Three days of very high winds. Considerable cloudy weather. Precipitation far higher than usual for this month.

MAINTENANCE: Mostly of a routine nature this month. Soil on the fish pond plants was changed. Gravel was placed on a low spot of the driveway from the parking area to the residences. More floor sections in the museum building have been treated with Ducorex preservative. Some small signs were re-painted. Considerable time has been spent by our maintenance laborer and some time by the custodian on doing stabilizing work on the mission church. This work consists of using cement stabilized soil to seal broken places in the original plaster, so that water cannot get behind the plaster and cause its collapse, and filling up old vandal holes in the walls. So far this work, which is done between other pressing jobs as time allows, has been mostly in the cemetery and on the north end of the church.

INTERPRETIVE SERVICE: 889 visitors went on 159 guided trips through the mission church and grounds, receiving an average of 35.9 minutes per trip. 1448 visitors received combined Information and Interpretation Service in the museum lobby, patio garden, and view room. 1426 persons visited the museum.

INCREASE OR DECREASE IN TRAVEL: May travel of 1496 visitors has been exceeded once, by the figure of 1551 for May of 1937.

VISITORS: April 25 - 88 pupils and teachers from Nogales Junior High history classes were intensely interested mission visitors.
April 27 - Fernando Pesqueira, professor of history in the University of Sonora, Hermosillo, was a very interested visitor.
May 1 - A group of eight from the Arivaca school.

GENERAL PUBLICITY: May 4 - Photographers Ray Manley and Clifton Abbott, of Western Ways, Tucson, Arizona, taking photos.
April 29 - Thayer Soule and Grant Wolfkill, taking colored movies for Burton Holmes' "Travelogues."

INSPECTIONS: May 17 - Chief Clerk Castellum arrived in P.M. and spent a day going over many matters, and conducting an inventory of non-expendable property.

May 22 - Architect Kenneth M. Saunders arrived, and departed the afternoon of the following day. He inspected the status of construction work being done here by contract, and went over in detail with the contractor and custodian other work seriously needed.

NEW CONSTRUCTION: On May 8 the Tucson Roofing and Supply Company, of Tucson, Arizona, commenced contract work here to embrace replacement of the nave roof of the mission and plastering and roofing on the residences. At this writing the nave roof is ready for completion within a couple of days, as the base felting and water drains are now in.

STORM DAMAGE: On May 10 high winds literally ripped two sections of original plaster from historic buildings here. Weathered spots allowed wind to get behind edges of plaster, and some fell from the arched entry of the mortuary chapel and from the top of old court walls east of that point.

WATER SUPPLY: On May 2, while we were doing considerable irrigating, the water pump began sucking air instead of water for a short period. We are now drawing water from 64 feet down in our 77 foot well. Such an occurrence is a pretty good hint that within a year or two we will have to pull the system and run our pipe deeper.

NATURE OBSERVATIONS: The other day neighbors captured a small Gila Monster in the alfalfa field east of the monument, and gave it to us. The little fellow was about seven inches long (evidently a last year's model). Promptly a wooden-walled pen was made, and water and shade provided, so the lizard could be studied in captivity for a while. But the first night of captivity found the ungrateful varmint unappreciative of our housing efforts in its behalf, and dug under the wall to freedom.

A few days ago some folks over Patagonia way told Ranger Brewer they thought an old basement in the hillside back of their house was a rattlesnake den, and that they were afraid to go inside it. She said she thought "Bring 'em back alive Jackson" might help. So on a day off the Jackson family went over. I removed one nice Black-tailed Rattlesnake from the basement (there were no others in it), and brought it back to Tumacacori to keep for a few hours in a screened snake box. On Sunday, while with a party of visitors, I was suddenly electrified when my oldest boy ran to me and said that Bruce, the youngest, had just got rattlesnake poison in his eye! I beat my shadow getting to the house, and found this was quite true. But Betty, being an HCMP of long standing, and therefore versed in desert first aid principles, had already washed out the boy's eyes under a tap, and all was under control, with no harm done except to our nervous systems.

The accident occurred as Bruce leaned over to look at the snake. The upper, wooden lid of the snake box was open, but the screen of the inner door was safely closed. However the snake, being somewhat irritable, struck upward as the boy leaned downward to look, and its head hit the screen with mouth wide open. Venom sprayed upward, and one drop got into the boy's eye.

GENERAL: The first Boy Scout troop in the history of this vicinity has recently been organized. The custodian is secretary of the troop committee, and is active in private time helping the other committee members push the movement to what we hope will be a strong and permanent basis. We have one patrol, the "Pioneer Patrol", and have just started a "Cub" pack.

Earl Jackson,
Custodian

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Tuzigoot NATIONAL MONUMENT

Clarkdale, Arizona

May 26 19 47

MEMORANDUM for the Regional Director,
Region Three.

Following is the monthly narrative report for Tuzigoot National Monument for May, 1947.

Weather Conditions: The earlier part of the month was characterized by unusually hot days with a maximum recording of 102 degrees. This was broken when a refreshing rain of approximately .4 inches fell on May 6, and was the first measurable precipitation in six months. During the latter part of the month the weather moderated considerably with the daytime temperatures prevailing in the lower 90's which is normal for this time of the year.

Visitor Totals and Trends: Travel during May dropped to 822 which is a 50% decrease from last month's total. However, the number of visitors is 40% higher for the current Fiscal Year as compared with 1946. Indications still point to an accelerated 1947 Summer Travel inasmuch as the trend to date has been that of transcontinental tourists representing travel-starved Americans, and the close of school should mark the onset of the rush. Owing to a number of reasons, thousands of Americans are now keenly aware of Arizona's 16 superlative National Parks and Monuments, and are taking the time and money to see them.

Guide and Contact Service: Custodian Cotter is on annual leave five days per week and on duty status during Richert's two days off. With a smaller number of visitors this month, it was possible to raise the average time spent with each group both in the museum and ruins trips. An average of 21.5 minutes each was devoted to 203 ruins trips, and 22 minutes for 252 museum parties.

Personnel Time: Museum: 92 hours, 25 minutes. Ruins: 70 hours, 55 minutes. Total time for Custodian Cotter, 82 hours, 35 minutes; for Richert, 110 hours, 45 minutes.

Vital Statistics: The many friends both in and outside the Service of Custodian and Mrs. J. L. Cotter will be interested to learn of the birth of a son, Lawrence Tomlin, on May 2, at the Cottonwood, Arizona, Memorial Hospital. This is their second child, and many people are already acquainted with their four year old daughter, Jean, a precocious and charming little lady indeed. Congratulations and Best Wishes to Jack and Virginia Cotter on the event of the new arrival!

Special Groups: Boy Scout Troop 13 of Prescott, Arizona, under the leadership

of Scoutmaster A. J. Devine. The boys had earned their trip by selling refreshments at a concessions stand during a recent civic affair at Prescott, and were enroute to Grand Canyon.

Dr. Allen with 34 students comprising a Geology Class from the Arizona State Teacher's College, Flagstaff. Following an orientation talk by the Acting Custodian on archeology of the region, the class was conducted to the ruins where Dr. Allen utilized the excellent vantage point afforded by the hilltop to discuss and indicate various geological features of the Verde Valley.

Noteworthy Visitors: Mr. Jack Breed, widely-known photographer specializing in Southwestern scenes, was shown the Monument on May 24. Recent issues of National Geographic and Arizona Highways magazines display his latest work. Mr. Breed apparently enjoyed his tour of the ruins, and he stayed to take many pictures.

Mr. G. R. Wickham, a former Assistant Commissioner of Lands, Department of the Interior, accompanied by Mrs. Wickham were interested as well as interesting visitors on May 20.

Inspections: Foresters Walker, Carlson, and James visited Tuzigoot on May 10. They opined that comparatively little fire hazard exists insofar as Monument lands are concerned, but that constant vigilance is necessary with regard to the Administration Building.

Chief Clerk Luis Castellum arrived May 11 to inspect and advise relative to inventory matters. The Government vehicle Luis was driving broke down at Flagstaff. In order to maintain his itinerary, he was brought to Clarkdale by Custodian Beaubien in the Walnut Canyon truck.

Ranger Schuft of Casa Grande followed the Chief Clerk's visit a few days later to make a reconciliation between Headquarter's Inventory records and those of this office. Pete worked amazingly fast and was here only a matter of five hours.

Cooperating Government Agencies: Forest Ranger Linn, in charge of the Yaeger Canyon Ranger Station in the Prescott National Forest, paid Tuzigoot a courtesy call this month. He stated that an increasing number of people are visiting his station to inquire regarding the location of prehistoric Indian ruins on Forest Service lands with the avowed purpose of visiting them on foot or horseback. Mr. Linn believes it advisable to send as many of these people as possible to such archeological monuments as Tuzigoot and Montezuma Castle where guide and information service are provided, and there is no opportunity of unauthorized digging. It is regrettable that our supply of National Park Service literature is exhausted, otherwise it would have been possible to provide Mr. Linn with booklets to which he could refer his visitors for information and guidance.

Forest Fires: Indicative of the present high fire danger in the Northern Arizona Plateau is the fact that Ranger Linn reported a grass and brush fire of a few acres in extent on the Prescott National Forest near Jerome. This was put out by the Lookout Man stationed between Clarkdale and Jerome who first saw it. Investigation revealed the fire to have been man-caused.

Projects: New screens are being placed on all window frames and doors of the museum and residence. Concurrently with this re-screening job, the outside woodwork such as window casements, doors, and projecting vigas or beams are being given an application of linseed oil. This work is now 50% complete.

Stabilization: Approximately 70 rooms have been stabilized and/or repaired. Custodian Cotter, though on annual leave, has contributed many hours of his time to annotating photographs of the project and compiling the stabilization report. Two very capable, mature, and conscientious workers are now employed from Stabilization Funds. They are Yavapai Indians from Clarkdale, James Hood and Arthur Harris. Mr. Harris worked on the original excavation and repair of Tuzigoot in 1933-34. Moreover, he has had considerable experience as a stone mason gained as an employee of the Bureau of Reclamation. Mr. Hood has worked for the Indian Service.

Ethnology: On May 21, Ned Nayatewa, Chief of the Walpi Hopi Village, spent some time at Tuzigoot. He was conducting a number of his clansmen to Parker Dam for relocation. During an interview with Mr. Nayatewa, Custodian Cotter obtained three interesting legends concerning: 1) Hopi Origins, 2) Hopi pottery designs, and 3) Montezuma Well. These were incorporated into the Tuzigoot Fact File. They will be circularized to any Personnel desiring to read them.

Publications Report: None on hand.

Roland Richert

Roland Richert,
Acting Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Walnut Canyon National Monument
Flagstaff, Arizona.

May 26, 1947

MEMORANDUM for the Regional Director, Region Three. 19

There follows a report of activities in Walnut Canyon National Monument for May, 1947:

Weather. Several stormy days with light precipitation lessened fire danger temporarily.

Visitors. Of the 1,648 total, 1,034 made the ruins trip unattended. There were 44 picnic parties with 253 people.

NPS Visitors. Kenneth Saunders, Clark Carrel, Raymond Lovelady and Carl Alleman spent some time here discussing projects or gathering data for future work. Foresters Carlson, James and Walker stopped for a brief inspection. Chief Clerk Castellum paid a welcome visit as he can answer the questions which bother us most. Pete Schuft was in to inventory and put "decals" on the non-expendable property.

Personnel. Two laborers were hired but they only worked eight days each before laying off to plant crops. Three others have been hired to begin work this week.

Activities. A trench for 1,930 feet of underground power cable has been excavated, with damaged tile placed under the road and trail crossings. Five prefabricated fire places for the picnic area have been installed. A trench for a water line to picnic area has been dug. Some of our other projects are being neglected until supplies arrive. Our routine activities are somewhat behind schedule.

The Custodian made a quick trip to Casa Grande Nat'l Monument to take a car to Chief Clerk Castellum.

Publications Report. Only 500 2-fold leaflets, 100 Location Maps No. 6 and 4 Glimpses of the National Parks.

Paul L. Beaubien

NATIONAL PARK SERVICE

~~WHITE SANDS~~ NATIONAL MONUMENT

Box 251, Alamogordo, New Mexico

May 22, 1947

MEMORANDUM for the Regional Director, Region Three.

Following is our monthly narrative report for the month of May, 1947:

VISITATION	This Month	Travel Year To Date	Fiscal Year To Date
Total Visitors	6,194	47,121	80,637

Peculiar weather conditions have continued throughout the month. In the early part of the month a hot spell was experienced which exceeded any like period since weather records have been kept. This has been followed by winds and cold spells, especially at night. Maximum for the month was 100° on May 5th and the low of 38° was recorded May 16.

Visitors for the month totaled 6,194 in 1,599 cars. This is a slight drop under the corresponding period last year.

An official trip was made to Albuquerque May 16 to inspect a diesel auto-patrol. This machine was found to be small for our use but of much greater advantage than the present Wehr. It is hoped we may soon acquire this machine and get it in operation.

Considerable anxiety was created when a V-2 Rocket strayed from its proposed course and landed only four miles from Alamogordo.

No complaints have been received in the office from any source.

Our Operator-General has been off most of the month with his teeth and, I guess, finally had to have them all extracted. Our roads have suffered some as a result although Harold can handle the old Wehr if it becomes necessary. Our hope to get all the picnic tables cleaned up and repaired before the season is still only a hope. This applies as well to our picnic area shades and grills. It does look like we may get to do some badly needed repairs on our buildings. A contract has been let for such work.

The concession continues to do a good business and more room is certainly needed for its operation.

The Grazing Service seems to be curtailing much of its activity in this section and plans to turn a lot of their equipment over to War Assetts, among which is the carryall and power unit now on loan to us. Attempts are being made to transfer this equipment to our Service.

A visitor was in a few days ago and asked if we desired a piece of pottery for our museum. I declined, thanked him very kindly, and explained our policy in this regard; he informed me the pottery was taken some years ago from a mound now within the Monument area. I immediately reversed my decision and he promised to bring it over to us on his next trip to White Sands. This is the first complete pot I have ever heard of coming from this area, while it is broken he advises it is all there. It is apparently one of the Black on White types.

Our museum seems to be working better all the time. A U. S. Gypsum Co. official was in and wrote us a very nice letter regarding his visit. It is hoped we can work out a way to allow that company to prepare for us an exhibit of the by-products of gypsum.

Water continues to be a problem in our vicinity. Alamogordo has on several occasions been forced to place drastic restrictions on the use of water. So far it has had no effect on us but we use as little as possible when hauling it all.

Reports on our publications will soon be simpler, before long we will be entirely out of the White Sands leaflet.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

~~Wupatki~~ NATIONAL MONUMENT

Flagstaff, Arizona

26 May 1947. 19

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Wupatki National Monument during the month of May, 1947:

Visitors this month: 339 Travel Year to date: 1686

Weather: The highest temperatures yet recorded for early May occurred during the first week, reaching a maximum of 97 degrees. May is also the second driest month of the year here, but we received a total of .99 inches of precipitation. This exceeds any previous precipitation record for the month of May; .06 inches more than that in the wet year of 1941. This moisture, however, seems to have been rather spotty over this general area. At least it reduced a serious fire hazard and probably helped our water supply.

Roads: Considerable road improvement was accomplished during the month. During the two week ends when the rains came we dropped everything else to make fills and to drag and blade the road. One of the local cattlemen loaned us a small pull grader and we are quite proud of our job in those sections where there was little danger of breaking the blade on boulders. On neither occasion did we have our road man and the first time we had to hire a truck to pull the drag, as ours was at Navajo National Monument.

Expecting the arrival of Mr. Ralph Fowler to fill the road maintenance position, we promised jobs to several Navajos. It was necessary to do some urgent road repairs and the only way we could do it was by delaying the stabilization program. When Mr. Fowler did arrive, he stayed only 1½ days and then returned to Colorado because of a previously incurred disability. This is the second time within a year that we have had personnel forced to resign because of a disability which was not fully explained prior to their employment. One of these days we shall learn to profit from experience.

Travel: Visitor travel shows a slight increase over that of previous years and this is an indication of what we could expect if the Sunset approach were open. There was quite a decrease during the first week when the "heat wave" took place, and a very sharp increase after we had improved our road. A number of visitors mentioned being sent here by local business men- see publicity below.

Publicity: Flagstaff is launching a drive through its Chamber of Commerce to interest more of the passing tourists in the attractions of this general area. Evening meetings of business men and their employees are being held, only three to date, and local National Park Service men have been requested to address the groups. Both Custodian Jones and Ranger Aubuschon have participated to date, but tentative plans will include all men who wish to do so.

Considerable comment has been received on the newspaper articles prepared by Mrs. Jones regarding the introduction of electricity at Wupatki and the unusual discovery of Sunset Crater signs at Petrified Forest. Apparently both items were used on news broadcasts over KTAR in Phoenix.

An article on Wupatki prepared by Devereaux Butcher of National Parks Magazine was received for correction. It is one of the short articles for the July issue.

Personnel: Approval was received of the establishment of a Road Maintenanceman for Wupatki-Sunset-Walnut. Mr. Ralph Fowler was selected for the job, but as stated above remained on duty only a short time.

A local veteran, Dan Hogan, was hired on a temporary basis to do ruin stabilization work, but to date has had to spend most of his time on roads with a Navajo crew.

No selection has been made of a temporary ranger, although several applicants have been contacted. To date it has been impossible to fill this position because of housing, inadequate pay, or because the person wished to continue schooling.

NPS Visitors: In preparation for a revision of the Wupatki Master Plan Landscape Architect Alleman spent part of two days studying the area. What impressed us was the improvement in the methods of approach and analysis used by the Branch of Development compared to pre-war times.

Forester Walker of the Director's Office and Regional Foresters Carlson and James paid a brief visit to Wupatki on the 10th. The custodian was delayed in town by applicants for jobs and did not meet them, but Ranger Upton handled the situation very well.

Newsworthy Visitors: One party of visitors ignored our "Road Closed" sign coming down from Sunset Crater and can claim the distinction of being the first visitors in the past ten years to knock a hole in their crankcase. It is not entirely clear just where this happened but they drove slowly on down towards Wupatki and got stuck in the cinders just beyond Keiser. They were towed to Flagstaff after dark.

Spring Flow: Both springs continued to decrease in their flow compared to last month. Wupatki is flowing 226 g.p.day or 241 gallons less than last month. This is a normal decrease for this time of the year, but we cannot stand too many of these 100% cuts. Heiser Springs continues to decrease: 1830 g.p.d. compared to 1763 last month.

General: All in all this has been a fairly hectic month consisting of constructing tenthouses, hauling five tons of Quonset hut from Flagstaff, planning the erection of this hut, trying to keep the paper work current, the roads in shape and guiding visitors along with all the usual and unusual interruptions. We do not look for it to be much different during the summer months.

Overlooked under the NPS Visitors was the fact that we had a visit from Ranger Pete Shuft of Casa Grande. Pete checked over our non-expendable property and provided identification numbers. We enjoyed his visit in both a business and social sense.

Publications on Hand: The few remaining pamphlets on Wupatki are being reserved for answering inquiries:

Wupatki Informational Leaflet: 30 copies.

Region Three Office—Mr. King			

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
Region Three
Santa Fe, New Mexico

July 18, 1947.

MEMORANDUM for Associate Regional Director E. T. Scoyen.

Following is the narrative report for Naturalists of the Southwestern National Monuments for the month of June, 1947.

Staff Activities - General

Naturalist Dale S. King was in the office until July 25 when he accompanied Assistant Regional Director John M. Davis and Dr. H. P. Mera, of Santa Fe on a field trip to Chaco Canyon, Aztec Ruins, Mesa Verde, and Arches. He was also to visit Great Sand Dunes and Capulin Mountains.

Archeologist Charlie R. Steen was in the field during the first week in June. He visited Chaco Canyon, Montezuma Castle, Tuzigoot, Wupatki, and Walnut Canyon National Monuments, and the Kinishba Ruin in the Fort Apache Reservation. He was accompanied by Photographer George Grant. On June 27, Steen went to Chaco Canyon again to take Archeologist Alden Lancaster to Tumacacori National Monument. He was still in the field at the end of the month.

Naturalist Maurice Sullivan returned from an extended field trip on June 27. He had spent sometime in Organ Pipe Cactus National Monument aiding in a cattle count there and becoming familiar with the monument. He also visited Saguaro, Tumacacori, Montezuma Castle, Walnut Canyon, Chiricahua, and White Sands National Monument. He left again on the 30th of June with Regional Naturalist Bert M. Dodge to make public extension talks at Silver City State Teachers College. He was in the field at the end of the month.

Administration - Interpretation

The usual reports and 40 letters were written.

Approximately seven 2-fold leaflets were prepared on mimeographed stencils and run off for temporary use by the field until new supplies of the literature can be obtained.

Progress of Exhibit Plans and Projects

Word was received from the Custodian, White Sands, that the Billy the Kid Exhibit which was during the war removed from the Museum at White Sands has been loaned indefinitely to the Lincoln County Museum, Lincoln, New Mexico.

During his field trip, Naturalist King discussed possible interpretive improvements at Aztec Ruins and Arches National Monuments. With our present lack of any facilities for preparation of museum exhibits it is going to be difficult to maintain, much less improve, the rather shoddy exhibits and interpretive devices throughout the whole Southwestern National Monuments system.

Research and Observations

Archeologist Gordon Vivian at Chaco Canyon National Monument is resuming work on preparation of a research report on excavations performed in advance of CCC construction at Chaco Canyon before the war.

Further correspondence ensued with the branch of history in an attempt to obtain certain historical information concerning Tumacacori and the status of affairs of southern Arizona about the time of the abandonment of the church in the 1820's.

Cooperative Activities

Steen prepared suggestions for the Superintendent, Fort Apache Indian Reservation, as to possible stabilization methods and projects at Kinishba Ruin, which is to be administered and protected by the United States Indian Service.

Headquarters Loan Library

Accessions for the month totalled 92,- 8 books, 42 pamphlets, and 42 periodicals.

In answer to a request, Steen prepared a selected bibliography for El Morro National Monument.

Southwestern Monuments Association

Treasurer Alan C. Vedder worked fourteen days during the month, made out 47 purchase orders, one deposit turnin for the treasurer, and one disbursement list, and mailed 125 covers. A total of 60 letters were written. During the period he took care of almost all the incoming mail, particularly when the Executive Secretary was away for ten days. He put the purchase order files in order, cut stencils, sent memoranda to custodians, filed mailing list cards, and made out 25 checks for the month of June. On June 2 former treasurer Dan Paterson resigned and turned the books over the Vedder. On July 9 Vedder officially became treasurer. Much more time is now spent on the bank book, journal, letters, and working on turnins.

During the month the Association was fortunate in obtaining 100 reprints of the National Park Service article in Fortune Magazine kindly donated by the editor of Fortune Magazine. A total of 30 of these were mailed to the Director for his distribution.

The Collector of Internal Revenue was queried concerning the possibility that the Association might have to pay a federal membership tax. He replied in the negative, which is fortunate in that it will save the Association considerable outlay.

The completed manuscript and illustrations of "Poisonous Dwellers of the Desert" by Hatt E. Dodge were forwarded to the successful bidder, Sugar Pine Press of Westwood, Lassen County, California. It is hoped that this booklet, which will find ready sale in the Southwest, will be issued sometime early in August.

Unusual Activities - Conferences

King attended a staff meeting concerning the allocation of a small fund which was allotted by the Director late in June. He was pleased to learn that purchase of a dump truck for the ruins stabilization mobile unit was authorized from these funds.

King also attended two sessions of the annual meeting of the Western Association of State Game and Fish Commissioners held in Santa Fe.

Ruins Stabilization

Steen transported archaeologist Rick Lancaster to Tumacacori for a month's duty supervising stabilization work there three days a week, and doing relief guide duty the other two days. King, because his report on stabilization activities in Tumacacori last June has never been finished, furnished the Custodian with a letter detailing methods used in lime mortar stabilization.

Steen performed furthertests of stone hardeners at Bandelier National Monument and also at Santa Fe on materials from Casa Grande and Tumacacori National Monuments.

King was greatly impressed by the excellent stabilization work performed at Chaco Canyon on the ruins of New Pueblo Alto and Chetro Kettle. If the mobile unit can proceed at present pace it is possible that Chetro Kettle will be completed so that only routine maintenance will be necessary from now on. This will allow the unit to concentrate its attention on Pueblo del Arroyo and others of the great ruins which urgently need attention.

It was also a pleasure to see the drainage pipe at Aztec Ruins functioning perfectly. The ground water in the underground kiva in the ruin plaza has dropped two feet, and unless increased rainfall changes the situation, the drainage problem at Aztec has been lessened considerably.

Projects for Ensuing Month

King and Steen will be in the office for almost the entire month, although probably both will attend the Chaco Field Conference of archaeologists July 28, 29 and 30. Routine affairs will occupy their attention.

Sullivan will be absent on leave during the entire month, bringing his family from Maine to Santa Fe where they have found a house.

NATIONAL PARK SERVICE

Arches NATIONAL MONUMENT

Moab, Utah

June 27, 19 47

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of June, 1947:

GENERAL: Travel has been excellent during the past month and many of our visitors have stated that the April issue of "Arizona Highways" was responsible for their visit.

Utah Wonderland Tours (Colorado River Scenic Tours), which run scenic trips on a circle tour from Salt Lake City, Utah to Capitol Reef, Natural Bridges and Arches National Monuments, started their first trip on Friday, June 20th with a life photographer to record the scenic features and Miss Maurine Whipple, who wrote "Giant Joshua" to do an article on the trip. They made Capitol Reef OK but heavy rains held them at Fruita, Utah for two days. When they arrived at Hite, Utah to ferry across the Colorado River, the ferry was not in operation due to high water so they travelled via Hanksville and Greenriver to Moab and then on to Monument Valley and Natural Bridges. They intend to return on June 27th or 28th to take in Arches and the surrounding country.

WEATHER: Light rains fell on June 3rd, 10th and 11th with heavy rains on June 20th and 21st. For most of the month the weather was unusually cool and heavy winds occured intermittently.

TRAVEL: Our travel for the month was 171 cars containing 516 people as against 397 visitors for May and 32 8 for June, 1946. We had representation from twenty seven states and the District of Columbia.

INTERPRETIVE SERVICES: Eighteen parties consisting of 58 people were contacted in the Windows section and 48 parties of 149 people were contacted at headquarters. Two guided trips were taken into the Windows section with 5 people. Several parties made the hike into the Courthouse Towers section and were very enthusiastic over the scenery found in that area.

RANGER SERVICE: Ranger Walker made a trip to Natural Bridges on June 10th and 11th to make installation of a power unit at that area and to take a service man for the overhaul of the kerosene refrigerator at that area, which has not been functioning properly.

...from Archeological and History Library

COOPERATING GOVERNMENTAL AGENCIES: Mr. Aaron W. Tracy, chairman of the Utah State Department of Publicity and Industrial Development, visited the monument on May 28th. In a conference with Grand County Commissioner Taylor he stated that his department would probably make available to Grand County the sum of $15,000 for improvement of roads in Arches National Monument. We are keeping our fingers crossed and hope that this appropriation materializes for we can certainly make some much needed improvement with this amount of money.

MAINTENANCE AND CONSTRUCTION: Installation of the water system at the Windows parking area was completed on May 29th and water is now available for visitors. We have had several compliments by visitors who certainly appreciate finding a drink of water after making the hike to the features in the area during the hot weather. The water up to this time has been quite cool due to the fact that the entire installation is underground.

The 1½ KW power unit received from surplus was uncrated, serviced and prepared for installation at Natural Bridges.

NATIONAL PARK SERVICE VISITORS: Howard Young stopped by for a short visit on June 1st on his way back to Santa Fe from Ogden, Utah.

ROADS: The State highway maintenance crew graded the Windows road on June 4th and 5th and it was in good condition until our heavy storms of June 20th and 21st. It was posted "Closed" from June 21st to 23rd due to quicksand in Courthouse Wash. Ranger Walker and I spent most of Sunday, June 22nd on repairing same, putting it in passable condition. The State's motor grader is in use on the Colorado River road but hope it will be available for this repair job in the next few days.

Grand County started improvement of the Salt Valley road yesterday and it should be in good shape for use by visitors in visiting the Devil's Garden and Delicate Arch sections.

SPECIAL ACTIVITIES: From June 12th to June 17th inc. the custodian was on duty at the National Park Service exhibit at the Utah State Centennial Exposition at Salt Lake City, Utah.

As chairman of the publicity committee for the Grand County Centennial commission, I was in charge of the installation of a scenic exhibit at the exposition at Salt Lake City. This job was completed on June 15th. The display consists of 13 enlarged pictures of the scenic features of Grand County with Arches, Deadhorse Point, Fisher Towers, LaSal Mountains and Moab Valley being represented, and a relief map with the various sections designated by numbers with corresponding numbers on the pictures. An excellent collection of high grade uranium ore is also included in the exhibit.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
AZTEC RUINS NATIONAL MONUMENT
AZTEC, NEW MEXICO

24 June 1947

MEMORANDUM for the Regional Director,
Region Three, National Park Service.

There follows the report of activities in Aztec Ruins for June 1947.

WEATHER. Ideal weather has prevailed the entire month and with the closing of public schools travel has soared.

MAINTENANCE. The job of repairing the adobe-cement wall at the residence was completed and the museum roof was repaired and swabed with a new coat of tar.

Visitors. Ranger Shuft, Casa Grande, visited this area on special assignment from the Region Three Office. Mr. B. C. Johnson, District Engineer, Geological Survey; Mr. and Mrs. R. L. Lingle, President State New Mexico Reclamation Association; Mr. and Mrs. S. W. Seeman, artist, Burlingame, California; Dr. and Mrs Paul R. Fluck, Lambertville, N.J.; Mr. and Mrs. Walter M. Gilbert, Executive Officer Carnegei Institution of Washington, D.C.; Leland C. Bacus, US Fish and Wild Life Service with Fred Dasch from Saguarchi, Colorado visited during the month.

SPECIAL ACTIVITIES. Ranger Bill Reed was married in the early part of June.

The Custodian visited Mr. Richard Evans, owner of a trading post at Shiprock, New Mexico regarding the collection of excellent pottery that his family has acquired during the past 50 years from early Pueblo Indian sites. Mr. Evans had asked our opinion regarding the donation of a very fine Pueblo mummy for the museum at Aztec Ruins. We hope in the not too distant future to add this specimen to the display at Aztec.

INTERPRETIVE SERVICES. There were 209 conducted trips thru the ruins in which were 1188 visitors and 322 trips thru the museum with 1587 visitors.

INCREASE IN TRAVEL. Visitation has increased about 65% over that of last year with 1557 people in 513 cars from 40 states, Washington, D.C., Newfound Land, India and the Bahama Islands.

PUBLICATION REPORT.

16 page pamphlet, on hand ———————— 153

Aztec

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
BANDELIER NATIONAL MONUMENT
SANTA FE, NEW MEXICO

June 27, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of the activities at Bandelier National Monument for the month of June, 1947.

Weather and Roads

Weather has been dry and windy interspersed with cold periods. Only traces of rain fell during the report period. High temperature recorded was 94° but several times the mercury fell to within a degree of the freezing point at Headquarters with heavy frosts at a slightly higher elevation. High fire danger has prevailed during most of the month. A record was set this year when the danger shot into the "Extreme" bracket on two successive days. Only two other "Extreme" days have been recorded since the establishment of the weather danger station here in 1939. One day of extreme danger was recorded in June of 1939 and one in June of 1946, but this year is the first time we have had two extreme days in one year and two successive days.

Another milestone was reached in Bandelier history with the opening to traffic on June 18 of the Pojoaque short cut to Santa Fe. The newly constructed and surfaced "Atomic Highway" completes a link in the road from Santa Fe to Bandelier. It shortens the distance to Santa Fe from 60 miles via Espanola to 43.5 via Pojoaque and leaves only 13 miles of our approach road that is not surfaced. Work has commenced on the new highway bridge across the Rio Grande at Otowi but the structure probably will not be completed for many months. The approach road across the Ramon Vigil Grant has been dry and dusty, but since we have the authority and the money to maintain it we have kept it in much better shape than in previous years. Complaints as to its condition have been few this year. We are still handicapped by lack of a heavy grader. Our "puddle jumper" tricycle is not heavy enough to pull ditches or move much dirt.

Notice of award of the work of seal coating the 2.62 miles of oil surfaced road leading into Frijoles Canyon has been given to Mr.

Hanks of Santa Fe. The work will begin as soon as approval of the Director is received and should be finished by the end of July.

Administrative

The Custodian made a pack trip to the Capulin Canyon, Turkey Springs, Stone Lions, and Painted Cave to inspect trails and general conditions in this area. Several routine business trips were made to Santa Fe and Region Three Office. Clerk Bean spent the last half of the month on special detail in the Regional Office.

Maintenance

The road crew spent most of the month patching breaks in the surface of the oiled road in preparation for the seal coat job to be performed under contract. They also put in a new culvert on the Otowi Section, cleaned all other culverts and graded the approach road, repaired some washouts, etc. The Fire Control Aides have put the telephone system into first class shape and have worked the trails over the monument. During the periods of high fire danger the Aides have been held at Capulin Base Camp where they are engaged in making extensive improvements. High winds have kept throwing trees across the trails in critical spots so that constant vigilence has had to be maintained to keep them open.

Maintenance man Valencia constructed a new watering trough at the temporary corral. He also erected tent houses for three employees, installed propane gas in them, and ran an electric line to the tents so that employees could have the benefit of electricity. He also has completed insulation of the walk-in refrigerator at the Lodge and kept the ruins cleaned of weeds in addition to the garbage disposal, grounds cleanup, equipment maintenance, power plant operation, campground and residence fueling, general cleanup, and the thousand other jobs connected with operation of the monument. Our rehabilitation program continued and minor painting, plastering and repair on the buildings is almost complete. Much major work remains to be done. The new compressor and cooling fan were installed in the Lodge kitchen. The radio obtained from surplus was installed and daily contacts have been made with Region Three during the week days since June 9. Considerable trouble was experienced with the Diesel power plant; the custodian and mechanic worked all night on two occasions to get it back into operation. A new 7½ KW gasoline plant was installed, but it does not have capacity enough to handle our full load and is not much good at this season as a standby plant.

Park Operator

The operator reports a general lack of business and although travel was greater this month than for the corresponding month last year revenues are off. This is unfortunate for it is believed that the concessioner is offering the best service she ever has.

Protection

Ranger patrol of the upper Frijoles has been made on two Sundays during the month. On both patrols large numbers of fishermen were contacted, especially in the vicinity of the Upper Crossing. Licenses and creel contents were noted. The trail to the Upper Crossing is in need of some attention and will be repaired as soon as it is possible to remove men from more urgent duties. One patrol was made to the Otowi section and Tsankawi ruins, where everything seemed to be in good order and the ruins unmolested.

During recent weeks there has been noticed a rather heavy infestation among the alder trees of the alder flea beetle. No large scale control program is being planned but plans are being made to spray the trees in the campground and headquarters area.

The second horseback accident of the season occurred on the morning of June 8. Mr. Jack Hamlet, an employee at the Lodge, was thrown from a horse and received minor injuries. A Personal Injury Report was made of the accident. Emphatic words of caution are being given to riders about riding along narrow trails and along steep cliffs. There is now in the process of preparation a mimeographed sheet which will be handed to each prospective rider. This sheet will urge all visitors to ride with care and definitely explains which trails are to be used as bridle paths.

The periodical tests of the drinking water are being taken once each week. Previously, test samples were collected and sent to the State Laboratory at Albuquerque once each two-weeks period. Since chlorination has started, all reports have been satisfactory.

Personnel

Jimmie Brooks entered on duty as fire control aide, SP-3, June 2. Three seasonal rangers were entered on duty the first of the month. Simon Joseph Thomas of Santa Fe is the only hold over from last year. Robert Norris and Jack Turney, both of Alamosa, are serving their first season. All personnel have had difficulty obtaining uniforms. Ranger Gastett ordered his uniform in April and it has not arrived yet. The new men have had orders in since the first of June but are told that they cannot obtain uniforms until late in the summer. It is strongly recommended that we make blue jeans the official uniform until such time as more formal attire becomes available. It is reported that regulation hats probably will not be available until next year.

Visitors

Former Regional Geologist, Dr. Charles Gould, spent a day at the area renewing acquaintances. Archeologist King and Stan Davis spent June 10 with us. Archeologist Steen spent a day going over stabili-

sation problems. Regional Archeologist Reed and family brought Dr. Portia Hume of San Francisco to see the monument on June 7. Luis Castellum with family and Henry Tullar stayed overnight June 7. Other Region Three Office visitors included Mr. and Mrs. Lovelady, Carl Alleman and family, Charlie Carter and family, and the Richard Barnetts.

Travel

The number of visitors for June increased 177, but the number of automobiles entering the monument for the first time decreased 52 and the number of visitor days decreased 72, an indication we believe, that bona-fide tourist travel is less this summer. The Lodge reported only a pitiful 200 visitor days (a decrease of 182 from last June) which would seem to be a reflection of the same trend toward decrease of tourist visitors and increase of Los Alamos picnic crowds. The weekend influx of Los Alamos people creates a small "Coney Island" in Frijoles Canyon and is assuming the proportions of a serious problem.

Interpretation

One film talk was given off the monument this month to the Albuquerque Rotary Club. 100 luncheon members saw the film "New Mexico National Monuments". Five evening lectures were given during the month. However, as more people are staying overnight, the evening lecture program is organized for full operation with each seasonal ranger preparing three to four talks each to provide a quite varied program throughout the week.

The percentage of visitors taking ruins trips jumped 30% over last June despite an increase of re-entry cars and repeat visitors.

Acting Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

CANYON DE CHELLY NATIONAL MONUMENT
CHINLE, ARIZONA

June 25, 1947

MEMORANDUM for the Regional Director, Region three.

The following is a report of activities at Canyon de Chelly National Monument during the month of June, 1947.

Weather

Dry hot weather accompanied by heavy winds thruout the month made canyon conditions unfavorable for travel much earlier than usual. The maximum temperature of 95 degrees is slightly higher than normal. The heavy winds generally brought a few drops of rain and were followed by cold spells during the latter part of the month. The minimum temperature of 35 degrees is far below those registered during the last few years. One thunder shower brought a total of .27 inches of rainfall.

Administration

Ranger Shuft arrived early the morning of June 12 and all non-expendable property was inventoried and numbered with decals. The usual work on accounts, estimates, etc. took considerable office time. One trip was made to Gallup, New Mexico to pick up my Temporary Ranger and attend to other Government affairs.

Maintenance

The Dodge Pickup was painted by the Custodian and Government Decals placed on the doors. The Fairbanks-Morse pump engine was overhauled and given a new lease on life for a while. The Signs constructed by the Arizona State Highway department under the old N.Y.A. program and which had been stored at Petrified Forest National Monument were mounted and installed at the turn-off at Chambers, Arizona.

Travel

This month has seen the highest number of visitors for any June on record with a total of 370 visitors. This brings our travel year to date up to 1,130 visitors which is our largest number since 1940. It is an increase of 202 visitors over last travel year to date.

With these visitors a total of 106.5 hours were spent in guide time on 32 separate conducted tours. Seven hours were spent in contacting 49 visitors in 15 groups.

Visitors

Among the visitors to Canyon de Chelly this month was Assistant to Secretary of the Interior Mr. Davis and his party of Indian Service officials who made an unannounced visit while on a tour of inspection of the Indian Service school at Chinle on June 17.

Ansel Adams and Bill Lippincott spent three days taking Photographs of the Canyons. Mr. and Mrs. Robert Hamman (Alberta) of "Spin a Silver Dollar" fame, Sally Lippincott, Dr. and Mrs. C.G. Salisbury and a party of fifty delegates from the Southern California Presbytery. Lon Megargee, artist of note and Miss Bertha Dutton and Dr.Ferdon of the Archeological staff of the New Mexico State Museum of Santa Fe.

Ranger Service

Temporary ranger Richard K. Thomas entered on duty June 17. We have been able during the greater part of the month to give our visitors more and better interpretive service.

Fire Protection

One class B fire occurred during the month at the head of Monument Canyon burning 2.6 acres. This fire was reported by Indian service lookouts. It was caused by fires built by searchers for a lost Indian child. The fires were left burning and spread thru pine needles and duff.

Public Health

Four trips have been made into the Canyon to bring out sick Navajo Children. One trip was made to the rim opposite White house and the sick girl was carried from the opposite rim down a hand and toe trail and then up the other side to the Car.

Our area lost an enthusiastic friend and one who has given much aid. Dr. Fred Stone, Physician at the Chinle Hospital died suddenly at 2:00 P.M. on June 21. We'll miss his friendly visits with guests and his cheerful whistle.

Meredith K. Guillet
Custodian

June 25, 1947

Memorandum for the Regional Director
Region Three, National Park Service,
Santa Fe New Mexico,

There follows a report of the activities in and around Capulin Mountain National Monument,

Visitors are estimated to be three thousand for the Month, bring total visitors, Travel year to date nine thousand nine hundred sixty, and Fiscal year to date to be twenty four thousand nine hundred sixty.

Special Visitors;

Dr Nusbaum and Party from the University at Las Vegas was making a field trip about the middle of the Month, on the thirteenth I believe it was, While here they all visited the Capulin Mountain National Monument and also went on over to the Folsom Site, where Dr Nusbaum delivered a brief address which was indeed interesting,

Mr Balch from the Regional Office in Santa Fe made an all too brief call on the Custodian a few days ago,

Free publications on hand as of June 25, 1947

Capulin Mountain Nati nal Monument,
three page folders, eight thousand,

Weather has been grand all during the month, slightly dry having only about one half inch precipitation however we had plenty during May and this leaves us now in splendid condition, all grasses and shrubery are extremely lush and all flowers are in bloom, Too bad Mr Sullivan came just three weeks too early but it is mighty hard to predict the seasons in advance,

The new markers that have been placed on the road in the Monument have been really doing their work and have had plenty of compliments on them,

Roads have been kept in first class condition all thru the month,

Respectfully,
Homer J, Parr,
Custodian

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
CASA GRANDE NATIONAL MONUMENT
COOLIDGE, ARIZONA

June 25, 1947.

MEMORANDUM for the Regional Director,
Region Three.

There follows the narrative report for Casa Grande National Monument for June, 1947.

General: One can hardly pick up a newspaper published in this state today, but one reads in big headlines about the terrible shortage of water and electricity. The state legislature is being attacked and a water code is demanded. 50 % of the irrigation pumps in this area are rationed to pumping only four days a week, and all pumps are shut off from noon to six P.M. Several days during the past month, we have been without electricity a good part of the day due to the shortage of power furnished by the Indian Service.

Weather: The first week of the report period gave maximums in the 90's, but since the 4th. of June, the temperature has always ranged above 99 degrees, and one day it reached 110. The nights have been relatively pleasant, usually ranging in the 50's, and only occassionaly reaching the 60's. The days have been clear, with only five cloudy days. Too much plowing up of the surrounding land along with the extended period of drouth, has caused some rather unpleasant dust storms. Old timers tell us that there used to never be the dust storms there are these last few years, since man has over used the land.

Administration: Architect Saunders of the Regional office was in the area the 21st. He has distributed the invitations for bids for the partial reroofing and repairs of the utility area buildings, and the bids will be opened in the Regional office. S.A. Schwenn of the Tucson Roofing Company was in on June 5th. to check over the bid on this job.

Mechanic Stonehocker obtained specifications for bids on the WAA. dump trucks for the Regional office.

Bids have been received from the Treasury Dept. for the sale of old vehicles, and one inspection has been made and two inquiries have been received and answered.

All purchases were closed on the 18th. as reported to the Chief Clerk.

Visitors: June 1947- 1,905; June 1946- 1,592; Travel year to date, 1947- 29,733; 1946- 21,866. This is an increase over June of 1946. Our total visitor travel for the 1947 fiscal year was 34,041, which is 41 more visitors than we had estimated. This is no doubt an all time high for this Monument, and is nearly 10,000 more than we had in the 1946 fiscal year.

Interpretive Services: Of the 1,905 visitors to the area, 1,056 made the Ruins trip in 134 parties averaging 48.6 minutes per trip. 376 made the Museum trip in 125 parties staying an average of 24.9 minutes. 849 people came into the area to look over the museum, bring friends, of picnic, but did not visit the ruins. 2 Armed Forces members visited the Ruins this month. It has been very noticeable the great decrease in Army and Navy personnel these last six months, which proves the fact that the United States has completely demilitarized. The slight increase of visitors and length of trips over May of this year is due to the increase in children just out of school, traveling with their parents, plus the beginning of the summer tourists passing by on their way to the cooler climates.

Maintenance: The porch roof on Quarters No. 6-3 required complete reroofing.

A complete dead ground developed in the feeder line between the Quarters and the Administration Building, which resulted in having to pull the wire. The old black iron water pipe finally gave way and we found the wires had no insulation for about three feet, making it necessary to replace the pipe with conduit and pull in new wire. Labor was accomplished by Maintenanceman Barnett. We expect no more trouble or expense.

The chlorine had rusted out the larger intake as well as the exit pipes to the water storage tanks, making it necessary to replace all the pipe and fittings in the pump house. Mr. Barnett had the pipe cut and prepared before instalation, therefor we were out of water for only a very short time.

The long difficulty of our getting grease into one of the bearings of the sewer pump was located by our Maintenanceman Barnett, who found the bearing had not been drilled. Drilling it, the difficulty has been solved.

Trips Taken: Mechanic Stonehocker went into Phoenix on the 28th. of May for automobile parts. He also went to Flagstaff and Grande Canyon on the 30th. through the 3rd. to pick up a truck which he left at the latter area on one of his trips a month ago. Custodian Bicknell made a trip to Phoenix to get conduit and wire on the 13th. June 24, Mechanic Stonehocker left on a trip to Grand Canyon to pick up tanks for Organ Pipe Cactus, Saguaro, and Tonto Nat. Mons.

National Park Service Visitors, and Visitors of Note: On May 26, Custodian Supernaugh was in for AAA Ford Pickup and material for his area. The following day Custodian Egermeyer was in for his water tank. Mr. A.E. Buchenberg was in to visit the area on June 9. Dr. E.K. Reed of the Regional Office, dropped in for a few minutes on June 15, to tell us his plans, and he returned on the 18th. with a group of 19 students from the Tempe State Teachers College. A full morning was spent with the group in the Museum, on Compounds A and B, and at the prehistoric ball court. The early part of the afternoon, Dr. Reed gave us pertinent archaeological information.

On June 21, Architect Saunders stopped in to tell us how the bids for the roofing of the Utility area's Buildings were progressing.

Nature Notes: One night blooming cereus got a head start this year and had a gorgeous bloom on Memorial Day night. The following morning, the bloom had been completely eaten away by the bugs. A gila monster was seen directly east of the Administration Building on June 2. The "Jumping Cactus" or Silver Cholias bloomed around the Admin. Bldg. during the first part of the month. The ocotillo, though in full leaf where we irrigate it from the coolers, is in seed at the present. Some of the mesquite beans are ripening. Snakes have been on the increase, and the red phase of the racer snakes are seen nearly every day in the main ruin, and a very large one was stretched out on the back steps of quarters No. 6-3 on June 4. The bats are very active now, having had their young. Several young ground squirrels have made their appearance this past month.

Personnel: The Schumachers had a nine pound five ounces baby boy, born to them on Memorial Day. Park Ranger Schuft is still on duty at the Regional Office where he is working on the inventory of the Southwestern Nat. Mons. equipment. Mechanic Stonehocker made out application for transfer to Crater Lake Nat. Park.

Accessions: A fine quartzite metate of probable Papago origin was given to the Museum by a visitor. He had found it south of Eloy. When the Anderson property a ½ mile south of the Monument was being prepared for cultivation this spring, the caterpilar operator found a fine egg shaped Hohokam bowl, containing a very large piece of Hematite inside. The Hohokam housewife had used the bowl to hold her red paint in, and had no doubt misplaced it. Only two pieces were broken off the bowl, but this was repaired, and cleaned. The S.L. Palmer collection which had been collected by Dr. Palmer in the 1890's in the various areas of the southwest, was distributed from Mesa Verde Nat. Park where it had been stored. Casa Grande received its share of the collection which consisted of two sets of restrung shell beads some 15 and 21 inches in length, and a picture of the Casa Grande watch tower taken in 1894.

Inventory of Publications:

NATIONAL PARK SERVICE

Chaco Canyon NATIONAL MONUMENT

Bloomfield, New Mexico

June 25, 1947

MEMORANDUM for the Regional Director, Region Three,
National Park Service.

There follows the report of activities in Chaco Canyon National Monument for the month of June, 1947.

There were a total of 224 visitors to Chaco Canyon this month. The number of visitors is nearly three and one half times the visitors for May, but 57 less than the number a year ago this month. The visitors came in 69 automobiles from the states of:- Arizona - 1 car, 2 visitors; Arkansas - 1 car, 3 visitors; California - 7 cars, 18 visitors; Colorado - 4 cars, 16 visitors; Connecticut - 1 car, 3 visitors; Delaware - 1 car, 2 visitors; Kansas - 1 car, 2 visitors; Michigan - 2 cars, 4 visitors; Nevada - 1 car, 2 visitors; New Jersey - 1 car, 3 visitors; New Mexico - 35 cars, 121 visitors; Ohio - 3 cars, 8 visitors; Oklahoma - 2 cars, 5 visitors; Tennessee - 1 car, 3 visitors; Texas - 6 cars, 23 visitors; Utah - 1 car, 7 visitors; and Natal, Bahamas - 1 car, 2 visitors.

All 224 of these visitors took a trip through the ruins, and formed 62 parties. They were divided into 148 paid admissions, 34 tax only admissions and 42 children less than 12 years of age. 147 of these visitors formed 44 parties and listened to the museum lecture. Total time:- Ranger - 24 hours, 55 minutes, custodian - 59 hours 30 minutes.

Three written requests for information were answered. One request was from as far away as Toronto, Ontario.

The coldest during the month was 33 degrees on the 22nd of the month, and the warmest was 90 degrees Fahrenheit on the 7th, 15th and 25th of the month. The moisture consisted of 0.04 on June 17, 0.02 on June 18, 0.02 on June 21, and 0.06 on June 26, which made a total of 0.14 inch of moisture for the entire month.

The road crews were contacted, and both the San Juan County and McKinley County men agreed to bring out their blades again. This was done during the past week. Therefore, the approach roads to Chaco are in excellent shape.

An advance party of students and instructors from the University of New Mexico arrived on the 6th, and began the task of placing the summer school physical plant in shape to be ready for the school to begin on the 16th, the first field session at Chaco since early in the war. The students, a good many of whom are ex-GIs, accomplished the job in the allotted time, and school began on time; so with our own crew, the Trading Post and overnight visitors, the camping ground with its overnight visitors and the University, all going strong, Chaco is like a little city!

There was a transportation problem here this month. The stake truck needed repairs to the engine, but also the fan belt broke and the fan cut a severe gash in the radiator. The truck was started to town, but it was realized in a few miles that despite the fillings the radiator leaked too much, so it was brought back. The radiator taken off, loaded in the pickup and the pickup started to town, but on the Chaco hill, the transmission dropped out of the pickup. This necessitated several days layoff of the crew. First, the pickup was repaired, then a new radiator put on the stake truck, then the stake was taken to town, and now it is being repaired.

The fence crew has taken down fence on the north side of section 28, part of that which runs diagonally through section 28, and have placed posts on the west side of section 28 and some on the south side. Much more rock work was encountered than was expected on the west side of section 28.

Ranger Guillet turned up one morning with a terrible tooth ache. He left at noon, and was gone 7½ days having his teeth worked over.

Radio communication between El Morro National Monument and Chaco was resumed on June 28, after a long lapse. It was decided to continue the talks semi-weekly. The reception at both stations is very clear, especially so at this time of year.

The following visitors, National Park Service and others, were at Chaco Canyon this month:- George Grant, Charlie Steen, Dr. Nusbaum, Dr. Reed, Ranger Schuft from Casa Grande, John Davis, Dale King, Mr. Buchenberg and Dr. Mera. Another visitor was Dr. Martin Withers, former ranger at Mesa Verde National Park.

The Trader reports that all souvenirs for sale this year have arrived, but that the sale of jewelry is slow. The Navajo rugs are coming in at an increased rate when compared with last month, and they are being sold at about the rate that they are coming in. All kinds of supplies are being sold to the students, the school

purchasing a large part of its groceries at the store; and, altogether, the operator is expecting the greatest month in gross sales since he has been here.

At the end of the month, there were on hand:-

The two-fold leaflets on Chaco Canyon, approximately	9356
Southwestern Monuments folders, "	210
National Park location map, number 6, "	475

Chaco Canyon NATIONAL MONUMENT

Bloomfield, New Mexico

June 29 19 47

MEMORANDUM for the Custodian,
Chaco Canyon National Monument.

There follows the report of Mobile Unit activities in your area during the month of June, 1947.

GENERAL:

Working conditions have remained excellent this month and there have been few absences among the men. Emergency repairs were completed at Pueblo Alto and Pueblo Bonito and work is again in full swing at Chetro Ketl.

Archeologist Aide Al Lancaster left the 28th for a month's temporary duty at Tumacacori.

The partly washed-out pit house site discovered some 11 miles up the canyon this past winter by the Mobile Unit staff is now being excavated by the University of New Mexico. We are watching this dig with proprietary interest, hoping that some valuable data on the early Chaco will be salvaged here.

PUEBLO ALTO

Emergency work of four weeks duration was completed June 5th. This small site on the north mesa close to the proposed entrance road is not completely stabilized but enough work was done to insure the walls standing until further measures can be taken.

A total of 19 separate jobs were done here. Three were reinforced members to preserve wall breaks in their original outline and the remaining 16 jobs consisted of buttressing undercut sections and patching breaks at the ceiling or present ground level.

PUEBLO BONITO

Work on the back wall here was completed June 11th. This was a large patched area done some 20 years ago, by Zuni workmen, (according to the Navajo) which fell recently. Early photographs available indicate that the repair of 20 years back extended the wall considerably above the height at which it was found. The fallen section was rebuilt as close as possible to the condition shown in 1921.

The lower part of the rebuilt section was laid in masonry cement. A horizontal band through the center of the wall is tied together with a reinforced member and this in turn is tied in to the wall of the room adjoining on the south.

Following this large job 10 man days were spent repairing the balcony level on to the west. An additional four man days were put in cutting weeds from the plaza, rooms, and visitor trail. Weeds were bladed out in front of the ruin with the grader.

CHETRO KETL

This month saw completion of repairs to the entire back wall at balcony level. Stabilization of rooms 44, 45, 48, 49 and 50 has just about completed the northern tier of rooms which had been excavated to a depth of three stories.

In progress in this area are repairs to rooms 40, 43 and 49. Walls here are one and a half to two stories in height; it is an older section of poorer masonry and considerable patching is necessary at the ground floor level.

Also finished this month were complete repairs to kiva I, one of the two largest clan kivas in the site. The wall was patched and capped and extensive repairs were made to the bench which was not only badly weathered but had settled a lot where excavations had been carried under it in tracing earlier walls.

In the section along the central corridor left by the excavators for runway and excavating railroad rooms 62 and 57 have had minor patching and capping and room 35 N partially undermined during the excavations has been rebuilt.

The old tar paper covering over room 106 is being removed and the walls carried up to recieve a new less conspicuous roof. This is the room having designs in blue and yellow on the east wall.

Extensive repairs are in progress to the prehistoric roof of room 39. A foot to a foot and a half of soil had been left over it following the excavations and the drain provided in the center had become filled with trash. The large central viga broke and one corner of the roofing fell in.

The roofing has been jacked back into place and a new supplementary beam installed and new savinos put in place of those lost. The large original beam is now supported and will be secured with steel straps as soon as these are obtained.

One job has been started in the eastern wing of the pueblo, room 115. Here extensive repairs are being made to foundations; these will be carried up in a reinforced member to hold a large wall break in its original outline.

NATIONAL PARK SERVICE

CHIRICAHUA NATIONAL MONUMENT

Dos Cabezos, Arizona

June 27, 1947

MEMORANDUM for the Regional Director, Region Three.

Following is a report of activities at Chiricahua National Monument for June, 1947.

Weather conditions. The continued dry weather was interrupted slightly by a total of .52 inches of rain on June 18-19, which was a temporary relief. Two fires in the north end of the Chiricahuas, well off the monument, were started by lightning preceding the rain.

Inspections. Forester Ratcliff and Naturalist Sullivan arrived from Green Pipe Cactus on Monday, June 23, to look over the grazing allotments and to acquaint Mr. Sullivan with Chiricahua. One day was spent on the monument.

Maintenance. The new roof on the gas house is being completed by Operator Marble, with some help from the rest of the force. This building had the only flat roof on the monument and it was the only one that leaked. A start has been made on enclosing a fire tool room in the garage. It is thought there will be enough lumber left from the roof job to complete this room.

Approaches to Monument Area. The gravel and dirt approach roads continue to be in fair condition, though rough and corrugated. No visitor complaint has been heard about these roads, so they must not be too bad.

Interpretive Service. Approximately 1600 visitors were contacted in the Headquarters museum, and a few more on patrol and at Massai Point. The Happiness Tours, which make Chiricahua their only stop in Arizona, got off to a slow start on June 18 with some57 visitors who came by bus and had little time on the monument, due to a late train. Custodian Cooke took them on a guided trip of the Massai Point area. On June 1, Custodian Cooke made a tour of the Echo Canyon trail with a party of 15 newspaper men and their families, up from a convention at Douglas.

Travel Trends. This months figures showed an increase of about 50% over last month, and 25% over this month last year, in travel. With Happiness Tours and the usual summer increase, we expect this trend to continue for the remainder of the travel year. This month completes

the fiscal year with a travel of 15,16?. This is about 25% ahead of any other fiscal year.

Visitors. Dr. Herbert Brandt, ornithologist, who has been on a field trip in Rustler's Park in the Chiricahuas, stopped in. Mr. Schumacher (father of Paul Schumacher, Archaeologist, Casa Grande) who is making a ground water study of the San Simon area, visited a while one afternoon. Dr. Eric Reed, Regional Archaeologist, brought a group of 16 teachers and others to Chiricahua, inconnection with the conservation school at Silver City, New Mexico. Among these visitors were C. W. Matteson, Chief, Section of Education, Forest Service, and Mrs. Ruth Jones, Information Specialist, with the Forest Service Region Three office in Albuquerque, New Mexico.

Ranger Service. Seasonal Ranger Lew Hoffacker entered on duty June 6. Ranger Hoffacker is a veteran and a student at George Washington University.

Public Health. Returns from a water analysis by University of Arizona Agricultural Experiment Station indicate that the Chiricahua water supply is pure, but contains an excessive concentration of flouride which may require installation of a filtration system.

NATIONAL PARK SERVICE

El Morro NATIONAL MONUMENT

Ramah, New Mexico

June 26, 19 47

MEMORANDUM for the Regional Director, Region Three.

There follows the report of activities in El Morro National Monument for the month of June, 1947.

WEATHER: As was expected the weather this month has been dry and windy with a great range in temperature. Maximum reached 89 degrees on the 16th and theminimum dropped to 33 degrees on the 22nd. The total precipitation amounted to .51 inches.

TRAVEL: Travel during the 1947 fiscal year shows an increase of 27% over that of 1946. A total of 359 people arrived at the monument in 101 cars from 18 states and one foreign country. The tour of the inscriptions was made by 343 people and 20 of this number went on top to see the Ruins. Sixteen people arrived only for information. The total guide time amounted to 88 hours and 5 minutes.

APPROACH ROADS: The 20 mile stretch between Gallup and the Zuni Indian Reservation was bladed on June 15th & 16th and the Indian Service is completing repairs, started last fall, on three miles located in the Reservation. This approach road is in better shape than usual, but is still frightening to the average tourist. The road from Grants to the Ice Caves was bladed during the first two weeks in June and this stretch is still in fair condition, but the last 18 miles on to the Rock discourages many visitors.

PERSONNEL: Mr. William H. Scott entered on duty June 17th. as Seasonal Ranger. He arrived at a time when everything here was definitely SNAFU and any ordinary person would have left the same day. However Bill is certainly not an ordinary person in any respect and we are very fortunate to have him with us, and appreciate all that he has done to help us out of a tight spot.

WATER ANALYSIS: Samples of our water supply are now being taken at regular bi-weekly intervals and sent to the lab. in Albuquerque. For the two periods in this month the report has shown the water in the sandstone pool to be contaminated but safe at the Custodian's Residence. Continious chlorination is necessary. We have been unable to decide whether we prefer the mellow taste of the algae or the stimulating fumes of the chlorine. The combination of the two we can definitely recommend to anybody who isn't very thirsty.

SPECIAL ACTIVITIES: The Harry Pictures Inc. completed their filming

SPECIAL ACTIVITIES contd: here on June 26th. but their work crew was here for two more days dismantling sets and cleaning the grounds. Three more days were spent with them on seeding and obliteration work. More planting remains to be done, but a little moisture is needed for this job. The owners of the two inscriptions put on the Rock during the motion picture activities was located in Gallup, contacted and requested to return to the monument and remove his name. His name,Bart Cresto, appeared in two places and the removal was done under my supervision. On June 22nd a would-be mountain climber was unfrozen by the assured feeling given by a stout rope around his body. He had attempted to scale a steep slope of the Rock and found himself in a position where he could not go up or down. A rope was lowered to him from the top and as soon as the loop was under his arms he completed the climb faster than we could reel in the rope.

GENERAL: Two trips to Gallup and one to Grants were made for supplies. One emergency trip to the hospital was made on June 8th. when Edie feard a premature visit from the Stork. She made the trip to Gallup without mishap stayed one week in the hospital and is now back at the Rock. I never realized how far it really was to Gallup.

Betty E. Wilson
Bates E. Wilson,
Custodian.

2-fold Spanish edition——3759

2-fold English edition——1068

16-page Booklet——8659

GRAN QUIVIRA

GRAN QUIVIRA, NEW MEXICO.

JUNE 25, 1947.

The following is a summary of activities for the month of June, 1947.

Visitors this month totaled 261.
Travel year to date 1438

Weather. This makes five consecutive years of drought in this area and the country in general is approaching rapidly in appearance the dust-bowl era of the nineteen thirties. Many people, in this section, continue to leave in an effort to find some means of livelihood in other parts of the country. High winds and great clouds of dust appear almost daily. The entire month has been very dry and dusty. High temperature for the past month was 92 and low 41.

Roads. The approach road from Mountainair is in fair condition. However, the road from Carrizozo has been blocked to traffic most of the month. Tourist coming from the South, who have not been warned of road conditions, find themselves stuck for several hours in deep sands before help can be obtained. Constant moving sands will fill the highway within a few hours after a passage-way has been made by the Highway Department. The Custodian recently borrowed a heavy road maintainer from the State Highway Department for use on the entrance road to the monument and it is now in excellent shape.

Travel. This month shows a nice increase over the previous month of May in spite of bad roads and sand storms. Instate visitors numbered 125 and outstate visitors 76. There were a total of 69 cars with instate numbering 49 and outstate 20. 6 people walked out to the monument. We had only 2 visitors from the Armed Forces.

Guide and Contact Service. 261 visitors were conducted through the ruins on 69 guided tours. The average time spent by each party was 57 minutes. Total contact time of 77 hours.

Special Activities. At 1:30 A.M. on the morning of June 9, loud knocking on the door of the custodian's residence disrupted peaceful slumber. The visitors proved to be three doctors from New Jersey who wished to be shown around, even at the unusual hour. Securing all available flashlights a guided tour was made through the ruins and one hour later (2:30A.M.) our visitors, who said they intended to visit all the National Parks and Monuments in the United States, went merrily on their way expressing high praise for the excellent service and courteous treatment always shown by the National Park Service.

Maintenance and Administration. Deweeding of the ruins rooms continued as time permitted and loose fallen stones were placed back in the walls in their original positions. Received two badly needed 6:50-16 tires from Walnut Canyon. Delivered several urgent telephone messages-some up to 15 miles distance from the monument.

GRAN QUIVIRA

GRAN QUIVIRA NATIONAL MONUMENT

JUNE 26, 1947

Gran Quivira Monthly Report continued from page one ——————Page 2

Painted and relettered more directional road signs and placed them on both approach roads. Cleaned one cistern and overhauled deep well pump.

Publications Report. 1000 Gran Quivira two-fold leaflets on hand. No other free or for sale publications on hand at this monument.

Everett M. Ross

Custodian.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
GREAT SAND DUNES NATIONAL MONUMENT
MOSCA, COLORADO.

June 26, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in Great Sand Dunes National Monument for June, 1947.

WEATHER. The weather for this report period should have occurred in March, as there were the most severe wind storms felt todate. The major part of the month was very cloudy and with considerable moisture falling. Rain fell on May 27, 29 and 31; June 19 and 21. Snow mixed with rain fell on May 28, June 11, 12 and 18. These snows recovered the tops of the Sangre de Cristo range and between both snows and rains, the Medano Creek is running with a steady flow. The San Luis valley is nearly afloat from all moisture and crops are correspondingly retarded. Very strong south-west winds blew on June 8, 9 and 11 which caused all cars driving up the long slope into the headquarter area to boil and have engine trouble.

The Denver Weather Bureau has written saying that when equipment is available, a cooperative weather station will be established at this area.

At 8200 feet elevation, we hope that summer will arrive and stay awhile. The oil stove in the basement was shut off on June 24, when the weather had warmed up enough for the house to remain comfortable. Most days during the month were quite cool; with the maximum temperature estimated at 75 degrees. Grass and wildflowers in the area are abundant with all the moisture they have received.

TRAVEL. One thousand, nine hundred eighty-one visitors in four hundred twenty-seven cars visited the Sand Dunes during this report period. Two girls rode horses into the area, which brings the total visitation to 1983. Thirty-five states were represented. Three members of the armed force were counted. One thousand, one hundred seventy-two people took advantage of the camp and picnic area, and of these fifty-seven camped over night. Three written requests were answered.

INCREASE IN TRAVEL. For June, 1946, the record shows 216 cars and 715 visitors.

ROADS. It is understood that the State Highway Department and Travel Bureaus in Denver, received so many complaints concerning the entrance road into this monument, that the District Supervisor made a special

trip to the Sand Dunes to check on the road personally. He arrived on June 10 and during our conversation, mention was made of the effort being made to obtain four rail-road irons to enable me to drag and maintain the five miles of road in the monument. On June 13, a six rail-road iron drag was delivered, and that afternoon was devoted to road work with considerable smoothing of corregation as a result.

Then on June 16, the Colorado State Highway grader came out to the headquarter area. He returned again on June 19 and graded and widened the road into the picnic area. The entire afternoon was spent in removing all rocks he had up-rooted.

Again on June 20, 24 and 25, the grader made its appearance to this area, and as this is being written, the road is receiving more attention.

The road from the Mosca turn-off to the San Luis Lake was under water (running-board deep) on June 22 and the Zapata Creek over flowed and washed a section out of the road a short distance from our entrance gate. This condition plus complaints has produced great results todate and the road will soon be in excellent condition.

COMPLAINTS. Verbal complaints are still being made in regards to the unfinished rest-rooms at the checking station. It is hoped that funds will be made available during the 1948 fiscal year to remedy this bad situation.

Road conditions were also complained about until the advent of the state grader working on the road. Visitors stopped complaining as soon as they saw some work being done.

ARCHAEOLOGY. No further developments have been noted in the Alamosa State College excavations. An Oregon visitor found two nicely made points on the Upper Medano.

NEWSWORTHY VISITORS. The Manassa School held its picnic at the Sand Dunes on May 27, with 300 attending. On May 30, Mr. and Mrs. Hector Bambien and family of Durango visited this area. The Department of Geology from Yale University spent a half-day in the dunes on June 17. There were fifteen in the party. Fifteen girls from the Myron Stratton Home in Colorado Springs had a picnic on June 20.

WILDLIFE. Four baby blue-birds were successfully launched from their nest under the porch roof. Many young rabbits and chipmunks are noticed in front and back yard patios. The deer have moved into the higher mountains and no longer are seen around the springs.

ACTIVITIES. With the great increase in visitation, only routine maintenance and especially vital projects were accomplished.

The Dodge 4x2 pickup was repaired and obtained from the Heide Garage in Alamosa. It was found to have a crack along the cam shaft and into the tappet bearings. With this condition, the pickup may last a year or break down at anytime, resulting in the need for an entire new block.

The office floor was given tow coats of gray paint; the two desks were uncrated, washed and waxed. After a considerable struggle, they were carried in and arranged as conveniently as possible in the small room. The metal file cases were also washed and waxed; these will have to be bolted together.

During spare time and between visitors, a start has been made on putting the files into good shape. The folders are of legal size and must be cut down to fit the file cases.

The hall and dining room of the custodian's residence received its first coat of paint. One coat is not enough, but another coat will be applied in the far distant future.

Cleaning up of the two picnic areas and hauling of garbage is now a major maintenance job. Extra barrels are badly needed in both areas.

Only a half a day has been spent on filling in the water-line trench.

A barrel of gasoline for the light plant and one-half ton of nut coal were hauled.

Both 3 KW light plants were moved to a better position in the light plant room and they were placed and bolted to a platform. Wonder what it would be like to have a permanent ranger here who could lift his share of 450 pounds? The wires were run through pipe which lead to the switch. The newer plant was put into operation and both will be alternately used. A work-bench is under slow construction in this room.

Three bids were issued for an 8 cubic foot propane ice box and one copy of the bid was posted in the Alamosa post-office. Little hope is held that this size box can be obtained. We haven't eaten from cans since our Hovenweep days.

Purchase orders were issued for needed paint, lumber for signs, linseed oil, turpentine, welding, some hardware and other small items.

The repaired typewriter was received and also flags, fire extinguisher fluid and visitor registration book cover. At long last, a barrel pump was obtained and will save an aching back.

As time permits, contact will be made with Mr. Howard Linger in regards to a correction deed needed to establish the water rights for Mosca and Morris Gulch Springs.

Also there is needed information to be obtained from the Alamosa County records in regards to land and boundaries.

The Memorial Day week-end is expected to be repeated on July 4 week-end. The previous week-end brought in 315 visitors, many campers and the usual hauling of water for boiling radiators and helpful shoval work in extracting cars stuck in the sand of the pichic ground.

Although gasoline is not yet rationed in Colorado, no doubt the Midwest rationing will bring about a decrease in the number of people we have been having from that section of the country.

A pat on the back goes to Custodian Hastings, who after reading of my plight with water line and small wrenches, sent and gave me his personal worn and battered 24 inch wrench to complete the job. A final twist and turn with said wrench completely tightened the union and wrench withstood the test.

PUBLICATIONS. There are on hand, 63 of the mimeographed informational leaflets. Fifteen copies were requested by the Department of Geology, at Western State Teachers College.

It is hoped that the Naturalist Division can prepare some sort of mimeographed sheet or funds can be available to publish the two-fold which is needed very badly at this area.

Ted C. Sowers,
Custodian.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Montezuma Castle National Monument
Camp Verde, Arizona

June 24, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows the monthly report of activities at Montezuma Castle and Montezuma Well for the month of June, 1947.

Visitors this month - 2297; travel year to date - 12253.
Visitors June, 1941 - 1139; travel year 1941 - 8254.

General Numerous visitors were attracted to the Verde Valley on June 22 when a smoke stack at the old Verde Extension Smelter at Clemenceau was blasted to the ground. The Clemenceau Airport is nearby and the four hundred foot stack had been decalred a hazard to night flying. It was estimated that 5000 people had their attention focused on the stack at 5:00 P.M. when several hundred pounds of dynamite brought it tumbling straight down to the ground with a resultant cloud of dust that resembled an atomic bomb explosion.

We are again encountering numerous Triatomas, alias cone-nose bugs, assassin bugs, Chinese bed bugs, etc. However we are not sure that anyone has been bitten.

Mrs. Hastings was awakened the night of June 15 when she was being investigated in bed by a four inch centipede which was captured.

Administration About half of the Custodian's time has been spent on business pertaining to Montezuma Well and to the supervision of contracts contemplated or in progress.

A cash box was provided by Southwestern Monuments Association so that funds from book sales could be more completely segregated from revenues from ticket sales.

The receipt and posting of another sign "Open 8:00 - 5:00 daily" from the State Highway Department completes our sign program on Alternate Highway 89. Visitors approaching from either Cottonwood or Sedona can now be spared driving sixteen miles to learn the hours our monument is not open.

A supply of mimeographed information leaflets was received to take the place of our printed two-fold leaflets. A new supply of two-fold leaflets has been on order since December, 1946.

The quarterly sales report for Southwestern Monuments Association showed a turn-in of $342.18 for the period. Sales this month totaled $104.35 with a shortage of $4.70 not collected on the "Self-Serve" plan.

Totals for the fiscal year show that we have sold 6510 tickets and have collected $1627.50 in fees and $103.35 in taxes. Total travel for the fiscal year is 18,147. We have 42 more visitors this month than the peak month of September last year when 2,255 were counted.

On June 20 Mrs. G. G. Stocking, Richland, Michigan fainted completely in the fourth story of the Castle. Ranger Leding rendered first aid and left her there with her husband while other visitors completed their tour and by that time she could climb down by herself.

Publicity The Prescott Courier for June 2 carried a news article on this monument and Montezuma Well.

Personnel The services of William L. Rowantine were terminated May 31 as pre-arranged so that he could enter other work.

Charles D. Frost, ex-Marine, reported for duty June 1. Frost had one summer's previous experience as a Fire Guard at Saguaro and is adjusting himself to our routine.

Protection On June 14 three boys, Walter, Richard, and Floyd Friess were apprehended after they had excavated several corn cobs, bits of squash rind, fragments of arrow shafts, etc. from a cave near the Lower Ruin.

Museum Exhibits In 1896 the mummy of a two year old boy was found buried on the ledge just outside Montezuma Castle. The discovery was made by S. L. Palmer, Jr. who in 1938 loaned his collection of artifacts to Mesa Verde National Park with the stipulation that it be kept intact. After several years of intermittent negotiations it was agreed that the mummy could be returned to the Montezuma Castle museum where it was delivered June 7 by Messrs. Steen and Grant.

National Park Service Visitors Architect Kenneth M. Saunders was here May 28 and on June 23 to confer on matters pertaining to Montezuma Well and the preparation of PCP sheets.

Forester Ratcliff and Naturalist Sullivan were here May 31 and visited Montezuma Well.

Archaeologist Steen and Photographer George Grant were here June 7. Mr. Grant took some pictures including 5 x 7 Kodachromes of the Castle. A fine set of black and white prints of these pictures was received June 23.

Noteworthy Visitors W. G. Harper, Albuquerque and A. C. Anderson, Prescott, both from the Bureau of Plant Industry, Division of Soil Survey were here. They were accompanied by Prof. H. V. Smith of the University of Arizona.

Mrs. William Colter, staunch friend of the Park Service, was here June 22.

Service To The Public Travel this month was a little more than twice what is was for the same month in 1941. There were 2297 visitors who came in 713 cars. Tickets were sold to 829 people, Complimentary Admission Tickets were issued to 102 people, 159 children were admitted free and there were Indians admitted upon payment of tax only.

Contact Time Total contact hours, 243.75. Hastings, 52; Leding, 70.75; Schroeder, 16.25 at Montezuma Castle; Howenstine, 22.75; Frost, 82. There were 190 guided trips through the Castle for 1093 visitors and 287 groups in the museum including 1111 visitors. There were 485 visitors who received information outside the museum or ruins. Picnic parties were 26 for 103 people and five camping parties including ten people stayed over night.

Free Publications On Hand

2-fold leaflets, Montezuma Castle	145 (A small supply was received from another area since last report)
The National Park System and Other Areas Administered by the Park Service	18.

Montezuma Well On a patrol trip on May 29 a shovel and signs of fresh digging were discovered. Only a few shovels full had been moved in the big pueblo on the rim and perhaps the pot hunters left in a hurry.

The former owners of the Montezuma Well property are contemplating sale of the fence that was constructed under permit on Forest Service land and now in possession of the Park Service. If this fence is sold and removed it will remove more than a half mile of necessary fence.

The following report of activities at Montezuma Well has been received from Archaeologist Schroeder.

General Twenty-three days were spent at the Well; 19 by Schroeder, by Hastings, and 1 by Leding. Schroeder began full daily duty at the Well June 6. 581 visitors in 110 cars, trucks, buses, and on 3 horses were contacted.

Administration Considerable time was devoted to cleaning and miscellaneous repair. Refuse that had been gathered was dumped into the old household well and the collapsed cesspool.

Thanks to the loan of a wood carving set by Charlie Steen who piloted the Pie Wagon to the Well, a considerable number of signs for the trail and property have been completed.

Mr. Lee began drilling the new household well May 24 and completed the well June 12. It is 105 feet in depth and discharges 1600 gallons per hour based on the estimate of a bailing test.

The first crop of hay was mowed on June 10, baled June 12, and picked up (our share of 71 bales being placed in the barn) on June 14. Mr. Lightfoot who was awarded the contract for harvesting the second crop, irrigated June 20 through June 22.

The Webb Contracting Company of Prescott was awarded the contract for the renovation of the quarters on the property.

Truck I-13834 was driven from Santa Fe by Mr. Ratcliff and delivered to Montezuma Castle May 31 for use at Montezuma Well. It has since been found that the left front spring is 2½" longer than the right front spring which impairs turning to the right but we have been unable to get a replacement.

George Grant came in June 8 with Charlie Steen and photographed the physical structures on the property.

Half a day was spent tearing down old signs along the boundary as well as within the area.

Act of God A heavy windstorm blew down the roof of the shed on the south side of the barn about 5:30 P.M. June 20. It also bent up a portion of the tin roof on the northeast corner of the barn.

A brief rain of about five minutes duration caused two big leaks in the ceiling of the museum. A check on the outside revealed there was a greater flow pouring into the museum than out of the canales.

Research A continued effort was made to locate the old Wales Arnold irrigation ditch on the ground. This information is needed to support claims to water rights.

Some of the sites in the area were photographed and also our two "big trees", mesquite and cottonwood. Well drilling operations were also photographed for our files.

Interpretation The mimeographed pamphlets for the visitor trail around the Well were received and stapling has begun. It is planned to make them available to the public this coming month when the trail stakes are up.

Sherds from four sites were sent to the Museum of Northern Arizona for identification and have been received. They further substantiate the post 1100 A.D. date for this area.

Roads The county road running by the Well was graded this month eliminating a great majority of the chuck holes and washboarding. The operator drove into the Well area to obtain water for his equipment from the irrigation ditch. Being unfamiliar with the operation of such equipment, the natural question was raised. The operator's demonstration resulted in the grading of our entrance WYE.

Homer F. Hastings,
Custodian.

Natural Bridges NATIONAL MONUMENT

Blanding, Utah

June 27, 1947

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Natural Bridges National Monument for the month of June, 1947:

GENERAL: Travel to the area has held up very well despite stormy weather which had an adverse effect on the approach road from Blanding, Utah. Practically all visitors visited the three bridges, making the trip to the Kachina Bridge by a short walk from the White Canyon road.

WEATHER: Cool weather has been the rule during the month. Rain fell intermittently with a heavy storm on June 22nd. The days for the most part have been clear and comfortable.

TRAVEL: This months travel totalled 31 cars and 120 people bringing the total travel for the fiscal year to 280 cars and 969 people, which is excellent travel for this area.

ROADS: Storms during the month made the road from Blanding very slick during portions of the month. The Maverick Point hill bore the brunt of these storms and washed badly. At this writing it is rough but passable.

The White Canyon road is still passable but the ferry at Hite has not been operating due to mechanical trouble and high water on the Colorado River. Visitors have advised me that the road in the North Wash, between Hite and Hanksville, is in very poor condition.

INTERPRETIVE SERVICES: Seventeen parties consisting of 72 people were contacted at headquarters and one guided trip was made to the three bridges with one person. Forty seven people visited the area during the absence of the ranger, on his day's off. Two parties of 6 people used the camp-ground for an overnight stay and two parties of 8 people were contacted in Blanding.

ACQUISITIONS: A 1½ KW power unit was received during the month from surplus and was installed at the dam on June 11th.

TRAILS: The trails are gradually being put in good shape. The ladders near

Sipapuu Bridge were gone over and put in good shape. Several trees had fallen across the trail in the canyon and these are being removed. Eroded fills are being repaired and arrows are being repainted on slick-rock portions of the trail.

June 27, 1947

MEMORANDUM for the Director, Region Three

There follows the Monthly Report of activities in this area for the month of June 1947.

WEATHER: Snow on June 11th. High winds and dry sand prevailed thruout the month.

VISITORS: Visitors were on the area continually from the 25th of May until the 14th of June at which time the surrounding roads discouraged travel. The next party to arrive came in on the 23rd. The New Mexican Boy Scout expedition 17 strong were here on the 24th and 25th. Dr. Edmond Schulman, Uni. of Arizona is here studying Dendro-Chronology.
Total travel: 42 in 17 cars. 30 Campground users.

N.P.S. VISITORS: Ranger Peter Schuft on the 15th to help us organize our inventory.

WORK PROGRESS: The power line was elevated from Residence #1 to the tool house.
The excavation for the 950 gallon gas tank is complete.
The herbarium was completely overhauled, many specimens were mounted, new labels were prepared for old specimens, new specimens were pressed, mounted and labelled.
A Major Repair and Rehabilitation Program was prepared for this area.
A revised Priority Construction Program was prepared to place the water supply system in the #1 position.
A manuscript was prepared for publication by the National Park Association Magazine.
Material was prepared for a National Parks article to be published by Holiday.

NATIONAL PARK SERVICE

Organ Pipe Cactus NATIONAL MONUMENT

Ajo, Arizona

June 25, 1947. 19

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities in Organ Pipe Cactus National Monument for the month of June, 1947.

WEATHER:
June has been very nice as a whole with only three days reaching above 100 degrees. High for the month was 105 on both the 15th and 16th. Nights remained cool with a low of 65 reached on the 1st and again on the 22nd. High winds on the 20th caused a peculiar situation which we had never experienced here before. Although little dust was raised in our general area the air was completely filled with a dust haze which remained for two days following. No precipitation fell and only one day during the period was partly cloudy.

SPECIAL ACTIVITIES:
The greater part of the month was taken up with the trapping and counting of cattle on the monument. With the assistance of Forester Ratcliff, Naturalist Sullivan, and Ranger Steele, all cattle were trapped and counted at the water holes with a final count of 806 being determined as on the monument. Work on this project was started on June 1 and completed on June 17, with work being carried on 24 hours per day.

TRAVEL:
Out of state travel has about stopped for the summer; however, some local travel is still coming in as are those stopping on their way through to the gulf for fishing. Total travel through the area for the month was 7292 , bringing the travel year to 62867 . 54 persons stopped at headquarters and received interpretation service.

GENERAL:
With the cattle count taking up most of the month, little else was accomplished other than to keep office routine current and the S. & M. project going. At the end of the fiscal year five miles of fence will have been completed along the west boundary on the S.& M. program. Some unexpectedly rocky terrain has slowed the project some as holes have had to be punched before posts could be driven.

Mr. Emmett and Mr. Roberson of the Bureau of Animal Industry, called at the office to work out cooperative fence projects along the International Boundary. The section along Organ Pipe is probably the most critical of all border areas as far as the drift of Mexican cattle across the border is concerned. It is hoped that something may be worked out for the benefit of both

agencies.

Work on the new building of the Lake scenic easement strip is nearly completed and additional improvements are being started on the private property. Requests for access roads were presented for consideration to carry out a subdivision plan on this land.

It is announced through the Bureau of Land Management that 360 acres in 2½ and 5 acre business and homesites will be opened up on the public lands at the junction of the monument highway and the Tucson road. All of thiswill be along our approach roads and will undoubtedly have some effect on the monument.

ACCIDENTS:

A deer was struck and killed on the highway the night of June 7. There was no evidence of carelessness on the part of the driver so no action was taken.

WILDLIFE:

Outbreaks of rabies in coyotes, bobcats, and fox have been reported numerous in the vicinity. The Fish and Wildlife Service is carrying on a poison program in the area around Ajo to eliminate the danger there.

PUBLICATIONS:

Informational two-fold pamphlets on hand,	English version	13,000

William M. Supernaugh,
Custodian.

Saguaro National Monument
Tucson, Arizona
June 26, 1947.

MEMORANDUM for the Regional Director,
Region Three.

There follows the MONTHLY NARRATIVE REPORT of activities at Saguaro National Monument for the month of June, 1947.

WEATHER. Days were generally clear, cloudless, and warm, with daily maximums ranging from 91 to 99 degrees. ~~Heavy~~ lightning storm occurred on the afternoon of the 17th, followed by a not-so-dry storm the following day, when .48 inch of precipitation in the form of rain and hail was recorded at the Mica Mountain Tower weather station; only a trace of moisture fell at Headquarters. Nights have been cooler than usual for this time of the year. The Tucson weather station has recorded less than one inch of rain since January 1, and almost daily radio news items and newspaper articles are stressing the critical ground water conditions throughout the state.

INSPECTIONS. Forester Ratcliff and Naturalist Sullivan of the Regional Office were in for the afternoon of June 20, and paid a further visit to the Madrona Canyon area on the morning of the 22nd. Grazing and wildlife problems, including "pigs", were discussed. Other, unofficial, NPS visitors were Clair and Mrs. Cook, of Chiricahua, who arrived on the 10th.

MAINTENANCE. Maintenanceman Ollie Barney, and his one-man trail crew spent the entire month clearing windfalls from the Cow-head Saddle trail, and brushing out this and other trail which can be reached from their headquarters at Manning Camp R.S. In all, sixteen miles of trail were re-brushed, and fairly heavy maintenance applied to the so-called Fire trail which leads under Spud Rock, on the north side. Trails which can only be reached by establishment of camps elsewhere will have to be neglected this year, since the only spring on the mountain which has not been dry since early May is the one at Manning Camp. Five man-days was spent on telephone maintenance; the line works satisfactorily to the lookouts, but we are unable to hear town after 8 or 9 A.M. each day. Ranger Fulton spent several days overhauling building fire protection installations at Madrona R.S., and, with the assistance of the Packer, George Hilliard, replaced two of the mangers at the Madrona Barn. Fulton also spent three days overhauling the engine, pump, and water system at Madrona Canyon, and is now beginning work on a temporary shelter for our two new 3-KW generators there.

APPROACH AND MONUMENT ROADS. The Broadway approach road has been in an even rougher, more washboarded, condition - if possible - than has been usual all winter. Very few visitors arrive here without adverse comment on its condition, although those who come in from the east, via Vail, are even more outspoken in their complaints. The county road crew is now making the second maintenance trip of the month over both these roads, but their work seldom lasts more than two or three days. By contrast, the Loop Road within the cactus area of the monument, is somewhat smoother, although it too, is finally beginning to roughen up as the prolonged drought continues.

TRAVEL AND INTERPRETIVE SERVICES. Our seasonal decrease in visitors continued this month, with only 772 persons, in 228 cars, counted into the monument. Registrations included 31 states, with California and Illinois tied for second in greatest number of visitors, after Arizona. Contact service was available only 20 days of the period, due to days off duty and necessity for the Custodian to be absent from Headquarters on other duties. On these days, 218 persons, in 65 parties, were provided with information at the Headquarters contact station.

PERSONNEL. Roderick J. MacKenzie, Jr., entered on duty in the W.A.E. Fire Control Aid position recently established on May 31; this work is four days weekly, with the fifth day's work being with the trail crew. Rex E. McPhaul entered on duty as Fire Control Aid, SP-3, on June 1.

FOREST FIRE PROTECTION. No fires occurred during the month. Fire-danger weather readings have averaged in high moderate class, with two days when conditions warranted putting an extra Aid on emergency detection duty; on one of these days wind velocity reached 44 mph, and felled numerous trees along the trails within the 1943 burn. The Coronado National Forest has had three Class "C" fires in the past week, and radio reports of an 8000 acre fire on the Tonto National Forest were picked up by our lookouts. Current fire-weather broadcasts predict the early beginning of our summer rains and lightning storms, probably by the end of this week.

PUBLIC HEALTH. Water for drinking purposes has been hauled to the Madrona R.S. throughout the month, as the last of the creek water was too populated with wildlife to use internally. Present storage capacity of 6000 gallons was last filled two weeks ago, and in another two weeks we shall have to haul water for the pack animals. Water samples from the creek have been analyzed as unpotable for the past five months.

PUBLICATIONS. Free publications of the Service on hand at end of the report period were as follows:

Saguaro two-fold informational leaflets, English	3561
Saguaro two-fold informational leaflets, Spanish	1100
Location Map No. 6, Southwestern States,	607
(Two dozen were found in Tucson office files)	
Southwestern National Monuments Folders —	721
(100 copies found as above)	none.

Don W. Egenmeyer
Custodian

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Sunset Crater

NATIONAL MONUMENT

Flagstaff, Arizona

OFFICE OF THE CUSTODIAN

June 28 47

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Sunset Crater National Monument for the month of June, 1947:

Visitors this month: 1727 Travel Year to date: 5914

Travel: Visitation continues on the increase in keeping with the steady influx of visitors to other points of interest in the Flagstaff area. 30% more visitors came to the area this month than were recorded for June of 1946, an increase of 17.6 % for the month over last year.

Roads: Continued dry weather, heavy travel use and lack of maintenance have taken their toll on the entrance road. It has become very rough and in many places large chuck holes have made the going most disagreeable. Several cars have gotten stuck and have been pulled out of these holes, but in spite of this road condition the visitors still come.

The last week of the month we were able to do some road work, hauling between thirty and forty loads of clay and filling the worst spots so that at least we no longer will have to maintain a towing service. It is hoped the local weather prophets, that expect rain over the 4th of July, will find their predictions coming true. Maybe some of that moisture will come our way so that some definite road maintenance can be accomplished. The Wupatki back road remains closed to the visitor because of the dryness of the deep cinder.

General: At long last residence has been established at Sunset Crater. The Uptons moved into tent quarters on the 19th and things are beginning to take some semblance of order.

Regular interpretive service will now be offered. That together with the many other necessary tasks with the planning and development of the area will not allow time to hang idly on the hands.

NPS Visitors: Ranger Paul Schumaker of Casa Grande was at the Crater on the 17th. He reported the climb and descent were made in 50 minutes without ill effects. A number of local monument visitors have stopped in to wish the Uptons well in their new home. Davy, Corky and Bucky have been up several times to assist in getting settled. Custodian and Mrs. Beaubien of Walnut Canyon were over to inspect the new set up. Ranger and Mrs. John Ashurst and daughter Boots, with guests, were up on the 27th to

extend tent warming greetings.

~~Tonto~~ NATIONAL MONUMENT

~~Roosevelt, Arizona~~

~~June 25,~~ 19~~47~~

Memorandum for the Regional Director.

Following is the monthly Narrative Report for Tonto National Monument for the month of June 1947.

TRAVEL - 735 persons visited the monument during the month; of these 342 visited the Lower Ruin. 27 states were represented with Arizona leading.

WEATHER - The weather this month is truly Arizona with hot clear days and cool nights. No rain fell and a record temprature of 109 was reached.

GENERAL - Conditions for the Salt River Valley are not too good at the present time. Roosevelt Lake will be dry the 27th. and no rain is expected for some time. This will no doubt cause a sharp decline in travel to the Monument as we contact many sportsmen.

On Tuesday afternoon, June 17, an electrical storm swept through the Four Peaks region of Tonto National Forest starting a very small fire. High shifting winds took the fire out of control and is still burning. At present over 8,000 acres have been cleared of brush. (Bull was nervous until notified that 100 soldiers from Phoenix would arrive and he was not needed.)

Malcolm T. Bull
Acting Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
TUMACACORI NATIONAL MONUMENT
Box [redacted]
Tumacacori, Arizona

June 25, 1947.

MEMORANDUM for the Regional Director,
Region Three.

Follows the monthly narrative report for Tumacacori National Monument for the month of June, 1947:

WEATHER CONDITIONS: No rain. Hottest day 104 on June 16. Coldest day 47 on May 22.

MAINTENANCE: Other than routine, a large drainage ditch was dug to connect the drains under the two sides of our approach area. Repairs to linoleum flooring were made in the living room of the ranger house.

MUSEUM AND EDUCATION: Plant labels have been installed for most of the plant species in our patio garden. Sticks are made from old orange crates, with one planed side, then linseeded, and the lettering applied with our Leroy lettering set. They are very nice looking, and elicit favorable comment.

Two of the old molinas (grist mill upper and nether stones) were fixed up to give a more graphic idea of how they operated. Stakes have been driven into the peripheral holes of the upper stone, and the nether stone has been set up on a stone foundation about a foot above ground, with a lime mortar trough around it, and a slab and lime spout. This illustrates how the meal working out from the center would fall into the trough, and could then be swept around to the spout into a basket. The set-up is based on a photo of molinas in place at Quitovaquito, on the Mexican border west of Nogales.

Timbers of a life size model of an arrastra (the old type ore mill) which was built on the grounds ten years ago by former Custodian Caywood, were so rotten they were taken down, and the circular trough of the base has been covered with dirt. The arrastra is better shown by a miniature in the museum, anyway, and I feel that an arrastra on the grounds places undue emphasis on the very theoretical mining activities of the mission priests.

INTERPRETIVE SERVICE: 830 visitors went on 160 guided trips through the mission church and grounds, receiving an average of 37.15 minutes per trip. 1361 visitors received combined Information and Interpretation Service in the museum lobby, patio garden, and view room. 1295 persons visited the museum.

INCREASE OR DECREASE IN TRAVEL: June travel of 1373 visitors has been exceeded once, by the figure of 1429 for June, 1937.

VISITORS: June 10 - The Patagonia Home and Garden Club (12 women).
June 13 - Carl A. Miller, N.P.S., from Petrified Forest.
June 15 - Parents and kids, totalling about 90 people, picknicked here. They were celebrating First Communion, which had been held elsewhere earlier in the day.
June 21 - 29 University of Arizona students, under direction of R. A. Spencer, U. of A. Dramatics Department.

INSPECTIONS: May 28 - Architect Kenneth M. Saunders, to check on repair and rehabilitation work being done here.
June 8 - Collaborator A. E. Buchenberg, to discuss stabilization problems.
June 15 - Archaeologist E. K. Reed, of the Regional Office.
June 20 - Architect Saunders.
June 21 - Architect Saunders, Forester Ratcliff, and Naturalist Sullivan.

DONATIONS AND ACCESSIONS: An old 16 gauge shotgun was donated to the museum by Thomas D. Casanega. The gun had belonged to his father, an early day peace officer in Southern Arizona, and a friend of Pete Kitchen.

PERSONNEL: Two days of annual leave taken by Ranger Brewer during month.

MAJOR REPAIR AND REHABILITATION: Restoration of the nave roof is complete. New roofs over ranger residence, custodian residence, and comfort station, await only hot asphalt and gravel. Scratch coat of plaster has been applied to ranger residence and garage.

Custodian.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Tuzigoot National Monument
Clarkdale, Arizona
June 22, 1947

MEMORANDUM FOR the Regional Director
Region Three

Following is the monthly narrative report for Tuzigoot National Monument for June, 1947.

Visitor Total: Travel for the month seemed to 1220 . The trend was normal for June--the folks were taking the kids with them on a vacation.

Guide and Contact Service: An average of 20 minutes each for 264 ruins parties and 21 minutes each for 318 museum parties kept the ball rolling all month. All parties arriving during visiting hours were given orientation talks and at least one NPS man was stationed at the museum as long as it was open. Temporary Ranger Lee E. Donke entered duty June 22.

Personnel Time: Museum: 112 hours 10 minutes. Ruins: 80 hours 45 minutes. Total time for Custodian Cotter: 56 hours; for Ranger Richert, 130 hours, 55 min. for Temporary Ranger Donke: 4 hours, 50 minutes.

Park Service Visitors: Tuzigoot welcomed last month Supt. and Mrs. Harold C. Bryant of Grand Canyon National Park, Administrative Assistant and Mrs. Jim Eden of Grand Canyon, Ranger Paul Schumacher of Casa Grande, Naturalist Charlie Steen and Photographer George Grant of Region Three and the combined entire staffs of Montezuma Well and Montezuma Castle, respectively.

Special Exhibit: A new exhibit was permanently installed at the museum designed to point up to the visitor the difference between pot hunting and archeology. A case was divided diagonally into two halves. The left half reproduced in a setting of earth a litter actually left at the site of a small pueblo two miles south of Tuzigoot by a typical "pot hunter"--a broken shovel, a human femur, well-weathered, a broken metate a couple of pot sherds and a broken beer bottle. A couple of weeds over the wreckage completed the picture. The right half of the case shows in a setting of sand a human skull, a small pot and assorted items of jewelry being whisked and brushed out of the earth with archeologist' tools, a complement of which are displayed. At the side is a notebook used by Ned Spicer during the excavation of Tuzigoot, a photo taken of a burial in the field, and a copy of the published Tuzigoot report by Caywood and Spicer. Typed labels--later to be printed--explain the story of the exhibit. The considerable interest shown by the visitors in this case has been quite encouraging.

Stabilization: Mr. James Hood joined Mr. Arthur Harris in the stabilization project and the work continued in full swing this month. About 2/3 of the rooms needing stabilization have been completed thus far. All work has been photographed before and after completion.

Valedictory Note: After seven years of service at Tuzigoot interrupted only by a hitch in the Army, John L. Cotter and his H.C.W.P. left for a new assignment as Staff Archeologist (will it be H.S.A.W.P?) at Natchez Trace Parkway, Tupelo, Mississippi. Cotter arrived in April, 1940, solo, in a sedan packed with his entire earthly possessions--and room to spare. He is leaving (in the same car) after having shipped 4800 lb. of household goods by freight, with his car packed with Mrs. C., Jean Cotter, age 4 and Larry Cotter, age 7 weeks--and no room to spare. Tuzigoot certainly does things to people.

We are taking with also a load of nostalgia which is not really measurable and a keen feeling of regret at leaving so many fine friends in the Park Service throughout Region Three. We feel that the Southwestern Monuments spirit is too much a part of us ever to be replaced. Our good fortune in having been associated with this fine group will always be with us. Adios, and the best to all the "outfit".

Welcoming Note: The whole Verde Valley joins Tuzigoot in a hearty welcome to Everett and Eleanor Bright who return as Custodian and H.C. W.P. after a stint at Gran Quivira. We have found the memory of their popularity in this community entirely undiminished. In the interim between Custodians, Ranger Richert will be assisted by a newcomer to the Park Service, Temporary Ranger Lee E. Denke, former ensign in the U.S. Navy who entered on duty June 22. Tuzigoot is doing O.K.

Publications Report: 571 mimeographed Tuzigoot Information Sheets; 62 two-fold leaflets.

John L. Cotter

John L. Cotter
Custodian

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Walnut Canyon NATIONAL MONUMENT
Flagstaff, Arizona.

June 26, 1947.

MEMORANDUM for the Regional Director, Region Three. 19

There follows a report of activities in Walnut Canyon National Monument for June, 1947:

Weather. Dry and windy. Several trees were blown down, some damaging telephone line. One that went down between the comfort station and the parking area left quite a gap in the vegetation.

There are numerous complaints about the bad corrugations in the entrance roads. They are so dry that blading is almost useless.

Visitors. Of the 2,691 total, 1,872 made the ruins trip unattended. Seventy one parties, 323 people, used the picnic area. Members of a class in Conservation from the Arizona State Teachers College, and a geology class from Princeton, were both here on June 23.

Personnel. Fifty man-days of per diem labor have been expended on various projects. Two electricians were hired several days to complete wiring of buildings and make connections with the underground cable.

Projects. Most of the telephone line has been overhauled, and is in better condition than for several years. 83.95 tons of cinders have been hauled and spread on parking lot, trails and around fireboxes in picnic area. Two badly needed water hydrants have been installed, one in picnic area and one just outside the administration building. Materials needed for repairing the water trunk line never arrived, so little was accomplished on that project. The project of installing the underground power cable is as complete as can be done until the power line poles are in place. We have electricity from a 5 KW plant in the administration building and comfort station as well as in the residences. Three wires were laid to the houses, should we ever need to use an electric stove.

Publications Report. We have on hand, 50 2-fold leaflets and 40 Location Maps No. 5. We are only giving one per party when we think they really want one.

NATIONAL PARK SERVICE
WHITE SANDS
Box 251, Alamogordo, New Mexico

June 27 47

MEMORANDUM for the Regional Director, Region Three.

Following is our monthly narrative report for the month of June:

VISITATION	This Month	Travel Year to date	Fiscal Year
Visitor Total	8856	55977	89493
Armed Forces	403	5158	8953

June, not to be outdone by previous months, has broken all records for travel since actual count has been made. 8856 visitors in 2077 cars is the mark set this June. The fiscal year total of 89,493 is a figure to be very proud of with only three permanent men to handle them. I believe I would be very conservative in estimating we have missed some four or five thousand visitors who have entered before the checking station opens or after it closes. Next month we hope to catch a part of this number by staggering shifts but we will always miss a lot of people. An interesting sidelight on the fiscal year travel figure is that Armed Forces Use is just barely one percent of total visitation.

Mr. and Mrs. Harvey Cornell accompanied by friends stopped in on a "postman's holiday". Ernie and Elsie Saunders were in on our repair work and were accompanied by Mrs. Tillotson on one trip. We are always glad to have these folks in and wish they could come more often. With continuing Army rocket tests we have had several Army and Navy officials in including Major General Homer of Fort Bliss and Lieutenant General Gerow of Fort Leavenworth Command School. Any number of photographers were in hoping to beat the new Standard Oil picture by Ansel Adams. The month gave us 25 school groups from New Mexico, Texas, Colorado, Kansas, Oklahoma and Arizona with 542 pupils and sponsors. We were glad to welcome these students and hope their trips lead to an increase in this type visitor next year.

We are happy to report a big improvement in the looks of our residential area and Administration Building. A contract was let for replastering and reroofing several of our buildings preventing further deterioration however much remains to be done and we are hoping to get it all in shape before too long.

The White Sands Service Company reports one of the heaviest June sales months in its history.

WHITE SANDS NATIONAL MONUMENT
ALAMOGORDO, NEW MEXICO

June Narrative Report
June 27, 1947

Ranger Service was lacking this month in many instances due to our personnel shortage, Ranger Steel being away a portion of the month and unforseen events such as plugged sewer lines, septic tanks, etc. We are in hopes that some day we can report giving ranger service of the duration and quality the visitor deserves but maintenance duties are running so heavy we simply can not give the time we would like to each visitor.

Our first fatality occurred Sunday at White Sands. A Reverend W. Fred Cole suffered a slight heart attack while playing in the sands. He was brought to Headquarters and was seemingly much better when a second and fatal attack struck him. He was taken to Alamogordo and then to El Paso where he lived.

All of the leaflets on White Sands are gone and many requests are turned down daily. Publications on hand are as follows:

WHITE SANDS NATIONAL MONUMENT FOLDER	0
SOUTHWESTERN NATIONAL MONUMENTS FOLDER (OLD)	2970
GLIMPSES OF OUR NATIONAL PARKS	118

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Wupatki

NATIONAL MONUMENT

Flagstaff, Arizona

OFFICE OF THE CUSTODIAN

June 28 47

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Wupatki National Monument for the month of June, 1947:

Visitors this month: 503 Travel Year to date: 2189

Weather: Unusual weather conditions prevailed during the month. The days, for the most part, were cooler than usual; clouds appeared in the sky almost every day, except when Photographer George Grant was here. There were even several traces of precipitation.

Roads: The roads were dusty and "washboarded" and the source of considerable complaint. No work was performed, except at Sunset Crater. The approach from Sunset Crater is safe enough for experienced drivers and will probably be in fair shape for the average visitor shortly after the rains begin.

Travel: Visitor use shows an increase of 25% over last year in spite of the fact that the Sunset Crater approach is closed. More of our visitors are families definitely on a vacation than at any time since the beginning of the war. The influx of teachers seems especially heavy. Average contact time is down simply because we cannot ignore other aspects of the job to spend the desired amount of time with visitors.

Public Relations: A lecture on the history and organization of the National Park Service was given in the course on Conservation of Natural Resources at Arizona State College in Flagstaff. This was part of a cooperative program by personnel from Grand Canyon National Park and Walnut Canyon National Monument.

The series of lectures sponsored by the Flagstaff Chamber of Commerce mentiond last month have been discontinued indefinitely. An interest in promoting travel to local points of interest is widespread, but to date it has not been organized effectively.

Personnel: Mr. Ralph Fish has been selected to fill the road maintenance position and will enter on duty shortly after July 1. He is a valuable addition because of his previous experience in this vicinity.

As yet we do not have a temporary ranger, but again we hope to have one on duty next month.

Stabilization: The ruin stabilization project continued with efforts concentrated primarily on the amphitheatre at Wupatki Ruin. Due to various "bings", stock branding and so forth the turn over in personnel was considerable. To facilitate hauling of water a small used water tank mounted on a trailer was purchased at a reasonable price.

NPS Visitors: Photographer George Grant and Archeologist Steen spent a portion of June 10 at Wupatki regarding stabilization and taking photographs. As usual George did an excellent job.

Activities of Outside Agencies: The Bureau of Reclamation crew completing plans for Coconino Dam, 8 miles west of Cameron, spent several days in the vicinity of Black Falls on a topog map. At its maximum height the water level will supposedly be one foot above the present Black Falls diversion weir. This will mean that some of the Monument land will be inundated, but the extent cannot be determined until completion of the survey project.

General: An undue amount of time and money was spent on keeping the trucks in operational order or having them repaired. The thirteen year old dump truck assigned to Wupatki-Walnut ate up another $130.00 for repairs, bringing the total for this fiscal year to more than $260 on repairs only for this piece of equipment. The same condition prevails with the pick-up truck.

Visitors encountering difficulty on the road and requiring a tow to Flagstaff totaled two this month. Thanks to Custodian Brewer we only had to tow one halfway and then Jimmy came along on his way to town and took over for us.

Publications Inventory: Through cooperation of the Region Two Office our meager supply of Wupatki leaflets was supplemented, and copies of "Glimpses of Our National Parks" were received from Washington.

Wupatki Informational Leaflets: 75 copies
Glimpses of National Parks: 50 "

REMARKS: (Please note below any factors influencing interpretive service, such as: "Museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER-NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

CONDUCTED TRIPS: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

TALKS: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

ATTENDED INTERPRETIVE STATIONS: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.

INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS INQUIRE.

INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

UNATTENDED INTERPRETIVE DEVICES: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITS USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE DEVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

INTERPRETIVE ACTIVITIES OUTSIDE THE AREA: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

COLUMN #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

COLUMN #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

COLUMN #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

INTERPRETIVE ACTIVITIES OUTSIDE OF THE AREA ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

TOTALS: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. TOTAL ATTENDANCE SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

CONDUCTED TRIPS: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH ROOMS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

TALKS: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

ATTENDED INTERPRETIVE STATIONS: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.

INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS INQUIRE.

INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

UNATTENDED INTERPRETIVE DEVICES: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITORS USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE DEVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

INTERPRETIVE ACTIVITIES OUTSIDE THE AREA: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

COLUMN #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

COLUMN #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

COLUMN #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

INTERPRETIVE ACTIVITIES OUTSIDE OF THE AREA ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

TOTALS: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. TOTAL ATTENDANCE SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 5TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

Unattended Interpretive Devices: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITORS USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE DEVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

Interpretive Activities Outside the Area: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

Column #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

Column #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

Interpretive Activities Outside of the Area ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

Totals: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. Total Attendance SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE SERVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

NAME ~~J.W. Brower, Jr.~~

TITLE Custodian

REMARKS: (Please note below any factors influencing interpretive service, such as: "Museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

CONDUCTED TRIPS: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

TALKS: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

ATTENDED INTERPRETIVE STATIONS: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.

INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS INQUIRE.

INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

UNATTENDED INTERPRETIVE DEVICES: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITORS USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE DEVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

INTERPRETIVE ACTIVITIES OUTSIDE THE AREA: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

COLUMN #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

COLUMN #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

COLUMN #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

INTERPRETIVE ACTIVITIES OUTSIDE OF THE AREA ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

TOTALS: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. TOTAL ATTENDANCE SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. TITLE Custodian

REMARKS: (Please note below any factors influencing interpretive service, such as: "museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

* Estimate; visiting time in museum not clocked.
** Including 12 runarounds.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

CONDUCTED TRIPS: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OTHER FEATURES OF THE AREA.

TALKS: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

ATTENDED INTERPRETIVE STATIONS: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.

INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS INQUIRE.

INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

UNATTENDED INTERPRETIVE DEVICES: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITORS USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE DEVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

INTERPRETIVE ACTIVITIES OUTSIDE THE AREA: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

COLUMN #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

COLUMN #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

COLUMN #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

INTERPRETIVE ACTIVITIES OUTSIDE OF THE AREA ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

TOTALS: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. TOTAL ATTENDANCE SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
REGION THREE
SANTA FE, NEW MEXICO

August 27, 1947.

MEMORANDUM for the Regional Director, Region Three.

Following is a narrative report for naturalists of the Southwestern National Monuments for the month of July 1947.

Staff Activities — General

Naturalist Dale S. King, during July 1-5, visited Great Sand Dunes and Capulin Mountain National Mountains in company with Assistant Regional Director John M. Davis. He spent July 25-27 at Bandelier, and July 28-30 at Chaco Canyon National Monument. The remainder of the month was spent at the Region Three Office.

Archeologist Charlie R. Steen was in the field at the beginning of the month. He visited the Point-of-Pines camp of the University of Arizona, on his return from Tumacacori National Monument. Later in the month he traveled to Bandelier, Chaco Canyon, Wupatki, and Walnut Canyon in connection with stabilization projects. Three days were spent at the Sixth Annual Archeological Field Session at Chaco Canyon. The balance of the month was occupied at Santa Fe principally on stabilization planning and reports, with some work on the photographic files.

Naturalist Maurice Sullivan left Santa Fe on July 9 on annual leave to bring his family from Bar Harbor, Maine, to Santa Fe.

Administration — Interpretation

The usual reports and 45 letters were written.

Memoranda were sent to three field areas outlining possible revisions of 16-page booklets. It is hoped, however, that funds allotted to those projects may be used to prepare more urgently needed two- and three-fold leaflets. Interpretive and scientific forms for the fiscal year were ordered through the Chief Clerk.

Public Relations and Extension Services

Information was furnished to the editor of Minicam Photography concerning the location of major cliff dwellings and pueblos in the Southwest. This magazine plans an article designed to give information to photographers visiting the region.

Research and Observation

Various monuments were furnished supplies of the newly printed observation file card which is a part of the fact files of field areas.

Further correspondence included an attempt to obtain some type of supersonic equipment to discourage bats from roosting in historic and prehistoric structures.

Region Three Office Loan Library

Accessions for the month were 13 books, 29 pamphlets, and 126 periodicals—a total of 168.

Mrs. Sullivan ordered several geological and biological publications, and Steen accomplished some work on the photograph files.

Received during May, and bound in July, were two photostatic copies of the Holsinger historical report on Chaco Canyon. One copy was sent to Chaco Canyon and the other retained in the library. Another important accession during July was a list of missionaries stationed at Tumacacori, abstracted from church records by Father Victor R. Stoner of Tucson. This information which is contained in chart form is extremely interesting and will be redrawn and duplicated for distribution.

Southwestern National Monuments Association

The forthcoming publication, "Poisonous Dwellers of the Desert," by Nath M. Dodge, is progressing nicely. A cover sketch was prepared by Raymond Loveladay, and galley proof read and returned on July 18. It is hoped copies of the booklet may be received late in August or early in September.

Complete payment was made during the month for the tract of land near Aztec Ruins National Monument which will be donated to the United States Government.

No action was taken on a proposed booklet for White Sands pending receipt of information from the author, formerly with the National Park Service, who apparently is negotiating for funds to publish the booklet privately.

During the month of July, Treasurer Allen Vedder worked 19 days, an increase of five days over the previous month. This was caused by the additional book work due to the ending of the fiscal year on June 30. A greater part of his time was spent in posting from turn-ins from the monuments—not only in the inventory books but also the inventory in sales records kept at headquarters. Next year it will not be necessary to keep these latter records which were necessary when the Treasurer worked in a separate office. Much time was also spent in making out the elaborate record of inventory which goes in the annual report. The Treasurer is handling most of the mail now for the association. During July, 185 covers were mailed, including 26 letters, and 38 purchase orders. One

deposit of 23 items were made, and one disbursement of 20 checks. Considerable time was required by such work as counting 2,000 cards and stamping them for Grand Canyon, paying bills, and sorting business reply file cards received from the field.

Visitors

The office was visited by Drs. Ruth Underhill, H. P. Mera, and Fred Eggan; Custodian Simmonics; and Rangers Tom Onstott of Bandelier and Sam Houston of Death Valley.

Unusual Activities — Conference

Messrs. King and Steen attended the Sixth Annual Archeological Conference at Chaco Canyon July 28 through 30, in company with Regional Archeologist Erik K. Reed and Senior Archeologist Jesse L. Nusbaum. The conference was worthwhile, and particular notice was taken of the need for intimate integration between ethnology and archeology, and the need for good interpretation. The meeting unanimously passed a resolution warning against the abolition or weakening of the Act for the Preservation of American Antiquities. This resolution will be circularized to members of Congress, conservation organizations, scientific associations, etc.

Ruins Stabilization

A rough draft was prepared for the Regional Director's annual report. This contained major reference to ruins stabilization activities in the Southwestern National Monuments. Steen spent considerable time planning preservation activities for Fiscal Year 1948.

Projects for Coming Month

King will be in the office probably most of the month.

Steen will start stabilization work at Bandelier about the middle of the month, and then will visit Tumacacori, Casa Grande, and Tonto, inspecting and supervising similar activities. He will make plans for the large stabilization project at Casa Grande to be instituted this winter.

Sullivan will be on annual leave probably most of the month, staying in the office for the remainder of the period.

Dale S. King,
Naturalist.

Approved for distribution John M. Davis, Assistant Regional Director, 8-28-47 (date)

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Arches NATIONAL MONUMENT

Moab, Utah

July 29, 1947

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of July, 1947:

GENERAL: Travel has been excellent during the month despite rough roads and with the recent publicity received in National Geographic, I believe we can look forward to increased travel for the balance of the year.

The custodian was absent on annual leave from July 22nd to 27th at Salt Lake City, Utah. While there improvements were made on the Grand County Centennial exhibit and contact was made with Commissioner Howells of the State Department of Publicity and Industrial Development regarding funds for improvement of Arches roads. The Service exhibit was visited and it was noted that the pictures on exhibit had been tinted, making a great improvement in the display.

WEATHER: The temperature has been extremely high most of the month with little relief from rains. During the latter part of the month the official reading at Moab showed a maximum of 105 degrees during the day. Very light showers occured on one or two occasions.

SPECIAL ACTIVITIES: An inspection was made at Natural Bridges National Monument on July 12th and 13th. The area was found to be in good shape and travel on the increase. The trails are in fair shape but will need some work next month.

TRAVEL: Travel for the month practically doubled that of July 1946 with 193 cars and 611 people as compared with 107 cars and 323 people last year. This brings our travel year to date to 2710 people. If travel continues at the present rate the 1947 travel year should surpass 1941, Arches biggest year, when 3786 people visited the area. This month's travel showed 32 states, District of Columbia and Canada represented.

The Utah Wonderland Tours party returned to Arches on June 28th and were accompanied into the Windows section where several shots were taken by the Life photographer. Dr. Williams of Moab accompanied the party and was made the

subject of several shots.

INTERPRETIVE SERVICES: Visitor contact has increased steadily during this travel year with many visitors stopping at headquarters for information regarding the outlying sections of the area. Sixty eight parties containing 194 people were contacted at headquarters, 44 parties of 170 people were contacted in the Windows section and 441 people visited the Windows section unattended. Three caravans of 16 people were accompanied to outlying sections and 8 parties of 53 people were taken on guided trips into the Windows and Devil's Garden sections.

ROADS: The Windows road was in poor condition practically all month. The storms of June 20th and 21st washed it badly and it was July 22nd and 23rd before the State maintenance crew could grade and repair same due to the fact that they are kept busy on repairs to the highways, which seem to be deteriorating rapidly. At this writing the road is passable but soft in spots due to lack of moisture.

Grand County maintenance crews spent two days on the Salt Valley road with their equipment and it is in good condition as far as the Devil's Garden. No trips have been made to Delicate Arch as I have been afraid that the old pickup would not stand such a strenuous trip.

MAINTENANCE: A desert cooler was constructed using a 34" fan recently received from War Surplus. This was installed at quarters but does not work as efficiently as the two smaller coolers used during previous years. More experimenting will be necessary. A small cooler was constructed and installed at the office.

Windows were placed in the pump and light plant room for better circulation of air during hot weather.

Drinking fountains were installed at the Windows parking area and at the office.

The 3 KW power unit received from War Surplus was temporarily installed at quarters and is functioning OK.

N. P. S. VISITORS: Mr. Davis, Mr. King and Dr. Hare of Santa Fe visited the area on June 28th and 29th. They were accompanied on a trip to the Windows section and Deadhorse Point. They left on June 30th for Great Sand Dunes.

WORTHY VISITORS: A group of students and professors from Weber College, Ogden, Utah visited the area on July 4th. The party was in charge of Walter E. Buss, who I believe used to be a Ranger-Naturalist at Zion and Bryce Canyon.

PUBLICITY: The June issue of Utah Magazine contained an excellent write-up and pictures on Arches. This is the result of the expedition made into the area by

Dr. D. Elden Rock and other professors from the Brigham Young Young University of Provo, Utah during April.

The August issue of National Geographic contained Jack Breed's pictures and article on Arches. Requests have already been received from people who have seen the article and pictures for information on the area. This is excellent publicity and should boost our travel considerably.

Representatives of Graphic Pictures of Los Angeles, California visited the area on July 11th and shot colored movies and 4 x 5 black and white of features in the Windows section.

Dr. Gilbert Cunningham of Midland College, Fremont, Nebraska, with party of 3 people, visited the area on July17th and 18th taking educational movies of the monument. They were shown the Windows and Devil's Garden sections.

AZTEC RUINS NATIONAL MONUMENT
AZTEC, NEW MEXICO

24 July 1947

MEMORANDUM for the Regional Director,
Region Three, National Park Service.

There follows the report of activities in Aztec Ruins for July 1947.

WEATHER. Generally very good weather has prevailed and tourist travel has increased correspondingly. A high temperature reading of 95 was reached with lows in the upper 50 bracket.

MAINTENANCE: The drainage ditch has been flushed and continues to perform properly. So far this summer there has been less trouble with seepage water within the lower ruins' structures than at anytime during the past 3 years.

VISITORS. Mr. A. vanW. Dunn, NPS, Chicago; Mr. H. R. Shepherd and Family, Colorado Fish and Game Dept(former Park Ranger Zion-Bryce); Mr. Bob Holmes and the Explorers Camp(Ansel Hall Mesa Verde)with 14 boys; Mr. J. Howie with 20 boys of the Prairie Trek; Dr. Paul Reiter and 56 students from the University New Mexico Field School; Miss Bertha Dutton, archeologist, with 18 Girl Scouts; Dr. E. Smith, Dept. Anthropology, Univ. Utah.; Mrs. Josephine Stanley, Chief Occupational Therapeutist, USVA, Fort Lyon, Colo. Mr. Claude W. Pyle with 11 Boys Scouts from Sidell, Ill.; Mr. and Mrs. H. L. Winfield, State Senator, Ft. Stockton, Texas with Mr. and Mrs. J. M. Harris, Austin, Texas. Mr. Winfield aided in the creation of Big Bend National Park; Messrs. A.A. Look, Byron Patterson, James Quinn from the Chicago Museum of Natural History, Paleontology Dept.

SPECIAL ACTIVITIES. The Custodian visited Colorado National Monument and the Black Canyon of the Gunnison.

On 18 July the Custodian visited Mr. Richard Evans regarding the loan of a mummy which is now housed at Shiprock, N.M. at the residence of Mr. Evans.

INTERPRETIVE SERVICES. There were 1615 visitors in 275 trips shown the ruins and 2460 visitors in 547 trips conducted thru the museum.

INCREASE IN TRAVEL. There was a 25% increase in travel over last year, with 2460 visitors in 700 cars from 43 states, Wash. D.C., Bermuda, Italy, Sweden and the Dutch East Indies.

PUBLICATION REPORT.

Irving D. Townsend,
Custodian

AZTEC

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
BANDELIER NATIONAL MONUMENT
SANTA FE, NEW MEXICO

July 28, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of the activities at Bandelier National Monument for the month of July, 1947.

Weather and Roads

Weather has continued hot and dry during July with a maximum temperature of 102° recorded on July 12. The 0.96 inches precipitation which fell during the month quickly evaporated. The fire danger has been lower this month as a whole than during June, however, as a result of decreased winds. The fire danger approached extreme on a few days but measured moderate to high most of the time.

The approach road has been dry and somewhat rough. Maintenance with our light grader has been a difficult and arduous task but has at least prevented the road from falling into the disrepair of yesteryear. Complaints about roads and road conditions are fewer than in previous years.

The award of the work of seal coating the oil surfaced road leading into the "Canyon" has been approved by the Director. It is expected that work will begin very soon.

Personnel

Fred E. Simmonds has been appointed Custodian of Bandelier National Monument vice Chester A. Thomas. Mr. Simmonds reported July 25 from Mammoth Cave where he was chief ranger. "Art" is to leave August 1 for Zion National Park where he will be assistant superintendent.

Laborers Duran and Quintana were terminated during July and replaced by Tafoya and Roybal. Most of the per diem employees are being released August 1 due to shortage of funds.

Clerk Bean spent part of the month in the fiscal and personnel section of the Region Three Office.

Maintenance

The Diesel light plant failed us completely and has been removed by engineers at Los Alamos for overhaul and repair. The plant furnished

us by them as temporary replacement is not yet operating and the small standby gasoline plant is not quite able to carry the load during periods of heavy use. Preliminary work toward building the new powerhouse was begun this month by Region Three personnel. Construction of a place to house reserve light plants will help solve our serious power problem.

Routine cleanup, garbage disposal, maintenance of equipment occupied a proportionately larger amount of the maintenance man's time as travel has increased almost half again over that of a year ago and campground use has increased almost three times that of July, 1946. Some time was spent in temporarily installing the sprayer on the truck for use in spraying trees in the canyon.

An agreement has been reached that henceforth the Lodge will be responsible for its own garbage disposal and minor maintenance. This relieves us of a great nuisance and time consumer.

Cooperation With Other Agencies

The Forest Service and Park Service are now negotiating with The Mountain States Telephone Company to construct a telephone line for joint use by Bandelier and the Forest Service. The Atomic Energy Commission at Los Alamos has notified the Forest Service that the present line through Los Alamos must be removed this year and the Espanola Telephone Company plans to install a dial system which would render our grounded circuit lines ineffectual. It is hoped that we will be able to tie into the Mountain States line at the Otowi Section and thus obtain direct connections with Santa Fe. Progress reports are being forwarded to Region Three as negotiations proceed.

The Forest Service requested our help on the 5th of July to suppress a fire northwest of the San Miguel Lookout. A crew of 4 men sent from here helped them bring the fire under control early the next morning.

Lodge

Mr. Carl Henderson of the New Mexico Public Health Service inspected the kitchen and dining room of the Lodge July 2. The sanitary condition of the above were pronounced satisfactory and steps are being taken to follow suggestions made by Mr. Henderson for improvement of the facilities.

The increased travel in July has resulted in an increase in both over-night guests and dining room customers; there were almost twice as many overnight lodgings as during July of 1946. This is a gratifying contrast to the poor June business reported by the Lodge.

Travel

The travel increase for this July over July of 1946 is 46% with

increased uses of the campground of 287%. Prijoles Canyon Lodge reported an increase in 68% of overnight lodgings over July 1946.

Interpretation

With the increase in travel, the interpretive contacts showed some increase in per cent. Through the ruins the percentage of visitors increased from 48% in July 1946 to 51% this year and the number of parties grew from 149 to 216. The average time of ruins trips increased 15 minutes to almost 80 minutes each.

The attendance at evening lecture programs was gratifying as 719 people turned out for 23 programs of 1 to 3 talks each. Slides and film were used to great advantage in this program as 21 talks were centered around films and 14 were accompanied by slides. 10 talks were given with no aids other than occasional chalk or mechanical aids.

Visitors

Official visitors from the Region Three Office during July were Ratcliff, Jones, and Canham working with the insect infestation of Prijoles Canyon; Bennett and Bradley concerned with the new powerhouse; Davis on administrative problems; Steen working on stabilization of the ruins; and Dodge and King on interpretive matters.

Dr. Evets, noted geologist and collaborator with the Service, visited us on July 27, 1947. Flight Lt. Clausen Haas from Denmark visited us to gather information for lectures and articles for his homeland.

July visitors from foreign countries included those from The Hague, Holland; Paris, France; Belfast, Ireland; Birkdale and London, England; Maracaibo, Venezuela; Copenhagen, Denmark; Santiago, Chile; and Austria.

Protection

The Upper Crossing area was patrolled twice during the month. The trail to the Upper Crossing is in fair condition. A decrease in picnicking and fishing at the Upper Crossing was noted during the latter part of the month. The Otowi Section, Turkey Springs Area, Capulin Canyon, and the upper monument area were patrolled once each during the month.

Shade trees in the headquarters area--alder, box elder, cottonwood--were sprayed with a lead arsenate spray on July 21 and 22 in an effort to combat the alder flea beetle and the leaf rollers which were attacking the box elders, and to forestall the work of the tent caterpillars on the cottonwoods. A solution composed of 4 pounds of lead arsenate to

each 100 gallons of water was used. 4 ounces blood albumen spreader was used in each batch.

All government residences, garbage cans, and garbage disposal cans in the campground were sprayed with a DDT solution in an effort to prevent flies and insects.

Constant alertness is being kept in our fire protection program but up to this date the monument has escaped any serious lightning storms and there have been no man-made fires.

In accordance with the Director's instructions a monthly inspection was made at the Lodge for fire hazards. The result of this inspection was satisfactory.

Wildlife seen on the area during July include bear, fox, mountain lion, rattlesnakes, and the ever-numerous mule deer. Several does with fawns have been seen near the headquarters area in recent weeks.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

.....NATIONAL MONUMENT
CANYON DE CHELLY NATIONAL MONUMENT
....CHINLE, ARIZONA.....

.....July 25, 1947.....

MEMORANDUM for the Regional Director, Region three.

The following is a report of activities at Canyon de Chelly National Monument during the month of July, 1947.

Weather Conditions

The hottest day to date was registered on July 13 when the mercury reached 98 degrees. Weather has been different than normal. Days have been sultry and although some moisture has fallen in surrounding areas, we have only received .57 of an inch which is a total for four showers.

This has made travel in the canyons difficult even for the special car operated by Thunderbird ranch. Some early peaches have come out of the canyons and in spite of the dry weather, Navajo corn fields look good. Our minimum temperature for the month was 57 degrees.

Administration

Considerable time was spent by the custodian in going over the filing system and bringing it up to date. The semi-annual inventory of equipment was completed. All required reports were made and submitted.

One trip was made to Gallup New Mexico on July 8, I went via Window Rock, Arizona where I met With Chief Forester Carl Hamie on matters concerning fire suppression. This was the opening day of Tribal Council and I spent some time there.

Maintenance

The complete redecoration of the interior of the Custodian's residence was completed during the month and linoleum was layed on the Kitchen floor. Plaster repair was made to the west upper side of quarters. The Campsite at the old quarrie was completely cleaned and the headquarters camp ground in the cottonwoods was enlarged and one fireplace completed. Roads were graded to White house with the dump trunk and drag. Two patrol trips were made to Kinny cave and beyond and others were made to Canyon de Chelly area above the Monuments, and to the peninsular area between Monument and de Chelly Canyons.

Signs were refinished and new ones made to replace those in the Kayenta and Ganado hotsc regions.

Travel

Travel records show that this has been the top figure for any month of July on record. A total of 321 visitors were recorded. The new signs placed at the turn-off at Chambers Arizona may have had some influence in guiding visitors this way. Road conditions [illegible] been as bad as they have been for several years otherwise we might have had a great deal more travel.

Interpretive Services

Two men have been kept busy with guide and contact work for almost all of the past month. A total of 175 hours and a half were spent in conducting 393 people to the White house and Spider Rock area. 107 visitors comprised mostly of those coming into the monument via Sawmill and stopping at the overlooks on the way in received orientation and interpretive talks at Headquarters: Also those who take the Thunderbird ranch trips into the canyon are given interpretational talks generally on their return. Only 24 known visitors did not receive information.

The inauguration of Campfire talks to overnight Campers when in sufficient numbers to make it worth while was started last month with one lecture to a group of 54 girl scouts and two more were given during July. One was given to the Boy Scout Archeological Expedition and the other to the Prairie Trek expedition out of St.Louis.

Visitors

Fremont Ellis and Lon Megargee, artists of note. Irene Rich of Movie and Radio fame and her daughter Frances. Dr Fenton and Jack Stoltz with the Boy Scout Archeological expedition. Two groups of Boys explorers from Ansel Hall's Camp among whom was Jon Lindberg, son of Col. Charles A. Lindberg. Mr. and Mrs. L.A. Huston of the Los Angeles City Museum, Esther Henderson and Chuck Abbot, Photographers of note, Miss Warren Glenby, Artist and Model(American Magazine-January 1947), and last, Commander Scott and Family of Sunday morning radio fame(Virtual B.System, Greyhound Lines)

Protection. Fire

One class B fire was reported in the peninsular area above Black Rock. On arrival the custodian found the fire had been put out by Hada Davis,the Indian Service Smoke Chaser and had burned .01 acre.

Insect Infestation

The Cottonwood leaf beetle is attacking the cottonwood grove in the old channel and has done considerable damage. Control measures will be taken as soon as funds and equipment are available.

General

A great deal of activity has started in the Chinle area with the purchase of oil leases by Stanolind in the Black Mountain area. This Activity seems to spread over the whole four corners region. A preliminary survey is being made for a pipe line across the reservation leading from the Barker dome north of Aztec, New Mexico to San Francisco. The Aguardo Oil Company at present has a large crew of men making tests. And drilling is about to start at Black Mountain.

A resolution was adopted at the Tribal Council to put a two percent sales tax on the trading stores which will be turned back to tribal funds. price control measures were also proposed.

SOUTHWESTERN NATIONAL MONUMENTS

~~Coolidge, Arizona~~
Capulin, N. M.

ADDRESS REPLY TO THE SUPERINTENDENT

July 25. 1947.

Memorandum for the Regional Director
Region Three, National Park Service
Santa Fe New Mexico,

There follows a report of the activities in and around Capulin Mountain National Monument for the Month of July, 1947.

About six thousand visitors to the Volcano for the month. This brings total visitors travel year to date to fifteen thousand nine hundred sixty and fiscal year to date thirty thousand nine hundred sixty,.

No special visitirs this month appeared,

Free publications on hand as of July, 25, 1947, Capulin Mountain National Monument folders,

Two thousand five hundred,

Weather has been just right all thru the month and we have had about one and one half inches of precipitation.

Some cattlemen say that we have the largest grass and the fattest cattle that we have had in forty years here,

Roads in and around the Monument have been kept in first class condition all thru the month,

Something nice to see has been made in addition to the Capulin Mountain, National Monument This is the huge cut made by the gravel or cinder haulers, adjoining the Monument on the east, this excavation is about fifty feet deep one hundred feet wide and several hundred feet long, this shows what might be the inside of the Volcano, something we have never before been able to visualize, layers and fold of freshly cut cinders in several of the bright colors really worth viewing. Of course it is no part of the Monument,

Homer J. Parr
Custodian,

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
CASA GRANDE NATIONAL MONUMENT
COOLIDGE, ARIZONA

July 25, 1947.

MEMORANDUM for the Regional Director,
Region Three.

There follows the narrative report for Casa Grande National Monument for July, 1947.

GENERAL: According to the state motor vehicle division, gasoline consumption in Arizona in the fiscal year 1946-1947 increased by more than 60 per cent over 1941, which was the banner year of pre-war days. This has been reflected in the tremendous increase in travel to the Monument over any previous year.

WEATHER: The temperature at the Monument during this last report period has ranged all the way from a low of 58 degrees on June 25, to a high of 115 on the 1st. and 115 on July 18. Most of the nights have ranged in the 60's and 70's while the days have been in the 100's and 110's. We have had three bad dust storms this month, and it has threatened to rain so often that we have stopped counting. Four times the dark clouds rolled over and each time we got about 16 drops per acre. It is really going to be a hot and dry summer, with no real rain since December of last year. The dams are dry, and the farmers and ranchers are really complaining.

ADMINISTRATION: Since Ranger Schufts return from the Regional office, he has been working on the non-expendable inventories for the southern Arizona Monuments and on all the Casa Grande inventories. Mr. Fitzpatrick of Phoenix has been here several times, looking over the cars and scrap which we have surveyed. He has bids in on several of those, and picked up one which he bought. Mechanic Stonehocker installed an old Chevrolet Dump-bed on one turret-trainer. On July 21, Mr. Stonehocker delivered the other two trainers to Fraunhaur, Phoenix, to have new dump-beds installed, in accordance with their bid which was let by the Regional Office. The three electric hot water heaters were purchased from Farmers Electric who was the successful bidder. They shall be installed next month.

VISITORS: July 1947- 1,288; July 1946- 1,240. Travel Year to date: 1947- 31,019; 1946- 25,126. This is an increase over July 1946 and a decrease over June 1947. This is due to the very hot weather and the decrease in travel in this section of the country during the summer months.

INTERPRETIVE SERVICES: Of the 1,286 visitors to the area, 674 made the Ruins trip in 112 parties averaging 47.4 minutes per trip. 652 made the Museum trip in 107 parties staying an average of 24.9 minutes. 612 people came to the area but found it too hot and did not go out to the ruins. Six members of the armed forces visited the Ruins this month.

MAINTENANCE: The interiors and accessories of the Comfort Stations and all the metal work on the outside doors and windows of the Administration Building were painted by the Maintenanceman, Carroll Barnett. Archeologist Schumacher brought the Casa Grande Bibliography up to date, with a great many additions in the Fact File. He has also been working on the Casa Grande Chronology file of important dates and events connected with the Monument.

TRIPS TAKEN: Mechanic Stonehocker returned from his trip, June 24 to June 30, to Grand Canyon, Organ Pipe Cactus, and Saguaro National Monuments, hauling Surplus Material. July 1, Stonehocker went to Phoenix for the Autocar engine. Ranger Peter Schuft returned on July 10 from his two month assignment to the Regional Office. Since then he made a short trip to Organ Pipe Cactus and Saguaro National Monuments on July 20 through 22 to inventory their Non-expendable equipment. Mechanic Stonehocker made a second trip to Grand Canyon and Tonto for Surplus Equipment, from July 14-to 17. On July 21, Mr. Stonehocker went up to Phoenix to have the dump beds installed on the trucks.

N.P.S. Visitors, and Visitors of Note: Ranger Leding of Montezuma Castle brought the relief ranger's pickup truck - I 13621 back on June 29. Al Lancaster and Charlie Steen dropped in for a few minutes on the same day on their way to Tumacacori. Olay Barney from Saguaro stopped by here on July 16 on his way to Montezuma Castle for hay. He made the exchange of bench grinders for Organ Pipe Cactus and Montezuma Castle. He stopped by here on July 20, on his way back to Saguaro. Former Southwestern National Monuments clerk, Joe Golden, now a civilian employee with the Navy, paid us a visit on July 17.

NATURE NOTES: An article on the ruins appeared in the July issue of the National Parks Magazine. We had been in correspondence with Mr. Devereux Butcher in April of this year, concerning this article and the ruins. This has been the month of the Night Blooming Cereus. Three were in bloom on June 26. On the night of July 12, one plant near the Comfort Stations had ten blooms at once. The reporter from the Coolidge Examiner took pictures of the event, and it appeared in the above paper of July 18. The last Cereus bloomed on July 13. The fruit of the Prickly Pear near the Administration Building ripened.

NATURE NOTES CONT:

The bats have been defenitely on the decrease in the ruins, while the snakes inside the Main watchtower have been on the increase. Maybe the balance of nature is taking care of itself inside the Casa Grande. Both these animals are still doing a good deal of damage to the visitors clothes, morale and nostrils on these hot days, as well as deteriorating the caliche walls. There is still a defenit need for some sort of devise to discourage the bats, and when they leave, the snakes will leave the ruins also.

Custodian

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Chaco Canyon NATIONAL MONUMENT

Bloomfield, New Mexico

July 26, 1947

MEMORANDUM for the Regional Director, Region Three,
National Park Service.

There follows the report of activities in Chaco Canyon National Monument for the month of July, 1947.

There were a total of 371 visitors to Chaco Canyon this month. This is 147 more than last month, and 154 more than a year ago this month. The visitors arrived in 92 automobiles from the states of:- Arizona 5 cars, 15 visitors; California 8 cars, 27 visitors; Colorado 8 cars, 41 visitors; Connecticut 1 car, 2 visitors; Kansas 1 car, 2 visitors; Louisiana 1 car, 4 visitors; Maine 1 car, 4 visitors; Maryland 1 car, 4 visitors; Massachusetts 1 car, 3 visitors; Michigan 1 car, 2 visitors; New Jersey 2 cars, 8 visitors; New Mexico 48 cars, 219 visitors; New York 2 cars, 5 visitors; Ohio 4 cars, 8 visitors; Oklahoma 3 cars, 9 visitors; Oregon 1 car, 6 visitors; Pennsylvania 1 car, 2 visitors; Tennessee 1 car, 2 visitors; Texas 2 cars, 7 visitors.

All 371 visitors viewed the ruins. They formed 61 parties which were made up of 259 paid admissions, 35 children admitted for tax only, and 39 children less than 12 years of age. 285 visitors listened to the museum talk. Total time - Ranger 53 hours 15 minutes, Custodian 35 hours 15 minutes.

Four written requests were answered.

The warmest days of the month were 98 degrees on the 25th and 26th, and the coldest was 45 degrees Fahrenheit on the 30th of June. It rained on the 3rd, 6th, 7th, 8th, 13th, 15th and 16th. All of which totaled .90 of an inch of moisture for the entire month.

The Custodian took from the 6th through the 11th sick leave.

The University field school closes today. They have worked six days a week, while the students have been busy most of the rest of the time, so altogether it has been a busy time for all. It was this Custodian's first field school at Chaco, and he learned a great deal, and will have recommendations for the next summer, so that there will be an even better understanding between the University officials,

the students and the National Park Service. The Chaco Conference begins Monday.

The men on the fence crew have carried the fence across the arroyo and the posts, except for the brace posts, are in place from the arroyo to the mesa. The past few days, they have been hauling sand and gravel for the cattle guard. It is a 130 mile round trip to haul sand!

It was noticed that just north of La Pajada, which the new fence includes, there is a prairie dog town. The old town, near Headquarters, disappeared in the past several years. This new town is the only one on the Monument, at present, to this Custodian's knowledge. The Navajos are to be warned to stay away from it, for they consider baked prairie dog a delicacy.

More trouble has been experienced with the water pump and engine. It was necessary again this month to overhaul the small pump. It is hoped that the new one will arrive soon, for we have no auxiliary. Besides the water pump, the usual routine duties such as greasing and changing oil in the light plant, water pump engine, tractor, trucks, keeping the camp ground clean, cutting weeds in the ruins, etc., were accomplished.

Radio communication has been regular and satisfactory between this Monument and El Morro, lately. It was a means of Custodian Peter Wilson and this Custodian meeting for the first time, and we exchanged material for our monuments in Gallup.

There were several organized groups through the ruins this month. 16 boys from the Explorers Camp, Esperus, Colorado, 70 Presbyterians traveling as a group, two groups of 26 each from Cottonwood Gulch known as the Prairie Trek Expedition and a group of Girl Scouts were in. Some other newsworthy visitors were Paul Balch, and Charlie Steen from Region Three Office, Jean Pinkley, Museum Assistant, John Winterhouse, Ranger and Don Watson, Park Naturalist, from Bent Verde National Park, Dr. Bob Lister from California, formerly Ranger at Chaco, Flight Lieutenant Knud Von Clemson Haas from Denmark, Commander A. W. Scott, radio Commentator, Dr. Rouse, editor of American Antiquity, and Dr. Doric O'Brien from Gila Pueblo.

The Trader reports that his general merchandise sales are equal to or better than last month. Many of the students of the Field School have ordered Indian made moccasins. That part of his business is booming, also, and, of course, it keeps some Navajos busy. His jewelry is turning over slowly, but he expects it to pick up because he now has finally found and made arrangements with a local Navajo to begin

making jewelry. The rugs are coming in slowly this month, but as he is selling them faster than he is getting them in, his stock pile is decreasing.

At the end of the month, there were on hand:-

Free two-fold leaflets on Chaco Canyon, approximately...8800
Southwestern Monument folders..... 0
National Park location map, number 6..... 400

There follows the report of Archaeologist Richard G. Vivian.

Chaco Canyon NATIONAL MONUMENT

Bloomfield, New Mexico

July 25 19 47

MEMORANDUM for the custodian
Chaco Canyon National Monument.

There follows the report of Mobile Unit activities in your area for the month of July, 1947.

GENERAL:

Working conditions have remained good until the past week when an epedemic of squaw dances hit the country. The work has been shut down the past three days due to insufficient labor. With Al Lancaster still detailed to Tumacacori this has given us a chance to catch up on the photography and recording.

CHETRO KETL:

Work this month will complete all of the northern excavated section of the site comprising the first four tiers of rooms out from the north wall and the row of higher kivas just south of these rooms. Work is in progress on the two superimposed structures, Kivas G and H and on the two easternmost rooms of this section. Next month attention will be centered on the southern rooms of this block and on the eastern wing of the pueblo.

Room 106 reported in progress last month has been completed. Here prehistoric designs in blue and yellow on the plastered wall have been protected by raising the original walls and reroofing the structure. The new roofing is built in two sections; an asphalt paper roofing and over this, with an air space between, a second, dirt covered roof.

Work in 115 in the eastern wing of the pueblo was also completed this month. Foundation walls were rebuilt under two sides of the room, one steel reinforced integral member was constructed over a large doorway break, vertical capping was carried up one fragmentary wall and repairs were made to the ceiling offset at the present second story level.

Another major job was done in room 45 in the deep section

near the north wall. Here most of the two story south wall has fallen since its excavation in 1934. All that remains in place is a small section some 7 feet high on the west and an overhanging strip of wall 2 to 3 feet wide and 15 feet high on the east.

All fallen masonry was removed from the room; the small undercut piece on the west was buttressed and on the east the 15 foot vertical break was strengthened with a reinforced integral member which is tied into the intact east wall. Other work in the room consisted of repairs to a lower door and capping of the other 3 walls.

Work is in progress on Kiva G, the upper of the superimposed kivas in the northeast section. This is the kiva whose top wall is 28 feet above the lower excavations. All of the bench here is supported on rails and other members resting on lower walls. At the time of earlier repair the bench facing had been rebuilt in concrete but the strip between this facing and the kiva wall was filled only with soil. Moisture had separated the two with the result that the facing was either loose or had fallen. All of this has been removed and the entire bench top relaid in wire reinforced masonry mortar.

Work is being continued on this kiva in removing all of the old broken capping from the top wall and resetting it in reinforced mortar.

In room 42 the present second story of the west wall had been built on top of a large horizontal beam embedded at the first ceiling level. One end of this beam had weathered out allowing some masonry above it to fall with the subsequent settling of one end of the entire second story. This wall was jacked up with the aid of Charlie Steen's 25 ton jacks and a steel beam to carry the weight inserted above the horizontal timber.

A first floor doorway and an eroded ceiling offset were repaired in the east wall of 42 and all walls capped.

Timbers treated with the preservative several months ago have by now regained their original color and work is underway to treat all wood in the site in the same manner.

Extensive repairs have been made to room 40, the south wall in particular. This is the last of the series of east-west rooms which hold back one and two stories of unexcavated fill. Here the upper level of the wall was reinforced, extensive work was done at the first story ceiling offset and two large doorways were filled with rough masonry to prevent further washing of higher fill through them. The remaining three walls were capped, doorways repaired and minor breaks taken care of.

The heavy offset walls 2½ to 3 feet thick which carry large recesses or alcoves in the first story were repaired in rooms 44 and 46. Considerable patching was necessary in 46 and the tops of both were repaired and given a protective capping to preserve the wall timbered alcoves which are among the best architectural features of Chetro Ketl.

Capping of all walls, repairing doorways and filling wall breaks has been completed in rooms 43A, 37, and 41.

WORK ON PARK SERVICE LANDS

The University of New Mexico has continued its excavation on monument land in the immediate vicinity of Shabikeshchee Village. They are excavating the partial remains of a pit house some 16 feet below the present surface. This structure was disclosed by arroyo cutting.

To date all of the 16 foot overburden has been removed and they are in the process of clearing the floor. No wall, only the plastered floor is present. Interesting features which have come to light so far are: a rectangular stone lined fire box, half of a basin shaped depression possibly a fire pit, fragments of a partition wall dividing the room at the line of the firepit, a series of footprints in the mud floor and another large pit which is only partially cleared.

Some pottery, Lino with fugitive red, has been found in the strata above the floor but no sherds on the floor as yet.

Other work on Federal lands by the University includes exploration for burial grounds below Penasco Blanco. No burials have been found to date though a large area has been tested with pits and trenches.

Also being conducted on Federal lands are a water resources study, a survey of 18th century refugee sites, a pictographic survey and an extensive sherd survey.

~~CHIRICAHUA~~ NATIONAL MONUMENT

~~Dos Cabezos, Arizona~~

~~July 25,~~ 1937

MEMORANDUM for the Regional Director, Region Three.

Following is a report of activities at Chiricahua for July.

Weather Conditions. Weather has been extremely dry for this time of the year. Normally our heavy rains start by the middle of July. So far this month we have had only 1.25 inches of rain. This together with the low rainfall during the past 8 or 10 months is causing the neighborhood considerable concern in regard to house and stock water supply. The Monument supply is still holding up quite well so hope to get by if we get our usual August rains.

General Publicity. Two Kohn brothers, photographers and writers for Western Ways, have been visiting the Monument for a week getting material for a magazine article.

Maintenance. The new roof for the oil house has been completed and a good start has been made at partitioning off a room for fire equipment.

Approaches to Monument Area. Approach roads are slightly less dusty and rough as some rains have settled the dust a little and made grading possible.

Interpretive Service. Two Happiness Tours visited the Monument but their train schedule did not allow for a very long stay. 154 came in the two tours and were conducted on a quick auto trip over the monument. It is thought a few more Happiness Tours will visit the Monument this summer but this is uncertain, as they are having trouble getting enough tourists once a week to make a special train. Without a special train the railway cannot work out a long enough stop allow anything more than a rush trip to the Monument. One conducted hike of 6 visitors was taken around the Echo Canyon Trail. Ranger Hoffacker took a party of 8 to the Heart of Rocks.

Museum Activities. Some work has been done on changing the museum to bring it as near as possible to the plan worked up by Naturalist Dodge some years ago.

Increase in Travel. 2120 visitors came to Chiricahua as compared with 1737 for June and 1764 for July of 1945. Our travel year is now about 54 % ahead of this time last year.

Forest Fire Protection. On July 26 a fire training meeting was held for the local force. Building and forest fire protection was discussed and a small forest fire was started and extinguished to demonstrate the building of fire line, use of tools and mop up.

General. The Post Office Department is circulating a petition to determine if the patrons wish their post office spelled Dos Cabezos or Dos Cabezas. Notice has been received from the Department of the Interior, Division of Geography that it shall be spelled Dos Cabezas. In order throw further light on the subject I checked the files for spellings on letters that have reached Chiricahua, and offer the following. Dascobbezos, Dos Cabenzas, Dos Cabezok, Dos Cabezos, Dos Cabezon, Two Heads, Dos Cabbages. Should doubt still exist in regard to the spelling of the ghost town post office that serves Chiricahua, we will likely have some new and better spellings by next month.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

~~El Morro~~ NATIONAL MONUMENT

Zuñi, New Mexico

July 26, 47

MEMORANDUM for the Regional Director, Region Three.

There follows the report of activities in El Morro National Monument for the month of July, 1947.

WEATHER: Maximum temperature reached 92 degrees on July 2nd and the minimum was 41 degrees on June 30th. The total precipitation amounted to 2.04 inches, falling on six different days. The two showers on July 20th and 25th accounted for 1.33 inches of the total.

TRAVEL: A total of 625 visitors arrived at the monument in 115 cars and one airplane. Twenty-nine states and three foreign countries were represented. The tour of the inscriptions was made by 371 people and 119 of this number went on top to see the ruins. Total guide time amounted to 93 hours.

APPROACH ROADS: The road from Gallup to Zuñi was bladed on July 14th & 15th and is still in unusually good condition. After one heavy rain on July 15th, travel by canoe was possible between El Morro & Zuñi with a few short portages. Two weeks of very dry weather and our lakes have vanished. The road from Grants to the Ice Caves is in fair condition, but the last 18 miles on to the monument is still very rough.

NOTEWORTHY VISITORS: Dr. Edwin Colbert, Dr.& Mrs GG. Simpson, William K. Fisk and Thomas G. Jerardi visited the area and made the tour of the inscriptions. An interesting tour of the inscriptions was made with Dr. F.V. Scholes, Dr. J.C. Russell, University of New Mexico and Dr. W.E. Gevehr, of Washington,D.C. On July 15th a group of 25 boys, under the supervision of Mr. Hollis L. Howie, were taken on the tour of the inscriptions and on top to the ruins. Three days later the custodian accompanied this group through an ice cave two miles east of the cave now open to the public. The boys armed with cameras, thermometers, steel tapes, etc. gathered some very interesting data and a report of their findings has been promised the custodian. On July 17th a group of Girl Scouts under the supervision of three Scout executives and Miss Bertha P. Dutton, archeologist, camped in the area and were given a very interesting campfire talk on "Applied Anthropology by Vogtie Vogt. Their program continued until 2 AM as they hunted in vain for a squaw dance. Next morning they were shown the inscriptions and ruins so by noon they were ready to call a halt, but a heavy rain cloud which threatened the Grants road kept them on the run.

SPECIAL ACTIVITIES: On July 20th the custodian made a trip to Santa Fe for repairs on his uppers and spent two afternoons in the Regional Office solving many El Morro problems. Mr. Burton Dwyre, State Highway Engineer was contacted and from him it was learned that the survey for the improvement of Highway #53 would be completed this fall and that work (construction) would start in the spring as soon as weather permits. The program is definitely set up and we are really beginning to believe that we will soon have one all-weather road.

James L. Breese, of Santa Fe, distinguished aviator, who was a member of the crew aboard the NC-4 when she flew the Atlantic, added to t the mystery of the "Flying Saucers" on July 24th. when he landed his Piper Cub in the flat east of the monument and delivered the custodian a brand new set of " Flying Uppers". His motto is " Delivery with a smile for a smile"

GENERAL: Two trips to Gallup and one to Grants were made for supplies. On these trips a count was made of the places where a tourist might get lost getting back to Highway #66 from El Morro. It looks like directional signs will have to be placed both ways. Many people have written telling us of their difficulties in getting back to the main highway.

Bates E. Wilson
Bates E. Wilson,
Custodian.

Number of copies of free publications on hand at the end of June, 1947.

2-fold Spanish edition------3700

2-fold English edition------966

16-page Booklet------8255

GRAN QUIVIRA

GRAN QUIVIRA, NEW MEXICO

JULY "_, 1947.

The following is summary of activities for the month of July, 1947.

Visitors this month totaled	417
Travel year to date	1855

Weather. This paragraph reads much the same as those in narrative reports of the past few months. Day after day and week after week of nothing but cloudless, dry hot weather. No precipitation of any importance has fallen during the month - in fact, there has been very little moisture of any kind during the past eleven months. High temperature was 97 and low 52. Incidentally the U.S. Department of Commerce, (Weather Bureau) now requires that weather station observers submit a weekly instead of a monthly report. In addition to weather observation the new system requires a report on the effect of weather on crops; condition and progress of crops; description of present farm operatic ...s; etc. This will place some additional work on custodians and rangers.

Roads. The State Highway maintainer has been laid-up for repairs for the past month, and, as a result, both approach roads are in poor condition.

Travel. This month shows a sharp upturn in travel. More visitors this month than for any month for many years. Instate visitors numbered 234 and outstate visitors 138. There were a total of 109 cars with instate numbering 72 and outstate 37. Increased visitation was due mainly to more out of state travel. 18 people walked out to the monument.

Guide and Contact Service. 417 visitors were conducted through the ruins on 109 guided tours. The average time spent by each party was 57 minutes. Total contact time of 103 hours, 50 minutes.

Treasure Hunters. Gran Quivira is undergoing it's usual annual invasion of gold seekers. Parties with all sorts of wierd gadgets ask permission to locate and dig for this precious metal. Now sixteen hundred burro-loads is quite some pot of gold. The humble burro can walk off with a load of two or three hundred pounds. At 250 pounds per load this would amount to well over $100,000,000 with a few pocketfuls left for neglected decimals. There may have been some mistake in the burro-count, but anyhow, that's the exact amount one insistent Gent. said was here, under the thick walls of this ancient mission, and he knew exactly where it was located. He was quite putout when permission to dig was declined, even though immediate operations could be started with the Government getting half the take.

GRAN QUIVIRA, NEW MEXICO

JULY 26, 1947.

Gran Quivira Monthly Report continued from page one ——— Page 2

Maintenance and Administration. Interpretive services has taken up most of the time during the month with little time left over for other duties. However, the gas engine operating the deep well pump was completely overhauled and is now in excellent operating condition. This engine had ceased to function due to needed parts and repairs. About two days work was spent overhauling USDI 1-13250 coupe pickup.

Publications Report. 950 Gran Quivira two-fold leaflets on hand. No other free or for sale publications on hand at this monument.

Edward W. Wright

Custodian.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
GREAT SAND DUNES NATIONAL MONUMENT
MOSCA, COLORADO

July 26, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in Great Sand Dunes National Monument for July, 1947.

WEATHER. Summer has arrived, although it has been cool during this report period. Nearly every afternoon has its light shower accompanied by thunder and lightening. A very heavy rain fell on July 17, which washed most of the gravel off the roofs of headquarter buildings.

The Medano is still flowing, being fed by almost constant rains. All snow is gone from the Sangre de Cristo range, with the exception of a few scattered patches in deep ravines. Crops in the San Luis valley are retarded and the potatoe crop is not up to expectations.

TRAVEL. Two thousand, seven hundred thirty-seven visitors in six hundred nine cars visited the Sand Dunes during this report period. Thirty-one states were represented. One member of the armed force was counted. One thousand, seven hundred seventy-seven people took advantage of the camp and picnic-grounds, and of these one hundred eighty-six camped overnight. One written request for information was received and answered.

The July 4 week-end travel to this area was very heavy. Six hundred sixty-nine people came in one hundred forty-six cars during the three days. Four hundred eighty people had all day picnics and outings into the Sand Dunes. Of the three days, July 4 had the heaviest travel, with many local visitors coming out to escape the noise of fireworks in town.

INCREASE IN TRAVEL. For July, 1946, the record shows 370 cars and 1462 visitors.

ROADS. The Colorado State Highway Department graded the 24 mile approach road into the area on June 27, July 9, 16 and 23. The road is now in excellent condition, although even after grading, visitors have complained about the rocky condition of the road. Its obvious that the American public aren't happy unless they can gripe about

something. Most complaints come from visitors who are used to oiled roads.

COMPLAINTS. Complaints are still being made concerning lack of restroom facilities at the checking station. The proper type flush box and bowl can now be obtained in Alamosa, but at a price which is prohibitive. Since the peak of the travel season is so near to the end, it would seem advisable to wait until prices lower and funds are available for this job.

Many visitors come into the area over the Alamosa road and naturally complain about the last four miles of that road. This section of road crosses the Zapata drainage off the mountain range and is of course badly washed. Because of scarcity of steel for culverts, the State Highway Department is unable to properly repair this section of road. It is understood that this rates a priority when materials are once more available.

The lower picnic area is a subject of verbal complaints in that with the huge increase in visitation, cars have cut and torn what sod and grass is there, so that the sand is now in a loose state and cars are easily stuck in this area. Shovel work is the only means of extraction and it would be wonderful to have a winch on the Dodge 2x4 to accomplish this tedious task. This area is fast developing into a major problem.

NATIONAL PARK SERVICE VISITORS. On July 1, John M. Davis and Dale S. King inspected the area and went over various problems.

Mr. A. van V. Dunn, Chief of Water Division and family came for a short while on July 5. Mr. Dunn was most helpful in explaining the water rights of this area and leaving suggestions and instructions as to the handling of this matter with Linger Bros.

NOTEWORTHY VISITORS. The first section of the Prairie Trek Expedition from St. Louis, Mo., on June 29, with 25 members. This group camped for two nights.

Dr. H.P. Mera of Santa Fe, who accompanied Davis and King on July 1.

The University of Kansas Field School on July 1, with 15 in the group who camped over-night.

The second group of the Prairie Trek Expedition with 26 in the party, arrived on July 8 and camped here two nights.

The Community Church of Monte Vista, Christian Endeavor held a picnic on July 13, with 43 in the group.

On the same Sunday, the Japanese-American Baseball Club of Alamosa held their picnic here with 40 members present.

WATER RIGHTS. Mr. Dunn, Chief of Water Division went over the legal problem of obtaining full water rights to Moaca and Morris Gulch Springs. A letter was written to Linger Bros., explaining the situation and suggesting proper means of releasing the water rights to the United States. To date no answer has been received from Linger Bros.

MINERAL CLAIMS. On July 9, a Mr. V.M. Jones came into the monument to do prospecting work on his claim in the northeast corner of Section 22. A check at the Alamosa County Courthouse revealed he filed his claim on May 26, 1947. He remained on his claim for ten days.

LAND STATUS. The Chicago Office has completed a tabulation of the acreage of Great Sand Dunes: Gross area is 45,333.47 acres, of this 9,425.28 acres are non-Federal lands. The net area of Federal lands amounts to 35,906.19 acres

ACTIVITIES. The major part of my time has been spent in cleaning up the two picnic areas. With the heavy increase in people picnicing and the lack of barrels for trash and garbage, this is an all day job. I particularily hate the man who invented Kleenex!

Toilet paper holders were installed in the pit-toilets at the picnic area in the faint hope that less paper would be thrown around the area.

The four file transfer cases were welded together and now make a trustworthy file case for the office. The files were completed with the exception of the front covers which have as yet, not been received. A file box was re-vamped to hold all blank forms. At Mr. Davis' suggestion, the office furniture was again re-arranged and the office now has a much better appearance. A book-shelf was built and now all that is needed, is books.

Two signs were painted and it is hoped that they will serve to slow down fast traveling cars so they will stop and register at the checking station.

The work bench was completed in the light plant room and all tools were cleaned and hung on a board above the bench.

Deeds were received for surplus equipment and will be placed as soon as time allows.

The two bed-rooms received a first coat of paint on ceilings and walls.

Mr. George Ziegler brought in his cattle on July 5, and to date have remained where they belong——on his land.

Keeps and locks were placed on the restrooms at the checking station, and these rooms will be used at present time for needed storage space.

The uncovered water line trench was discussed and inspected with Mr. Davis and an attempt will be made to obtain the use of a small tractor with a blade to push dirt and rocks into the 1500 foot uncovered section. It is believed that such a piece of equipment can be located and this will be done as time permits.

Because of lack of storage space for gasoline, it was necessary to purchase gasoline on credit card until a contract is awarded to this area.

One bid for the refrigerator was received from Denver, and it is hoped that we soon receive shipment.

Gasoline rationing evidently didn't prevent mid-west visitors from reaching areas where gasoline is not rationed. The majority of out-of-state visitors come from that section of the country.

The Shrine Ceremonial will be held next month on August 16 at Great Sand Dunes, and it is locally anticipated that a thousand will attend the event.

PUBLICATIONS. There are on hand, 62 of the mimeographed informational leaflets.

As soon as time permits, a proposed leaflet will be submitted to the Naturalist Division for mimeographing.

Ted C. Sowers,
Custodian.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Montezuma Castle National Monument
Camp Verde, Arizona

July 24, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows the monthly report of activities at Montezuma Castle and Montezuma Well for the month of July, 1947.

Visitors this month - Montezuma Castle - 2527; travel year - 14,780.
Montezuma Well - 425; travel year - 804.

The travel count for Montezuma Well covers only five days per week and about six hours per day.

General: Steadily increasing travel is no longer news but merits comment only because is shows an increase of more than 93 per cent over the same month in 1941 when we had 1303 visitors. July 5 brought one of the heaviest day's travel when 235 visitors were counted. Visitors are often waiting for the gate to open at 8:00 A.M. and we will have demand for guided trips every hour for ten hours until 6:00 P.M.

Administration Office work takes the most of one man's time. The Custodian endeavors to leave many routine matters for the rangers while they are relieved of the monotony of ladder climbing. Four or five hours per day is about all one man can climb and still retain any enthusiasm for his work.

Ranger Leding drove the Ford pick-up I-13821 to Casa Grande where it was transferred. His return was delayed by the Santa Fe bus driver's strike.

The general information sign near our gate was mauled by vandals who completely demolished it and dumped it over the roadside a hundred yards or more from its place. Luckily it was nailed together and the nails pulled out without doing great damage to the sign.

Several visitors have been attacked by bees on our narrow ledge trail beyond the Lower Ruin, and one man was stung fourteen times when he did not find the sign "Narrow Dangerous Trail" a deterrent.

The Custodian and Mrs. Hastings took two days annual leave to join Ranger and Mrs. Leding on a trip to Navajo National Monument. We got stuck in loose sand and on the Shonto Hill but we enjoyed the trip and the Brewer's hospitality.

This month's book sales amounted to $125.50. Of this amount we were short $9.30 on the "Self Serve" plan. Stickers advertising Southwestern Monuments Association were pasted in all bound volumes offered for sale.

No word has been received concerning the status of the contract for rehabilitating the quarters at Montezuma Well and we are most anxious that the project be completed so that the ranger may reside on the premesis.

Weather The maximum temperature was 110° on July 18 and the minimum was 45° on July 12. Total precipitation was .23 of an inch. Most of the month was hot and dry with our showers doing little to deter travel.

Maintenance Our gutters were cleaned and culverts were checked. An effort is being made to keep all drains in readiness for a heavy rain.

National Park Service Visitors Henry Tuller, Clerk Stenographer, visited Montezuma Castle and Montezuma Well enroute to his new assignment at Hoover Dam.

Mr. and Mrs. Ben H. Thompson and three sons were here.

Custodian Earl Jackson was a most welcome visitor July 9 to 13. We learned a lot from Earl and hope he comes again soon.

Ranger Abuchon and party were here from Walnut Canyon on July 10.

Maintenance Man Ollie Barney came from Saguaro for a truck load of hay from Montezuma Well. Our share of the first crop, 72 bales, and 5 bales from the second crop were loaded.

Kennaerthy Visitors Mr. and Mrs. Arthur Woodward spent the night on our picnic ground and had breakfast at the Custodian's house.

Commander A. W. Scott, nationally known radio commentator, visited the Castle and Well. He had difficulty when his car stalled just inside the gate at Montezuma Well. The hydromatic clutch locked the wheels securely so that the car and trailer could neither be pushed or pulled until the car was jacked up and the clutch released by rotating the back wheels.

Accessions A copy of "The Book of Indian Crafts and Costumes" was donated to our library by Southwestern Monuments Association.

On July 11 Earl Jackson directed us to a flared basket about 5 inches in diameter and 2 inches high which he had seen imbedded in refuse in a remote corner of Room F-1-2 (Pinkley) in the first story of Montezuma Castle. Although only about one-fifth of the basket could be viewed a few years ago, it was now completely exposed and held in place by a few twigs. Here it could be damaged by rodents so it was removed and Mr. Jackson cleaned it thoroughly. It was found to have a weave and design quite like the modern Apache.

Use of Monument Facilities By The Public Montezuma Castle had 2527 visitors who came in 720 cars, trucks, and busses. Tickets sold, 886; Complimentary Admission Tickets used, 107; children who climbed free, 205; armed forces who climbed, 1.

A visitor for the record was here July 6. She bathed her three-year-

old daughter at the drinking fountain while Papa and Junior climbed the ladders.

Contact Time Total contact hours, 254.25. Hastings, 65.75; Leding, 77.25; Schroeder, 6.50; Frost, 106.75. There were 188 guided trips through the Castle for 1199 visitors and 266 parties in the museum including 1378 visitors. Visitors receiving information outside the ruins or museum numbered 736. Seven parties including 35 people camped over night and 24 parties including 101 people are known to have used the picnic ground.

Montezuma Well The following excerpts are taken from Archaeologist Schroeder's report.

General Daily duty was maintained except for lieu days and as follows; July 4, holiday, Custodian Hastings on duty; July 12, replaced Leding who was on sick leave at Castle; July 14 and 15 replaced Hastings on annual leave at Castle.

423 visitors in 122 cars and trucks were contacted. Judging from the pamphlets used during lieu days an estimate of another 50 cars could be made. 7 parties of 26 people were counted using the picnic grounds.

Administration The greater part of the month was devoted to work on the trail and making signs for the trail and approach roads. Trail signs were set up June 28 and the trail pamphlets have been in use since that date. The trail has been delineated with lines of rock to guide the visitor over large areas of bedrock. One burial pit, with limestone slabs in place, was cleaned out to better illustrate the type of grave used. Visitor comment on the trail has been favorable in most respects.

Public Facilities (the lack of) Several requests from parched throats resulting from the sunny walk on the trail have been received for drinking water. Similar requests for restroom facilities are answered by our antiquated "Chic Sale", and I suspect, by some of our more protective flora.

Buildings Some time was spent in an attempt to plug two bad leaks in the roof of the museum building. Plastic roofing tar was spread into the visible cracks on the rear portion of the roof. However on July 21 water from a heavy rain backed up to where other leaks occurred and an attempt will be made to repair them. The entire roof is in such bad repair that it is about ready to collapse.

Research On July 18 Dr. Colton and Eddie McKee of the Museum of Northern Arizona made a preliminary survey of the geology of the Well. Soundings were made and it was found that the Well is saucer-shaped running from a few feet [illegible] the shore and dropping to 20 and 25 feet under the [illegible]. In the clear water soundings read from 40 to 55 feet, [illegible] slightly east of center. The temperature of the water at [illegible] recorded at 77 degrees and 4 inches below the surface at 84 degrees.

Mr. Leslie N. Gooding, a retired botanist, was here at the same time and browsing around the area of the Well and the creek bottom he identified

86 species, some tentative.

Alfalfa On July 18 the second crop harvested under contract by Mr. J. C. Lightfoot was stored in the barn, a total of 245 bales.

Rattlesnakes Three western diamond and one black-tailed rattlesnake were found. Two in the Well proper at the outlet cave, one along the irrigation ditch outside the Well, and one on the rim by the small pueblo. The latter, a black tail, was skinned by Ranger Frost for a specimen.

Airmail Delivery On June 29 a plane buzzed the Castle and dropped a note attached to a T-shirt for Archaeologist Schroeder. Custodian Hastings directed the plane to the Well by means of questionable gestures. On arriving at the Well the tactics were repeated and the message delivered with accuracy on the roof of the house.

Homer F. Hastings,
Custodian.

Arches NATIONAL MONUMENT

Moab, Utah

July 29, 1947

RECEIVED
JUL 28 1947

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Natural Bridges National Monument for the month of July, 1947:

GENERAL: Travel to the area is holding up very well and it looks like this may be the banner year for travel to this monument. The ferry at Hite is again in operation and several parties have travelled to the area over this route.

TRAVEL: A total of 51 cars and 240 people visited the monument during the month, bringing our travel to date to 580 people. The majority of the visitors were from Utah but a good representation was had from other states.

Several cars containing a group of students and professors from Weber College at Ogden, Utah visited the area on July 5th.

The second trip of the Utah Wonderland Tours arrived at the monument on July 21st, via Hite Ferry. The party consisted only three passengers, who were accompanied on a trip to Sipapan Bridge.

INTERPRETIVE SERVICES: Six parties containing 17 people were accompanied on trips to the various bridges by Ranger Reed. Forty eight parties of 183 people were contacted at headquarters and 51 people visited the area during the absence of the ranger. Most of the people get their view of Anchine Bridge by making a short hike from the Hite road in preference to the 8 mile hike in the canyons.

WEATHER: Hot weather has been the rule throughout the month and has reduced the number of parties visiting all of the bridges over the 8 mile trail. Light showers fell twice during the month.

MAINTENANCE: The Dodge pickup was sanded and given a coat of black paint to replace the original washed out drab finish. This has improved its appearance 100%.

The 1½ KW power unit was moved from the site near quarters

to a point under the ledge where it is better protected and out of sight. A concrete footing was poured as a base for the installation.

Trail work has been continued as time permitted and it is in fair shape. The underbrush is crowding the portions in the canyon and a laborer will be hired during August for the removal of same. Trees which fell along the trail during the winter are being removed.

ROADS: The State maintenance crew has been working on a portion of the road near the Bear's Ears on the Elk Ridge, and have improved the condition of the Maverick Point hill. At this writing the road is in good shape.

The road from the monument to Blue has not been maintained this year but is still in fair conditions. Maintenance of this road was turned over to San Juan County after the completion but it is my understanding that the county now wants to return it to the State for upkeep. I hope they decide where road it is before it gets in too bad a condition.

VISITORS: Dr. David M. Hall, representing Carnegie Museum of Pittsburg spent several days at the monument. He is preparing to excavate ruins in the vicinity of Butler Wash. Regional office was notified of his contemplated activities.

July 24, 1947

MEMORANDUM for the Director, Region Three

There follows a report of activities in this area for the month of July 1947.

WEATHER: Weather has been extremely dry and has become the principal topic of conversation. Only 0.30 inches of precipitation were recorded. This is believed to be the dryest July recorded (to date) by the Betatakin Cooperative Observer Weather Bureau Station. High temperature was 98 degrees on the 20th, low was 49 degrees on the 15th and 16th.

ROADS: All roads in this area are dry and rough. Windblown sand is impassable on some road sections. Almost all of the fill material is loose or gone from the blasting holes in the Shonto Hill approach road. The same effect could be obtained by driving up a flight of standard stairs 400 feet high.

VISITORS: Travel has been discouraged by impassable roads. 18 members of the Boys Explorers of Colorado were here on the 6th and 7th. On the 20th Mr. and Mrs. Devereaux Butcher, Editor of National Parks Association Magazine, arrived to enjoy Betatakin. Dev and Mary will accompany us on our routine inspection trip to Rainbow Bridge planned for July 25-26.
Total travel: 47, in 13 cars. 22 overnite campers. One visitor came from Ireland.

National Park Service Visitors: The Hastings and Ledings of Montezuma Castle National Monument were here to visit Betatakin on the 14th.

PROTECTION: On July 8 lightning struck a pinyon tree only 15 feet from the 950 gallon steel gas tank. The excavation for this tank is ready for its installation. We are prevented from completing this job because we have no authority to purchase the pipe fittings. Better protection to property could be effected if this tank were installed underground.

The following items were performed by force account:

The log house formerly called 'tool-shed' is now housing the generator units for illumination. This month a new concrete roof was added to this structure. The sod roof afforded inadequate protection to the $1500.00 worth of Kohler generators. A six-pane steel sash window was installed in the same building.

The roof of the Shop-storehouse was retarred.

The entrance road was scraped from Shonto to Headquarters.

Chips were hauled and placed in the dry sand areas near Shonto and at Segi Point.

118 pieces of out-going correspondence were processed thru this office and a short ton of incoming correspondence was read and filed.

~~ORGAN PIPE CACTUS~~ NATIONAL MONUMENT

~~AJO~~, ARIZONA

July 25 19 47

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities in Organ Pipe Cactus National Monument for the month of July, 1947.

WEATHER

July has been very hot all month with all days over the 100 mark. 112 degrees was reached on both the 1st and 18th which is near our record for the area of 113. Low for the month was 68 on the 16th. Summer showers have started with two small falls on the headquarters area totaling .24

TRAVEL

Travel through the area this month totalled 5287, bringing the travel year to 69,154, with a small number stopping for interpretive service and an occasional camper.

GENERAL

S.& M. fencing project was terminated on July 25, with 7 3/4 miles of fence completed on our west boundary. The crew was terminated on the night of the 26th as we do not have material to continue further work.

Ranger Pete Schuft was down on the 21st and all non-expendable property was inventoried and numbered.

The office was moved from the custodian's residence to the new temporary office and contact station near the highway. This is a great help as I now have room to work and set up our files properly as well as being within sight of the highway for better service to the visitor.

A localized cloudburst on the evening of July 21st washed out a hole in the middle of one of the dips about 20 feet wide and 5 feet deep. As soon as reported, flares and blocks were placed and the damage reported to the County. It has been temporarily fixed and made comparatively safe for traffic. We are expecting considerable highway damage during the flood season as sand is piled high along all washes from last years rains.

Mr. Emmett and Dr. McDonald, of the Bureau of Animal Industry, stopped for more information and study on the proposed cooperative fence project along the International Boundary. It is hoped that this fencing can soon be put in as the summer rains will cause a great increase in the drift of cattle and horses into the interior of the monument.

Both custodian and ranger were called to Saguaro National Monument on the evening of July 8 to assist in fire suppression, returning to the monument the night of July 10.

PERSONNEL

Ranger Ringenbach entered on annual leave July 25 and is spending his vacation on the Coast. He will return to duty on August 15.

William R. Supernaugh,
Custodian

Saguaro National Monument
Tucson, Arizona.
July 30, 1947.

MEMORANDUM for the Regional Director,
Region Three.

There follows the MONTHLY NARRATIVE REPORT of activities at Saguaro National Monument for the month of July, 1947.

WEATHER. Two and 25 one-hundredths inches of rain, on eleven days during the report period, were measured at the Mica Mountain Lookout. On the 22nd, 1.56 inches fell on the Rincons, with the other days of precipitation recording from a trace to .24 inches. This is far below the normal for July, and the mountain is not "wet down" by any means. Contrasting our rainfall with that of the Santa Rita Mountains, 45 miles south of Tucson, they have had over ten inches during the month. Temperatures have been over 100 degrees most of the month, with July 1 setting a new record for that date in Tucson, with 110 degrees, while at monument Headquarters that date showed 106.

SPECIAL ACTIVITIES. Only one official trip was made during the month, when Maintenanceman Ollie Barney drove the stake-body truck to Montezuma Well to pick up 71 bales of hay from their first cutting, on July 16 to 18. Ranger Fulton made two trips to Manning Camp, and the Custodian made two during the month, the second to inspect the site of Fire No. 5.

INSPECTIONS. On July 17 and 18, Regional Forester Carlson and the Custodian rode up to Manning Camp, and Mr. Carlson looked over the area burned in Fire No. 5. Ranger Pete Schuft arrived on the 21st, and spent the 22nd making the inventory of Non-Expendable Property for initiating the new property accounting system.

STATUS OF PRIVATE LANDS. It is understood that another portion of Section 8, owned by Mr. T. C. Igo, has been sold for homesite purposes, and that the well sunk by the new owner has been completed, with the residence structure to be started soon.

Inquiries as to the status of the "Baker" well, 1 mile west of the Headquarters and presently owned by the Tucson Chamber of Commerce were made by private parties desiring to use or purchase this property. Two separate groups were referred to the C. of C. Secretary, Mr. Goyette, and it is to be hoped that they receive more information than has the Custodian, who, on four occasions, has asked to see the files on this property, and has been put off with promises to mail us the desired data.

MAINTENANCE. The two men of the trail crew have spent the entire month, when not fighting fires, in resetting water bars, adding new bars and drainage ditches, and, in places, widening tread on the patrol loop trail. At the end of the month work had started on the trail to Cross Shack. The telphone line has again been almost useless the greater part of each day, and, after spending a total of almost fifty man-days on its upkeep since April, we finally gave up, and engaged one of the local experts to find the trouble. After re-wiring all three lines into the Madrona R.S. with no marked improvement, he gave up, with the comment that the trouble must be in the Central Office. Next day he apparently found this to be the case, and for two days the line worked better than ever before. Now it is again useless after 9 or 10 A.M. Ranger Fulton has spent several days repairing the water pump, and pumping 5000 gallons of muddy fluid into the storage tanks for use of the stock. The spring at Manning Camp was cleaned, but the supply is too low to do as thorough a job as is desirable. One of the radio masts at Headquarters blew down in a storm on July 5; it was reset the following day. One of the antenna masts at the Madrona R.S. was snapped off in a high wind on the 22nd; it is still down, and will have to be replaced, although the station is still operative at reduced volume. The Headquarters sewer line appears to be stopped up, and after spending one day on it, no improvement is apparent. It is probable that the interior fixtures will have to be removed to open the line from that end. One day, July 6, was spent by the Custodian in dragging the Loop Road, which put it in good condition.

APPROACH ROADS. The Broadway approach road has been in the worst shape we have seen it since last fall. All month the visitors complained bitterly about the extreme roughness of both this, and the Vail approach road. No maintenance was accomplished by the Pima County crew during the month.

TRAVEL AND INTERPRETIVE SERVICES. The usually expected decrease of visitors continued, with total travel dropping to 543 people, arriving in 178 cars. Registrations showed visitors from 27 states and Switzerland. Informational service was available only 19 days during the month, due to pressure of other work, and fire business. Of the 158 persons given information at the Monument Headquarters, 65, or almost half, were met by Mrs. Egermayer, who spent 315 minutes, or over half, of the total contact time of 560 minutes, in this work. Under present personnel and work load conditions it is impossible to maintain any effective interpretive program during the summer months, and it will not be surprising to receive complaints as to this situation.

PERSONNEL. Mr. Michael T. Keevan entered on duty as Packer July 25, at 8:00 A.M. He replaces George T. Hilliard, who has resigned, effective July 26, to return East.

FOREST FIRE PROTECTION. Five forest fires, four of them Class "A" and one Class "B", occurred during the month. Of these, one was reported on July 5, two on July 7, and two, including the Class "B", on July 8. All were lightning-caused, and the two reported on the 8th were not discovered until over 20 hours after starting, since both were blind to any of our lookout positions or patrols. In addition to all of our regular personnel, 24 outside fire-fighters were required to suppress the last two, as the larger of these, which finally reached 5½ acres, was not out until 7 P.M. on July 11. First thought on Fire No. 5, the Class "B", was that we could not control without outside help, so assistance was requested from Organ Pipe Cactus and Chiricahua, which was promptly forthcoming, as Custodian Supernaugh and Ranger Ringenbach arrived at 10 P.M., and Ranger Sharp an hour and a half later, in response to messages sent at 4:15 P.M. Their assistance was badly needed, and sincerely appreciated. We still feel that only luck as to weather conditions prevented both of these last fires from being much larger, after the delay in discovery, and the generally dry condition of fuels. Since the 11th, we have had only one fire, non-reportable, as it rained out before arrival of a crew. Fire weather danger is still running in the Moderate and High classes, as the effects of the one good rain which occurred on the 22nd have been lost without recurring precipitation.

ACCIDENTS. On June 26 Packer Hilliard suffered a punctured wound in his left knee while shoeing mules, and was hospitalized for two days. During the period of Fires No. 5 and 6, one fire-fighter was so badly stung by wasps near the Redrock Canyon burn that he required medical attention, and another fire-fighter, Milbur Carpenter, was thrown from a horse and suffered a broken wrist and numerous cuts and bruises. On the 22nd the Custodian sustained a cut scalp which required three stitches to close, resulting from striking said thick head on a projecting bolt on a truck body. Mrs. Egermayer was stung by a scorpion on July 1, and required medical treatment. One of the K-9 horses mated for use by fire-fighters threw his rider, bolted, and was not found until three days later, minus saddle and blanket, and with a deep, worm-infested cut on his flank; as it was impossible to bring him off the mountain, this animal is being treated at Manning Camp, as is one of our own mules which ran into a projecting branch and punctured his flank, which likewise became worm. Another accident, if such it can be called, occurred on June 30, while hauling water to Headquarters in the new ply-wood trailer. The front wheel and front of frame pulled off the trailer, depositing the remainder in the middle of the road, upright, without spilling any water or damaging the rather frail tank. It was embarrassing to arrive home with only the tow-bar and front wheel attached to the truck, but the tank was salvaged for other use.

PUBLIC HEALTH. As the water supply at Redrock Canyon has been polluted since December, all drinking water for personnel in that area has been hauled from the K-9 ranch nearby. On July 8 the report of the monthly sampling disclosed that this source was also polluted. On July 8, the report of a sample of water from the Manning Camp Spring was received - unsafe to drink. Since then the spring has been cleaned, and orders were given to boil all drinking water from that source. Water for the Ranger and family, and the Packer, is now hauled from Tucson. For a while this

water was stored in the salvaged plywood tank which had been moved over there, but after the first week of such use, we were forced to discontinue this practise, as Ranger Fulton, his wife, and the Packer all became ill, presumably from the effects of the banana oil with which the tank had been treated. Before discovery of the polluted condition of the water obtained from the X-9 supply Mrs. Egenmayer had drunk some while at the Ranger Station; she later became ill, and our doctor diagnosed water infection. Daily fever for over three weeks resulted.

NEW EQUIPMENT. A 4000 gallon water-storage tank was transferred from the Grand Canyon. A new 550-gallon gasoline tank was purchased locally to replace our leaking one at Headquarters. A battery-charger was purchased to charge batteries at the Madrean Ranger Station, after the small 350 watt plant (which is to be moved) ceased to function and had to be taken to Coolidge for later repair. Two additional pack saddles and one pair of pack bags, as well as 8 five-gallon milk cans were purchased during the month.

PUBLICATIONS. Free publications of the Service on hand at the end of the report period are as follows:

Saguaro two-fold informational leaflets, English	3070
Saguaro two-fold informational leaflets, Spanish	1100
Location Map No. 5 - Southwestern States	607
Southwestern Nations Monument Location Map	156

(400 each of items one and four, above, sent to Utah Centennial office).

Sales publications of the Nation Park Service ——— none.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Sunset Crater NATIONAL MONUMENT

Flagstaff, Arizona

July 29, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows a report of the activities of Sunset Crater National Monument for the month of July, 1947.

Visitors this month: 2328 Travel Year to date: 8242

Travel: During the past month 1630 persons registered. This, when compared to 1132 for the same month of last year, shows an increase of 30.5 %. The estimate of the total number of visitors is again computed on the basis that 70% of the visitors register. An additional 30% is added to arrive at the total visitation. From a comparison of the actual number entering the monument and those that register it is apparent that the method used for the past year is most conservative. The study will be continued and if the present trend continues, a change in the proportion used in computing the count will be made with the next report.

Weather: For the most part this has been a month of light showers. The rains that were forcast never materialized. We are still hoping that moisture may come so that much needed work on the roads can be done.

Roads: By degrees the entrance road becomes more like a washboard. Because of the extremely dry weather it is impossible to do any type of maintenance on the cinder and about all we can do is hope that it will rain. The Wupatki back road remains closed. The continued drouth causes this deep cinder to become more difficult to travel.

General: The schedule for the month has been largely given over to a clean up of the area. An accumulation of trash from many months of heavy visitor use, without regular cleanup, really makes it a man sized job. Refuse cans have been obtained and located in spots most commonly used for picnicing. This will go a long way in helping to keep the area more presentable. Both pit toilets have been repaired, with a new door in one and a new roof on the other. Signs that had been stolen by vandals have been replaced and others have been repainted. More of this type of work remains to be done. As much time as possible is being given in contacting the visitor. This together with the other essential jobs has a tendency to spread one rather thin. But as the other work is caught up it is hoped that more time can be given to interpretive contact.

Visitors: Mr. and Mrs. Devereux Butcher of National Parks Association visited Sunset on the 19th. The day was spent in making the ascent of the crater and inspections of other interesting features. Chief Engineer A. D. Currad, Minor Roads Division, Branch of Development, Director's Office in company with Engineer S. D. Hendricks of the Santa Fe office stopped for a few minutes on the 20th, while enroute to Wupatki and Grand Canyon.

Publications on Hand: Sunset Crater National Monument 2-fold leaflets on hand - 750 Copies.

Robert F. Upton
Ranger in Charge

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Tonto NATIONAL MONUMENT

Roosevelt, Arizona.

July25 19 47

Memorandum for the Regional Director:

Following is the monthly Narrative Report for Tonto National Monument for the month of July, 1947.

TRAVEL - Travel for the month of July was 362 with only 154 of this number visiting the Lower Ruin. Twenty-one states and one Canadian Province were represented by this number.

PERSONNEL - Although no official word has yet been received, Charles Sharp is expected to arrive around August 1st to take up his duties at Tonto as Custodian.

U.S.F.S. VISITORS - Custodian Earl Jackson of Sunset Crest National Monument spent the night of July 13th here at the Monument, arriving only enough in season himself of catching a mess of fish for breakfast. Hardly had the smell of fish departed from the kitchen when Gene Stonebocker and gang arrived with the surplus storage tank. Tuesday, July 22, Engineer Bradley arrived from the Regional Office to begin work on the fence survey.

WEATHER - Temperatures for the past month have been exceedingly high and have gone well above 100 every day. Good showers fell on the 7th, 21, and 22nd, however these rains have been so light that the only benefit was a short relief from the heat. Roosevelt Lake is now dry and the Salt River is a mere ditch of water.

FIRE - Tonto had it's first reported fire on the afternoon of July 7th as the result of a severe lightning storm in this area. The fire ~~caught~~ in some dead aztal above the upper ruin and was extinguished in about 3 hours, two of which were spent in looking for dirt to combat the fire. At that we fared better than the Forest Service as they had a fire started at the same time, but not reported for several days, and lasted for over a week.

GENERAL - The house has been completed and is now occupied, giving Tonto two houses, but the greatest improvement was the electric plant which is now in use.

FENCE - Engineer Bradley of the Regional Office ; Joe Bean, Monument maintenance man , and two local men are running a survey over the boundary fence with the hopes of establishing the fence in a permanent location. At present all is progressing very well.

Acting Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
TUMACACORI NATIONAL MONUMENT
~~BOX 777, TUCSON, ARIZONA~~
Tumacacori, Arizona

July 26, 1947

MEMORANDUM for the Regional Director,
Region Three.

Travel to Tumacacori took its annual July drop this month, but we haven't had a great deal of time for missing the extra visitors. This report period saw the completion of the contract job of repairs to the mission church and the Park Service buildings; the beginning and excellent progress of stabilizing the walls of the church; the paper work that arrives with the end-of-the-quarter and end-of-the-fiscal-year; and the cleanup incidental to having crews of plasterers and roofers on your area.

Weather. The drought continues in this vicinity. After a winter which, Weather Bureau records show, was the driest since 1903-04, our July rains have brought only .76 inches of precipitation. Last year we recorded 3.93 inches for this period.

Here, lack of rain means continued heat; there was a record high of 109 degrees on July 1; 15 days of this report period have had maximum of 100 or above.

With range conditions very poor, and farmers drawing heavily on the supply of ground water, there is just one bright side of the dry picture for the Monument: rain would have slowed progress on stabilizing the mission walls.

Personnel. Custodian Jackson was on duty until July 1, when he left for a month of annual leave. Archeologist Aide Lancaster came down from Chaco Canyon, arriving on June 30, to supervise stabilization work and to provide interpretive service on Ranger Brewer's weekly days off. On July 10th Andres M. Alegria was hired as Laborer for the stabilization job. Laborer Orozco has provided part-time help on the stabilization crew (with the decrease in travel, Brewer was able to handle some of the janitor and gardening chores).

Tumacacori has been fortunate in having Al Lancaster here this month; his work on the mission is exactly what was needed, and no one could ask for better all-around help on an area (we hadn't expected someone who not only was tops in stabilization, but who knew Park Service policy, and the routine of fee collecting and of conducting guided trips).

Travel to the Monument. There were 1,095 visitors this month. The increase of 1947 travel over that of 1946 was less this month than for any previous month (travel for July 1946 totaled 1,006). The percentage of out-of-state travel has held up, but local travel has been slight, particularly on week-ends.

Interpretive Service. Of the 1,095 Monument visitors, 1,072 were given information; 1,057 saw the museum; 671 made the complete tour of museum and mission; 23 were runarounds. There were 135 trips through the mission, averaging 34.6 minutes duration.

On four days during the month electric power was off for several hours, making it impossible for visitors to see the museum exhibits. During summer lightning storms we expect occasional breaks in the power, but this month the failures were evidently due to the current power shortage in this part of Arizona (the power was off between 1 and 5 one afternoon a week).

Contract No. I-33ap-73. This contract, covering repairs to the roofs of the mission, the two residences, and rest rooms, and the plastering of the residences and rest rooms, was awarded to the Tucson Roofing and Supply Company. Work was begun May 8. The church roof was completed during June. During this report period the following work was done: finish plaster coats on the residences; finish roofing coats on the residences and rest rooms; painting and plastering the rest room interiors; roofing the second story of the bell tower and covering with a trap door the upper entrance to the tower stairs; repair to one column of the lantern of the sanctuary dome; replacing the wooden cross in the lantern.

Final inspection was made by Architect Saunders on July 17; final clean-up by the contractor has not yet been done.

Stabilization of mission. Mr. Lancaster arrived with Mr. Steen on June 30; they and Custodian Jackson laid out a program of patching of the original plaster on the north side, second story, of the bell tower, and on the south side of the tower; and of removal of the modern wooden framing from the baptistry window, and restoring the window to its original appearance.

For the first few days Mr. Lancaster familiarized himself with original materials used in the church, and experimented with different mixes of lime plaster, coloring materials, and the making of adobe brick. On July 10 a full-time Laborer was hired, 70 adobe bricks were made, and a scaffolding was constructed out of lumber on hand. To date, the projected work is almost complete, repair of plaster breaks on the facade is two-thirds complete, and two stabilizing jobs not in the original program have been done.

A detailed report on amount and location of repair work, and material and methods used will be written at the completion of the job. Photographs have been made before and after repair.

We do want to repeat here that this kind of stabilizing is exactly what the mission needed. The National Park Service is pledged to preserve and protect. Special skill is required to preserve (not restore) and protect from continued weathering a building with as long a history of neglect as Tumacacori. Workmen whose only standard is modern construction, who do not realize the historical importance of original construction, can do more harm than good. Mr. Lancaster's work is all to the good.

Research and Observation. Part of the current stabilization job was an examination of the wooden framing of the church windows; it was determined that the mortised and pegged frames are original. After removing the modern framing of the baptistry window, Mr. Lancaster found that the arched roof of the window opening originally ended two feet from the outer wall face; original adobes in place in the outer two feet were laid horizontally. This window repair is being modeled on the original east door of the sacristy, where an arched ceiling led to horizontal wooden lintels.

Rev. Victor Stoner visited Tumacacori twice during July, bringing very valuable historical data each time. On the 2nd Father Stoner showed us two early photographs of Tumacacori; one is particularly valuable because it shows one complete arch and bases of others, forming the "arched colonnade" that Prof. Brightson described in 1860, remnants of On July 17 Father Stoner presented the National Park Service with a chart of signatures and dates he had compiled from the mission registers of Tumacacori and vicinity; this chart gives an almost unbroken succession of missionaries for this area for the entire Franciscan period, and is an invaluable addition to our knowledge of Tumacacori history.

Laborer Andres Alegria's maternal grandfather was the Carmen Mendez who donated the ten acres for Tumacacori National Monument in 1908; Andres' mother was born just south of the mission and has lived nearby all her life. From her we learn that the present altar in the sanctuary was built by Pedro Calistro "in 1900, the year he started the Semana Santa here"; from Andres' father, Tomas Alegria, we learn that the choir loft fell in 1901 ("a family living in the rooms east of the church had a boy about ten years old; he had a swing hung from the north arch of the loft, and one day the whole choir loft broke").

Donations and Accessions. Bill Smith gave to the museum ~~on July~~ a collection of worked conus shell "tinklers" which had been found by Clifford Burdick of Tucson in a grave at Guevavi mission; the collection was entered in the museum records June 29.

Regional Naturalist Lodge sent a series of Kodachrome slides showing Southern Arizona reptiles, to the Tumacacori visual aids library, on July 3.

Inspections. Architect Saunders came June 25, accompanied by Mrs. Saunders and Mrs. Tillotson.

Archeologist Steen inspected the mission stabilization needs on June 30.

Architect Saunders spent July 17 and 18 here, giving the contract job its final inspection. (Custodian Jackson, finding himself back at Tumacacori in the middle of his vacation, was on hand for the official wind-up of the contracted repair work.)

Maintenance. Trouble with the wiring of Residence #1 was reported to us on July 7, when plasterers at work on the building received electric shocks from the walls. Mr. Lancaster found that the meter registered the use of current when all lights and appliances of the house were off. On July 11 an electrician from Nogales made temporary repairs to the wiring that by-passed the ground; he reported the wiring in very poor condition and in need of complete overhaul.

A new hose for the gas pump was received from Casa Grande and installed on July 1; old aerial poles were removed from both residences; two new doors installed in the residences by the contractor were given a protective coat of linseed oil; plaster was removed from the screens of the Custodian's residence; the garage and closet between the rest rooms were thoroughly cleaned.

Special Activities. On July 7 there was a small explosion midway between a plasterer and two parked cars (too close to both for comfort). When the dust cleared we found a thoroughly flattened tin can, Army drab in color, oozing green peas from both blown-out ends. A B29 was overhead at the time, and the obvious conclusion was that they had recently lost one can of peas. The incident was reported to the BAB base in Tucson; the commanding officer agreed that a serious accident might have occurred if the can had registered a hit instead of a near miss, and extended the apologies of the Army Air Corps. (This is one field of activity we're willing to concede entirely to White Sands.)

NATIONAL PARK SERVICE

Tuzigoot NATIONAL MONUMENT

Clarkdale, Arizona.

July 26, 19 47

MEMORANDUM for the Regional Director,
Region Three.

Following is the monthly narrative report for Tuzigoot National Monument for July, 1947.

Visitor Statistics and Trends: Brisk visitor travel characterized the month with 1361 persons arriving to view the Ruins and Museum. During the 4th of July Weekend it was noted that a general exodus from California apparently occurred inasmuch as the majority of our visitors at that time were Californians, and nearly one out of every two vehicles observed on the highways was from the Coast State. Varied scenic and recreational attractions of Northern Arizona which were accentuated by the Prescott Rodeo and Flagstaff Pow Wow lasting three days, brought unprecedented traffic on US Highway 89A between Phoenix and Grand Canyon.

As evidence of the increased travel which was predicted in our report for May, we note from the records that July 1941, showed a total of 1065 visitors, which at that time was an all-time high; July 1946 showed only 917, whereas last month, June 1946, travel totalled 1220. Thus, in each of the above comparisons there is a substantial and significant increase.

Guide and Contact Service: An average of 23 minutes for 512 ruins parties and 22.4 minutes for 327 museum parties kept the Acting Custodian and Ranger busy with visitors and left time for little else.

Personnel Time: Museum: 122 hours, 10 minutes. Ruins: 119 hours, 50 minutes. Total time for Acting Custodian Richert: 115 hours, 20 minutes; for Temporary Ranger Danke: 125 hours, 40 minutes.

Administration: Several days were spent familiarizing Ranger Danke with duties at Tuzigoot and briefing him on the archaeology, geology, and history of the Verde Valley Region. This is Mr. Danke's first assignment with the Park Service. He seems to enjoy the work and is doing a commendable job guiding. Ten replies were made by correspondence to persons who had written inquiries requesting information on the Monument. Our limited supply of free Park Service literature is all out of proportion to the large number of requests from travel bureaus for such information.

Museum Activities and Exhibits: The new functional exhibit which former Custodian Cotter and the present Acting Custodian installed relative to displaying the difference between pothunting and scientific excavation has evoked much comment. A few people smart apprehensively as they view with a guilty conscience the typical pot hunter's loot. The great majority, however, are genuinely interested

in knowing what archeology is and ask many additional questions. If any complaints come in regarding this exhibit, they will only be construed by us as prima facie evidence that the complainants were guilty in varying degrees of violating the Antiquities Act!

Publicity: Tuzigoot rated a humorous note in Reg Manning's cartoon section of the ARIZONA REPUBLIC, Sunday, July 20, 1947 edition, wherein Reg pointed out that the Tuberculosis X-ray Mobile Unit would be in Clarkdale on July 24 and 25. He showed a local citizen peering at an X-ray picture of himself - a skeleton. Remarked the citizen with a horrified expression on countenance and hair standing on end: "Omigosh! My X-ray looks like something out of Tuzigoot Ruins!"

Projects: With the great influx of visitors, we have had insufficient time to complete the re-screening job on the window and door frames of the Administration Building. However, we received new labels from the Museum Laboratory for a few of our exhibits, and these are now being placed in the cases. Because of their appropriate size, clarity, and conciseness, these new labels greatly enhance the effectiveness of the displays, and will go a long way toward filling our most urgent need.

Signs: Two new highway markers were constructed by and purchased from a local sign painter. One has been placed at the "Y" on Highway 89A at the lower end of Clarkdale sufficiently in advance of a rather sharp, hilly curve to enable people to make the proper turn-off. Heretofor this was impossible. The second sign is being held as a replacement. Casualties among signs here are high owing to,1) Man, and 2) Climate, in order of priority.

In addition, a representative from the Arizona Highway Department was contacted in Clarkdale from whom it was learned that present signs between Jerome-Clarkdale and Flagstaff-Clarkdale are being replaced. Hereforth, Tuzigoot will be adequately marked.

Stabilization: Funds became exhausted July 1, and our two laborers, Mr. Hood and Mr. Harris, were terminated. We regretted letting them go, as they are excellent stone masons. Both have already found other employment. 80 rooms were stabilized. Work is being continued on the Stabilization Report.

Outside Talks: The Acting Custodian has been asked by the Clarkdale Volunteer Fire Department to talk to the group on "Forest Fire Suppression", and, incidentally, at their last meeting was "elected" a member. (They found out I attended the Chiricahua Fire School)

Publications Report: on hand, 170 Tuzigoot Information Sheets and 50 Two-fold leaflets.

WHITE SANDS

Box 231, Alamogordo, New Mexico

July 21, 47

MEMORANDUM for the Regional Director, Region Three.

JUNE TRAVEL, 1947	1947 TRAVEL YEAR TO DATE
Visitors 12,477 Cars 2,921	Visitors 68,454 Cars 16,938

July again surpasses all similar months since accurate travel count has been possible. 12,477 visitors in 2,921 cars have established this record. To substantiate last months story (and to justify night differential for two rangers) an accurate record has been made of night visitors. This record shows 5,191 visitors in 665 cars entering White Sands between 8:00 and 8:00 P.M. during the first 20 days of July. Several hundred have gone through even after eight but we have to draw the line somewhere.

The weather has been hot and dry but a break last week gave us 1.88 inches of rain. This is the first rain of any consequeamce for months and we at last have our road in good shape for the first time this summer. Until the rain it was so dry it was impossible to work the clay topped section.

One official trip was made to Albuquerque by Rangers Chittum and Schaffner to pick up the Caterpiller Diesel grader from WAA. We have now entered a NEW ERA by graduating from a 1934 Wehr to a second hand Army grader which, incidentally, has greatly relieved our minds on the road problem. I slipped in a few days annual leave and made a flying trip to the West Coast. A trip has been planned to Dog Canyon to check water flow but something has come up each time to prevent the trip. It is hoped we can get over this week since it is urgent we get a good record of the water flow. The local water situation is seemingly no better and drastic measures are being taken to conserve water. Several wells have been taken over by the Army to assure a supply for the local base. The nature of this water, however, has been such that lately we are forced to haul almost entirely from Alamogordo.

Little has been done on museum contacts. We feel almost lucky to contact the museum enough to keep the floors and glass clean. Of course information is given on request and as time will allow. Unfortunately the more people the more requests for information and the less time we can give to such requests.

We had hopes of getting an inventory well under way before this as well as repairs to our picnic area but as yet we have found time for neither. A long range plan for repairs will have to be inaugurated whereby we make most of our repairs on tables, etc, during the winter months when our travel drops some. Unless, like last winter, the travel does not drop as expected.

The increase in travel has thrown a heavy run on our rest rooms with heavy maintenance required there. During peak hours those rest rooms are proving entirely inadequate too. The current issue of Readers Digest carries a very interesting article on public rest rooms and the trouble encountered in any attempt to keep them in first class condition.

Our water samples are constantly being returned as "Unsatisfactory". The District Health Officer states we are doing all we can since the trouble seems to be in the source. Any way the visitors ask now why we don't weaken our Clorox with a little water.

No program other than contact service is planned for August which is always our heaviest month. We will do well to give good service to the estimated 42,000 who will visit us next month.

We reduced our stock of the old Southwestern National Monuments folder by sending 1,250 to Utah for use during the Centennial being held there. Dozens of requests are received daily for the White Sands folder which, of course, we cannot fill. A summary of publications on hand is;

in trip.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Walnut Canyon National Monument
Flagstaff, Arizona.

July 27, 1947

19

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities in Walnut Canyon National Monument for the period of July, 1947:

Weather. A few light showers and several cloudy days raised hopes that it would rain again someday, but there has not been enough precipitation to turn the grass green. Up the Walnut Canyon drainage, Mormon Lake is a dry barren flat and Lower Lake Mary is a mud hole.

Visitors. Of the 3,307 total, 2,209 made the ruins trip unattended while 115 were contacted on the trail. Fifty nine parties, with 415 people, used the picnic area.

Among the visitors to be noted were Dr. Gladys Reichard with a small party of anthropologists, Mr. and Mrs. Arthur Woodward, Dr. Jessie L. Nusbaum, Mr. and Mrs. Devereux Butcher, and Col. Harry Kelling, former C. O. of the Mt. Elden CCC Camp.

Inspections. Mr. A. Van V. Dunn stopped by on the 12th to discuss water problems. Engineers Curradi and Hendricks were here briefly on the 19th to form some idea of the roads and trails.

Personnel. Seasonal Ranger Vicklund entered on duty July 7.

Activities. With the largest visitor month on record since Walnut has been administered by the Park Service, most of our efforts were expended on routine duties. It seems that a lot of time is needed to keep the area clean. Some of the supplies needed to repair the water line were received, and two of the most urgently needed air-release valves were installed. About five man-days were spent repairing roofs and windows of storage sheds. Those on "contact" duty at the Observation Point had some time to straighten out property records and catalogue the publications in library.

Publications Report. None on hand for distribution.

NATIONAL PARK SERVICE

Wupatki NATIONAL MONUMENT

Flagstaff, Arizona

July 28, 47

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Wupatki National Monument for the month of July, 1947:

Visitors this month: 647 Travel Year to date: 2835

Weather: The highest temperatures usually prevail in June, but this year July has been an exceptionally warm month. Extreme drought conditions prevail throughout this area.

Roads: The small amount of precipitation has improved the road somewhat. Our improvement activity has been concentrated on making fills in the holes and the maintenance of waterways. The Sunset road has not been opened to the general public yet due to general lack of precipitation.

Visitor Travel: Visitor use shows an increase of 33% over that of last year and is made up primarily of people definitely on a vacation.

Activities of Outside Agencies: Dr. Sam Welles of the University of California spent one day in the area with a group of students. He examined the tracks in Emmett Lee's hogan, identifying them as those of Chirotherium and of a recently discovered small reptile which will be published upon in the near future. He obtained some specimens from the nearby quarry under permit. At Dr. Welles suggestion Emmett Lee's hogan and the wash have been named "Wupanosaurus" and "Wupanosaurus b'ko" respectively.

Ruin Stabilization: The ruins stabilization work performed this month consisted of finishing up the amphitheatre (wall capping) and correcting drainage of the floor area. The area surrounding the amphitheatre was trenched slightly to divert surface water. Drainage was improved in several rooms through installation of tile and by backfilling.

Activities of the SCNM Stabilization Laboratory: Collaborator Buchenberg and crew installed approximately fifty feet of soil cement trail near the ruin (Wupatki) as an experiment. A report on this project is forthcoming.

Water Supply: No measurement of the springs was recorded for June, but they are still decreasing. With the flow at the lowest ever recorded and no precipitation of any consequence, it will be interesting to see how low they get before the normal fall increase.

Wupatki Spring is now flowing 107 gallons per 24 hours compared to 226 gallons in May. Heiser is producing 1384 gallons per 24 hours compared to 1630 in May.

NPS Visitors

A. V. Dunn, Chief of Water Division, spent a few hours on July 12 looking over our water problems, particularly that concerning Heiser's Spring.

A. D. Corredi, Chief of Minor Roads and Sam Hendricks, Regional Maintenance Engineer spent the 20th looking over the Roads and Trails matters at both Wupatki and Sunset Crater.

John Harrington, ranger naturalist at Wayside Museum in Grand Canyon visited Wupatki for the first time.

Other Visitors:

Mr. and Mrs. Devereaux Butcher of the National Parks Association spent a portion of two days at Wupatki seeing the outstanding points of interest.

General: In addition to normal duties for this time of the year the interior of the Custodian's residence was painted and the exterior woodwork stained, fire hazards were corrected to the extent of materials available, cooperation extended the Forest Service on one fire, cut out letters for Saguaro and Big Bend completed and ready for shipment. Emergency repairs on our equipment and that of visitors seemed to require an undue amount of time.

Publications on Hand:

Wupatki Information Leaflets (new edition) 5500 copies
Glimpses of National Parks: 45 "

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

Talks: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

Attended Interpretive Stations: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.

INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS INQUIRE.

INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

Unattended Interpretive Devices: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITOR-USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE DEVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

Interpretive Activities Outside the Area: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

Column #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLACE TOTAL EACH COLUMN IN ALL BLOCKS.

Column #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

Interpretive Activities Outside of the Area ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

Totals: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. Total Attendance SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 5TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

Interpretive Activities Outside the Area: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

Column #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

Column #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

Interpretive Activities Outside of the Area ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

Totals: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. Total Attendance SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. ONE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

TITLE Custodian

REMARKS: (Please note below any factors influencing interpretive service, such as: "museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures, or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (library, contact station, exhibit rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispensing INFORMATION rather than interpretive service should not be considered as attended Interpretive Stations.

INFORMATION is factual matter relative to physical developments, physical facilities, geographic location, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, motel accommodations, bus and train schedules, and similar matters outside of the area regarding which visitors inquire.

INTERPRETATION is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visitor using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive devices, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or provided by Service personnel outside the area. Number of copies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Please total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should not be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive devices, this attendance may record a total considerably in excess of the visitors registered in the area during the same period. For comparison, the total number of visitors to the area during the month should be shown.

This Report Due: from all National Park Service areas providing any interpretive services. Send two copies to the Regional Director who will forward one to the Director. One copy should be retained by the Superintendent or Custodian of the area in which the report originates. Coordinating Superintendents also should be provided with a copy. One in the Regional Director's Office not later than the 6th of the month following that covered by the report.

REMARKS: (Please note below any factors influencing interpretive service, such as: "Museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field on the job hours, to historic structures, or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (Library, contact station, exhibit rooms, study collections, etc.), count being made by Service personnel in attendance. Contact stations or offices dispensing information rather than interpretive service should not be considered as attended Interpretive Stations.

Information is factual matter relative to physical developments, physical facilities, geographic location, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, hotel accommodations, bus and train schedules, and similar matters outside the area regarding which visitors inquire.

Interpretation is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visitor using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive services, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or provided by Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Place total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. Ter should not be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive services this attendance may record a total considerably in excess of the visitors registered in the area during the same period. For comparison, the total number of visitors to the area during the month should be shown.

This report due: from all National Park Service areas providing any interpretive services. Send two copies to the Regional Director who will forward one to the Director. One copy should be retained by the superintendent or custodian of the area in which the report originates. Coordinating superintendents also should be provided with a copy. Due in the Regional Director's Office not later than the 5th of the month following that covered by the report.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

Fill Out Only Those Blocks That Apply

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

Talks: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

Attended Interpretive Stations: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.

INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS INQUIRE.

INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FROM WITHIN THE AREA.

Unattended Interpretive Devices: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITOR USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE DEVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

Interpretive Activities Outside the Area: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

Column #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. FILL IN TOTAL EACH COLUMN IN ALL BLOCKS.

Column #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

Interpretive Activities Outside of the Area ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

Totals: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA AS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. Total Attendance SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures, or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (library, contact station, exhibit rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispensing INFORMATION rather than interpretive service should not be considered as attended Interpretive Stations.
INFORMATION is factual matter relative to physical developments, physical facilities, geographic locations, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, hotel accommodations, bus and train schedules, and similar matters outside of the area regarding which visitors enquire.
INTERPRETATION is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visitor using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive services, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or provided by Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Please total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should not be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive devices, this attendance may record a total considerably in excess of the visitors registered in the area during the same period. For comparison, the total number of visitors to the area during the month should be shown.

THIS REPORT DUE: from all National Park Service areas providing any interpretive services. Send two copies to the Regional Director who will forward one to the Director. One copy should be retained by the superintendent or custodian of the area in which the report originates. Coordinating superintendents also should be provided with a copy. Due in the Regional Director's Office not later than the 5th of the month following that covered by the report.

Co — Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Total each column in all blocks.

Co — Column #3 shows the average amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checks at occasional intervals.

In — Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should NOT be included in the totals in the lower right-hand corner of the form.

To — Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of (the various interpretive services offered. Since each visitor may use several different interpretive services this attendance may record a total considerably in excess of the visitors registered in the area during the same period. For comparison, the total number of visitors to the area during the month should be shown.

Th — This Report Due: From all National Park Service areas providing any interpretive services. Send one copy to the Regional Director who will forward one to the Director. One copy should be retained in the superintendent or custodian of the area in which the report originates. Coordinating superintendent also should be provided with a copy. Due in the Regional Director's Office not later than the [illegible] the month following that covered by the report.

NAME Roland Richert
Roland Richert,
TITLE Acting Custodian

Explain below any factors influencing interpretive service, such as: "Museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

CONDUCTED TRIPS: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

TALKS: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

ATTENDED INTERPRETIVE STATIONS: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.
INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATION, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS INQUIRE.
INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

UNATTENDED INTERPRETIVE DEVICES: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITOR USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE DEVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

INTERPRETIVE ACTIVITIES OUTSIDE THE AREA: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

COLUMN #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

COLUMN #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLACE TOTAL EACH COLUMN IN ALL BLOCKS.

COLUMN #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

INTERPRETIVE ACTIVITIES OUTSIDE OF THE AREA ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

TOTALS: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. TOTAL ATTENDANCE SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS OCCUPANCY IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICE SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. REGIONAL OFFICE SUPERINTENDENT ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

REMARKS: (Please note below any factors influencing interpretive service, such as: "museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures, or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (Library, contact station, exhibit rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispensing information rather than interpretive service should not be considered as Attended Interpretive Stations.

Information is factual matter relative to physical developments, physical facilities, geographic location, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, motel accommodations, bus and train schedules, and similar matters outside of the area regarding which visitors inquire.

Interpretation is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visitor using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive services, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed on program by Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Please total each column in all blocks.

Column #3 shows the average amount of time on each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should not be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive activities this attendance may record a total considerably in excess of the visitors registered in the area during the same period. For comparison, the total number of visitors to the area during the month should be shown.

This Report Due: From all National Park Service areas providing any interpretive services. Send the original to the Regional Director who will forward one to the Director. One copy should be retained by the superintendent or custodian of the area in which the report originates. Coordinating superintendents also should be provided with a copy. Due in the Regional Director's Office not later than the 5th of the month following that covered by the report.

Region Three Office—Mr. King			

September 15, 1947.

MEMORANDUM for the Regional Director, Region Three.

Following is the narrative report for Naturalists of the Southwestern National Monuments for the month of August, 1947.

Staff Activities - General

Naturalist Dale S. King was at the office during the month except for several days of annual leave and a field trip to Chaco Canyon on August 27-28.

Archeologist Charlie R. Steen spent most of the month in the office. Two field trips were made; one to southern Arizona monuments, the second to Chaco Canyon. The first trip was made in company with Photographer George Grant and was to inspect recent stabilization at Tumacacori National Monument and to make preliminary plans for work this winter at Casa Grande. Tonto National Monument was also visited during the trip.

Naturalist Maurice Sullivan returned to duty on August 25. He was absent on annual leave the previous part of the month packing his personal effects in Maine and transporting his family to Santa Fe.

Administration - Interpretation

An unusual number of letters were written answering requests for information on Southwestern National Monument areas, as well as furnishing photographs to authors for articles to be published, or to teachers for school use.

Several monuments have reported need for signs for nature trails. There exists no facility at the present time for preparing labels suitable for outdoor use. It is hoped that most of the problems can be solved by the use of numbered stakes, but a setup must be instituted when funds are available for the printing of metal or durable labels.

Sullivan worked the last week of the month on a manuscript for a self guiding trail leaflet for Montezuma Well, edited a press release for the same area, and made distribution of library copies of the two following papers: "Habits, Foods, and Economic Status of the Band-Tailed Pigeon", and "Pocket Gophers of Arizona". Considerable routine matters had accumulated for attention during his absence.

Public Relations and Extension Services

An article on Tupatki National Monument by Johns Barrington, temporary Ranger Archeologist at Grand Canyon, was read and approved. A release for the press giving results of depth measurements on Montezuma Well was corrected. The release was prepared by the local staff at Montezuma Castle.

Research and Observations

The staff members of the Museum of Northern Arizona made careful measurements from a boat on the depth of Montezuma Well. The bottom of the Well was found to be a shallow saucer shape, with a maximum depth of about 55 feet near the center.

A rather complete set of bibliography cards was received from the Custodian, Casa Grande. These cards represent a great deal of work on the part of Archeologist Schumacher there, and he is to be complimented.

On a field trip through southern New Mexico Archeologist Steen and Photographer George Grant visited the historical old town of Shakespeare. Photographer Grant made some excellent exterior pictures of the two or three historic buildings, which are in private ownership, and are receiving good care. One of the most interesting features there is a fine example of puddled caliche wall in the Stratford Hotel.

Region Three Office Loan Library

Accessions for the month were 16 books, 29 pamphlets, and 40 periodicals, making a total of 85.

Naturalist Sullivan carried on correspondence to obtain additional biological numbers for the library.

The editor of Arizona Highway's Magazine was approached to continue the free subscriptions of the magazine to the various national monuments throughout the Southwest. He gave affirmative answer.

Southwestern Monuments Association

Page proof and proff for the three-color cover were received and returned to the printer during the month for the forthcoming publication "Poisonous Dwellers of the Desert".

Considerable time was spent, partially on personal time, in editing the manuscript for "Excavations at Montezuma Castle" by Earl Jackson, and Callie Pierce Brewer.

It was decided not to continue with attempts to publish a manuscript on White Sands. This manuscript was prepared by a former employee who plans to publish it on a personal basis.

During the month of August, Treasurer Allen C. Vedder worked 17 days. Much of his time was spent on the usual routine of writing letters, purchase orders, taking care of the daily mail, making deposits, bank reconciliation, and the usual disbursements, consisting of 36 items. The remaining time was spent on figuring inventory for the fiscal year-end June 30. This month he mailed 118 covers, including 29 letter, 18 purchase orders. Two deposits were made; one pertaining 12 items, one 121 items. Additional time was consumed by such activities as making stencils, counting and stamping business reply cards, and filing the latter which are increasing in number.

Visitors

Custodian Simmonies and Ranger Chatott of Bandelier, Doctor John Mc Gregor of the Illinois State Museum, and Doctor D. F. Denny, geologist from the University of Michigan.

Ruins Stabilization

Much needed stabilization activities on Tyuonyi Ruin at Bandelier National Monument were started.

Further correspondence was had with a corporation making supersonic equipment in an attempt to obtain a device by which bats can be discouraged from roosting in the ruins of the Southwest.

A heart-breaking catastrophe occurred at Chaco Canyon National Monument, some time during the night of August 22-23. Rains earlier in the week had soaked into the ground and a heavy rain late in the afternoon of the 22nd formed a flash flood that flowed down the short draw east of Chetro Kettle. As nearly as can be determined the flood dammed the arroyo at a bend near the old excavation dump which extends from the northeast corner of the ruin.

A second flash flood, from another rain later in the night, formed a shallow lake between the ruin and the cliff. Water drained into the north tiers of rooms, which were excavated below ground level. The water soaked the adobe mortar of the walls and 40 walls collapsed. Among these was about forty feet of the fine north wall of the ruin. Dangerous cracks have formed in walls of rooms and kivas in the high central portion of the ruins.

Archeologist Gordon Vivian cleared fallen wall material from two rooms the following week and found the rooms filled, for an unknown depth, with soupy mud. This will take a long time to dry sufficiently so that workmen will not be in danger when working in the rooms. We must expect to lose more walls in the ruin.

A report of the damage has been sent to the Director with a request for emergency funds.

Technical Aid to Administrators

Rough drafts of justifications were prepared for a P-1 Archeologist at Bandelier and a P-1 Naturalist at White Sands National Monument for the 1949 estimates.

Explanation of service policies concerning taking of tips by National Park Service personnel was prepared at the request of a field man.

Various western universities were circularized to obtain names of archeologists who might be interested in P-1 positions in the National Park Service.

Projects Planned for Next Month

The staff will be in the office most of the month, except that Steen will spend possibly half of his time traveling on stabilization activities.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Arches NATIONAL MONUMENT

Moab, Utah

August 26, 19 47

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of August, 1947:

GENERAL: Travel showed a decided increase during the month, with most of the visitors stating that the articles and pictures in the National Geographic was the reason for their visit. Our contacts jumped from 10 or 15 people a day to 50 and 75 people a day. Each night several parties have used the headquarters area to pitch their camps.

The custodian was on annual leave for 2½ days during the month.

WEATHER: Storms occured intermittently during the month and kept the weather unusually cool for an August in the Moab vicinity. On August 21st a cloudburst struck Moab and the surrounding country, when, according to the official gauge in Moab, .98 inches of rain fell in 40 minutes. From the amount of water which flowed through the headquarters area of the monument I would guess that 1½ inches fell at ARCHVILLE.

SPECIAL ACTIVITIES: Two trips were made to Blanding during the month. One trip to employ a laborer for trail work at Natural Bridges on August 1st and another one on August 9th to deliver a new tire for the Natural Bridges pickup.

Ranger Walker made an official trip to Walnut Canyon and Casa Grande National Monuments from August 7th to 11th to pick up surplus equipment assigned to Arches and Natural Bridges. He also picked up equipment assigned to El Morro, Canyon De Chelly, Chaco Canyon and Aztec Ruins and delivered same at Gallup and Aztec Ruins for the various areas.

COOPERATING GOVERNMENTAL AGENCIES: On August 19th Grand County Commissioner Taylor advised me that notification had been received from Commissioner Treacy of the Utah State Department of Publicity and Industrial Development that funds had been made available for the Arches road improvement. On August 21st Landscape Architects Carter and Allaman arrived to look over the proposed work. The contemplated changes and new construction were over on August 22nd, 23rd and 24th. Grand County has not, as yet, re

cived the contract to be entered into with the department, but Mr. Taylor stated that funds in the amount of $16,000 were assured with more available, possibly to $25,000, if needed to complete the contemplated work. He also stated that work would probably start, with Grand County equipment and personnel, around September 15th, if Service approval is granted.

TRAVEL: Travel for the month hit a new high for Arches with a total of 307 visitors to the area in 289 cars. This figure is practically four times that for the same month last year and approximately 300 more visitors than we had during July, 1947. This brings our total for the travel year to 3623 people. Our travel represented 36 states, District of Columbia, England and Venezuela. The out of state travel exceeded the local travel by about 76%.

The Utah Wonderland Stages visited the area on two occasions with a total of 7 passengers and a group of boy's from Annel Ball's camp were in on July 26th.

INTERPRETIVE CONTACTS: Again this month our visitor contacts showed a large increase. A total of 161 cars containing 461 people were contacted at headquarters and 87 parties of 267 people were contacted in the Windows section. Four evening trips were taken with a total of 40 people and 7 guided hikes were taken into the Devil's Garden, Delicate Arch and Windows sections with a total of 49 people. For the last two weeks of the month an average of 5 parties a day have taken the hike into the Courthouse Towers section unattended. Nineteen requests for information were received and answered.

NATIONAL PARK SERVICE VISITORS: Regional Director Tillotson and wife visited the area on August 9th. Mr. Tillotson spent about two hours looking over the headquarters area and discussing various problems.

Landscape Architects Carter and Allaman arrived on August 21st for the purpose of looking over proposed road improvements. They left August 25th for Santa Fe. While here we let them get the feel of a pick and shovel on road repairs in the Windows section in order to bring out three cars of visitors stranded in that section after our cloudburst of August 21st.

PUBLICITY: Mr. Ladd Goodman of Portland, Oregon, photographer for "View-master", who put out three dimensional color slides and hand viewers, visited the area from August 18th to 20th. He took shots in Courthouse Towers, The Windows, Devil's Garden and Delicate Arch and stated that this series would probably be out in about 90 days.

Mr. Hubert A. Lowman of South Gate, California, whose black and white pictures of Arches have been used by various publications, was in the area the latter part of the month making a color series.

Mr. Frank Wise of Salt Lake City, formerly photographer for the L. D. S. Church, now connected with the Deseret Book Co., spent several days covering the area for pictures to be used for publicity purposes.

ROADS: Storms during most of the month made necessary continuous maintenance on the Windows road but our storm of August 21st practically obliterated several portions of this road between Courthouse Wash and Willow Flat. The storm struck at 8:15 p. m. and lasted approximately 40 minutes. During that time the retaining wall behind the quarters was washed out and 8 or 9 inches of water flowed around the residences. The road from the office to the quarters was impassable and a sheet of water flowed across the whole area. Ranger Walker left the Windows parking area at 4:30 p. m. and advised the five cars of visitors still there to leave the area immediately if it started to rain. One car got out at about 5:25 p. m. and advised us that the other four cars were evidently stranded. We survived the state trunk and started out at 7:30 p. m. to investigate but were unable to negotiate Courthouse Wash, which was running about three feet of water. Returned to headquarters until 10:30 p. m. and tried again and were able to cross the wash which at that time had only about one foot of water. We found one car about 1/2 mile from Courthouse wash. They were campers and were all OK and asleep. Continued on to a wash about one mile beyond Willow Spring where a 36" culvert had been washed out and was impassable. We walked 12 miles to Willow Flat and found the other three cars high but dry. Two of the parties had food and blankets, which they shared with the people in the other car. Everyone was having a good time and did not want to return with us. We returned to headquarters at 3 a. m. The next morning we routed our Landscape Architects Carter and Alleman, who had arrived at 10:30 p. m. the night of the 21st, and with Ranger Walker and myself we repaired the road to the stranded cars and had them out of the area by 2 p. m. The road was still badly washed and practically impassable but still the visitors came, disregarding the road closed sign at the junction. On the 22nd the State sent a dump truck and two men who made a dip at the side of the washed out culvert and repaired several washouts on the roadway. That day 8 cars made the trip to the Windows. At this writing the State has a power grader working on the road and it should be in fair condition again by the 28th. This storm also put about 8" of sand in the pump and power plant room and water ran on through the balance of the warehouse.

A trip was made over the Salt Valley road on August 24th and it was found impossible to travel on the short route via Valley City due to washouts. The trip was made through Thompsons and all portions of the road were found to be badly washed. The sand down the Salt Gorge to the Turnbow cabin was in excellent shape from this storm and no trouble was experienced on this portion of the road. Hope to be able to get the County to repair this road within the next couple of weeks.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
AZTEC RUINS NATIONAL MONUMENT
AZTEC, NEW MEXICO

24 August 1947

MEMORANDUM for the Regional Director,
Region Three, National Park Service.

There follows the report of activities for Aztec Ruins during July 1947.

WEATHER. Extremes for the month, beautiful clear hot days with the Monument crowded with visitors, and chilly, windy, rainy days of cloudburst proportions when few visitors braved the weather. More precipitation has been recorded this month with 3.29 inches than any previous month during 1947. On the 22nd 1.40 inches rain fell in a tremendous cloudburst that swept out the small local bridges and one main bridge on the Aztec-Farmington highway. All thru traffic has been routed south of Aztec via Bloomfield to Farmington and Gallup.(The drainage ditch still functions dispite the deluge and great amount of water that ran over and into it).

Maintenance. Because of the large amounts of rainfall we have had considerable work to complete in the ruins structures. Some activity has been placed in keeping the drainage ditch open during flooding from surface rain water. Blocking of the sewage line from the public comfort stations has forced the closing of these for a week during which time we have dug a new cesspool.

VISITORS. Dr. Reed, Mr. Carlson and Mr. Cook from Region Three Office visited during the month. We enjoyed a visit from the San Cristobal Valley School, with teachers and students. Numerous Navajo, Ute and Pueblo Indian Groups have also visited the Ruins this month.

Interpretive Services. There were 2142 visitors conducted in 322 trips thru the ruins and 3076 visitors in 410 parties shown the museum.

INCREASE IN TRAVEL. An increase of 20% in travel this August over August 1946 is reflected by our total travel of 5076 visitors for this month. These people arrived 918 cars from 41 states, Washington, D.C. and five foreign countries, Canada, Argentina, Brazil, Denmark and Norway.

Custodian.

AZTEC

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
BANDELIER NATIONAL MONUMENT
SANTA FE, NEW MEXICO

August 28, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of the activities at Bandelier National Monument for the month of August, 1947.

Weather

Showers and thunderstorms beginning on August 8 and continuing intermittently through the rest of the month brought the end of our extremely dry summer. The Rito de los Frijoles and other streams have resumed a normal or somewhat-above-normal flow, the falls again have water to "fall", and vegetation has revived. The fire weather danger reached zero on one day.

Administration

Fred W. Zimmerlee, formerly chief ranger at Mammoth Cave, entered on duty as custodian on August 3. He spent August 4, 11 and 22 in the Region Three Office.

August 7 was spent at Los Alamos discussing special use permits with Mr. Dilmio of the Atomic Energy Commission. We are attempting to eliminate all permits except those of permanent need and consolidate the remainder on a longer-term basis than the present yearly basis.

The custodian attended the memorial services at the Museum of New Mexico held at Santa Fe on August 24 in honor of Dr. Hewitt. Dr. Hewitt did some of the earliest excavating of the Bandelier ruins.

Maintenance

Bandelier's electric power system continues to require a great deal of attention. The Diesel plant is still at Los Alamos undergoing repair and Los Alamos has furnished us with a replacement plant to carry the load in the meantime. The repair of short circuits in

the Lodge light system required some time of the maintenance-man. The replacement of motors in the Lodge refrigerators was necessary during August.

Difficulty with the monument telephone system was experienced as a result of a severe bolt of lightning. The replacement of two transmitters and the installation of one ringing coil solved the difficulty. The procurement of two surplus phones from Los Alamos gives us replacement parts.

The advent of rainy season has made it possible to more effectively blade the approach road with the tricycle grader, although the rains complicated the maintenance problem by heavily washing dips and ditches in many places. Many of the headwalls were badly washed and will be repaired or rebuilt. The culvert in the Canyon del Buey was relocated after being heavily washed. However, the roadbed itself is in excellent condition in most places.

Utilities

A conference of Forest Service officials, Mountain States Telephone Company executives, and Assistant Regional Director Davis and Custodian Binnewies of the National Park Service was held in Albuquerque on August 29 to discuss the possibility of a direct telephone line from Bandelier to Santa Fe. The prospects of the construction of the line to the Bandelier headquarters by Mountain States are favorable and a new line to Santa Fe via the Otowi Section seems to be assured. This will replace the present unsatisfactory Forest Service line to Espanola and with the construction of a short line from the San Miguel Lookout to hook on to the monument line the 40 to 50 miles of line to Canada can be eliminated.

Additional confirmation that the Atomic Energy Commission will refuse to consider any hookup by Bandelier to their electric power line was received in the form of a letter from the Chief of Operations. Security reasons were given as the basis of the refusal.

Maintenance-man Valencia made a flying trip to the Grand Canyon August 23 to 26 to pick up two 7.5 KW three-phase-four-wire light plants to supplement the Diesel light plants during periods of light load and during the winter.

Stabilization

The stabilization program began on August 20 in Tyuonyi on the north side of the passageway. The project outline includes the clean-up of rooms to floor level or foundation bottom (if needed), stabilization of walls with soil cement, removal of loosened mortar and repacking of walls, resetting stones too loose to pack, and resetting fallen stones. No plastering is being attempted. To date three rooms

have been completed and three more started.

Travel

Visitation for the month of August fell below that of July of this year contrary to expectations, but we barely managed to eke out an increase of 15 visitors over the travel of August, 1946. To date the travel for the travel year is the highest for this time of year in Bandelier history.

The percentage of new visitors compared to re-entries was high at 80%. The campground use by overnight campers was the highest since 1940.

Visitors of Note

Bandelier was honored during August with the visit of several noted archaeologists including Dr. A. V. Kidder, Earl H. Morris, Spencer L. Rogers, and Dr. Jesse Nusbaum. Mr. Dan Kelly of the Board of Directors of the Laboratory of Anthropology and the Museum of New Mexico visited us on the 17th.

Foreign visitors included those from Canada, Belgium, Norway, and India.

Interpretive Services

Interpretive contacts showed an increase over July despite the slight drop in travels. The number of people through the ruins showed a 20% increase over last August with the total number of visitors about the same.

The evening lecture program proved worthy of the extra time spent as it attracted 914 people during the month and a total of twelve different programs were used.

Fish and Wildlife

The drying-up of Frijoles Creek due to the extremely dry July weather made it necessary on August 1 to move the fish stranded in lower pools to the upper portion of the stream in the vicinity of Ceremonial Cave. The stream is again flowing normally to solve this particular problem.

Many deer were seen in and near the Headquarters area during the month. Frequently seen were a doe with two fawns and three two-year-old bucks. Visitors were cautioned about feeding the deer and the posters to this effect have been kept posted in all public rooms.

Forest Protection

The tent caterpillars have been increasing on the cottonwoods in

the campground in spite of the spray job in July. Additional materials for re-spraying are now being awaited.

The "high fire danger" posters have been removed from the roads and trails following the frequent heavy rains during the past two weeks.

The first fire of the season was caused by lightning on August 8 and involved 2.1 acres of sparse timber and grass on the south side of Lummis Canyon across from Corral Hill. A second one tree fire was discovered in the same locality by the suppression crew on the first fire on the same day. Suppression costs of the two fires were $61.31 and $7.87 respectively.

A third lightning-caused fire was discovered on August 12 on an inaccessible point on the north rim of Frijoles Canyon just a short distance above the Ceremonial Cave. The cost of this fire, located just outside the monument boundary, was $29.12. This fire burned through 1.69 inches of rain which kept it from spreading but did not put it out.

Protection

Routine patrols made during the month were two to the Upper Crossing and four to the Otowi Section. The Upper Crossing area is receiving heavy use for camping and picnicking, but fishing is not as heavy as in July. The patrols revealed no evidence of vandalism, although four people were found on August 24 holding target practice just within the south boundary of the Otowi Section. Inquiry revealed that they did not realize that they were on the monument and brought to our attention that Los Alamos people can drive onto the monument area without seeing a National Monument sign. Additional boundary signs in that area will be placed to remedy this deficiency.

Cattle have been discovered grazing on both sections of the monument during the month and have been removed. A complete patrol of the boundary fence was started to discover where the livestock gained admittance.

Personnel

Fire Control Aide James H. Brooks was terminated August 3, Fire Control Aides Orem and Toribio were terminated August 15, and Fire Control Aide Ollie Wendland will be terminated as lookout on August 31. Laborers Tafoya and Roybal were released August 1. Sam Orem and Cres Toribio were rehired for work on the stabilization project. Augustine Pino was terminated as laborer leadman on rehabilitation work and reappointed as laborer on roads and trails.

Concessions

The Frijoles Canyon Lodge reported generally good business with the exception of a few days in the middle of the month. There were 787 lodgings

and 3375 meals were served.

Difficulty was experienced with getting sufficient help, particularly dish-washers and maids, so that it was necessary for others to help out as needed.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Canyon de Chelly NATIONAL MONUMENT
Chinle, Arizona

August 26, 1947

MEMORANDUM for the regional Director, Region three

The following is a report of activities at Canyon de Chelly National Monument during the month of August, 1947.

Weather Conditions

The long hot and dry spell continued into early August when it was finally broken by showers in the higher areas and finally around headquarters. We have had nine good showers totaling 2.67 inches of moisture. The largest one came during Ceremonial time and put the roads in almost impassable condition. This greatly affected our months travel as this is generally our heaviest period. Another good rain came on August 21 and 22 which affected the visitors who generally visit the area at Snake Dance time. These were good rains and they have really benefited the surrounding area. Lakes and tanks are full that have been dry for years at this time of the season. Our Maximum temperature was 97 on three successive days and the minimum 66 degrees.

Administration

District Supervisor Fred Maxwell was over and we went overplans to more strictly enforce the Antiquities act on the reservation and made plans for the posting of warning signs in strategic areas. I painted two permanent signs for the petrified forest area and mounted what Cloth signs the Navajo Service had (3) which were to be placed in the trading posts at Naalini and Black mountain. The Navajo service has furnished me some lumber and I hope to have signs at all of the valuable sites not included in the monument.

One and a half days of annual leave was taken by the Custodian.

Maintenance

The road was dragged to White house overlook once by the Custodian and once by Ranger Benson. Other than regular maintenance nothing much was accomplished.

Travel

After the biggest travel on record for July we had hoped also to break our record for August but roads were in such bad conditions and were not improved by the rains that visitors hesitated tackling them. The roads north to Monument Valley and Kayenta were also practically impassable and much travel that would ordinarily come this way went

Travel Cont'd.

around by Tuba City.

A strange coincidence is that the travel figure this year is exactly the same as last with 268 visitors. Our travel year to date is 1919 visitors as compared with 1534 for the same period last year. This Fiscal year to date shows 789 visitors while last year we had 606.

Interpretive Services

A total of 108 hours were spent in conducted tours to White House and Spider rock Areas. Thirteen hours were spent in orientation talks and headquarters contacts.

Research and Education

When not busy with guide and contact work Temporary Ranger R.K. Thomas has been busy gathering information and working on "An aesthetic approach to Basket Maker Photographs". It is with real regret that I will have to separate him before it is completed. However he will continue with it after he leaves and should have it ready for submission to your office for approval before Winter.

Protection Fire

Three forest fires occurred during the month. One Class B in the upper Monument Canyon area, and two in the Black Rock area. Rains coming during August have lessened the fire danger over the whole Area.

Visits by N.P.S. Officials

Forester William C. James visited the area on August 11-12 to discuss and look over the Cottonwood leaf Beetle infestation and go over forest fire problems.

Assistant Regional Director Davis, and Sam Hendricks, Highway Engineer were in August 18 - 19 looking over our roads and discussing Administrative affairs.

Visitors of Note

Mr. and Mrs. D'Eaut of the French United Nations Delegation. John Henry Cocu, Noted lecturer and friend of the Service. Martha Graham, dancer. Dr. and Mrs. Thomas Noble. Vice Admiral Hingman (Ret.) Elizabeth and Stuart Chevalier, novelists ("Drivin Woman") Fred Lucking noted artist and illustrator, Mr. Galley, Artist, David de Harport, Anthropologist from Harvard.

Meredith M. Guillet
Custodian

August 25, 1947.

Memorandum for the Regional Director,
Region Three, National Park Service,
Santa Fe New Mexico,

There follows a report of the activities in and around Capulin Mountain National Monument for the Month of August 1947.

Visitor are estimated to be nine thousand for the month, bringing total visitors travel year to date twenty four thousand nine hundred sixty and Fiscal year thirty nine thousand nine hundred sixty,

Free publications consisting of the folders describing this Monument on hand at this date five hundred,

Moderate rains almost every days for the past week has made life rather muddy but is is just what h the Doctor ordered and we like it, possibly about one and one half inches altogather for the month This moisture has permitted the Custodian to keep the Monument Road in splendid condition throughout the Khath.

Wild life in the Monument has been doing nicely The Squirrels will have plenty of acrons but no pinon nuts for storage this winter, the Deer have a well balanced forage and plenty of it,

A splendid crop of wild cherries this season on the Monument and they are just now ripe this is where this Monument received its name " Capulin" is wild cherries in Spanish,

This season the Custodian here has demonstrated that Strawberries can and is being raised by the bushel in Capulin, Truly this is a strawberry country when irrigated,

Very Respectfully,

Homer J. Farr,
Custodian,

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
CASA GRANDE NATIONAL MONUMENT
COOLIDGE, ARIZONA

August 25, 1947.

MEMORANDUM for the Regional Director,
Region Three.

There follows the narrative report for Casa Grande National Monument for August, 1947.

GENERAL: "And the Rains Came." That the rains finally came is the great news of the month. After no rain to speak of since December, it has rained every week this month. Yet the water pumping situation is still critical. A well on the property west of the Monument was lowered another 150 feet. The water table at that well on July 27 was at 92 feet. The Phoenix newspaper reported that in the Salt River Valley the water table was the lowest since 1920. Many wells have gone dry.

WEATHER: This month has been cooler than July. There were two days when the maximum temperature reached 115 degrees, but since Aug. 7, the temperature has read in the 90's and 100's. The nights have been cool, with the minimums reading in the high 60's and 70's. It rained ten times during the month, mostly between Aug. 4 and 9. The total rain fall for the month is 2.02 inches.

ADMINISTRATION: Mr. Schaenn of the Tucson Roofing and Supply Company brought his foreman in on Aug. 5 to go over the roofing job in the Utility Area. He said he would be back in a few days, but he has not made an appearance as yet. He took a Rex No. 31 side arm hot water heater with him for Tumacacori.

On Aug. 14 and 15 the F.A.A. picked up all the declared property consisting of: 1 crane shut-off valve, 3"; 4 syphon valves, 7 floor furnaces, and 1 addressograph. On Aug. 16, Georges Tire Shop who was the highest bidder, picked up the scrap material from the surveys. The turret trainers were picked up at Trumbull after the dump beds had been installed.

VISITORS: Aug. 1947- 1,717; Aug. 1946- 1,297. Fiscal year to date: 1947- 32,736; 1946- 34,423. This is an increase over 1946 as is to be expected with the increase in travel throughout the United States this year. This is also an increase over July 1947 due to the cooler weather and more people traveling through Southern Arizona.

INTERPRETIVE SERVICES: Of the 1,717 visitors to the area, 1,009 made the Ruins trip in 136 parties averaging 47 minutes per trip. 991 made the Museum trip in 129 parties staying on the average of 24.7 minutes. 708 people came to the area but found it too hot and did not go out to the Ruins. 9 Members of the Armed Forces are included in the above trip totals.

MAINTENANCE: The kitchen in Quarters No. 2-4 was painted, and the kitchen, dinette, service porch and bathroom of Quarters No. 4-4 was painted. The new electric hot water heater was installed in Quarters No. 4-4.

Archeologist Schumacher has checked and brought up to date the Office files pertaining to the Naturalist and Interpretive end. The Casa Grande photograph file has been checked and also brought up to date.

TRIPS TAKEN: On July 31, Mechanic Stonebocker, Archeologist Schumacher and Maintenanceman Barnett went up to Phoenix to pick up the dump trucks at Brashoff, but due to strikes, the trucks were not ready. Maintenanceman Barnett brought the trucks back herem Aug. 14 and 15, making two trips to Phoenix, one on his own time.

LEAVES TAKEN: Mechanic Stonebocker took one day optical leave on July 25 and went on Annual Leave on Aug. 1. Ranger Schutt also went on Annual leave on Aug. 1. Archeologist Schumacher took one day sick leave on Aug. 6.

N.P.S. VISITORS AND VISITORS OF NOTE: On July 27, Dr. Lloyd of the Chicago Academy of Science made a visit to the ruins. Custodian Eggmeyer came in here on July 30 to pick up a motor pump and have his water tanks repaired. On Aug. 8, 28 Boy Scouts, Santa Lucia Area Council, from San Luis Obispo, California, visited the ruins on their 3,300 mile trip in a bus. Aug. 11, Ranger Fulton from Saguaro brought in the Chevrolet panel truck and the Ford dump truck, and took back with him the turret trailer I-31788-N.P.S. 33-4457. On Aug. 12, Custodian Superintendent dropped in on his way to White Sands and picked up a Ford Motor. Mr. Rockfellow, one of the men who carved his Delta Psi in the Ruins, visited the area with his party on Aug. 15. On Aug. 17, Ranger Eigenbach and the Maintenanceman of Organ Pipe Cactus brought in the Soil and Moisture pickup and horse trailer for repairs. He left for Grand Canyon with the stake turret trailer to pick up the light plants. He returned here, to pick up the load of lime and his pickup truck, on Aug. 21. He left a light plant, shovels, and materials for Wupatki at this area. Two photographers from Western Ways of Tucson were in on Aug. 20, taking pictures, and Charlie Steen and Photographer Grant were here on Aug. 21 taking shots of the ruins. On Aug. 21, Custodian Sharp and Ranger Bull were here to pick up the light plant for Tonto.

REMARK NOTES: The Barrell of Compass Cactus started blooming the end of this month and is in all its glory at present. The Jumping of Chain Fruit Cholla is still having a few individual blossoms. Two great Blue Herons were seen around the monument and canal on Aug. 20. The rains have allowed the Ocotillo to leaf out again, and a few of the Creosote Bushes are in bloom. The bats which were absent from the ruins during most of July, have reentered the ruins the latter part of this month. It seems that part of them had gone elsewhere for a time, but have returned since the rains came. Maybe the great drouth we had in the early part of the summer caused them to have to move elsewhere to seek their food. Yet so far there are defenitly fewer bats in the ruins this year than there were in previous years.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

~~Chaco Canyon~~ NATIONAL MONUMENT

~~Bloomfield, New Mexico~~

August 28, 19 47

MEMORANDUM for the Regional Director, Region Three,
National Park Service.

There follows the report of activities in Chaco Canyon National Monument for the month of August, 1947.

The number of visitors this month was considerably reduced because of many, and several hard, rains (see later). There were 121 less than a year ago this month, and 283 less than last month. A total of 103 hardy souls came in 35 automobiles from the states of:- California - 5 cars, 14 people; Colorado - 8 cars, 29 people; Georgia - 1 car, 2 persons; Louisiana - 1 car; 2 persons; Massachusetts - 1 car, 4 people; Michigan - 1 car, 4 visitors; Missouri - 1 car, 2 visitors; New Mexico - 9 cars, 25 visitors; Oklahoma - 3 cars, 8 visitors; Texas - 3 cars, 12 visitors; Utah - 1 car, 2 visitors and Wyoming 1 car, 4 visitors.

All of these visitors took a trip through the ruins. There were 102 full admission tickets sold, 3 children paid tax only, and one complimentary ticket was issued. No children less than 12 years of age went through the ruins this month - a record of some sort. 93 persons listened to the museum talk. Total time, Sugar - 18 hours and 30 minutes, Custodian 27 hours and 30 minutes.

The warmest day of the month was 99 degrees on the 29th of July, and the coolest was 51 degrees Fahrenheit on the 20th and 23rd of August. It rained on the 4th, 5th, 8th, 10th, 12th, 16th, 22nd and 23rd of August, and formed a total precipitation of 3.23 inches!!

The men on the fence crew stopped work early in the month. They have not been able to go back to work because of the rain and the water in the arroyo. The latter has run almost constantly. Several times the water was up six and seven feet deep.

The cattle guard, which the fence crew poured in concrete, is an example

of the many factors, over which we have no control, which have delayed the fencing project. In order to save time, and especially money, the pits were dug out so that the concrete could be poured without the use of forms — that night, it flooded ... all the walls fell in. It was necessary to dig it all out, and build forms for the conc ete!

Another example of hard work going to waste was in an arroyo where a culvert washed out. Another was put in (about three times as large as the first!) with rocks on the upstream side, wire mesh deep in the ground to hold the rocks in place and the soil thoroughly packed all around and above the culvert. One and one half hour later, the 30 foot culvert was a quarter of a mile down stream, and a gulch 14 feet wide and 4 feet deep was washed in the road. This was a different flood from the one which covered the cattle guard (see more later in Ruins Stabilization report).

Bates Wilson was up from El Morro National Monument. He brought a stove, and took back the old CCC pump house and some tarps. Ranger Walker from Aztec Ruins National Monument brought some surplus property on the 14th of the month. Other National Park Service visitors were:- Jesse Nusbaum, Superintendent Rose [illegible] Watson from Mesa Verde National Park, Erik Reed, Dale King, Charlie [illegible] Mrs. Townsend from Aztec Ruins, Engineer Dahl, Jesse Spuhler and Sven [illegible] former seasonal rangers at Bandelier National Monument and others.

The successful Chaco Conference was held this month. The Custodian attended some of the meetings, saw many old friends, made new ones and learned a great deal.

Radio communication between El Morro and Chaco Canyon National Monuments has been regular and satisfactory.

The Trader reports business as usual this month. During the summer, while he had an assistant, he put some roof on the cabins, and hauled the winter's wood. Because of the latter, he will not have to be away from the store so much this winter.

Projects for the ensuing months:- finish the cattle guard when the welder is able to come out with his trailer over the approach roads, finish the fence job when the weather allows, repair the roads, start the seeding project, and begin to button up the place for the cold weather.

At the end of the month, there were on hand:-

Free two-fold leaflets on Chaco Canyon, approximately.....8600
National Park Location Map, number 6 ....."..... 375

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Cha co Canyon NATIONAL MONUMENT

Bloomfield, New Mexico

Aug. 28 19 47

MEMORANDUM for the Custodian,
Chaco Canyon National Monument.

There follows the report of Mobile Unit activities in your area for the month of August, 1947.

The heavy rains of the past two weeks slowed the work generally. On the night of the 22nd flood waters carrying large amounts of debris plugged the small arroyo to the east of Chettro Kettle. This water then took a new course behind the site; formed a large reservoir here and broke into the series of rooms along the north wall which had been excavated well below ground level. Heavy damage was suffered throughout this series of 22 rooms and walls to the south were cracked by the settling of unexcavated fill beneath them.

The full month has been spent at Chetro Ketl, completing repairs to Kiva G, the rooms on the east side of the central house block, and starting work on the southwest section.

The bench of Kiva G was set in reinforced masonry cement capping last month. Work continued this month to complete similar capping over the upper walls. This is a much remodled kiva, one partially within the other, and over the eastern and southern parts two separate kiva walls were capped.

Also in this same area the walls of room 22 and 23W were carried up in cement repairs and tied into G with reinforcing. Two large holes in 22E were filled, a doorway partially rebuilt and the walls capped. Extensive repairs were made to 38E where a part of the base was rebuilt, the wall surface was patched and the top was carried up high enough to turn back surface water from adjoining fill. Work had started on 38 W, 36-37 S when they were damaged by the flood.

During the month all exposed timbers in the site were treated with the permatox-A preservative.

Work was also completed in seven rooms in the southwest section of the excavated area. The walls here, fronting on the

courtyard are not as high as those to the north and less patching was necessary. Capping was completed on rooms 81, 85, 88 and the south half of Kiva N also called the west tower kiva. More extensive repairs -- the necessary raising of wall tops to prevent washing, the repair of doorways and capping and wall patching were completed in rooms 73, 79, 105.

Archeologist

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

CHIRICAHUA NATIONAL MONUMENT

Dos Cabezas, Arizona

August 27, 1942

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Chiricahua National Monument for the month ending August 24.

Weather Conditions. The summer rains arrived late this year with heavy rains not starting until the first week of August. So far this month we have had 4.42 inches of rain. Some neighboring ranchers were compelled to ship cattle early this year because of the dry range, but the rains have helped the cattle situation considerably. Fortunately the Monument water supply remained adequate throughout the dry spell, which some old-timers described as the driest period in their recollections.

Maintenance. Operator Marble completed partitioning off a section of the garage for use as a separate storage for fire equipment. A number of days were spent by the local force in building an additional drainage for the sewage disposal system. This did not turn out to be quite so big a job as was originally anticipated so it could be done by the regular forces with very little cash expense. Heavy rains did considerable damage to the roads and trails, thereby requiring extensive grading and hand work in reconstructing the washed-out areas.

Approaches to Monument Area. Approach roads have been worked on since the rains, but visitors complain that they remain as rough as corduroy roads in spots.

Interpretive Service. It was thought that the Happiness Tours would resume their visits to the Monument, but apparently the agency could not muster up enough sight-seers to warrant a special train through Willcox, the nearest rail-head to Chiricahua. The trouble seems to be that they planned their on a weekly basis rather than on a bi-weekly basis as last year. Two ranger-led hikes through the Heart-of-Rocks area and two through Bobo Canyon were conducted during the month. The custodian spent two hours with an auto caravan of 41 visitors from the University of Arizona.

Museum Activities. Plans were drawn up for a geological exhibit and were submitted to the regional office for approval. There is a definite need for an exhibit of this type since Chiricahua was originally set aside for it's geological interest.

Increase in Travel. During the past month 1452 visitors were registered at Monument headquarters. For the first time this year this shows a loss from the corresponding month of last year. Statistics for the travel year show a 41% increase over travel last year at this time.

Visitors. Archeologist P.J.F. Schumacher and family of Casa Grande spent a day visiting the area. We are very grateful for the archeological assistance which Mr. Schumacher was able to give us in relation to the Apaches.

Ranger Service. Although we were happy to learn of Ranger Sharp's promotion to Custodian of Tonto National Monument, we were sorry to see him leave Chiricahua the early part of the month.

Forest Fire Protection. A lightning-caused fire near the northeast corner of the Monument on August 12 required a two-man detail to bring it under control. Fortunately only .1 acre of forest was burned. Fire Lookout Windes was brought down from Sugar Loaf Lookout on August 15. Forest Service Lookouts in the Chiricahuas came down a week earlier.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

El Morro NATIONAL MONUMENT

Ramah, New Mexico

August 25th 19 47

MEMORANDUM for the Regional Director, Region Three.

There follows the report of activities in El Morro National Monument for the month of August, 1947.

WEATHER: During this month we have had every type of weather listed in the book. The maximum reached a near record of 93 degrees during the first half of the period which was an unusually dry two weeks for August. From the 13th. through the 25th. we have been drenched daily by 6.31 inches of rain and the minimum temperature dropped to 48 degrees. High winds, dust storms, cloudbursts, slow drizzles, extreme heat and cold gave us a month of weather which was anything but monotonous.

TRAVEL: Visitor count up to the 13th equalled the total for the month of August 1946, but from the 13th on very few visitors, except "R.C. MUD DRIVERS" have attempted our roads. A total of 187 people arrived at the area in 50 cars, and 18 states and one foreign country were represented. The tour of the inscriptions was made by 156 people in 34 trips and 29 of these people went on top . Total guide time amounted to 34 hours.

APPROACH ROADS: At the present time there is only one approach road which might be called open to El Morro. Two bridges were washed out on the 23rd. and the only route without a washout is that from Grants, via San Rafael and the Ice Caves. However this route is studded with lakes which the ordinary tourist is unable to navigate.

NPS VISITORS: Mr. John Davis and Mr. Sam Hendricks, Highway Engineer, visited the area on the 20th. Trails and roads were inspected and maintenance discussed. Their visit was a very short one but we enjoyed seeing them and discussing problems in the area. Our regular 3 PM rain started as they were leaving for Grants and Mr. Davis put the Custodian to shame by expertly navigating the 16-mile mud stretch without chains. He did a little rabbit hunting along the way, but never lost momentum.

GENERAL: On the 13th. a trip to Chaco Canyon was made to pick up a CCC prefabricated building. This building will be used as a power plant house. With very few visitors arriving during the last two weeks time has been available for a few maintenance jobs. We do not especially like the muddy roads, but when they are in this condition we are able to work on a job without being interrupted.

Number of copies of free publications on hand at the end of August, 1947.

2-fold Spanish edition————————3735

2-fold English edition————————866

GRAN QUIVIRA

GRAN QUIVIRA, NEW MEXICO

AUGUST - 1947

The following is a summary of activities for the month of August, 1947.

Visitors this month totaled	439
Travel year to date	2294

Weather. Very pleasant in regard to warmth and rainfall. Precipitation this month totaled 4.77 inches of rain. The upland and fields have taked on new life and numerous varieties of large and small mountain flowers are to be seen everywhere - quite a contrast to the parched desert appearance of about 30 days ago. Also, we now have sufficient water in the cistern to take a bath occassionally. High temperature for the past month was 92 and low 51.

Roads. Both approach roads are in very poor condition. The State Highway maintainer has been completely out of operation for the past 60 days due to some mechanical difficulties, and recent heavy rains in some areas make travel most difficult.

Travel. Visitation continues to show an increase over all previous months in spite of poor roads. Instate visitors numbered 287 and outstate visitors 152. There were a total of 90 cars with instate numbering 60 and outstate 30. The continued increase was definitely due to heavier out of state travel. 14 people walked out to the monument.

Guide and Contact Service. A total of 439 visitors were conducted through the ruins in 90 guided tours. The average time spent by each party was 62 minutes. Total contact time of 92 hours, 50 minutes.

Special Notes. The August 19, Region Three Office Staff Conference Minutes mentioned a letter from Dr. Paul E. Fluck in which he stated that he had visited all of the 170 areas in the System and gave Lehman Caves, Gran Quivira and Joshua Tree his highest rating. The custodian is deeply grateful for the Doctor's kind words. A requested conducted tour, of this ancient mission, at 9:30 in the morning, of Dr. Fluck and party, may have some bearing on the high rating we received.

Maintenance and Administration. Recent rains caused a tremendous growth of weeds in all rooms of the mission, and deweeding, as time permits, is now underway. The drainage ditch along the entrance road to the monument has been cleaned out and holes in the road filled.

Publications Report. 900 Gran Quivira two-fold leaflets on hand. No other free or for sale publications on hand at this monument.

Barrett W Bright

Custodian.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
GREAT SAND DUNES NATIONAL MONUMENT
MOSCA, COLORADO

August 26, 1947.

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in Great Sand Dunes National Monument for August, 1947.

WEATHER. The weather has remained rather cool during this report period with the maximum temperatures registering around 85 degrees. The minimum temperature is estimated at 40 degrees. Rains fell on August 4, 7, 11, 12, 15, 16, 18, 19, 21, 22 and 23.

The rain of August 19, was severe enough to wash out the monument road in several places, and the county approach road also suffered from rain.

The Madeno took on renewed vigor from these rains and water is visible for quite a distance along the foot of the dunes. All snow is gone from the Sangre de Cristo range. Crops are still retarded in the San Luis Valley.

TRAVEL. Five thousand and nineteen visitors in one thousand one hundred eighty-one cars visited the Sand Dunes during this report period. Thirty-six states were represented, as well as Washington D.C., and Mexico. Two members of the armed force were counted.

Two thousand seven hundred fifty-two people took advantage of the camp and picnic-grounds, and of these one hundred ninety-six camped over night.

One written request for informational leaflets was received from the Colorado Advertising and Publicity Department and forty leaflets were sent.

INCREASE IN TRAVEL. For August, 1946, the record shows 600 cars and 2833 visitors.

ROADS. The approach road from Mosca was graded on July 29, August 6, 13, 15 and 16. After the heavy rains and unusual usage from the Shriners and visitors, this road is again in terrible condition. An electric automobile counter has been placed on the approach road and it is hoped that this heavy visitation to this area will persuade the state to improve the road.

The monument road suffered several washed out places after the rain of August 19. Three days were spent in shoveling dirt, removing rock and dragging the iron rails over the three mile stretch. There is a decided improvement in the government road over that maintained by the state.

COMPLAINTS. At present, many complain about the roads. The lower picnic area is in its usual condition in that cars can easily become stuck in the loose sand. Three loads of graval were hauled and dumped in one hole that has caused considerable trouble.

Funds have been made available for finishing the rest-rooms at the checking station. As soon as more information is received as to flush boxes, bids may be issued on the job.

DISTINGUISHED VISITORS. The Lisle Scholarship Group of thirty-five held a picnic.

The Pueblo Motorcycle Club of sixteen members rode over Mosca Pass on twelve motorcycles, picnicing at this area.

The Buena Vista, Colorado, Round Up Lodge for Boys held a picnic for forty boys.

The Arlington, Texas, Future Farmers of America camped over night with thirty in the group.

The Shrine Ceremonial brought out four hundred fifty members for their initiation and barbecue.

Regional Director Tillotson, sister and wife paid a too short visit enroute to Santa Fe, while on annual leave.

WATER RIGHTS. Only a verbal "NO" has been received from Linger Bros., and it has been requested in writing.

MINERAL CLAIMS. As soon as time permits, the claim will be checked again at the Alamosa County Courthouse.

ACTIVITIES. Major work has been clean-up in the two picnic areas. Garbage hauling and picking up scattered paper consumes a terrific amount of time.

The draft control was installed on the oil stove in the office.

A trip was made to Alamosa for gasoline and supplies.

Both light plants were checked over and the tool box was removed because of vibration.

Both patio gates were repaired and painted. "Private" signs were placed on both.

Between visitors, paint was applied to the garage doors, rest-room doors and windows, and the north window and east door of the office.

Linseed oil was applied to the signs at the checking station and large post between garage doors.

Signs were lettered and painted for speed limit within the monument boundary, stop sign and directional sign at the Blanca turn-off.

Three days were spent on necessary road work.

Considerable time was spent in pulling and shoveling twelve cars out of the sand at the lower picnic area.

After the first of the month, the Dodge 4x2 will be taken to the Heide Garage for the installation of a short block.

The Labor Day week-end should be the last big spurt in travel---- we would like to catch our breath.

SPECIAL ACTIVITIES. The Shrine Ceremonial was held at Great Sand Dunes on August 16. Two large tents were erected and Shriners crossed the sand on hay wagons drawn by tractor. Afternoon rains, however, cooled off the burning sands. A total of four hundred fifty men attended the event.

Special thanks are given the Shriner clean-up crew, who did a wonderful job. It was our first chance to taste buffalo meat, and we now understand and sympathize with the Plains Indians who declare beef is tasteless. This particular buffalo was fat, tender and a juicy morsel.

The attached brochure was issued by the San Luis Valley Shrine Club and contains an excellent photograph of this area.

PUBLICATIONS. There are on hand twenty of the mimeographed informational leaflets.

Ted C. Sowers,
Custodian.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Montezuma Castle National Monument
Camp Verde, Arizona

August 24, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows the monthly report of activities at Montezuma Castle and Montezuma Well for the month of August, 1947.

Visitors this month - Montezuma Castle - 2570; travel year - 17,350.
Montezuma Well - 543; travel year to date 1347.

Travel count for Montezuma Well covers only the 1½ days when Archaeologist Schroeder was on the area and then for six to seven hours per day.

Administration We were advised of funds for the 1948 fiscal year and find that anticipated expenses will make it difficult to stay within our limit.

On all Sundays and some week days we were confronted with the problem of having more visitors wanting to climb into the Castle than we could accommodate. A limit of nine has been recommended for safety on the ladders and to avoid overloading the building. It takes an hour to make the trip and it sometimes happens that we have 25 to 30 visitors wanting to climb when a trip is organized. Two written complaints growing out of such a situation reached the Director's office. These were investigated and reports were submitted.

Two days annual leave was taken by the Custodian to accompany Ranger Leding on a trip to the North Rim of Grand Canyon.

Some assistance was rendered Engineer Hardley in locating two Indian laborers to assist in re-chocking boundaries and locating permanent corners at Montezuma Well.

The custodian was away from the monument August 15 through August 19 to attend the funeral of Mrs. Hastings grandmother in Durango, Colorado.

The turn-over in publications amounted to $89.18 for the month. There was a shortage of $4.45 on the Self-Serve plan.

Decal numbers on equipment were checked against the list supplied by the Regional Office and discrepancies were reported.

Weather Precipitation has been recorded on ten days with a total of 1.78 inches. Hopi Indians were again successful with their Snake Dance prayer for rain and according to radio reports 500 visitor cars were detained by

muddy roads.

Maintenance The sink at Residence No. 2 was unplugged. This requires the use of a 25-foot sewer auger and usually takes about a half day. There appears to be some irregularity in the drain tile under the cement floor of the living room which makes this a recurring job.

Supplies and Equipment The Gruvow refrigerator in Residence No. 1 has ceased to function and is not repairable because the manufacturers have gone out of business. A contract for a new refrigerator ordered a year ago last June has been cancelled and a new order is being considered by the Bureau of Federal Supply.

A faulty front spring on the pick-up used at Montezuma Well was repaired.

Accessions A copy of "Life Histories of North American Jays, Crows, and Titmice" was received for our library.

Museum Three of our six museum cases were opened for cleaning and to make minor repairs. Opening each case requires the removal of 20 screws and the attention of two men to handle the heavy plate glass.

National Park Service Visitors Acting Custodian and Mrs. Richert were here. Assistant Regional Director Davis and Engineer Hendricks were here on August 17.

Use of Monument Facilities by The Public Montezuma Castle and the Well had a total of 3115 visitors who came in 855 cars, trucks, and busses. Tickets sold, 750; Complimentary Admission Tickets used, 118, children who climbed free, 189. There were no armed forces visitors.

Contact Time Total contact hours at Montezuma Castle, 237; Hastings 30; Loding, 89; Frost 98,; Schroeder, 19. There were 175 guided trips for 1067 visitors who climbed into the Castle. In the museum there were 304 groups including 1535 visitors. Visitors receiving information outside the ruins or museum totaled 847.

Contact time at Montezuma Well is reported separately.

Montezuma Well The following report has been received from Archaeologist Schroeder.

General Daily duty was maintained except for lieu days and as follows: August 5, 11, 12, 18, and 19; replaced Hastings on annual leave at the Castle.

545 visitors were contacted in 144 cars during the 17 days of duty. 12 hours and 10 minutes were spent on contact and 13½ hours on interpretation. 18 cars with 77 people made use of the picnic grounds and one car of 4 people camped over night.

About 5/8 or our traffic is actually contacted on the basis of the following;

2 Montezuma Castle

Pamphlets taken from box:

after 5:00 P.M. (July 25 - Aug. 5)	21
on 4 lieu days (July 30, 31, and Aug. 6 & 7	42

(Our supply of pamphlets ran low Aug. 8 and visitors have since been requested to return them. For this reason no figures are available for the remainder of the month. To date we have 48 requests for pamphlets on file.)

From Aug. 8 through Aug. 22 all things being equal, another 63 pamphlets would have been taken. In addition, 4 days were spent at the Castle during this period, so another 30 pamphlets might be added.

Total contacts	543
Total estimated visitors	312 (2 people per pamphlet)
Total traffic	855

Administration This month brings our sign project to a close. 34 signs have been made and set up.

Received a two hole punch and put files in order with fasteners to bring them up to date.

Cleaned out the museum and cases. Washed pottery and other material and placed it in the exhibit cases in preparation for cataloguing.

A proposed master plan map of the area was received from Regional office. It was checked on the ground and additional notes were added for comment.

Buildings Word has been received that the Webb Contracting Company will begin work on the rehabilitation of the quarters at the Well in the next week or two.

In spite of efforts to repair the leaky roof of the museum, rain continues to flow into the interior giving the place the appearance of an aquarium. The following wildlife have found their way through the various holes in the walls: small toads, lizards, house mice, wren, garter snake, and miscellaneous spiders and scorpions.

After a particularly hard rain a check was made in the other buildings. Leaks were evident in the two west cabins and also in the "attic" of the house. None of the latter leaked through the ceiling though some water formed puddles of sufficient weight to make the ceiling sag slightly. Perhaps this moisture will be an aid in driving the bats out of the walls.

Plants and Systems The pump for the household well was installed and encased in cement by the Wingfield Commercial Company. However it was not connected because of a lack of underground conduit which is specified in the contract.

Roads The county road was graded August 13 and 14 but the combination of a heavy rain the following day and traffic left the road in fairly poor shape in some spots.

The dirt that had been placed on the hill of the approach road to the Well has almost completely been worn or washed away. It is planned to put several more pick-up loads over this stretch.

Research A court decree pertaining to the ditches on the property was located. A copy was sent to Regional Office along with the known information obtained to date.

Received information pertaining to the area from Mrs. McNabb, former school teacher at Beaver Creek School; Mr. Cherry, former heir; and Carl Back and Mrs. W. J. Back, former tenants and heirs. This data has been placed in the fact file.

Publicity Submitted an article on Montezuma Well to Regional Office for comment. It is planned to submit the article to the Museum of Northern Arizona for publication in the Plateau.

Mr. Charles Parker who writes for Arizona Highways came on August 22 to obtain information on the Well which he plans to incorporate in an article on the Verde Valley.

Newsworthy Visitors August 10 - Regis Toomey, Big Boy Williams, Gordon Oliver, and other actors and technicians from the movie set at Sedona visited the Well. Big Boy Williams invited the undersigned (Schroeder) to the set by way of renewing a short army acquaintenance and reversed the process by acting as guide at the set. Williams visited the Well again with another group on August 17.

National Park Service Visitors August 15 - Willard Bradley came in to check the boundary and to set boundary markers. He completed his work on August 19.

August 17 - Assistant Regional Director Davis and Engineer Hendricks visited the Well on their tour of the monuments.

Arches NATIONAL MONUMENT

Moab, Utah

August 27, 1947

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Natural Bridges National Monument for the month of August, 1947:

GENERAL: A party of 17 people on a horseback trip from the Rasmussen dude ranch at Monticello camped at Kachina Bridge on the night of August 4th and were marooned for several hours by high water in White and Armstrong canyons, caused by heavy rain that night. Ranger Redd checked on their condition on August 5th, when the water in Armstrong Canyon had receded, and found them to be OK.

TRAVEL: Visitors to the area showed a decrease from last month with only 42 cars and 166 people as compared with 81 cars and 231 people last month and 44 cars and 210 people for August, 1946. This is no doubt due to the heavy rains which were experienced during the month. Utah Wonderland Stages visited the area twice during the month with a total of 7 passengers.

INTERPRETIVE SERVICES: Twenty nine parties of 143 people were contacted at headquarters and five parties of 11 people were contacted in Blanding. One trip was made to all three bridges with a party of 10 people. Most people made the trip to one or more bridges unattended.

WEATHER: Heavy rains fell on August 4th, 5th, 11th, 16th and 20th. High water was experienced in the canyons on each occasion. The weather has been unusually cool in this country for August.

ROADS: The State maintenance crew graded the road from Blanding during the month arriving at the monument on August 12th. This put the approach road in good condition for the time being. I have had no report from Ranger Redd regarding the outcome of the storm of August 20th.

TRAILS: Durant C. Black of Blanding was entered on duty as trail laborer on August 2nd. The heavy storms of August 4th and 5th played havoc with the fill sections of the trails but they were again in good shape when the August 20th storm struck. I have no report on their condition since that date. Ranger Redd advised me that Laborer Black was resigning on August 23rd.

MAINTENANCE: New signs have been prepared and are to be installed at the road junction at Blanding. Both road and trail signs are being repainted as time permits.

At Last—A Trek to Mecca Across Real Burning Sands

August 16th . . . Alamosa, Colorado

Great Sand Dunes National Monument

Great Sand Dunes National Monument Is Unique In America

Have you stood in the San Luis Valley
When the sun was sinking to rest,
And gazed on the beautiful tinting
That spreads from the foot to the crest.

Of the wonderful Sangre de Cristo
One range of the Rockies' vast horde,
That because of its crimson flushes
Is named for the blood of our Lord.

At the base of these beautiful mountains
A curious thing we behold
Mysterious and changing Sand Dunes
That glisten and shine like pure gold.

*—Mrs. W. D. Carroll.**

Within the San Luis Valley of south-central Colorado, famed for its agriculture and many artesian wells, lies the highest piled expanse of inland sand dunes in the United States. Nestling at the foot of the towering, snowcapped peaks of the Sangre de Cristo (Blood of Christ) Mountain Range, these colorful dunes, now embraced in Great Sand Dunes National Monument, contrast vividly with their towering mountain-range background.

America boasts of no more natural wonder than the Great Sand Dunes National Monument, located 33 miles east of Alamosa. The Sand Dunes extend over an area of 80 square miles, rising from 800 to 1,500 feet high, having the distinction of being the largest inland shifting sand dunes in the world.

The Great Sand Dunes of the San Luis Valley, mysterious and enchanting as they lie seemingly obedient to the will of the winds, could tell a monumental story fashioned from the tales of ancient peoples if only they would cease their whispering and speak with the voices of men.

The history of the Great Sand Dunes begins with the story of the Indian tribes who camped throughout the valley. That the Great Sand Dunes held a fascination for the Indians is indicated by the number of arrowheads and other artifacts found in the vicinity, especially around campsites located near Indian Springs, Medano Springs and other spring areas at the lower end of the dunes. These springs were undoubtedly favorite watering places for wild game. A few Folsom points found here indicate that that ancient people may have found their way hither.

*Mrs. W. D. Carroll is one of the most outstanding pioneer women of the San Luis Valley. She is active in club and social groups and a past president of San Luis Valley auxiliary of Colorado Territorial Daughters. She came to the valley with her parents in 1873.

UNITED STATES
DEPARTMENT OF THE INTERIOR

NAVAJO NATIONAL MONUMENT
TONALEA, ARIZONA

Aug. 25, 1947

MEMORANDUM for the Director, Region Three

There follows a report of activities in this area for the month of August.

WEATHER: Very interesting and definitely curbing travel. Only four sunny days. High temperature 93 degrees on the 1st, low temperature 46 degrees on the 23rd. Precipitation 2.94 inches.

VISITORS: 62 visitors came in 11 cars. 52 made overnite camps. 36 of these visitors came in the Boys-Explorers parties. Their heavy automotive equipment being an asset in travelling these roads.

Acting Associate Regional Director John M. Davis and Highway Engineer Sam Hendricks visited in this area on Aug. 14, 1947.

ROADS: Most of our labors this month have gone into keeping a road open--and we have not been successful at all times. The USIS constructed dams across most of the washes draining Black Mesa. Rains on the 8th and 9th filled the dams and a cloudburst on the 10th broke the dams and released torrents of water across the road between Tonalea and Kayenta. That night 27 people were marooned at Cow Springs. (this is the settlement that was omitted from the proposed road map of Navajo's two fold leaflet). On the following night 12 people were isolated in the same trading store. On the 11th the Custodian was stymied on the wrong side of the Shonto wash overnite. A flash flood had left a 24 inch deposit of silt, forming a quick-sand bed, on the crossing. We waded to the trading store and got the pickup across at 2:30 P.M. on the 12th. On the 15th the C.P.C. crossing in our entrance road across Kethla Valley washed out. We are able to get in and out only on submerged cow-trails not recommended for strangers. The entrance road is a canal connecting a series of lakes. Bear a hand, lads.

78 pieces of Outgoing mail were processed thru this office.

ORGAN PIPE CACTUS NATIONAL MONUMENT

AJO, ARIZONA

August 26, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities for Organ Pipe Cactus for the month of August 1947.

WEATHER

August while starting out hot with a high of 108 has been a very good month for this part of the state. It cooled with the rains and most days have been in the 90s with low temperatures of 65 at night. 2.61 rain has fallen on the headquarters area during the month with much more in the northern section. A flood with more than 2 inches of rain falling in less than one hour on August 8 at headquarters caused the wash here to get out of bounds and cause considerable damage and work.

TRAVEL

Travel this month was 5723 bringing the travel year to . Local travel was slowed up this month by road conditions and the river being too high for crossing most of the month. 13 cars were contacted at headquarters. These had turned off to visit to monument only so we can foresee a time when we will may get a surprising number of summer visitors.

GENERAL

August seems to have been an exceptionaly busy month with not a lot that you can see accomplished.

The Custodian made a trip to White Sands for surplus materials for here and other Arizona monuments.

Ranger Ringenbach made one trip to Grand Canyon for power plants and other surplus.

The flood on the 8th caused water to be up over areas where no signs of washing ever showed. About six inches of water ran through the garage and it was much deeper all around it. All lumber and oil barrels were carried off but most was recovered along the wash later. Considerable leveling and filling was required around the utility area.

We were able to accomplish quit a lot in road work during the month while the ground was damp for grading.

Floods have caused a lot of damage to fences along the north boundray and an experiment was tried . We have put up an electric fence along those sections which continually go out. this is much faster and easier repaired until the flood season is over.

Plans for the fencing of the International Boundray were carried on with the Bureau od Animal Industry and International Commission. Job application has been submitted and is is hoped to get this started soon.

Permission for a third line rider camp was granted to the Bureau of Animal Industry to be locater near the Bob Gray ranch.

Our main Highway has been in very bad condetion all month. Floods have filled most dips and several have lost pavement. Little work has been done by the County and the road in in a very dangerous condetion no w.. Several washes need post construction work before they can ever be safe.

Personel

Ranger Ringenbach returned from annual leave August 13 after spending some time on the coast.

The Custodian will take annual leave during the month of September.

PROJECTS FOR THE COMING MONTH.

Nearly all time during September will be spent on Maintenance work. Roads will be repaired as well as fences with patrols carried out during the dove season which is the main hunting season we have to watch.

William R. Supernaugh,
Custodian

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Saguaro National Monument
Tucson, Arizona
August 26, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows the Monthly Narrative Report of the activities at Saguaro National Monument for the month of August, 1947.

WEATHER. This month has been cooler than July was. Afternoon showers and threatening clouds have consistently depressed the temperatures. Two rains of around 1 and 1/2 inches here on the desert have caused the roads to become washed badly. Of interest is the fact that more rain has fallen in the desert than on the Rincon Mountains. How much more I cannot say because we have no proper way of measuring rainfall either at Headquarters or at Madrona R.S.

Special Activities. On the eleventh of August, the Packer and Ranger drove the old dump truck to Casa Grande National Monument, pulling the green panel car. The dump truck was traded for another and the car was left for possible repairs. Ranger Fulton has been to Manning Camp three times this month staying overnight in each case. Custodian Egemeyer left the morning of August 25th for Montezuma Castle National Monument to get some hay.

MAINTENANCE. The Loop Road has been dragged twice this month, each time immediately after after good rains. Only after this road has become wet is it possible to do a creditable job dragging with the equipment we use. Excepting for some washes, this road is in excellent condition. The new 4-wheel drive truck is proving to be distinctly better than the old dump truck for pulling the road drag. At the Madrona R.S., a repaired antenna mast has been erected and a new hitching rack has been installed. On Mica Mountain trail maintenance has been continueing.

APPROACH ROADS. The Pima County maintenance crew has done nothing to the Broadway approach road this month. That and the two severe rains which caused all washes to flow have served to make this road worse than ever before. This is also true of the road between the Monument Headquarters and Madrona R.S.

TRAVEL AND INTERPRETIVE SERVICES. Travel has shown a continued downward trend. A total of 481 visitors traveling in 164 automobiles have been recorded. Of this total, 189 persons were from Arizona and 292 persons were from 23 other states. 130 persons, composing 39 parties, were contacted for a total of 1245 minutes. Ranger Fulton was on contact work for one day only. His duties at Madrona R.S. prevented any more than that.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

_____ NATIONAL MONUMENT

FOREST FIRE PROTECTION. Fire No. 7, the only one this month, happened on August 8th. It was lightning-caused and was confined to a single snag. Fire danger has been relatively low this month, hovering between dormant and moderate. 15 days were low, 14 days were moderate, and two days had a danger reading of high. On 14 days measurable amounts of rain were recorded; on 5 days traces of moisture were recorded. The total amount of precipitation at Mica Mountain for this month was 3.03 inches. The largest rain of 1 inch fell on August 15th.

ACCIDENTS. On August 8th, the green panel car was stuck in a wash and subsequently inundated by flood waters. Until the motor is cleaned it will be inoperatable. On August 16th the packer, Mike Keown, struck one of his fingers with a hammer while shaping a horse shoe. Two days later it was necessary to send him to Tucson for medical attention for his finger had become badly infected. At present it is healing satisfactorily.

NEW EQUIPMENT. We acquired a new dump truck which was converted from a war surplus truck at Coolidge. Also, we received a 2and 1/2 KW light plant.

PUBLICATIONS. Free publications of the service on hand at the end of the month are as follows:

Saguaro two-fold informational leaflets, English	3000
Saguaro two-fold informational leaflets, Spanish	1100
Location Map No. 6 -, Southwestern States	599

NATIONAL PARK SERVICE

Sunset Crater NATIONAL MONUMENT

Flagstaff, Arizona

August 29 1947

MEMORANDUM for the Regional Director, Region Three.

There follows a report of the activities of Sunset Crater National Monument for the month of August, 1947.

Visitors this month: 3937 Travel Year to date: 12,179

Travel: Comparing the actual registration for the month with that of August of last year, visitation has shown a slight decrease. 1575 people are recorded in the register, a drop of 12% over the same period for last year. This decrease, no doubt, can be traced to the impassable condition of the approach road, which for a period of ten days during the early part of the month was partially flooded.

For the past eight weeks comparisons have been made of the number of people entering the area and those that actually registered. It was found that the old estimate of 70% was most conservative. In fact the difference noted was so great that the study was extended for several weeks to be sure the data was not in error. Observations show that only 40% of the visitors actually sign their names to the register. This new figure will be used in this and following reports for the determination of travel to the area.

Over night campers were recorded for 16 days of the month. The largest party was one of twenty-three.

Weather: "And then the rains came." At long last it can be reported that Sunset Crater had rain. In fact it has been a daily occurrence, missing only five days for the month. Some have been real gushers but for the most part it has been the usual showers that are common to the mountain area this time of the year.

Roads: With the coming of the rain every attempt has been made to "make hay while the sun did not shine." But with its arrival it also brought flash floods that filled up the low spots in the lane just off of Highway 89, so that this portion was completely submerged and remained in this condition few about ten days. At any rate it discouraged many visitors from attempting to ford the water barrier. Cinder hauled into the low spots has remodied, at least temporarily, this condition.

A small blade was rented from one our neighbors for a couple days and with the Dodge used for the motive power, considerable improvement was made on the approach and entrance road. A small road drag made from two railroad rails has been used almost daily, improving the road until one can almost say that it is now in good condition. At least for a time we do not have to listen to "Why don't you fix that road?"

The back road to Rupatki is now passable with traffic again moving to a limited degree.

General: The greater part of the month has been given to road improvement. General cleanup of the area continues. The recently repaired pit toilets have been painted inside and out. The new refuse cans were given a coat of paint. The Thunderbird marker at the entrance on Highway 89 was repainted. The old four mile sign, recently recovered near the campground of Petrified Forest, has been repainted and is back in its old place at the entrance. The small shed which houses the electric generator was completed with the addition of tarpaper to roof and sides.

Interpretive Services: With the completion of many of the odd tasks that required urgent attention, more time can now be given to the contact of the visitor. Study is being given to the particular interests of the people entering the area. With these in mind the interpretive program will be expanded. It is hoped that a nature trail through some of the most interesting points may be developed.

Some time has been given to the photographing of wild flowers in color. There are a number of interesting adaptations made by the trees and shrubs to their cinder environment that also offer interesting subjects for the camera.

NPS Visitors: Assistant Regional Director John M. Davis and Regional Road Engineer S. D. Hendricks visited Sunset on the 15th for an inspection of the recently installed housing. Regional Forester S. Carlson stopped for a short time on the 24th. The problem of possible encroachment of insect infestation from the surrounding forest was discussed.

Cooperative Services: On the 1st and 2nd assistance was given Walnut Canyon personnel in fighting fires. Both calls were received from the Forest Service for fires on their land. On the 27th a fire was reported to the local Forest Service, which was burning approximately two miles east of Sunset Crater.

Publications on Hand: Sunset Crater National Monument 2-fold leaflets on hand - 600 Copies.

Robert P. Upton
Ranger in Charge

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Tonto NATIONAL MONUMENT

Roosevelt, Arizona

August 25, 19 47

MEMORANDUM for the Regional Director, Region Three.

Following is a report of activities at Tonto for the month of August.

Travel. Despite the heat, travel showed a slight increase over July, with 414 visitors to the Monument, 231 of whom made the climb to the lower ruins. Almost half of the cars were from out of state.

Personnel. C. Sharp came to Tonto on August 6 to begin as Custodian.

N.P.S. Visitors. Archaeologist Charlie Steen and Photographer George Grant were here a short time, discussing Tonto archaeology and problems, and taking pictures. Operator Jesse C. Marble of Chiricahua visited Tonto incident to moving in the custodian. Jesse will doubtless be back with a fishing rod when the lake starts to fill.

Weather. Hot weather prevailed during the first part of the month, relieved by several good rains during mid-month.

Roads. The Apache trail has been rough, but is in fairly good condition at present. We borrowed a grader from the State operator at Roosevelt, and with the Tonto CI pickup, graded the entrance road into good condition. Two heavy rains since then have not damaged it much.

General. The 2.5 K.V.A. light plant was brought up from Casa Grande, and is installed along with the 3.K.K. plant brought up last month, giving us a standby plant, and with last month's acquisition, advancing Tonto 50 years in a single month. The new refrigerator in the Ranger's quarters is still not properly adjusted, and we have some difficulty in getting the service man out here to fix it. On the favorable side, Tonto has one more house and a good pickup since the last time I was here. And due to considerable work on the part of Archaeologist Bull, the files are in very good shape.

NATIONAL PARK SERVICE
TUMACACORI NATIONAL MONUMENT
~~Box 2225, Tucson, Arizona~~
Tumacacori, Arizona

August 25, 1947.

MEMORANDUM for the Regional Director,
Region Three.

Follows the monthly narrative report for Tumacacori National Monument for the month of August, 1947:

WEATHER CONDITIONS: Precipitation was 2.55 inches, but is far below normal, with this district very dry, although good rains have hit the hill country. High temperature for the month was 107 on July 25, with a minimum of 59 on August 5. Old residents in the neighborhood say they cannot remember a summer which has been as hot, dry, sticky, and uncomfortable. It is truly punishment to have to wear regulation long sleeved shirts, buttoned collars and tie, and long trousers in such weather. Why don't we learn something from the British in designing uniforms for tropical and sub-tropical regions which are comfortable yet snappy?

MAINTENANCE: Lack of summer rains required a great deal of irrigating, which is normally almost dispensed with during July and August. Much routine cleanup, and some pruning, was accomplished. The patio garden fish pond was cleaned again and new plant boxes made for some of the plants.

INTERPRETIVE SERVICE: 818 visitors went on 141 guided trips through the mission church and grounds, receiving an average of 37.58 minutes per trip. 1449 visitors received combined Information and Interpretation service in the museum lobby, patio garden, and view room. 1385 visitors saw the museum. There would have been more of these latter, were it not for the fact that power failures on several occasions during the month left the museum without lights.

INCREASE OR DECREASE IN TRAVEL: August travel of 1502 visitors was by far the highest August travel on record here, being approached only by August of 1930, with 1382 visitors.

VISITORS: Among interested visitors were Dr. and Mrs. Edward Spicer, of the Anthropology staff, University of Arizona, on August 3.

The only school group was the Fenster Ranch School for Boys, of Tucson, which sent a party of 18 on August 24.

INSPECTIONS: Archaeologist Steen and Photographer Grant spent several hours here on August 20. While Mr. Grant brought Tumacacori pictorially up to date Mr. Steen conferred with us on stabilization work on the mission, and other interpretive problems.

PERSONNEL: August 1 - Archaeologist Aide Lancaster departed, after having spent a month here on stabilization work on the mission and part-time guide duty during absence of the custodian.

August 2 - Custodian Jackson returned to duty after a month of annual leave, during which he took a partial postman's holiday with a several days' visit with the Hastings at Montezuma Castle, followed by a visit to Tonto during which he had the pleasure of getting acquainted with Malcolm and Margaret Bull, and going catfishing with them, and catching fish!

Ranger Brewer was on annual leave during the period August 4 - 12. During this period per diem guide Judy England worked two days.

Because of money shortage it was impossible to fill a greatly needed job of permanent maintenamme laborer. Our temporary maintenance man, Orozco, spends a little time on maintenance, but is used now for the greater part of the time doing repair work on the mission.

STABILIZATION OF MISSION CHURCH: Most of the excellent work done by Archaeologist Aide Lancaster last month was referred to in the monthly report for July, and the entire part of his task was more adequately outlined in a report which was submitted separately. Upon his departure the most vitally necessary parts of stabilizing on the south end of the mission had mostly been done, including interior pointing around the weak core of the baptistry domed ceiling.

On August 7 small scale stabilization work, with one trained workman, was resumed. Nine man days of labor (exclusive of the custodian's time spent in some patching, and much experimenting with colored mortar samples) were spent in pointing many weathered holes in the west outside wall of the mission, some very large patches on the north end, and some on the sacristy roof.

NATIONAL PARK SERVICE

Tuzigoot NATIONAL MONUMENT

Clarkdale, Arizona.

August 26, 1947

MEMORANDUM for the Regional Director,
Region Three.

Following is the monthly narrative report for Tuzigoot National Monument for August, 1947.

Visitor Total: Travel this month surpassed all records on the books with a total of 2085 visitors. A high percentage of this number included vacationists who had been advised of the scenic Oak Creek Canyon Region, and who were avowedly touring the West in search of new panoramas. Judging from numerous superlatives expressed during their visit here, they were not disappointed.

Guide and Contact Service. An average of 19 minutes each for 399 ruins parties and 21 minutes each for 456 museum parties kept all hands pre-occupied.

Personnel Time: Museum: 156 hours, 50 minutes. Ruins: 125hours, 40 minutes. Total time for Acting Custodian Richert: 167 hours, 50 minutes; for Temporary Ranger Denke: 116 hours, 40 minutes.

Maintenance and Administration: Tuzigoot's relentless struggle to obtain a good water pipeline to Clarkdale is vaguely reminiscent of the State of Arizona's conflict with California for water. Perhaps it's an omen. To date, we have received 777 feet of pipe out of an original order for 1200 feet which was contracted for by a local firm in December, 1946. The contractor sends us dribbles of 3 or 4 sections of pipe as they are shipped to him.

Recent rains produced a new, lush crop of Russian Thistles. Accordingly, considerable time has been devoted to de-weeding the hilltop ruins and museum area. A heavy rain during the night of August 16, washed a large quantity of mud and silt from the hill onto the Administration Area which all but inundated the Garage and adjoining Men's Rest Room, thereby necessitating a one-day's job of clean-up.

On August 14, five boys hunting rabbits near the Monument's west boundary were admonished to pursue their activities elsewhere as several bullets ricocheted by us while on a tour of the hilltop with a group of visitors. The incident revived personal, vivid memories of enemy sniper's tactics in New Guinea and the Philippine Islands.

Inspections: On August 17, Assistant Regional Director John M. Davis, Highway Engineer Sam Hendricks, and Engineer W. L. Bradley visited Tuzigoot. Mr. Davis readily answered several questions of ours on administrative procedure. Mr. Bradley was also here on August 13, and he delivered 20 copies of ARIZONA'S NATIONAL MONUMENTS to sell for $1.00.

Special Groups: On August 9, Dr. Van Amringe brought a class of 40 students

from Pasadena City College. "Van's Caravan", as the group termed it, was engaged on a week's geological field trip including a very interesting itinerary to various points in California, Arizona, Utah, Nevada and Wyoming. We first met Dr. Van Amringe while on duty as Roving Ranger at Hovenweep in 1939 where we recall an enjoyable tour of Holly, Hackberry, and Square Tower Canyon Clusters with his party.

Requests for Information: A proof sheet covering Tours Information on Tuzigoot Ruins and Clarkdale was read and corrected for the American Automobile Association. Additional statistics and information regarding this area werecompiled and submitted as requested by the Association.

Five replies were written to individuals desiring information of the Monument.

Projects: Despite heavy visitor travel, some progress has been made placing new labels in the Museum Exhibits which also involves cleaning and re-arranging the contents of the cases.

Item of Local Interest: RKO Pictures Corporation has a movie colony located at Sedona where the Company is filming a new picture entitled "Stages West", starring Dick Powell and Jane Greer. An elaborate set representing a typical western frontier town of the '70's and '80's has been constructed using the colorful, red Supai Sandstone cliff formations overlooking Oak Creek as a background. A number of the film colony visited Tuzigoot. They in turn extended us a cordial invitation to visit the set and to observe filming operations. Many local people are employed as "extras". A flock of current motion pictures were filmed in the Oak Creek Canyon Area during the last two years including: "Desert Fury", "Leave Her To Heaven", "Angel And The Bad Man", etc.

Southwestern Monuments Association: During the month we received for our sales shelf 600 Miniature Photograph sets on Tuzigoot. Each pack contains 10 photographs with a caption card of various views of the ruins. These retail at .25 and have been selling rapidly.

Publications: In spite of our adopting an "under the counter" method of distribution (so unpopular during the War) of free literature, the supply is completely exhausted: None on hand.

Roland Richert

Roland Richert,
Acting Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Walnut Canyon NATIONAL MONUMENT
Flagstaff, Arizona.

August 27, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities in Walnut Canyon National Monument for the month of August, 1947:

Weather. We had a rather weak rainy season for August this year, but the grass is now green and the flowers are blooming. Our year-to-date precipitation figure is still far below normal.

Visitors. Of the 3,393 total, 2,806 were contacted and it is estimated that 2,545 made the ruins trip unattended. The showers reduced picnic area use, but a Kiwanis picnic brought our total number of users to 541.

Our contact point was left unattended four days, two when we had forest fires and two when we helped Engineer Bradley make a survey for the power line.

Ranger Aubuchon, on his day off, drove to Winslow to show two reels of pictures to some 65 Little Brownies and their sponsors.

Activities. Routine duties accounted for most of our time. At one time during month, and for the first time in our history, we had a card for every publication in the library, but a few pamphlets have arrived since. We hope to keep the library cataloguing current in the future. A verbal understanding was reached with the Arizona Power Company whereby we should have commercial electricity this calendar year. Two more air-release valves were installed on the water line. They were moved to one side to avoid having the valve box hit by a road grader.

Forest Protection. Two reportable Class A fires and a non-reportable fire, just off our boundary on USFS land, were suppressed. Two men spent most of a morning hunting a smoke which disappeared without being found.

Publication Report. None on hand.

Paul L. Beaubien
Custodian

NATIONAL PARK SERVICE
WHITE SANDS

Box 231, Alamogordo, New Mexico

August 23, 47

MEMORANDUM for the Regional Director, Region Three.

AUGUST TRAVEL, 1947	1947 TRAVEL YEAR TO DATE
Visitors 18,399 Cars 3744	Visitors 84,353 Cars 20742

August, not to be outdone by previous record breaking months during this travel year, breaks all actual count monthly records in the history of the Monument with 16,399 visitors.

Weather conditions on the whole have been good. Nearly two inches of rain has cooled off this entire section making visits to the sands most pleasant any time of the day. High for the month was 102 on the 11th with a low of 56 on July 31st.

Two official trips were made to the White Sands Proving Ground in connection with some surplus property desired by the Monument. One hurried trip was made to Santa Fe on routine problems.

Except for visitor contacts on the part of all concerned we have had little time for much else. Extreme water conditions at the Air Base have made it necessary that we continue hauling all water from Alamogordo, more than doubling mileage. Drastic attempts are being made to get our largest tank into operation but so far we have not been successful. Equally futile efforts have been made to keep up with the picnic area crowds on cleanup, get up the new shades, tables and grills, etc, but here again we gain little. Joe has taken advantage of the recent rains and given the roads some needed repairs. He has also worked the shoulders on all the pavement.

We were glad to have our new Highway Engineer, Sam Hendricks, in for an official visit. Custodian Supernough was in for some surplus property. We appreciate having Bill finally get around to visiting us. We have been after him for 8 years to get over.

The State has re-oiled U. S. 70 from Alamogordo some 40 miles west and are widening the highway by working up and oiling the shoulders. This will add a great deal in appearance as well as safety.

(2)

August 23, 1947 Monthly Report

Otero County comes out this month with a new weekly newspaper, The Otero County Times. In its initial issue featured article was the White Sands on the front page.

The concessioner reports an exceedingly heavy month with sales well above any previous month.

Some relief is in sight next month when we shorten the work day an hour (we hope) But with one of my rangers probably on vacation and our Temporary terminated little will gained. We will be pressed to hold our own unless we experience a big drop in visitors.

Anyway we present this brief report on August travel with no complaints on the part of our public and with pride in our area's popularity as shown by this large attendance.

Johnnie Paris,
Custodian.

NATIONAL PARK SERVICE

Wupatki NATIONAL MONUMENT

Flagstaff, Arizona

August 25, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Wupatki National Monument for the month of August 1947:

Visitors this month: 601 Travel Year to date: 3437

Weather: Temperatures were cooler, a higher proportion of the days were cloudy and there was more rain than normal. Rainfall totaled 1.68", mostly in the form of gentle showers rather than cloudbursts. This year the rainy period was almost a full month late which seriously affected the growth of native vegetation and the crops.

Roads: The condition of the entrance road improved considerably because of the moisture and our efforts in dragging. The road from Sunset to Wupatki has been opened to traffic from Sunset. It will become a two-way road when we can establish adequate turnouts.

Visitor Travel: Visitor use increased 25% over that of last year, being particularly noticeable at Wupatki Ruin. The registration at the Citadel dropped, possibly because many of the visitors failed to register. While working on the road one afternoon we counted 32 persons who visited the Citadel only. Eight of them had registered

Personnel: A local college student, Arnold A. Page, was employed on August 11 as a temporary ranger. This resulted in a decided increase in the facilities offered visitors, but we regret that Mr. Page can stay only until the early part of September.

General: Aside from routine and a few special projects most of our time has been spent on contact work. New signs have been prepared for the Monument and getting the holes down into some of the rocky sections is all that remains to complete this milestone. No small amount of time was spent in obtaining parts for the Army surplus equipment. In many instances it requires special parts which can be obtained only with difficulty. For instance, the Ford stake truck requires a six lug-hole wheel. Several agencies have tried to obtain one without success to date.

Spring Flow: Wupatki Spring showed a decided increase in flow, jumping from 107 gpd last month to 196 gpd this month. Earlier in the month it was necessary to haul water from Heiser Spring in order to have an adequate reserve of water on hand. Heiser Spring continued to decrease measuring 1350 gpd compared to [illegible] gpd last month. We are beginning to suspect that the decrease in flow of Heiser might be due to increasingly larger holes appearing in the rusted inlet pipe, but we do not have any pipe for replacement.

NPS Visitors: Assistant Regional Director Davis and Road Maintenance Engineer Hendricks August 15.

REMARKS: (Please note below any factors influencing interpretive service, such as: "museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures, or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (Library, contact station, exhibit rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispensing INFORMATION rather than interpretive service should not be considered as attended Interpretive Stations.

INFORMATION is factual matter relative to physical developments, physical facilities, geographic location, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, motel accommodations, bus and train schedules, and similar matters outside of the area regarding which visitors inquire.

INTERPRETATION is an accurate explanation of the manifestations of natural history and human history from within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visitor using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive services, trailside exhibits, self-conducting nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or provided by Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Please total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checks at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should not be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive services, this attendance may record a total considerably in excess of the visitors registered in the area during the same period. For comparison, the total number of visitors to the area during the month should be shown.

This Report Due: From all National Park Service areas providing any interpretive services. Send two copies to the Regional Director who will forward one to the Director. One copy should be retained by the Superintendent or custodian of the area in which the report originates. Coordinating Superintendents also should be provided with a copy. Due in the Regional Director's Office not later than the 5th of the month following that covered by the report.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES OR OTHER FEATURES OF THE AREA.

Talks: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

Attended Interpretive Stations: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.

INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS INQUIRE.

INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

Unattended Interpretive Devices: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITOR USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE SERVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

Interpretive Activities Outside the Area: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

Column #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. FILL IN TOTAL EACH COLUMN IN ALL BLOCKS.

Column #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

Interpretive Activities Outside of the Area ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

Totals: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA AS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. Total Attendance SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE ACTIVITIES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA WITHIN THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND THE ORIGINAL TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

It includes data on routes and roads, hotel accommodations, bus and train schedules, and similar matters outside of the area regarding which visitors inquire.

INTERPRETATION is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visits using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive devices, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed on request by Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Please total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should not be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive services, this attendance may record a total considerably in excess of the visitors registered in the area during the same period. For comparison, the total number of visitors to the area during the month should be shown.

This Report Due: from all National Park Service areas providing any interpretive service. Send two copies to the Regional Director who will forward one to the Director. One copy should be retained by the Superintendent or Custodian of the area in which the report originates. Coordinating Superintendent also should be provided with a copy. Due in the Regional Director's Office not later than the 5th of the month following that covered by the report.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures, or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (Library, contact station, exhibit rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispensing INFORMATION rather than interpretive service should not be considered as attended Interpretive Stations.

INFORMATION is factual matter relative to physical developments, physical facilities, geographic location, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, hotel accommodations, bus and train schedules, and similar matters outside of the area regarding which visitors inquire.

INTERPRETATION is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visitor using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive services, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or provided by Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Please total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

NAME Clair V. Cooke

TITLE ~~Custodian.~~ Clair V. Cooke,

REMARKS: (Please note below any factors influencing interpretive service, such as: "museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures, or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (library, contact station, exhibit rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispersing INFORMATION rather than interpretive service should not be considered as attended Interpretive Stations.

INFORMATION is factual matter relative to physical developments, physical facilities, geographic locations, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, hotel accommodations, bus and train schedules, and similar matters outside of the area regarding which visitors inquire.

INTERPRETATION is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visitor using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive services, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or provided by Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Please total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should not be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive devices, this attendance may record a total considerably in excess of the visitors registered in the area during the same period. For comparison, the total number of visitors to the area during the month should be shown.

THIS REPORT DUE: From all National Park Service areas providing any interpretive services. Send two copies to the Regional Director who will forward one to the Director. One copy should be retained by the superintendent or custodian of the area in which the report originates. Coordinating superintendents also should be provided with a copy. Due in the Regional Director's Office not later than the 6th of the month following that covered by the report.

REMARKS: (Please note below any factors influencing interpretive service, such as: "Museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

Talks: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

Attended Interpretive Stations: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.

INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS INQUIRE.

INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

Unattended Interpretive Devices: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITORS USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE DEVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

Interpretive Activities Outside the Area: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

Column #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

Column #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

Interpretive Activities Outside of the Area ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

Totals: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. Total Attendance SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. THE COORDINATING SUPERINTENDENT ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE TENTH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

NAME Russell L. Malan

TITLE Acting Custodian

REMARKS: (Please note below any factors influencing interpretive service, such as: "museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER-NATURALISTS, HISTORIANS, AND HISTORICAL AIDS. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures, or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (library, contact station, exhibit rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispensing INFORMATION rather than interpretive service should not be considered as attended Interpretive Stations.

INFORMATION is factual matter relative to physical developments, physical facilities, geographic locations, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, hotel accommodations, bus and train schedules, and similar matters outside of the area regarding which visitors inquire.

INTERPRETATION is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visitors using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive services, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or provided by Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Please total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should not be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive devices, this attendance may record a total considerably in excess of the visitors registered in the area during the same period. For comparison, the total number of visitors to the area during the month should be shown.

THIS REPORT DUE: from all National Park Service areas providing any interpretive services. Send two copies to the Regional Director who will forward one to the Director. One copy should be retained by the Superintendent or Custodian of the area in which the report originates. Coordinating superintendents also should be provided with a copy. Due in the Regional Director's Office not later than the 6th of the month following that covered by the report.

REMARKS: (Please note below any factors influencing interpretive service, such as: "Museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

CONDUCTED TRIPS: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

TALKS: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

ATTENDED INTERPRETIVE STATIONS: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.

INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS INQUIRE.

INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

UNATTENDED INTERPRETIVE DEVICES: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITORS USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE NOTICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

INTERPRETIVE ACTIVITIES OUTSIDE THE AREA: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

COLUMN #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

COLUMN #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

COLUMN #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

INTERPRETIVE ACTIVITIES OUTSIDE OF THE AREA ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

TOTALS: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. TOTAL ATTENDANCE SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL [illegible] INTERPRETIVE SERVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COOPERATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 5TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

NAME Robert T. Lyons

TITLE Ranger in Charge

REMARKS: (Please note below any factors influencing interpretive service, such as: "Museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (Library, contact station, museum rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispensing INFORMATION rather than interpretive service should not be considered as attended Interpretive Stations.

INFORMATION is factual matter relative to physical developments, physical facilities, geographic location, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, hotel accommodations, bus and train schedules, and similar matters outside the area regarding which visitors enquire.

INTERPRETATION is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visitors using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive devices, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or provided by Service personnel outside the area. Number of replies in response to written requests for information data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Run total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should not be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several [illegible] this attendance may record a total considerably in excess of the visitors registered [illegible] the same period. For comparison, the total number of visitors to the area during the month should be shown.

THIS REPORT DUE: from all National Park Service areas providing any interpretive service [illegible] to the Regional Director who will forward one to the Director. One copy should be retained at the superintendent or custodian of the area in which the report originates. Coordinating superintendents also should be provided with a copy. One in the Regional Director's office not later than the 5th of the month following that covered by the report.

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip as an interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (library, contact station, museum rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispensing INFORMATION rather than interpretive service should not be considered as Interpretive Stations.

INFORMATION is factual matter relative to physical developments, physical facilities, geographic location, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, motel accommodations, bus and train schedules, and similar matters outside the area regarding which visitors inquire.

INTERPRETATION is an accurate explanation of the manifestations of natural history and human history within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all interpretation using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive services, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or furnished by Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Add total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should not be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive services this attendance may record a total considerably in excess of the visitors registered in the area during the same period. For comparison, the total number of visitors to the area during the month should be shown.

THIS REPORT DUE: From all National Park Service areas providing any interpretive services. Send two copies to the Regional Director who will forward one to the Director. One copy should be retained by the superintendent or custodian of the area in which the report originates. Coordinating superintendent also should be provided with a copy. Due in the Regional Director's Office not later than the 5th of the month following that covered by the report.

REMARKS: (Please note below any factors influencing interpretive service, such as: "Museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

~~Observation Point left unattended four days. Personnel on forest fires two days, and two days spent on power line survey.~~

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

CONDUCTED TRIPS: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES OR OTHER FEATURES OF THE AREA.

TALKS: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

ATTENDED INTERPRETIVE STATIONS: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.

INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATION, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS ENQUIRE.

INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

UNATTENDED INTERPRETIVE DEVICES: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITS USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE REVIEWS, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

INTERPRETIVE ACTIVITIES OUTSIDE THE AREA: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED ON TRAVELS BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

COLUMN #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

COLUMN #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. ALSO TOTAL EACH COLUMN IN ALL BLOCKS.

COLUMN #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERSONS CHECKED AT OCCASIONAL INTERVALS.

INTERPRETIVE ACTIVITIES OUTSIDE OF THE AREA ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

TOTALS: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. TOTAL ATTENDANCE SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE SERVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

REMARKS: (Please note below any factors influencing interpretive service, such as: "Museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures, or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (Library, contact station, exhibit rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispensing INFORMATION rather than interpretive service should not be considered as attended Interpretive Stations.

INFORMATION is factual matter relative to physical developments, physical facilities, geographic location, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, motel accommodations, bus and train schedules, and similar matters outside of the area regarding which visitors inquire.

INTERPRETATION is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visitor using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive services, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or provided by Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Fill in total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should not be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive devices, this attendance may record a total considerably in excess of the visitors registered in the area within the same period. For comparison, the total number of visitors to the area during the month should be shown.

THIS REPORT DUE: From all National Park Service areas providing any interpretive services. Send two copies to the Regional Director who will forward one to the Director. One copy should be retained by the Superintendent or Custodian of the area in which the report originates. Coordinating superintendents also should be provided with a copy. Due in the Regional Director's Office not later than the 5th of the month following that covered by the report.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Arches NATIONAL MONUMENT

Moab, Utah

September 29, 1947

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of September, 1947:

GENERAL: Again this month we have had exceptional travel and all of our visitors ask these questions; "Why haven't we heard about this country before" and "Why hasn't this area had more publicity". From the requests for information and the reactions of our visitors it looks like Arches is on the way to becoming an important scenic area.

WEATHER: Rain fell on September 8th and 18th. Heavy wind was experienced on September 17th with strong winds on several other occasions. The temperature generally has been much warmer this month than in August, and at this writing we are having our regular August weather, very warm.

SPECIAL ACTIVITIES: A trip was made to Blanding on September 12th to deliver two tires to Ranger Reed for the Natural Bridges pickup.

I attended a meeting of the Associated Civics Clubs of Southern and Eastern Utah which was held in Moab on September 27th. The attendance was very small. Matters discussed were: Colorado River basin problems as they affect southeastern Utah; vital road problems for this section; and contemplated airport projects. A banquet was held during the evening with a total of 60 people in attendance.

TRAVEL: Travel again shows a marked increase over the preceding month and was approximately three times that for the same month last year. We had a total of 335 cars and 1079 people as compared with 307 people for August and 397 people for September, 1946. We had representation from 34 states, Canada, China, Alaska and Peru. As was the case last month, the out-of-state visitors predominated.

INTERPRETIVE SERVICES: The interpretational and informational angle at this monument is getting to be big business. A good percentage of our visitors stop at headquarters for information on the area and for the month of September, at this point, we had 141 parties consisting of 446 people. At the Windows we contacted 84 parties containing 284 people. Most of this contact

work was carried on by the custodian and HCMD due to the fact that Ranger Walker resigned on September 3rd. Four guided trips were taken during the month with a total of 18 interested visitors and two caravans were taken to outlying sections with 10 people. Several parties made the hike to Delicate Arch from Balanced Rock, a distance of 8 miles, due to the condition of the Salt Valley approach road. The Courthouse Towers section has been very popular with hardly a day passing that two or three parties do not make this hike.

COOPERATING GOVERNMENTAL AGENCIES: The contract between Grand County and the Utah State Department of Publicity and Industrial Development for Arches roads, has been approved by the Grand County Commissioners and is now in the hands of the Utah State Finance Commission for final approval. No Service approval has been received as yet. District Engineer Riles of the Utah State Road Commission made an inspection of the contemplated work and checked on possible improvement of U93 from the highway to the monument boundary. He later advised me that he had, in his report, suggested the expenditure of $7000.00 by the highway department for the betterment of this portion of the road.

RANGER SERVICE: Temporary Ranger Billy Walker resigned effective September 3rd at 6 p. m.

ROADS: The State maintenance crew finished emergency repairs to the Windows road on August 27th. The road was put in passable but was very soft in spots. The headquarters roads were also graded by them at this time. This crew spent an additional two days hauling shale to the worst spots and Laborer Winbourn worked 7 days hauling shale on the portion of road in the monument. At this writing they again have the patrol grading the road but will not be able to accomplish much due to lack of moisture.

The approach road to Devil's Garden and Delicate Arch is in very poor shape, due to the August storms, but is passable and has been used by several parties who have visited these sections. One day was spent repairing culvert approaches on this road.

MAINTENANCE: Merle R. Winbourn of Moab was entered on duty as a laborer on August 27th to repair damage caused by the storm of August 21st. The channel was changed in the wash behind quarters and approximately 35 feet of retaining wall was built to turn the water in the new channel. The old retaining wall on the main channel was repaired and raised 18". Several truck loads of sand were removed from the grounds. Sand was removed from the pump room at the warehouse and diversion ditches were dug around this building to handle water on future storms.

The water pumping system ceased functioning on September 8th.

Upon pulling the sucker rod it was found that a rod connection had parted at the working valve and considerable fishing was necessary before the valve could be recovered. The repairs were completed on September 9th.

High winds on September 17th snapped a pole on our telephone line near quarters. This was replaced and an additional pole installed to decrease the length of the span at this point.

The same wind caused considerable damage to the roof of the warehouse, removing several sections of paper. This was repaired on September 15th.

RECEIVED

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
AZTEC RUINS NATIONAL MONUMENT
AZTEC, NEW MEXICO

23 Sept 1947

MEMORANDUM for the Regional Director,
Region Three, National Park Service.

There follows the report of activities in Aztec Ruins for September 1947.

WEATHER. Sporadic, light rainfall and quite generally, excellent weather has favored the some 2 thousand visitors to this area this month. Usually September finds our first frost coming with chilly weather, but so far no frost and no disagreeable weather has marred the ideal.

MAINTENANCE. The electric pump and motor was removed from the small covered kiva in the court yard of the ruins. This pump and motor had been in use for some 3½ years in pumping seepage water from this structure. Since the operation of the drainage ditch the water table of the area has been lowered some 4 feet and since the water no longer came above a level of approximately 1 foot below the level of the kiva floor, use of the pump was no longer necessary. Pump removed August 29.

Large house jacks were obtained from Chaco Canyon and will be used in raising the roof of the small covered kiva enough to allow the removal of cracked timber and replacement with new.

INSPECTIONS. Dr. Reed, Dr. and Mrs. Hans Huth of the Chicago Art Institute and Mr. and Mrs. E. F. Lee, Chief Historian, NPS, visited Sunday 14 September.

Raymond Lovelady, Architect, Region Three visited the 18-19 Sept and contacted several construction contractors in this locality.

INCREASE IN TRAVEL. There were 2020 visitors in 529 cars from 37 states, Washington, D.C., Hawaii, Mexico, Belgium, France and India. This is an increase of approximately 11.3% over September 1946.

VISITORS. Dr. and Mrs. H.A. Hansen, Historian, John Muir College, Pasadena, Calif., Dr. and Mrs. D.S. Davidson, Asso. Prof. Anthropology Univ. Oregon, Eugene, Ore., Dr. and Mrs. I. O. Foster, Professor of History, Indiana University, Bloomington, Ind., Dr. T.C.V. Norman, Prof. Anthropology, Adams State College, Alamosa, Colo., E.W. Eaton, US Counselor Service, Piedras Negras, Mexico, Richard B. Woodbury, United Fruit Co., Guatemala(working on museum construction), Walter D. Enger, Timpanogas Cave, Ranger and Mrs. Byrd, Mesa Verde, Colo.

INTERPRETIVE SERVICES. There were 1562 people conducted in 221 trips thru the ruins and 2020 visitors in 506 parties were shown the museum.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
BANDELIER NATIONAL MONUMENT
SANTA FE, NEW MEXICO

RECEIVED
OCT 6 1947

September 30, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of the activities at Bandelier National Monument for the month of September, 1947.

Weather

Almost ideal weather from the visitor's standpoint prevailed during September and the month ended with a touch of beautiful Indian summer. The maximum temperature was 95 on September 1 and 2 lowering to the mid-eighties for most of the month. The minimum on the 12th of 39 degrees was the only temperature below 40 degrees for the entire month. This was in sharp contrast with the freezing 28 degrees recorded on September 23, 1946. 1.31 inches of rain fell.

Roads and Trails

The project of seal coating the parking area and the 2.7 miles of road leading into Frijoles Canyon was completed by Floyd Hanks during the month and the final inspection and estimates have been made. A light coat of oil was also applied to the utility areas and to the road leading to the residences.

The approach road is in average condition. The entire road has been bladed several times and the dips in Pajarito and Water Canyons were leveled up. The rocks in the roadbed near Pajarito Canyon were removed. Logs were cut and hauled for the repair of one of the foot and horse trail bridges above the headquarters area.

Special Activities

The custodian met with Mr. DiLuzio of the Atomic Energy Commission on September 9 and 19 to go over a section of road in Sandia Canyon that was desired by the Commission for entrance into Los Alamos lands. It was finally decided that the Commission would use another road that is just outside of the monument.

Messrs. Bradley, Thomas, and Diehl from the Region Three Office, Mr. O'Connor of the Atomic Energy Commission, and the custodian inspected several possibilities for the power line from Los Alamos on the 24th. The route from the west gate of the Los Alamos project was decided on as being most favorable.

Power Line

Negotiations with the Atomic Energy Commission have re-opened with reference to a hookup with their power line and the outlook for favorable approval appears good despite the definite refusal reported in August. A preliminary survey of a proposed line is now underway by Engineer Bradley of the Region Three Office.

Maintenance

The electric power system still causes some difficulty, but the repair and re-installation of the Diesel plant by Los Alamos technicians have at least temporarily solved our major difficulty. The 3 KW plant was put in place for use during the winter to provide daytime office lights.

The maintenance man spent some time converting the dormitory into light housekeeping quarters to alleviate the housing shortage.

Increase in Travel

The travel for September kept up very well to show an increase of more than 200 people over September of 1946. The annual travel figures at the close of the travel season indicate an increase of 8% over those of 1946 and are the largest in Bandelier history.

Interpretation

The interpretive program was changed at the time of the release of the seasonal rangers on Labor Day. The evening lecture program has been dropped and the ruins trip schedule was altered to provide 7 trips daily at 1½ hour intervals in lieu of the 10 trip schedule. More people went through the ruins this month than in June, although there were a few less parties.

Visitors

Noteworthy visitors during September were Chief Historian Lee and his party including Mrs. Lee and Dr. and Mrs. Hans Huth who were escorted to the monument by Erik Reed and Dale King. Other National Park Service official visitors during September included Charlie Steen, Inis Castellum, Sam Hendricks, Willard Bradley, John Diehl, J. R. Lassiter and Paul Thomas.

Bandelier's niece, Mrs. H. E. Kaemo, visited Bandelier with some of her family on August 31. Foreign visitors came from Canada, Mexico, Sweden, and Scotland.

Protection

A patrol of the entire boundary of the Otowi Section revealed several open gates and the need for minor repairs. A stretch of fence at the point where State Highway No. 4 enters the monument on the eastern side has not been rebuilt after having been removed by highway crews. Several cuts in the fence on the north boundary were probably made for the purpose of removing range cattle from the monument area. 12 head of cattle were removed from the Otowi Section during September.

Extensive patrol has been made of the Otowi Section for the purpose of preventing and detecting vandalism. No evidence of recent "pot-hunting" has been found, but several different parties were intercepted holding target practice on the area. These people, residents of the Los Alamos Atomic Bomb Project, were informed of the reasons for regulations against the use of loaded guns in the parks and monuments.

Installation will be made of additional boundary markers and Antiquities Act posters on both sections of the monument as they become available.

Wild Life

Two young mountain lions provided the wild life story of the year for us by chasing a doe and her fawn into Frijoles Canyon within a short distance of the stabilization crew. One of the lions was close on the heels of the fawn when frightened away by the shouts of the crew and would undoubtedly have caught it. The doe in the meantime swam across the canyon by Tyuonyi where the boys were working. The other lion was then spotted standing on a rock along the south rim almost above Tyuonyi.

Stabilization

The stabilization project got well under way as the weather stayed almost perfect for that type of work. To date, 46 rooms have had the walls stabilized and 6 rooms have had subfloor test pits completed to determine the complete construction.

Personnel

Seasonal Ranger Bob Morris was terminated on August 31 and Seasonal Rangers Jack Turney and Joe Thomas were terminated on Labor Day. Joe Thomas was reappointed NAE Guide and was on duty on weekends to help with the heavy Sunday crowds. However, due to the budget, he will not be used again after September until next spring.

Clerk Bean spent September 8 to 11 and 15 to 17 assisting with

reports on surplus property by the Regional Engineer's Office.

Lodge

It is with sorrow that we report the death of Richard X. Frey, son of Mrs. Evelyn C. Frey who operates Frijoles Canyon Lodge. Richard died at the Los Alamos Hospital on September 1, 1947.

Although business at Frijoles Canyon Lodge decreased considerably after the Labor Day weekend, the 325 lodgings during September have been considered to be sufficient to warrant continuation of operations until the middle of October.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

.....NATIONAL MONUMENT

Canyon de Chelly National Monument
Chinle, Arizona

September 26, 1947 19.....

MEMORANDUM for the Regional Director, Region three.

The following is a report of activities at Canyon de Chelly National Monument during the month of September, 1947.

Weather

Rainfall during the period has been above normal with 2.28 inches since August 25. These rains filled the stock reservoirs and many natural lakes that have had no water at this time of year for a long time. Range conditions have improved greatly. Maximum temperatures have been mostly in the high eighties with a high of 91 degrees. A minimum temperature of 39 degrees was registered on September 15. Killing frosts occurred the same night in the higher elevations. The Rains rendered Canyon travel out of the question most of the month.

Administration

A trip was made to Santa Fe and business was discussed in the Regional office on Sept.10, 11, and 12th. One trip was made to Gallup, New Mexico on August 25 for supplies and equipment. Patrols were made in both Canyons.

Maintenance

The heavy rains rendered the approach road from Chinle almost impassable as the road in spots has sunken lower than the wash. Some fill was made but a detour road was repaired and made usable. Roads have been drug and fills made where they were damaged extensively by the rains. A water pipe broke under the floor of the Service porch. This was dug out and repaired. much time has been spent in small maintenance jobs. The Dump Truck is being overhauled at the Indian Service Garage.

Ranger Service

Temporary ranger Richard K. Thomas was separated August 31. Park Ranger John S. Benson resigned his position on September 19. This now leaves only the Custodian on duty.

Visitors

Dr. Earl H Morris and his new bride visited the area on September 21 and 22nd. Mr. and Mrs. Millotte of Millotte enterprises were also in.

Visitors- Con't.

The Millettes are motion picture photographers who work with Walt Disney studios and others.

Travel

The travel year to date closed with a total of 2232 visitors or an increase of 493 over the 1946 figure of 1,839. Had road conditions been better during August and early September I believe that we would have exceeded any travel year to date. Although our travel was well over last years figure, our concessionner, Thunderbird ranch did only about half the amount of business. Campers were far more numerous.

Archaeology

A well preserved mummy of a turkey was discovered by Ranger Thomas while working on pictographs in a cave just west of the south of Del Muerto. Permission was obtained to remove it and when Dr. Earl Morris was here he kindly helped me to remove it and said that it was undoubtedly an early Basket maker burial. Its head had been removed but otherwise it is in surprisingly good condition. To our knowledge, this is the best preserved and only whole mummy of a turkey from this period. It was an interesting burial in that it was not associated with any others and had apparently been interred in a crude rock cist.

It was a privilege to be able to go over some of our sites with Dr. Morris and hear his interesting stories of his archaeological work in the canyons.

Interpretive Services

A total of 32 conducted trips were made into the canyon with 219 people. Time spent with these groups totaled 102.5 hours.

September 25, 1947

Memorandum for the Region Director,
Region Three, National pPark Service,
Santa Fe New Mexico,

There follows a report of the activities in and asound Capulin Mountain National Monument for the month of September 1947.

Four thousand five hundred visitors to the old Volcano this month, bringing total travel yr to date to 29460 and fiscal year to date to 19.500

Free Publications of the folders describing this Monument on hand at this date four hundred,

Weather

has been extra fine all thru the month, a light frost on the night of the twelvth and since that date extra nice and warm every day. Three days of fairly high winds and one day partly cloudy.

Roads and Trails in the Monument are in fair condition, despite a very heavy usage all summer, It appears that we have had more satisfied visitors this summer than ever before and the road has required considerable attention, however we have had no/ serious washouts as we usually do have each summer, We have hed only the ruts and the falling rock and cinders to contend with.

Fall color has begun to show among the thees and bushes, yellow, gold, purple, green and red and many other shades as always shows in the Autumn.

Very Respectfully,

Homer J.Farr,

RECEIVED

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Sept. 25, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows the narrative report for Casa Grande National Monument for September, 1947.

General: A report by the Mesa Junior Chamber of Commerce, states that visitor inquiries received are greater than ever before. They also state that they are prepared to take care of over twice as many visitors with 19 new auto courts having been completed in the Mesa district. Additional accommodations are avilable throughout the Valley of the Sun, and the lack of them which was the limiting factor last year, shouldn't affect the visitor totals. If the weatherman cooperates southern Arizona should be in for a banner travel season.

Weather: A comparison with Sept. 1946 indicates that Sept. 1947 averaged out to be about the same. A high of 113 and a minimum of 57 was recorded. Rainfall on the monument was negligible with .01 inches falling as compared to over 4" last year. Reports from the surrounding country and the watersheds behind Coolidge and Roosevelt Dams indicate that the rainmakers have been active and there are several thousand acre feet of water now in reserve behind them. The peak for water using has been reached however and now the concentration is on getting enough water in storage to assure a supply for next year.

Administration: On 8/25/47 The Tucson Roofing & Contracting Co. started work on Contract # I-33NP-96, which consisted of repairing and replacing flashing on utility area buildings and stuccoing fire walls. This work was completed on Sept. 5. C. Fitzpatrick picked up the junked Ford Pickup, Serial # 18-4553405, which he purchased under Region Three Contract # 33-5.

Visitors: September - 1947: 1680; September - 1946: 1771; September - 1941: 1008. Travel year to date 1947: 34,416; Travel year to date 1946 : 26,194. The increase in travel over 1946 amounts to 8222 visitors or about 33%. Revenue from ticket sales totalled $5700.00. SWPM Association publication sales were $1470.00 and figuring a 30% profit it would give us a revenue produced of $6200.00. Last Year when questioned a lot of the visitors stated they came down in Sept. because they were afraid they couldn't get accommodations later but this year with the increased tourist courts and etc. available one begins to wonder just what is in store for us.

RECEIVED
SEP 29 1947

.. Interpretive Services: Of the 1680 visitors to the area 926 made the Ruins trip in 136 trips averageing 50 minutes per trip. 786 made the museum trip in 116 parties averaging 23.5 minutes per trip. One armed forces visitor in uniform is included in the above total. The visitors as a rule are very interested and their thankyous and expressions of appreciation can usually be heard at the end of every trip. 754 came into the area but did not make the Ruins trip.

Maintenance: The museum cases were opened, cleaned, and worked over. In quarters # 6-3 an electric hot water heater was installed, bathroom, kitchen, dining room, living room, and hall were painted. Outside of the same quarters a concrete base for butane tanks, and concrete drains for taking water away from house, were installed. Two truck loads of dirt were hauled and placed around the base of the quarters. The pump house was rewired and new fixtures installed. In quarters # 9-1, the apartment, the main room was kalsomined, wood work painted, and fixtures and furniture cleaned up. The files are gradually being worked over, old and obsolete material pulled out and placed in back room, and new file covers and headings made.

Trips Taken: Sept. 3 & 17th. Mechanic Stonehocker made trips to Phoenix to pick up parts. Sept. 22, Custodian Bicknell w/Chief Clark Gastellum made trip to Tonto National Monument, returning that evening. On trip Tonto's repaired wash machine, 1 doz. bird traps, and 2 butane tanks were delivered.

Personnel : Archeologist Schumacher resigned effective at 5 P. M. Sept. 4. He, Mrs. Schumacher, and the baby left here the morning of the 5th. for Houston, Texas. His purpose in resigining was to go back to school and work toward getting his Dr's degree.

Leaves Taken: On 8/25/47 Mechanic Stonehocker returned to work after being on leave which started Aug. 1. Sept. 1st.. he took one hour of sick leave. 9/7/47, Ranger Schuft returned to work after being on leave for approximately a month.

NPS Visitors & Visitors of Note: 8/25 & 9/17, Custodian Egermeyar in to pick up (on 25) International Tractor to go to Montezuma Well to get hay for Saguaro, and on 17 to pick up repaired panel truck. 8/29, Ranger Fulton returned Tractor and picked up Saguaro Stake truck. Sept. 10 & 13, Ranger Ringenbach of Organ Pipe was in on his way to Walnut Canyon to pick up materials for Organ Pipe, and also stopped on his way back to drop off Custodian Beaubein. Custodian Beaubein was in to pickup dump truck for Waupatki. Sept. 21, Chief Clark Gastellum stopped by. Custodian Bicknell took him to Tonto on the 22, and he returned to Tucson the afternoon of the 23. He cleared us up on a lot of our fiscal matters and we would be glad to see him again when he can spend more time. Sept. 15, maintenancemman Bowden of Organ Pipe was in to pick up a dump truck and brought in Organ Pipe's old one.

Injuries Suffered: On Sept. 18, Mechanic Stonehocker while repairing starter on one of the trucks had the hood catch release, which dropped the hood on his head, opening a cut which required stitching by the Dr. After treatment Mechanic Stonehocker returned to duty.

Nature Notes: Sept. 21, the bats almost completly vacated the Ruin, which is one of the earliest vacating dates on record. All compass cactus around the area have bloomed or are in process of blooming, and various stages from flower to fruit can readily be seen. The mesquite trees are heavily infested with miniltos requiring some eradication work.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Chaco Canyon NATIONAL MONUMENT

Bloomfield, New Mexico

September 24, 1947

MEMORANDUM for the Regional Director, Region Three,
National Park Service.

There follows the report of activities in Chaco Canyon National Monument for the month of September, 1947.

This month, Chaco Canyon had 98 visitors which is 10 less than last month, and 17 less than a year ago this month. The rains during the last 45 days and the poor condition of the roads kept some away who might have come. After the floods of last month, with bridges out and the like on the better traveled roads, the graders of neither county have been able to get out here as yet. The visitors came in 35 automobiles from the states of:- California - 7 cars, 17 visitors; Colorado - 4 cars, 12 visitors; Illinois - 1 car, 4 visitors; Kansas - 2 cars, 6 visitors; New Jersey - 1 car, 1 visitor; New Mexico - 11 cars, 29 visitors; New York - 1 car, 2 visitors; Ohio - 1 car, 2 visitors; Oregon - 2 cars, 7 visitors; Texas - 2 cars, 8 visitors; Utah - 2 cars, 8 visitors and Washington - 1 car, 2 visitors.

All these visitors took a trip through the ruins, and formed 33 parties. 75 persons listened to the museum talk, and formed 22 parties. There were 74 paid admissions, 4 tax only children, 3 complimentary tickets issued, 15 children less than 12 years of age, and two members of the Armed Forces. The total time spent with the parties was Ranger 17 hours and 5 minutes, Custodian 29 hours and 40 minutes.

The warmest this month was 94 degrees on the 2nd of September, and the coolest was 35 degrees Fahrenheit on the 13th of September. Rain occurred on the 29th and 30th of August and the 7th, 8th, 18th and 19th of September which formed a total precipitation of .63 of an inch for the month.

RECEIVED SEP 29 1947

This month saw Ranger Guillet leave Chaco Canyon. We are happy for Bill in his new assignment at Colorado National Monument, but everybody in the Canyon hated to see him go. He is not only a good worker, but a mighty fine fellow. He was terminated September 15.

In the way of good news, we have Raymond Rixey who has just come in as a foreman for the ruins stabilization crew. He all already knew him from the University of New Mexico summer field session at Chaco, and welcome him to the Canyon.

The fence job was taken up again, when weather permitted, and the fence was carried to the mesa. However, there is yet to close the mesa tops, fill in the water gaps when the water goes down and weld the rails of the guard. When the roads get in better shape, the welder is going to bring his trailer with the electric welding outfit and weld the rails together.

The seeding project got under way with the assistance of the Regional Soil Conservationist who was here at the time. 1000 pounds of seeds of different kinds were put in the ground, some Blue Grama, some Western Wheat Grass and some Sand Dropseed. The seeds were planted on barren spots, and it is hoped that they will prove of great aid in soil conservation next summer. Immediately after the job was completed, it rained, which was what was hoped for. It's an ill wind.....

We are still working on our roads. The main road through the Monument is in passable shape, but the culverts have not been put in for lack of cable, though the one which washed down the stream (each of the two sections weigh approximately 1000 pounds) has been brought back the quarter of a mile to the road. The minor road to the west gate has been completed, and now the men are working on the north side of the arroyo east from Headquarters. At one hole in the road they have dropped 30 yards of dirt, and it is still a deep hole!

As the cooler weather comes, the campers and picnickers use more wood, but a plentiful supply is kept on hand for them.

Radio communication with El Morro National Monument has been regular and satisfactory for the past month.

Two of our heavy jacks, 25 ton, were loaned to Aztec Ruins National Monument.

Some visitors, including National Park Service personnel, were:- Dr. Erik Reed, Paul Reich, Le Roy Weaver from Mesa Verde National Park, Dr. and Mrs. Lee from the Director's Office, Dr. and Mrs. Ruth, Mr. and Mrs. Earl Morris, Dr. Reiter, and others.

The Trader, who is in the midst of lambing season when the Navajos pay their debts for the year, reports that he now has a better quality and a greater quantity of goods on his shelves than ever before. In retrospect, he finds this last summer that rugs moved faster than he could get them from the Navajos, that jewelry and the more expensive souvenirs moved slowly with the exception of jewelry made at Chaco Canyon.

Projects for the ensuing months:- get the place buttoned up for the winter, put in the culverts and repair the wash near the bridge when the cable and the end section for the culvert arrive; install the new water pump, which should arrive any day; get the planting project started; get the cattle guard welded; get the water gaps closed; etc.

At the end of the month, there were on hand:-

Free two-fold leaflets on Chaco Canyon, approximately....3500
National Park Location Map, number 6, " 330

There follows the report of Archaeologist Richard G. Vivian.

Irving McNeil, Jr.
Custodian

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Chaco Canyon NATIONAL MONUMENT

Bloomfield, New Mexico

September 24, 1947

MEMORANDUM for the Custodian,
Chaco Canyon National Monument.

There follows the report of Mobile Unit activities in your area during the month of September 1947.

Raymond Rixey from the University of New Mexico reported for duty September 17th. He replaces Al Lancaster who left the last of June for a month's duty at Tumaccori and has since completing that assignment been on detached duty at Mesa Verde pending the establishment of a position there.

Some time has been lost this month due to rain. During the early part of the period the labor supply was short and due to prolonged absences and resignations we were down to six men. The crew has been built up within the past week to fourteen.

The entire work month has been spent in emergency measures in the section of Chettro Kettle damaged by flood waters. One hundred thirty man days have been used in removing debris and the remainder of the time in shoring walls and laying support masonry.

On the east side three rooms have been cleared of debris and the fill partially removed from the narrow rooms, 36 and 37, which adjoin Kiva G/H. The debris in this sector, fallen wall and silt carried by flood water, runs from three to five feet in depth. The bottom of this while no longer muddy is very damp and still hard to work.

A small section of dangerous, overhanging wall was removed in room 40 S.

Here still on the east side the south walls of two rooms, 49 and 50 plus the division wall between them, have been carried up to a height of five feet as bracing for the fill still remaining in 36-37 and for the lower walls of Kiva G/H. The lower levels of these walls have been reset in concrete mortar.

On the west side of the damaged area the debris has been removed completely from 4 rooms, partially from 2 and the fill in two of the long corridor rooms has been cut down to expose wall which it covered when it slumped into two rooms which had been excavated to a depth of twenty one feet.

Debris on the west side averaged five feet in depth. The fill sections removed ran from six to twelve feet. All soil and unusable material has been dumped in badly washed areas along the road and around the bridge approaches.

In cleaning up to date some 200 timber specimines have been recovered, tagged and stored and many more are in sight.

On the west side one buttress section in reinforced concrete has been built against the overhanging east wall of 59 to support both it and the attached north wall. The extension of this wall in 59 has been completed as far as the foundation.

In progress are repairs to the bases of 55 and 58. This work is also being done in reinforced mortar and when complete will hold the remaining fill in the long rooms between the deep excavations and kives I and J.

Dangerous wall fragments some of them two and a half storeys above the workmen have been removed in rooms 55, 60 and 61. In room 61 two ½ story fragments of remaining wall have been supported temporarily with jacks and timber bracing.

Gordon Vivian
Archeologist

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

CHIRICAHUA NATIONAL MONUMENT

Dos Cabezos, Arizona

September 26 1947

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Chiricahua National Monument for September.

Weather. August was the only wet month of the year to date. A total of 8.09 inches of rain fell during August, making it the wettest August of the nine on record at Chiricahua. However the rainfall for the year still below average and September to date has turned loose of only .19 inch of moisture. Most of the rains were typical Arizona deluges that were local in nature and did considerable damage to roads.

Inspections. Assistant Regional Director Davis, Engineer Hendricks, Architech Saunders and Regional Forester Carlson arrived at the Monument September 22 and stayed until the morning of the 23rd. Roads, trails and equipment were inspected. Douglas fir insect infestations were inspected with Forester Carlson and some maintenance and improvement work on residences was gone over with Mr. Saunders. Chief Clerk Castellum arrived at the Monument September 24 and stayed until the 25th. Fiscal matters, office procedure and etc were discussed. The Custodian feels that considerable was gained by all these inspections.

Maintenance. Heavy rains during the latter part of August brought down more water than many of the culverts could carry and caused water to overflow and cut out the road in many places. The worst of this damage has been repaired by Operator Marble with the Temporary Ranger and Custodian helping some.

Approaches to the Monument. Approach roads have been rough from the August rains but most all have been graded and are in fair shape at present.

Concessioners. The Silver Spur Guest Ranch has not been a concessioner in furnishing meals and lodging for Monument visitors, as they are located on private land. However, they have been the only source for these accomodations. It is therefore of interest to know that they have closed down awaiting a change of management. It is thought they will open again in the near future.

The Riggs family at Faraway Ranch are still handling saddle horse trips onto the Monument. The bus concessioner has had no bus trips to Chiricahua for about three months.

Interpretive Service. No conducted trips were made this month. 989 visitors in 228 parties were contacted in the museum.

Increase or Decrease in Travel. 1106 visitors came to the Monument the past month. This compares with 1457 for August and 1758 for September of 1946. Part of this decrease is accounted for by the Happiness Tours not continuing this year, but there also seems to be a slight slacking up in travel.

Ranger Service. Seasonal Ranger Hoffacker left September 10 for George Washington University in Washington, D. C. This leaves Operator Marble and the Custodian as the only employees on the Monument until the permanent ranger position is filled.

Insect and Tree Diseases. A number of Chiricahua's douglas firs are being killed by what seems to be a primary infestation of flathead borers. Samples were collected by Forester Carlson and the Custodian and sent to the Bureau of Etomology and Plant Quarantine for identification.

NATIONAL PARK SERVICE

El Morro NATIONAL MONUMENT

Ramah, New Mexico

September 26, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows the report of activities in El Morro National Monument for the month of September, 1947.

WEATHER: Our rainy season continued through the 8th of September giving us a total of 3.35 inches. The temperature range was very great with a maximum of 87 degrees and a minimum of 34 degrees.

TRAVEL: The continuation of our summer rains made the approach roads impassable during most of the report period. A few brave souls did get to the monument but it was necessary to escort them through the worst mud holes, and this condition explains the 44% decrease from the same period last year. However , inspite of this heavy drop in travel, the total visitor count for the 1947 travel year shows an increase over last year of 26%. A total of 135 people arrived at the monument in 32 cars and one bus. Only twelve states and one foreign country were represented. The tour of the inscriptions was made by 107 people in 22 trips and the total guide time amounted to 22 hours and 45 minutes.

APPROACH ROADS: During August and September the total rainfall amounted to 11.66 inches which comes very close to the average annual precipitation of 12 inches. This abnormal amount of rainfall coming in heavy summer showers has made both approach roads impassable for periods of two weeks at a time. One irate visitor who didnt make it tho the monument wrote us a letter in protest to the condition of the road. He signed it "In sympathy with your plight I am sincerely yours,"

It was understood from the State Highway Department that the survey for the improvement of Highway #53 would be completed this fall, but no stakes have been seen on the road yet. The Chamber of Commerce of both Grants and Gallup have been asked to make special request that this work be done before snow flies so that actual construction work can be started in the spring.

RADIO CONTACT: Communication with Chaco Canyon has been regular and very useful.

PUBLIC HEALTH: The regular bi-weekly samples of our water supply were sent in this month and the report is the same as usual, Sandstone Pool contaminated, but safe at the Custodian's Residence.

RECEIVED SEP 29 1947

NPS VISITORS: Much to the Custodian's disappointment Erick Reed, Chief Historian, Ronald Lee, Mrs Lee, and Dr and Mrs Hans Huth did not arrive on their scheduled date of September 11, but came in on September 12 when the Custodian had to make a trip to Gallup. By telephone arrangements were made to meet them in Gallup and one very interesting hour was spent with them.

GENERAL: With the drop in travel Ranger Bill Scott was able to complete the project of putting the files in order. A project he started in June and if he had done nothing else this would have justified his employment. Bill returned to college September 15th, but not without signing a statement that he would return to El Morro next June.

On August 25th the Custodian made a trip to Grand Canyon to pick up surplus property, stopping at Walnut Canyon and returning to El Morro August 28th. The trip was sort of an Old Home Week Tour seeing Jimmy Brewer Paul Beaubien and a great many R.O. and Bandelier personnel at Grand Canyon.

Four loads of coal were hauled from the Indian Service Mine and this amount should hold us for the winter. One load of gravel was hauled for the floor of the generator house. Four yards of fill was removed from the cattleguard and used on the entrance road to patch washouts.

Bates E. Wilson
Bates E. Wilson,
Custodian.

GRAN QUIVIRA

GRAN QUIVIRA, NEW MEXICO.

SEPTEMBER 27, 1947

MEMORANDUM FOR THE REGIONAL DIRECTOR, REGION THREE.

The following is a summary of activities for the month of September, 1947

Visitors this month totaled	294
Travel year to date	2588

Weather. This has been an unusually dry September. No precipitation of any nature. However, the days have been very pleasant and warm with cool nights. High temperature for month was 90 and low 37.

Roads. The State Highway maintainer has finally been repaired after a two months breakdown for repairs, and as a result, both approach roads are in good condition. Especially the road from Mountainair.

Travel. September travel figures indicated a sharp decrease under August visitation. A decrease of about 55%. Instate visitors numbered 204 and outstate visitors 90. There were a total of 83 cars with instate numbering 58 and outstate 25. 7 people walked out to the monument.

Guide and Contact Service. A total of 294 visitors were conducted through the ruins in 83 guided tours. The average time spent by each party was 55 minutes. Total contact time of 76 hours, 20 minutes.

Maintenance and Administration. Several directional monument road signs were repainted and relettered and placed on State Highway 10 to Mountainair. Inventoried and cleaned all tools in tool shed. A supply of fire-place wood was hauled in for use by custodian Bowen, who is to arrive from Grand Canyon. Minor repairs were made on walls of the south and east corridors of the mission converto. Drainage ditch was cleaned out and weeds removed from the entrance road to the monument. The automatic electric sump pump, which supplies water to the residence, was completely overhauled and is now in excellent working condition. Also, the starter and generator on USDI 1-13850 were removed and repaired.

Publications Report. 700 Gran Quivira two-fold leaflets on hand. No other free or for sale publications on hand at this monument.

Custodian.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
GREAT SAND DUNES NATIONAL MONUMENT
MOSCA, COLORADO.

September 26, 1947.

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in Great Sand Dunes National Monument for September, 1947.

WEATHER. Typical Indian Summer has prevailed during this report period. The maximum temperature is estimated to be about 75 degrees; the minimum has reached an estimated 37 degrees. Aspen at the 9,000 foot mountain level has turned yellow and orange and the Sangre de Cristo Range is beautifully colored. The first skift of snow on Mt. Cleveland was seen on September 5, and the second snow on the 23.

Rain fell on September 6, 8, 9, 10, 17, 18, 19 and 23. The Medano is still running, but has retreated above the camp-ground. Two chilly days made it necessary to burn the oil stove for heat in the custodian's residence. It won't be too long before winter makes its appearance.

TRAVEL. Two thousand six hundred eighty one visitors in six hundred eighty-four cars, visited the Sand Dunes during this report period. Thirty-two states and the District of Columbia were represented. One member of the Armed Force was counted.

One thousand six hundred thirty-one people took advantage of the camp and picnic areas, and of these seventy-two camped over night.

One written request for information was received and answered.

INCREASE IN TRAVEL. For September, 1946, the record shows 404 cars and 1720 visitors.

TRAVEL YEAR. A tremendous increase in travel is indicated by figures which show that more people visited the Sand Dunes this year than in any previous travel year. There were a total of fifteen thousand two hundred twelve visitors for the 1947 travel year. Visitor days amounted to twenty-three thousand three hundred twenty-three. Travel to this area has doubled over the 1946 travel year, which shows a travel figure of eight thousand seven hundred fifty-three and visitor days amounted to eight thousand nine hundred and three.

This was truely a year in which the American tourist took to the highways and was interested enough in his country and especially in his National Park System, to turn off and visit the various Western and Southwestern Parks and Monuments.

Far better service could have been given these visitors if additional personnel were on hand for interpretation---not only is this true especially for a one-man area, but the entire Park Service suffered for this lack of personnel for the travel year.

ROADS. Due to mechanical break-downs with the State Highway Grader, the approach road suffered accordingly. The road was finally bladed on September 18, and it is hoped that the repaired grader will continue once more to grade on the average of once a week. It was necessary to haul two loads of rock and gravel for filling in the washed-out section of the monument road. The three mile stretch of monument road was dragged and some improvement was noted.

COMPLAINTS. The approach road and picnic areas received the majority of complaints. With visitation dropping off, there were less cars that became stuck in the loose sand of the lower picnic area, but it was necessary to dig out four cars.

The necessary time has not yet been found to locate more information on flush boxes needed to complete the rest-rooms at the checking station.

KENSWORTHY VISITORS. Post-man holidays brought in the Supernaugh family on September 5; Glen Beam on September 13 with fire extinguisher fluid; and same day the Sullivan family---it was a great pleasure to meet them and hope Maurice may return to give us more information on our natural phenomena. On September 19, the Grantland Rice Sportlight made its appearance to photograph a few skiers on the sand for an educational short. Conditions were not altogether favorable for the filming, but they hoped that enough footage would be considered good enough for the intended short.

WATER RIGHTS. A letter was received from Linger Bros., requesting more information on the problem of the water rights. This was immediately answered, and it is hoped this matter may be cleared up in the not too distant future.

MINERAL CLAIMS. Considerable time was spent at the Alamosa County Court House in connection with the Mineral Claims existing on the monument lands. From present records, it would seem that the Jones Claim on Dos Pesos Lode corresponds to the claim of the Jerry Lode made by the Myron Stratton Home for Girls in Colorado Springs. More information is needed before further action, if any, is taken.

ACTIVITIES. With the considerable decrease in visitation over last month's high, time has been found to begin work on filling in the water line trench before winter sets in. Due to crops being retarded in the valley, all farmers and ranchers were using their tractors for harvesting hay and potatoes. Not one tractor could be located in the immediate vicinity for the purpose of filling in the 1500 foot trench. So Sowers with weak mind and strong (?) back took up shovel and todate has 185 feet covered---only 1315 feet more to go!

The picnic and camp-grounds received their usual clean-up---hope that extra barrels may be obtained for garbage and trash cans.

Two trips were made to Alamosa for gasoline and supplies and also for mining claim data.

The south window and west windows and door of the office received a coat of paint. Touch-up paint is being applied to the most exposed parts of wood-work on the custodian's residence.

The Dodge 4x2 was taken to the Heide Garage and is still there awaiting necessary repair parts.

All fire extinguishers were checked and fluid placed in the three new ones.

Fire tool equipment is being sorted and transfer papers made out for their ultimate shipment.

A trip to Grand Canyon National Park and other points, is anticipated next month, in order that the 950 gallon tank may be of use this winter in holding the necessary supply of fuel oil.

PUBLICATIONS. There are on hand thirty-nine of the mimeographed informational leaflets. Twenty welcome copies were received from the Naturalist Office. A copy of a revised informational leaflet was submitted to the Naturalist Division, and it is hoped that it can be mimeographed for the 1948 travel season.

Ted C. Sowers,
Custodian.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Montezuma Castle NationalMonument
Camp Verde, Arizona

September 24, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows the monthly report of activities at Montezuma Castle and Montezuma Well for the month of September, 1947.

Visitors this month - Montezuma Castle - 2468; travel year - 19818.
Montezuma Well - 619; travel year - 1347.

The travel count for Montezuma Well covers only the visitors contacted. At least one-third more visited the area. Travel figures for the year for Montezuma Well cover those beginning with the June report. At the Castle we had 4924 more visitors this travel year than last and 10,383 or 110 per cent more this year than in 1941.

Administration All of our time has been spent on visitor contact, imperative maintenance, patrols, and attention to matters pertaining to Montezuma Well. We are still offering ten hours of guide service each day with trips 12:00 to 1:00 and 5:00 to 6:00. However this will be reduced to eight hours guide service each day with the termination of Ranger Frost on September 27.

Custodian Egermeyer hauled a load of baled hay from Montezuma Well on August 26 and Ranger Fulton took the last of it on August 30. No bids were received for harvesting the third crop and the fields have grown up to weeds for lack of care.

Ranger Frost has completed a map indexing system. Our maps and charts are now indexed both by number and by the subject covered.

On Labor Day Ranger Schroeder was the only man on duty at the Castle and no one was at the Well to economize on our funds.

This month's book sales totaled $107.90 with a shortage of $8.60 on the "serve yourself" plan. Total sales for the quarter were $322.58 and the total shortage $22.35.

Nine unsolicited Semichrome pictures of Montezuma Well were received to retail at $5.00 each. The pictures require special handling and wrapping and are too expensive to have around where they are liable to damage from rodents and insects. A frame was made for one to be used for display purposes.

Ranger Leding was on annual leave from September 6 through September 19.

Our supply of mimeographed leaflets ran out September 7. Another handful received from the Regional Office was gone in less than three days. Word has been received that the leaflets ordered in June, 1946 will be delivered this month.

Ranger Frost was called to Cottonwood on the afternoon of September 12 when it was found that his wife must undergo an emergency appendectomy.

Weather A cloud burst a few miles to the north and east brought the creek up about eight feet in a few minutes. Water overflowed the edge of the picnic ground and went through our revetment but did no appreciable damage. This monument received .80 inches of moisture in the storm. Maximum temperature for the month was 106° and the minimum 60°. Total precipitation was 1.11 inches.

Maintenance On August 27 the Custodian spent a half day unplugging the sewer from Residence No. 2 — the second time in a week. He also had to unplug the sewer from the ladie's restroom.

The Grunow refrigerator in Residence No. 1 has ceased to function. Efforts made since June, 1946 to get a replacement have so far been unsuccessful.

Protection All boundary and drift fences on the north side of Beaver Creek were patrolled and minor repairs were made.

Di-chlorobenzene crystals were placed in the herbarium and study collection cases.

National Park Service Visitors to Castle or Well Ranger Aubuchon and Mr. Roy A Prewitt, Economist from the Director's office were here August 31.

Custodian and Mrs. Supernaugh were here September 1 and Bill revealed his Indian blood when he sat on the bench while his wife climbed the ladders.

Custodian and Mrs. Beubien and Ranger and Mrs. Upton were here September 3.

Use of Monument Facilities By The Public The county road to Camp Verde crosses this monument and a traffic counter placed by the State at our east cattle guard revealed that 337 vehicles entered or crossed the monument in 48 hours from September 3 to September 5.

The Castle and the Well had a total of 3087 visitors who came in 912 vehicles. Tickets sold at the Castle, 776; Complimentary Admission tickets used, 53; children who climbed free, 112; armed forces visitors who climbed, 1.

Contact Time at Castle Total contact hours, 232.50; Hastings, 79.00; Leding 44.25; Frost 101.25; Schroeder 8.00. There were 179 trips for 942 visitors

and 1146 visitors saw the museum in 188 groups. Visitors receiving information outside the ruins or museum totaled 733. Numerous visitors who wanted to climb into the Castle were turned away when they found that our quota of nine for an hour was full.

Contact time at Montezuma Well is reported separately.

Visitor Reaction Some visitors upon their first view of the Castle were reported to say, "Look vot ve got here, Isaac. The Government will build anything to make a few dollars."

Montezuma Well The following report has been received from Archaeologist Schroeder.

General Daily duty was maintained except for lieu days and as follows: September 1, holiday, on duty alone at Montezuma Castle. Four hours annual leave were taken on September 2.

Visitors Detailed visitor statistics were kept this month in an attempt to ascertain the extent of visitor use. 619 visitors were contacted in 178 cars. In addition 43 pamphlets were removed from their box on lieu days, 26 after 5:00 P.M., and 36 during work days when maintenance duties kept me away from contact. In all, 103 pamphlets were picked up for which there was no contact. It is quite evident from the above that the majority of the pamphlets are not being returned.

Three hours and 20 minutes were spent contacting 139 cars averaging about 1½ minutes per car. Nine hours and three minutes were spent on interpretation in the museum for 190 visitors in 57 cars, an average of about 10 minutes per car. Only about one-third of the travel spent any time in the museum, probably because of our lack of exhibits.

70 visitors in 16 cars spent 15 hours and 21 minutes at the picnic grounds and 1 car of 3 camped over night. 159 cars spent 84 hours and 51 minutes at the Well, about 32 minutes per car. 164 cars spent 112 hours and 30 minutes as total time in the area, an average of 43 minutes per car. Figures will not balance because of incomplete statistics on all cars - i.e. cars that came in prior to 5:00 p.m. but left after 5:00 P.M.

Administration A cloudburst on September 6 caused considerable damage to the road and trail and flooded the museum. The latter resulted from improper drainage of the county road and the county supervisor has been contacted in this regard. Most of the month was spent in cleaning up the area, repairing trail damage, building diversion revetment, cleaning the museum and disposing of rubbish.

A supply of the revised trail pamphlets was received. The mimeographing was a perfect job. About half of these pamphlets have been stapled. Added trail signs were set up to conform with the revised pamphlet.

The State Highway Department took a traffic count on the county road. In a period of 4 days 320 cars passed over the counter at McGuireville. Somewhere between 1/3 and 1/2 of this traffic visited the Well during this

period. A daily check was made at two counters close to the Well to determine this figure.

Buildings The Webb Contracting Company began work on the renovation of the quarters September 3 and completed their work September 10. The house was rewired, bathroom fixtures installed including a hot water tank, the floors were repaired and covered with linoleum, and the door and window frames were repaired.

Except for the final hookup the Wingfield Commercial Company completed installation of the pump for the household well on September 17 and Custodian Hastings and Schroeder installed the plumbing from the pump to the quarters.

The Arizona Power Company installed a 220 volt line to the quarters September 10.

The entire quarters were sprayed with DDT on September 16 and 19. The spraying took a heavy toll on the spiders, flies, and bed bugs. It disturbed the bats sufficiently to force them out during the spraying, but they have been finding ways to return to the attic.

Stabilization An inspection of the ruins after the cloudburst revealed that considerable mortar had washed out of the walls of the lodge ruinsmas well as some of the standing walls nearby. An effort will be made to determine the amount of material required to rectify this erosion.

Research Additional information pertaining to the ditches and water rights was assembled and sent to the Regional Office.

Cataloguing of the archaeoligical specimens was undertaken on Sundays between contacts and 50 stone artifacts have been catalogued.

Service to the Public 84 pamphlets were sent out resulting from requests made during the period when our supply was down to 7.

A letter from the American Automobile Association requesting information on the Well was answered.

Publicity Charles Parker of Prescott revisited the Well to obtain additional information from our fact file in connection with his articles on the Verde Valley to be published in Arizona Highways.

Homer F. Hastings,
Custodian.

P. S.

Our publications report is submitted separately as directed in FO-601, August 19, 1947.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Arches NATIONAL MONUMENT

Moab, Utah

September 29, 19 47

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Natural Bridges National Monument for the month of September, 1947:

GENERAL: Some travel is coming to this area via the White Canyon road from Hite despite the fact that no maintenance work has been done on this section during the summer. It is still passable but very rough.

TRAVEL: The travel to this area is holding up very well with 68 cars and 216 people for the month. This is an increase of 50 people over August but fell short of September, 1946 travel by 29 people. States represented were California, Colorado, Florida, Illinois, Kansas, Massachusetts, Ohio, Pennsylvania, Utah, Texas and Wyoming. The Utah Wonderland Stages visited the area twice with 12 passengers.

INTERPRETIVE SERVICES: A total of 55 parties containing 174 people were contacted at headquarters and 14 parties consisting of 41 people were taken on guided trips to the various bridges with an average trip duration of 3 hours. Outside contacts were made with two parties containing 4 people.

WEATHER: Good weather was the rule most of the month. A heavy rain fell on the morning of September 9th. The last few days of the month were unusually warm.

MAINTENANCE: Signs were repainted at Arch Canyon and Owachomo Bridge. A new sign was installed at Fry Canyon due to complaints by visitors that trail was inadequately marked. New signs were installed to the junction in Blanding.

Several days were spent improving the road above headquarters and it is now in very good shape.

The trails were put in good shape after the storm of August 20th. The storm of September 9th caused some additional damage but at this writing they are again O.K.

(in trip.).

Russell L. Mahan
RUSSELL L. MAHAN
Acting Custodian

NAVAJO NATIONAL MONUMENT
TONALEA, ARIZONA

Sept 26, 1947

MEMORANDUM for the Director, Region Three

There follows a report of activities in this area for the month of September.

Attached are the following reports: Annual Travel Report for Rainbow Bridge National Monument (367 visitors). Significant is the fact that 169 visitors to Rainbow Bridge came by boat, 160 visitors muleback and only 38 visitors hiked in. The original and one copy were forwarded by Air Mail to the Director(Chicago address). Annual Travel Report for Navajo National Monument (342 visitors). The original and one copy were forwarded by Air Mail to the Director (Chicago address). The Quarterly Report on National Park Service Free Publications in compliance with PO-801 dated August 19, 1947. The Quarterly Statement of Mailings for the third quarter 1947. The Monthly Statistical Report of Interpretive Services (In triplicate). The Monthly Travel Report (10-157) in duplicate.

The Narrative report follows:

WEATHER: Unusually cool and dry. High temperature 87 degrees on the 26th. Low Temperature 40 degrees on the 11th. Precipitation 0.55 inches.

VISITORS: Only 34 visitors made the difficult trip to this area. They came in 14 cars.

ROADS: Both approach roads are in very bad condition in the Klethla Valley. The last two cars to enter each spent 4 hours crossing the flood detritus. 27 man-days were spent repairing the entrance roads. The culvert crossing in the Klethla Valley almost ~~moved out—only enough~~ road-bed remained for a dangerous diagonal crossing. By hitching our one-mule-scraper on the back of our pickup we were able to refill this crossing by making a long succession of figure "8's" with the loops on each side of the wash. The Indian Service has abandoned the first mile-and-a-half of the Cow Springs to Shonto road. The August floods had done irreparable damage. A new connecting road starts 1.6 miles east of Cow Springs and crosses the wash on a native-stone bottom.

NAVAJO NATIONAL MONUMENT
TONALEA, ARIZONA

WORK PROJECTS: The height of the chimney for the furnace was increased 4 feet.

The standby Kohler was placed on a concrete base. The gas lines were installed so that by the flip of two valves either plant may be put into instant use.

The revetment wall in the rear of residence #1 was extended 16 feet.

The flagstone terrace at the rear of residence #1 was extended to the retaining wall. Before placing these flagstones we trenched in and extended the electrical conduit to a point beyond that covered by the terrace. This eliminates disturbing the flagstones when the power lines are installed underground.

Hauling was a chore this month—4 loads of building sand from Klethla Valley coincidental to road work and mail trips. Only one trip was made to Flagstaff but both Gasoline and Bottled-gas were hauled. Flagstone was hauled from the quarry for the revetment wall and flagstone terrace. Three loads of fireplace wood were hauled in.

[illegible]: Two honeymooners were guided to Keet Seel for an overnite trip. So frightened in the nite by an owl they woke Pipeline. "Go to sleep" Pipeline advised them. Which they did only after moving their bed closer to Pipeline.

(SWMM-33 superceded by PO-601)

J.W. Brewer, jr.,
Custodian

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Organ Pipe Cactus NATIONAL MONUMENT

Box 38, Ajo, Arizona.

September 26, 19 47

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities for Organ Pipe Cactus National Monument for the month of September, 1947.

WEATHER

The hot weather held out the majority of the month with only a few breaks in temperature resulting from local showers. Maximum of 111 degrees was reached on September 4 and minimum of 58 degrees on the 10th. Precipitation totalled .36 of an inch, the lowest recorded for September since 1942. Heavier rains, however, fall in the southern and northwestern section of the monument which were not recorded.

TRAVEL

7,396 persons travelled through the area this month with only a portion of these being contacted bringing the travel year to 82,273. Several groups of campers requested sites this month and it appears that we shall have many more before travel season ends.

ROADS

The Pima County Highway Department partially cleaned up the Sonoyta highway on the 3rd and 4th, removing sand from the dips and patching up some of the worst holes in the macadam.

The Quitobaquito road was graded early in the month, but last reports indicate that recent rains have again washed it out.

ACCIDENTS

A small coupe overlooked the turn into the U.S. Custom gate and smashed into the NPS chain road barrier, demolishing the "Stop" sign and shearing off one of the heavy wooden posts placed some four feet into caliche. The cars two occupants, both intoxicated, were unhurt, though slightly fatigued and much less intoxicated three hours later after finishing the digging of a new post hole and cleaning up the road. Damage to the car was estimated at $100.

GENERAL

Ranger Ringenbach made two trips during the month - one to Walnut Canyon for heavy timber and one to Casa Grande for the OPC dump truck.

Six man days of maintenance on the north boundary fence was necessary following the flash flood of late last month.

Materials for the continuation of the Soil and Moisture program on the South boundary fence were gathered during the month with operation planned for October 1.

The kitchen of the Custodian's residence was painted by Laborer Bowden.

Ranger Fulton of Saguaro National Monument was in on August 31 with a load of hay.

PERSONNEL

Custodian Supernaugh has been on annual leave all month.

PUBLICATIONS

Informational two-fold pamphlets on hand, English version - 12,550.
Spanish version - 3,400.

PROJECTS FOR THE COMING MONTH

Soil and Moisture fencing project, visitor contact, and a hope for some construction work on the temporary Ranger residence.

May B. Klingenbeck,
Acting Custodian.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Saguaro National Monument
Tucson, Arizona.

September 27, 1947.

MEMORANDUM for the Regional Director,
Region Three.

There follows the monthly NARRATIVE REPORT of activities at Saguaro National Monument during the month of September, 1947.

WEATHER. Little relief from daily temperatures nearing 100 degrees was received; with a high of 106 making September 15 the second warmest day of the year, and a new record for the month. Several heavy thunderstorms which hit Tucson missed the monument entirely, and the precipitation for the month was less than one inch at Headquarters.

SPECIAL ACTIVITIES. The Custodian returned from a trip to Montezuma Well for a load of hay on August 27. On the following day Ranger Fulton made a similar trip for another load, returning September 1, after unloading part of the total at Organ Pipe Cactus.

MAINTENANCE. Replacement of water bars, adding new drainage to the trails in the forested area of the monument, and repair of the Spud Rock pasture fence took up most of the crew's time during the month. The Loop road within the cactus area was dragged twice in this period. A total of 20 miles of our trails were brushed out, and drainages improved or reconstructed, during the four months of fire season. After two more days spent attempting to unplug the sewer line at Headquarters, a plumber was employed to clear the stoppage. After two days of working properly, the line again clogged, rendering our indoor toilet and lavatory unusable. Maintenanceman Barney spent one day repairing the water pump at Madrona R.S. Most of Ranger Fulton's time during the month was spent in completing a temporary shed to house our two electric light plants, using largely scrap materials.

APPROACH ROADS. The Pima County Highway Department graded the Broadway approach road the last week. However, the first two miles east of the end of the pavement cannot be maintained by the county, since incorporation of this section as part of "Rincon Village" early in May. As Rincon Village has no funds, organization, or equipment, this portion of the road has not been graded since that time, and is in literally "cobblestone" condition. Numerous complaints are received from the few visitors now reaching the Monument, as to this condition, for which no remedy can be foreseen.

TRAVEL AND INTERPRETIVE SERVICES. Travel has continued to decline every month since February. September was no exception, with only

RECEIVED SEP 29 947

441 visitors, arriving in 152 cars and on five horses. Of the total, 163 were from Arizona, the remainder from 19 other states and Belgium. Thirty-seven persons, in 15 parties, were contacted at Monument Headquarters.

INSPECTIONS. Assistant Regional Director Davis, Regional Forester Carlson, Engineer Hendricks, and Architect Saunders visited Saguaro September 23 to 26. In company with Ranger Fulton their party spent two days at Manning Camp and on the trails of the Rincon Mountains, studying our protection and maintenance problems. The third day was spent at Headquarters working out an equitable method of allocating funds for all phases of our operations.

PERSONNEL. Fire Control Aids Richard R. Barmby, Ron E. McPhaul, and Roderick J. McKenzie were terminated August 29. Laborer Andrew J. Rushing was also terminated at the same time. Packer Mike Keevan resigned September 6, to return to school. To date this last position has not been filled. We were unable to find a qualified man to accept an Emergency appointment for two weeks as Fire Control Aid, although additional funds had been allocated by the Director's office because of continuing dry conditions and frequent severe lightning storms in the vicinity. The Civil Air Patrol was contacted, and agreed to patrol the area upon request; only one such patrol has been needed.

Custodian Egermayer was on sick leave for most of the period between August 29 and September 15. Park Ranger Fulton began a month's annual leave on the evening of September 25.

FOREST FIRE PROTECTION. One Class "B" fire, which probably started during a heavy lightning storm of August 31, was reported September 2, and out September 4; acreage burned was 2.80. A crew of nine men were used in the suppression, cost of which was approximately $350.

COMPLAINTS. One written complaint, received by the Director through a Senator, was forwarded to this office. This dealt with undependable telephone service provided permittees on our telephone line, and was answered in a separate report.

NEW EQUIPMENT. A set of lettering and numbering dies was purchased for use in identifying non-expendable equipment.

Ben W. Egermayer
Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Sunset Crater NATIONAL MONUMENT

Flagstaff, Arizona

September 27, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows a report of the activities of Sunset Crater National Monument for the month of September, 1947.

Visitors this month: 2880 Travel Year to date: 15,089

Travel: With the usual trend for this season of the year, travel has shown some decrease but has held up surprisingly well when compared to the reported drop in travel along Highways 66 and 89. Registration for the month numbered 1152. Using the new method of determining the total travel, an additional 60% was added to the number that registered. An increase of 27.4 % is shown for the travel year over that for the preceding year, with 4,134 more people visiting the monument. Generally the post-season visitors do not appear so hurried and take more time. No doubt they enjoy the monument more for they indicate more interest and show greater appreciation.

Weather: During the first ten days of the month occasional light showers continued. On the 6th a local hail storm covered the dunes and craters on the east side of Sunset. The hail remained several hours before melting. For the most part the latter portion of the month has been bright and sunny with only occasional cloudiness.

Roads: With the drying weather the approach and entrance road has again suffered from the heavy travel. The corduroy surface is persistent and creates a problem as that maintenance becomes more and more difficult. However with an occasional shower and almost daily dragging it has been possible to keep the road in fair condition. The back road to Wupatki still receives some travel, but with drying weather it will soon become necessary to close it to visitor use.

General: The principle project for the month has been a boundry survey. In studying the proposed enlargement of the monument it has been necessary to locate all points on the present boundry as well as those for the areas that are to be included. Many hours of walking and many more of searching for the elusive section corners have been necessary.

Interpretive Services: As much time as possible has been alloted to interpretive service and visitor contact. This has been limited by other

tanks particularly during the latter part of the month. Additional time has been given to the photographing and identification of flowering plants.

Visitors: Dr. and Mrs. Colton accompanied by Miss Katherine Bartlett of the Museum of Northern Arizona were at Sunset on the 15th. Dr. Colton and Miss Bartlett gave most helpful assistance in the location of boundry markers and pointing out of the sites of excavated pit houses. This time so kindly given by them has materially assisted in the planning so that the majority of the important sites will be included in the proposed additions to the area.

Publications on Hand: Sunset Crater National Monument 2-fold leaflets on hand - 700 Copies.

Robert P. Upton
Ranger in Charge

Tonto National Monument
Roosevelt, Arizona

September 25, 1947

MEMORANDUM for the Regional Director, Region Three.

Following is a report of activities at Tonto National Monument for the month of September, 1947.

Travel. September showed the expected slight increase in travel, with 576 visitors to the Monument, as compared with 414 in August. Slightly more than half of those were hardy enough to climb to the cliff dwelling in spite of the heat. About half the cars were from out of the state.

Weather. The few weeks preceding the autumn break in the heat here at Roosevelt Lake are usually brutally hot, and this year is the same as ever. Some rain has fallen this month, and the lake has started to fill again.

Roads. The entrance road is still in fair shape, though the short, heavy rains since it was graded last month have eroded it to some extent. The Apache Trail is not too bad, though corrugated in many sections.

Noteworthy visitors. Custodian Paul Beaubien of Walnut Canyon and Ranger Upton of Wupatki, and their wives, were here a short time en route to Phoenix. They brought in some wiring for the electrical system here. Custodian Al Bicknell and Chief Clerk Luis Cartellum were here September 22, brought some equipment from Casa Grande, and spent a very helpful day going over fiscal and administrative matters with the ranger and custodian of Tonto. Assistant Supervisor Charles and Mr. Jones of the U.S. Forest Service dropped in a short while on the 25th.

General activities. Much of the time this month was spent in painting and rehabilitating the custodian's house, moving the 4000 gallon water tank from the terrace, setting up a fuel oil tank, in working on the truck, and general maintenance. The refrigerator in the ranger's quarters is finally working excellently. The custodian's house is finally wired for electricity, and is much more convenient. The travel, though light, is scattered enough to take up considerable time.

Charles C. Sharp
Custodian.

RECEIVED SEP 29 1947

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
TUMACACORI NATIONAL MONUMENT
~~Box 2225, Tucson, Arizona~~
Tumacacori, Arizona

September 25, 1947.

MEMORANDUM for the Regional Director,
Region Three.

Follows the monthly narrative report for Tumacacori National Monument for the month of September, 1947:

WEATHER CONDITIONS: Precipitation of 1.19 inches was below the average for September, and continued with only slight alleviation the severe drought which has plagued this vicinity all summer. High temperature for the month was 104 on the 3rd, low was 55 on the 12th. On the 6th we had a severe hailstorm.

MAINTENANCE: Routine maintenance, including much irrigating, was kept current. Transplants of three maguays were made to more suitable locations. Two peach trees, diseased and dying, were cut out and removed. Tools and equipment were all checked in detail for forthcoming annual inventory report.

INTERPRETIVE SERVICE: 666 visitors went on 129 guided trips through the mission church and grounds, receiving an average of 34 minutes per trip. 1,191 visitors received combined Information and Interpretation service in the museum lobby, patio garden, and view room. 1,148 visitors saw the museum.

INCREASE OR DECREASE IN TRAVEL: September did not hit a travel record. Travel was 1,263, as against an all-time September high, for 1946, of 1393.

VISITORS: August 26 - Maintenanceman and Mrs. Barnett of Casa Grande National Monument were interested visitors.

September 5 - Sallie Hayden, sister of Senator Carl Hayden, was much impressed with the monument.

September 9 - Colonel Proctor, owner of the famous Pete Kitchen ranch 14 miles south, was much interested in the old guns in our museum.

September 10 - Dr. and Mrs. H. L. Stahnke. Dr. Stahnke is Director of the Poisonous Animals Research Laboratory, in Tempe.

INSPECTIONS: September 18 - Chief Clerk Castellum was in for another instructive question and answer session. These field trips of his are quite valuable, and I hope they can be fairly frequent. (I believe, however, he was stealing time from his annual leave on the occasion of this visit).

MUSEUM AND EDUCATION: One piece of outside educational work this month took the form of a one hour illustrated evening talk to 30 summer school children at the nearby Santa Cruz Ranch. The custodian was able to stress value of conservation as applied to the subject of his avocation, herpetology.

DONATIONS: "Spanish Exploration in the Southwest," a book, was donated to the Tumacacori Library by Edward S. Spaulding, of Santa Barbara, Calif.

STABILIZATION OF MISSION CHURCH: Stabilization work proceeded, not fast but carefully, and, I believe, well done. Three laborers were on the job part of the month, two most of the month. All the east side of the mission church, the west, part of the north and part of the south, had long sections at the top of the wall where original plaster was entirely gone. Those sections are being lathed, and plastered. The east side of the nave, east side of the baptistry, tower sacristy, and north sides of the latter two, have now been completed. Completion of permanent repair work here meant a lathe covering for adobe on large areas, with a scratch plaster coat, then a thin, colored, finish coat. Many small patches had to be done, and here only a color coat was used. The roof of the sacristy is now stabilized permanently, and weather-proofed for probably two years.

Earl Jackson,
Custodian

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Tuzigoot NATIONAL MONUMENT

Clarkdale, Arizona

September 26, 19 47

MEMORANDUM for the Regional Director,
Region Three.

Following is the monthly narrative report for Tuzigoot National Monument for September, 1947.

Travel Data: For the second consecutive month another all-time high was recorded for Tuzigoot as the number of visitors for September exceeded any previous corresponding period with a total of 1850. Our total for the 1947 Travel Year is 13,664, which, compared with last year's total of 10,579 constitutes an increase of 3,085, or 29%.

Guide and Contact Service: Museum, ruins, and orientation contacts totalled 5138 for the month. 1717 people in 415 parties were shown the Museum, and 1621 people in 296 parties were conducted through the Ruins. All visitors to the Museum were contacted.

Personnel Time: Museum: 151 hours, 25 minutes; Ruins: 91 hours, 20 minutes. Total time for Richert: 130 hours, 20 minutes; for Denke: 92 hours, 25 minutes.

Changes in Personnel: Temporary Ranger Lee E. Denke was terminated September 22 in order that he might accept full-time employment as general agent for an insurance company in Clarkdale. Custodian Bright is expected to transfer to Tuzigoot from Gran Quivira in approximately three weeks; meanwhile, the Monument is being kept open to the public every day of the week by the Acting Custodian with the able assistance of Mrs. Richert.

Maintenance and Administration: New seat covers were purchased for, and installed in the Government Pick-up Truck.

Rains during the earlier part of the month again forcefully revealed the poor condition of the Museum roof. Accordingly, the roof was checked again and roof cement applied in an effort to keep out as much rain water as possible until bids on a new roof are called for, and permanent re-roofing completed.

The water line was inspected and periodic checks by meter readings were made for possible leaks. Unless the contractor furnishes the remainder of our order for pipe so that it can be laid before Winter, the Monument will again be in dire straits.

The fence was patrolled and new hunting signs posted. Apparently the cloth signs need replacement on an average of every 6 months.

The County bladed the Monument approach road once during the month, including that portion of the road approach lying within Monument Boundary.

All room floors in the Ruins, and the Administration Area, were de-weeded and raked.

Special Visitors: On August 30, Ranger Jim Fulton of Saguaro was a welcome visitor. It was his first venture here, and he was enroute from Montezuma Well to Saguaro with a load of bailed alfalfa.

Custodian and Mrs. Supernaugh with Son Billy, of Organ Pipe Cactus National Monument were visitors on August 31. Bill was on Annual Leave. He and his family stayed in Cottonwood overnight following a nice visit and dinner at the home of the Acting Custodian in Clarkdale.

Mr. H. A. Lowman, professional photographer, was here on September 15 to take color pictures of the Monument.

Davis Dam Teen Age Club numbering 31 strong under the supervision of Mr. J. D. Kell descended on Tuzigoot September 21, and were given a special tour of the museum and ruins.

Roy and Dick Le Tourneau, son and nephew respectively of the famous Mid-western industrialist of the same name, whose heavy machine and road equipment is recognized and used in all parts of the globe, were very interesting visitors on September 21.

Publicity: On September 7, the Acting Custodian was asked to participate in a radio interview on Tuzigoot and the Verde Valley to be conducted by Miss Helen Mary Knox who has a Monday-through-Friday entertaining show on Radio Station KPHO, Phoenix, Arizona, at 10:45 to 11:00 A. M. Our consent to this was given (no, we were not paid), and Mr. James, a radio technician who accompanied Miss Knox, installed a Tape Recorder in the Tuzigoot Museum, and we proceeded to make a more or less impromptu and unrehearsed transcription. Inasmuch as Miss Knox and Mr. James were on a week's field trip in Northern Arizona for the purpose of gathering material for the show, the recording tape was flown to Phoenix where it was to be used in a re-broadcast during the week of September 14 to 21.

Publications: On hand, 38 free mimeo information sheets on Tuzigoot.

Roland Richert

Roland Richert,
Acting Custodian.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

NATIONAL MONUMENT
Walnut Canyon National Monument,
Flagstaff, Arizona.

September 28, 1947.

MEMORANDUM for the Regional Director, Region Three. 19

There follows a report of activities in Walnut Canyon National Monument for the month of September, 1947:

Weather. Two or three light showers kept the grass green, but there was no run-off to Stanks" and lakes. With little wind we had a good month for the visitors.

Visitors. Of the 2,277 total, 1,943 were contacted, and it is estimated that 1,717 made the ruins trip unattended. Thirtyfour parties,or 212 people, used the picnic area.

Activities. A trip was made to Casa Grande Nat'l Monument and Phoenix for Wupatki's dump truck, gas stove and refrigerator. On a day off, some copper wire was delivered to Tonto Nat'l Monument. A day was spent with Dr. Allan Phillips checking birds at this monument. Ranger Aubuchon spent two days with Economist Roy A. Prewitt. A day was spent with Ranger Ringenback loading a truck with lumber and other building supplies for Organ Pipe Cactus National Monument. More time than expected was spent trying to install a stove oil storage system at the Administration Building. It takes a lot of time to find enough pipe and fittings, and then get two drums that dont leak buried in the rocks here at the proper level. Man and equipment were hired from the County to repair our entrance road within area. Thirty five dump truck loads of cinders were hauled and a large blade was used to smooth them over the road where it is hoped they will force the run-off to pass under the road instead of over the top.

Personnel. Seasonal Ranger Viklund was terminated at noon, September 5. He is attending the College in Flagstaff this winter. It is planned to use him intermittently on trail work this fall, as a per diem laborer.

Paul L. Beaubien
Custodian.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

WHITE SANDS

Box 231, Alamogordo, New Mexico

September 23, 47

MEMORANDUM for the Regional Director, Region Three.

SEPTEMBER, 1947, TRAVEL	1947 [illegible] TO DATE
Visitors 12,674 Cars 3,084	Visitors 9[illegible] Cars 23,826

September finds our travel year at its end and the month and travel year both have broken all previous records since a fee has been charged at White Sands. For the month 12,674 people in 3,084 cars poured through our driveways. For the 1946-47 travel year we have had 97,427 visitors in 23,826 automobiles. Of this number over 7,000 have been members of our Armed Forces.

Everything shows an increase except personnel and appropriations - our personnel is no greater and our monies even less. Our increase this travel year is 11,734 over last year (which was our highest year since accurate records have been kept late in 1933) and is some 62,659 more than 1944 which was the lowest year.

If funds would permit operation of the checking station over longer hours in the summer months I have little doubt but that we could lay claim to well over 100,000 visitors during the past travel year.

Not one written complaint has been received by this office on the service offered by the National Park Service or by the concessioner, the White Sands Service Company. Numerous minor criticisms such as; closing the museum at 5:00 p.m. in the summer, no available picnic tables or shades on Sundays or holidays, locked rest rooms due to old or broken equipment, (in some cases lack of personnel to make immediate repairs), no rest rooms in the sands proper, no free literature on the area, et cetera, et cetera. We have been able in most instances to excuse the shortcomings as temporary post war defects that will be remedied as our appropriations and personnel increase, but to some this did not entirely satisfy.

Several official trips were made to the White Sands Proving Ground in connection with equipment and land use within our boundary. John Hall was in on a survey of a proposed line across the monument. Luis Castellum and family stopped in enroute to points south and west. The New Mexico State Tourist Bureau sent Harvey Caplin down for pictures of the Sands to be used during the next tourist season.

Narrative Report
(2) September 23, 1947

Maintenance and new construction are virtually synonymous in that what little maintenance we have been able to do has been almost new construction. After a certain stage is reached your attempts to repair a table or fire grill result only in a complete rebuilding. Maintenance on our picnic area has practically reached that stage and we are slowly replacing our units as time, and procurement of Army salvage, allows.

Last month I mentioned the state widening and back-sloping U. S. 70 on both sides of the monument, as well as a new seal coat. This has helped materially and, since bids have been let for seal coating our entrance road, we are hoping to keep space with the state and soon have our road looking as nice as 70.

The concession has struggled through the season with record sales in spite of their cramped quarters and lack of storage space. A spare office room has been used to assist in the storage problem but can only be considered a temporary relief.

Interpretive service has been low due to the loss of our temporary ranger, and too the ranger force has been spread so thin nothing has been given the attention we would like to give. All questions were answered but we feel certain that many more would have been asked if the visitor had not been crowded by others waiting for their questions to be answered also. Several late vacation parties have requested a rather complete routing through the Parks and Monuments of this region and this we are glad to do but it takes some time to do it right.

The museum has been a life saver as usual and answers most of the questions on the Monument proper, but no map, museum case, or what have you could possibly answer all the questions a Park Service visitor can think up. The worst one this past season has been " Does this road take us by where they dropped the Atomic Bomb?" Then, of course, there are always questions about the fauna of Acadia or the flora of Great Smoky Mountains.

A little notice of our visitor statistics will show that so far this fiscal year, in three months time, we show an increase of 7,934 over the same period last year, which is our record year. If this trend continues I shudder to think of how we can hope to maintain our already decrepit physical plant, picnic facilities, etc, on the monies allowed.

WHITE SANDS NATIONAL MONUMENT
ALAMOGORDO, NEW MEXICO

Narrative Report
(5)

September 23, 1947

A minor car wreck occurred in the sands proper, no one was injured seriously. A visitor came in off the highway a few days ago and said a car was wrecked down the road three or four miles and a woman was badly hurt. I dashed down the road seven miles then figured I misunderstood the direction turned around and went five miles past Headquarters the other direction finding no car wreck either way. Later I learned the wreck had happened 23 miles south of us so I guess I just didn't go far enough. Such is life.

In this last report for the travel year I want to mention again that only through the splendid work of the boys were we able to do as well as we did. Both Paul and Harold as well as Ray put in many long hard hours which enabled us to carry on with the increased load.

A list of publications on hand follows. Several White Sands leaflets were received from the Region One Office but before we could get them unwrapped and put up there were only two or three left.

Wupatki NATIONAL MONUMENT

Flagstaff, Arizona

September 27, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities at Wupatki National Monument for the month of September, 1947:

Visitors this month: 728 Travel Year: 14165

Weather: Clear, warm weather prevailed most of the month with a total precipitation of .24 inches. Vegetation is quite lush as a result of the rains late last month.

Roads: Approach roads are in fair condition, although no work was performed on them this past month. At least we have had no complaints of visitors getting stuck in the cinder.

Travel: After a sharp decrease early in the month visitor use exceeded that of August by 18%. Our travel year figure exceeds that of any previous year and is an increase of almost 20% over 1946.

Personnel: Temporary Ranger Arnold Page was terminated on September 5 so that he could enter college. With this early departure and heavy visitor travel the burden of visitor contact fell back onto the custodian. This resulted in our visitors not receiving the attention they should. Laborer leadman Hogan was also terminated on the 5th.

Navajos: Vera Standish, better known as Grandma Peshlakai, died on August 27. A venerable old lady of about 100 years, she was quite active until 1942, but had been practically an invalid since. She was respected by the local Navajos for her knowledge of the old ways and she was always making an effort to teach the younger women to use the old native dye formulas for wool. Last summer she supervised the manufacture of a Navajo type cooking pot which she asked be placed in our collection. Due to conditions beyond their control, her family had to make a partial burial of the old lady before calling on us. She is buried near Crack-in-the-Rock, a short distance from the river.

Activities of Outside Agencies: A wildcat outfit drilling for oil moved onto location about three miles northeast of Spider Web Ranch. There is supposed to be a limited oil structure at that point. No success to date.

RECEIVED
SEP 29 1947

Captian and Mrs. Petersen of Denmark spent several hours photographing Wupatki and Wukoki Ruins. Representatives of the United Nations Information and Cultural Affairs, they were taking the movies to show to the Danish people.

NPS and Other Visitors: Vititors this month included Jean Pinkley of Mesa Verde NP, Ranger Bill Bowan of Grand Canyon, Custodian Supernaugh of Organ Pipo, Ranger Van Cleave of Lake Mead, NPS Economist Prewitt of the Washington Liason Office and Fred Packart of the National Parks Association.

Spring Flow: The increase of Wupatki Spring recorded last month was not long lived. It is flowing 129 gallons per day compared to 196 last month. Heiser, as usual, has decreased to 1200 gallons per day from 1350 in August.

General: Aside from routine duties, three days was spent with Photographer Rex Fleming making a sound tracked color movie on the story of the cinder and it effects, two days on the Sunset boundary report with Ranger Upton, four days scrounging for ways and means of building our Quonset. Essential repair parts for our trucks were received. Custodian Beaubien made a trip to Casa Grande for the "new" dump truck. While a considerable number of minor repairs were necessary to this truck, it is in fairly good shape. We have not yet eliminated all of the "bugs".

David J. Jones
Custodian

RECEIVED
SEP 30 1952

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

October 14, 1947.

MEMORANDUM for the Regional Director, Region Three.

Following is the narrative report for Naturalists of the Southwestern National Monuments for the month of September, 1947.

Staff Activities - General

Naturalist Dale S. King was in the office during the month except for visits to Bandelier National Monument on September 6, 7, and 8, and to Albuquerque.

Archeologist Charlie R. Steen spent most of the month in the office on routine duties. One trip was made to Albuquerque with Naturalist King, and two trips to Bandelier.

Naturalist Maurice Sullivan spent the official month in the office, but visited on annual leave the following areas: Bandelier, Great Sand Dunes, and Aztec Ruins National Monuments and Mesa Verde National Park.

Administration - Interpretation

Steen furnished to the Custodian, Tumacacori, information concerning final mission days in Arizona and New Mexico. This information was obtained from the Museum of New Mexico.

King conducted correspondence concerning the possible stabilization of natural features, such as peculiar rock formations; forwarded the approved copy for the 8-fold leaflet for Tumacacori National Monument; wrote letters to applicants for P-1 archeologist positions; and discussed Service personnel problems on September 20th with Dr. W. W. Hill, chairman of the Department of Anthropology of the University of New Mexico.

King was finally able to attend one of the evening talk programs at Bandelier National Monument, and was impressed with the excellence of this well planned and executed program.

Public Relations and Extension Services

Steen read and edited articles submitted by others on Montezuma Well and on "Rainbow Highway", the Oak Creek Canyon road.

Arizona [illegible] Library

Progress of Exhibit Plans and Projects

Sullivan analyzed and commented on an excellent plan prepared at Chiricahua National Monument for a geology exhibit there. This plan was returned to the local staff for preparation. He also edited and forwarded to the Eastern Museum Laboratories for preparation the labels for exhibits at Montezuma Castle.

King prepared a priority list of needed museum exhibit preparations for Southwestern National Monuments. He also went over with Custodian Binnewies and Ranger Custott at Bandelier the museum exhibits there and made suggestions for improvement. Plans were agreed upon among the three as to how further museum preparation may be accomplished during the winter. It is hoped that the services of Pablita Velarde can be obtained to finish the illustrations for the Ethnology Room.

Accessions (other than library)

Sullivan obtained a stencil cutter from White Sands through the courtesy of Custodian Johnmill Faris. This machine will be of much service in the Department in the mailing and shipping of large packages, as well as preparing certain signs such as for nature trails. He also had correspondence with the Superintendent, Petrified Forest, in order to obtain a binocular microscope which is to be used at Santa Fe for botanical identification.

Research and Observations

The Custodian, Canyon de Chelly, was directed to remove a turkey burial which became exposed in Canyon del Muerto.

Observation file cards on birds were received from Aztec Ruins. It appears that very valuable observations are being made at Aztec Ruins on wildlife.

Sullivan furnished bird banding instructions to the staff at Tonto National Monument.

Region Three Office Loan Library

Accessions for the month were 17 books, 31 pamphlets, and 108 periodicals, making a total of 156.

Sullivan wrote for and received various geological publications.

Steen made a considerable number of additions to the bibliography file for various national monuments.

Southwestern Monuments Association

The Association donated a set of reference books describing Chaco Canyon to the library of the steamship of the same name.

A miniature set of photographs was compiled for sale at Bandelier National Monument.

Correspondence ensued with the author of a publication concerning Tumacacori in an attempt to have the paper brought up to date to be included in a proposed compilation volume which will make available the rather extensive work done by National Park Service personnel on the history of that area.

During the month Treasurer Alan Vedder worked 19 days. Much of the time was spent in preparing the annual report and statements.

The biggest news was that the Association made a net operating profit of $3,551.73 for the fiscal year; [illegible] a profit of $39[illegible] occurred last year. Sales were $8,763.61 an increase of about $6,500 over the previous year. Inventory as of June 30th was $9,237.30 in comparison with $5,378.41 for last year's inventory.

An audit is now being made by a commercial auditor and it should be available in the [illegible] near future.

This month 125 covers were mailed including 27 letters and 41 purchase orders. Two deposits were made, including 13 and 17 items. Official time was spent on such chores as stamping business reply cards, consulting with the auditor, etc.

Reports, Memoranda

Received from Bandelier National Monument was an interesting report summarizing the evening lecture program which was carried on successively during the summer. A rather extensive schedule of talks was given and ground work laid for an even better program for next summer. Content of talks was outlined for written in full to furnish material for break-in of green personnel in the future.

Visitors

Chief Historian Ronald Lee, Consultant Dr. Hans Huth, and Chatbdian Meredith Guillet.

Ruins Stabilization

Emergency funds of slightly more than $12,700 were received at the end of the month from the Director's Office to repair flood damage at Chetro Ketle at Chaco Canyon National Monument. This sum will enable an enlarged crew to place the damaged portion of the ruin in good condition by next spring.

Raymond Rixey reported for duty under Archeologist Gordon Vivian on September 17th. Mr. Rixey has been recommended for employment to replace Al Lancaster in the Archeologist Aide position for the ruins stabilization unit.

During the month Archeologist Steen inspected the weakening restored roof on the small kiva in the plaza at Aztec Ruins, as well as the stabilization work going on at Tyuonyi at Bandelier National Monument. He recommended that the log cribbing be removed from the Aztec kiva and replaced with new preserved timbers. Stabilization work at Bandelier has uncovered some incidental archeology.

inasmuch as it has been found that various floor features exist in the rooms which are hitherto unreported. Unfortunately, no known method of stabilization exists whereby these features can be exhibited to visitors.

Steen has prepared a memorandum for the Director asking assistance for technical aid in preserving the delicate plaster and fresco paintings at Tumacacori National Monument.

Steen and King made a fruitless trip to Albuquerque in an attempt to obtain suitable ruins stabilization tools from war surplus property. Steen spent considerable time during the month keeping stabilization records current.

Technical Aid to Administrators

A large portion of Sullivan's time was spent in compiling information concerning the 48 National Park Service areas in Region Three, the material to be used in a proposed manual for new employees.

Projects for the Ensuing Month

King will be in the office most of the month on routine affairs, editing two technical papers on Montezuma Castle for publishing by the Southwestern Monuments Association, and possibly will travel to Flagstaff for ruins stabilization work at Walnut Canyon and Wupatki later in the month.

Steen will spend most of the month in the office except for a week's trip to Canyon de Chelly and short trips to supervise stabilization work at Bandelier.

Sullivan will work in the office on the employee's manual and museum exhibit planning, with possible trips either to Arches or Great Sand Dunes National Monument.

REMARKS: (Please note below any factors influencing interpretive service, such as: "museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

Publicity received in the August issue of "National Geographic" has [illegible] doubled our travel and more than doubled our contact and interpretive contacts.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

Talks: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

Attended Interpretive Stations: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.

INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS INQUIRE.

INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

Unattended Interpretive Devices: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITAL USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE DEVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

Interpretive Activities Outside the Area: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

Column #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

Column #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

Interpretive Activities Outside of the Area ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

Totals: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. Total Attendance SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS' RESISTANCE IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE KNOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

TITLE Custodian

REMARKS: (Please note below any factors influencing interpretive service, such as: "museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (Library, contact station, museum rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispensing INFORMATION rather than interpretive service should not be considered as attended Interpretive Stations.

INFORMATION is factual matter relative to physical developments, physical facilities, geographic location, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, hotel accommodations, bus and train schedules, and similar matters concerning the area regarding which visitors enquire.

INTERPRETATION is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visitors using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive services, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or provided by Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should not be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive services this attendance may record a total considerably in excess of the visitors registered in the area during the same period. For comparison, the total number of visitors to the area during the month should be shown.

This Report Due: From all National Park Service areas providing any interpretive services. Send two copies to the Regional Director who will forward one to the Director. One copy should be retained by the superintendent or custodian of the area in which the report originates. Coordinating superintendents also should be provided with a copy. Due in the Regional Director's Office not later than the 5th of the month following that covered by the report.

REMARKS: (Please note below any factors influencing interpretive service, such as: "museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures, or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (library, contact station, exhibit rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispensing information rather than interpretive service should not be considered as attended Interpretive Stations.

Information is factual matter relative to physical developments, physical facilities, geographic location, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, motel accommodations, bus and train schedules, and similar matters outside of the area regarding which visitors inquire.

Interpretation is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visitors using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive services, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or provided by Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Fill in total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should not be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive services, this attendance may record a total considerably in excess of the visitors registered in the area within the same period. For comparison, the total number of visitors to the area during the month should be shown.

This Report Due: From all National Park Service areas providing any interpretive services. Send two copies to the Regional Director who will forward one to the Director. One copy should be retained by the superintendent or custodian of the area in which the report originates. Coordinating superintendents also should be provided with a copy. Due at the Regional Director's Office not later than the 6th of the month following that covered by the report.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

CONDUCTED TRIPS: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

TALKS: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

ATTENDED INTERPRETIVE STATIONS: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.

INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS INQUIRE.

INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

UNATTENDED INTERPRETIVE DEVICES: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITOR USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE DEVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

INTERPRETIVE ACTIVITIES OUTSIDE THE AREA: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR FURNISHED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

COLUMN #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

COLUMN #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

COLUMN #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

INTERPRETIVE ACTIVITIES OUTSIDE OF THE AREA ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

TOTALS: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. TOTAL ATTENDANCE SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL OF THE DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED AT THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE PERIOD COVERED IS SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

NAME A. E. Ditmanson
TITLE Custodian.

REMARKS: (Please note below any factors influencing interpretive service, such as: "Museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

CONDUCTED TRIPS: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

TALKS: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

ATTENDED INTERPRETIVE STATIONS: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.

INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS ENQUIRE.

INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

UNATTENDED INTERPRETIVE DEVICES: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITORS USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE DEVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

INTERPRETIVE ACTIVITIES OUTSIDE THE AREA: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

RECEIVED SEP 29 1947

INSTRUCTIONS FOR FILLING OUT THE FORM

COLUMN #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

COLUMN #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLACE TOTAL EACH COLUMN IN ALL BLOCKS.

COLUMN #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

INTERPRETIVE ACTIVITIES OUTSIDE OF THE AREA ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

TOTALS: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. TOTAL ATTENDANCE SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE SERVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

~~Rains, muddy roads and rough roads have retarded visitor travel.~~

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures, or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (library, contact station, exhibit rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispensing INFORMATION rather than interpretive service should not be considered as attended Interpretive Stations.

INFORMATION is factual matter relative to physical developments, physical facilities, geographic locations, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, hotel accommodations, bus and train schedules, and similar matters outside of the area regarding which visitors inquire.

INTERPRETATION is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visits using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive services, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or provided by Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Please total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors by using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should NOT be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive services, this attendance may record a total considerably in excess of the visitors registered in the area during the same period. For comparison, the total number of visitors to the area during the month should be shown.

This report due: from all National Park Service areas providing any interpretive services. Send two copies to the Regional Director who will forward one to the Director. One copy should be retained by the superintendent or custodian of the area in which the report originates. Coordinating superintendents also should be provided with a copy. Due in the Regional Director's Office not later than the 6th of the month following that covered by the report.

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures, or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (Library, contact station, exhibit rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispensing INFORMATION rather than interpretive service should not be considered as Attended Interpretive Stations.

INFORMATION is factual matter relative to physical developments, physical facilities, geographic locations, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, hotel accommodations, bus and train schedules, and similar matters outside of the area regarding which visitors inquire.

INTERPRETATION is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visitors using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive services, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or required of Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Fill in total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should not be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive services this attendance may record a total considerably in excess of the visitors registered in the area during the same period. For comparison, the total number of visitors to the area during the month should be shown.

THIS REPORT DUE: From all National Park Service areas providing any interpretive services. Send the copies to the Regional Director who will forward one to the Director. One copy should be retained by the superintendent or custodian of the area in which the report originates. Coordinating superintendents also should be provided with a copy. Due in the Regional Director's Office not later than the 6th of the month following that covered by the report.

REMARKS: (Please note below any factors influencing interpretive service, such as: "Museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

CONDUCTED TRIPS: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

TALKS: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

ATTENDED INTERPRETIVE STATIONS: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.

INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATION, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS INQUIRE.

INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

UNATTENDED INTERPRETIVE DEVICES: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITOR USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE SERVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

INTERPRETIVE ACTIVITIES OUTSIDE THE AREA: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES CONDUCTED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

RECEIVED JUL 29 1947

INSTRUCTIONS FOR FILLING OUT THE FORM

COLUMN #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

COLUMN #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. FILL IN TOTAL EACH COLUMN IN ALL BLOCKS.

COLUMN #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS BY USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

INTERPRETIVE ACTIVITIES OUTSIDE OF THE AREA ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

TOTALS: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. TOTAL ATTENDANCE SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 5TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

TITLE Acting Custodian

REMARKS: (Please note below any factors influencing interpretive service, such as: "Museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

Fill Out Only Those Blocks That Apply

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (Library, contact station, exhibit rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispensing information rather than interpretive service should not be considered as Attended Interpretive Stations.

Information is factual matter relative to physical developments, physical facilities, geographic location, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, hotel accommodations, bus and train schedules, and similar matters outside the area regarding which visitors inquire.

Interpretation is an accurate explanation of the manifestations of natural history and human history within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all services using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive services, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed by or through Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should not be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive services, this attendance may record a total considerably in excess of the visitors registered in the area during the same period. For comparison, the total number of visitors to the area during the month should be shown.

THIS REPORT DUE: From all National Park Service areas providing any interpretive services. Send the original to the Regional Director who will forward one to the Director. One copy should be retained by the Superintendent or Custodian of the area in which the report originates. Coordinating Superintendents also should be provided with a copy. Due in the Regional Director's Office not later than the 5th of the month following that covered by the report.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

CONDUCTED TRIPS: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

TALKS: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

ATTENDED INTERPRETIVE STATIONS: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.
INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, MOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS ENQUIRE.
INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

UNATTENDED INTERPRETIVE DEVICES: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITORS USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE MEDIA, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

INTERPRETIVE ACTIVITIES OUTSIDE THE AREA: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

COLUMN #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

COLUMN #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

COLUMN #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

INTERPRETIVE ACTIVITIES OUTSIDE OF THE AREA ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

TOTALS: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA AS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. TOTAL ATTENDANCE SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

Total Number Visitors to Area

NAME Earl Jackson

TITLE Earl Jackson, Custodian

REMARKS: (Please note below any factors influencing interpretive service, such as: "museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

* Estimate. ** Including 72 runarounds.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

CONDUCTED TRIPS: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

TALKS: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

ATTENDED INTERPRETIVE STATIONS: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.
INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS ENQUIRE.
INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

UNATTENDED INTERPRETIVE DEVICES: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITOR USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE SERVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

INTERPRETIVE ACTIVITIES OUTSIDE THE AREA: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

COLUMN #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

COLUMN #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

COLUMN #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

INTERPRETIVE ACTIVITIES OUTSIDE OF THE AREA ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

TOTALS: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS TABULATED FOR IN THE LOWER RIGHT-HAND CORNER. TOTAL ATTENDANCE SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE SERVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

NAME Roland Richart

TITLE Roland Richart, Acting Custodian

REMARKS: (Please note below any factors influencing interpretive service, such as: "museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures, or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive service.

Attended Interpretive Stations: Actual count of persons using the station (Library, contact station, exhibit rooms, study collections, etc.), count being made by Service personnel by attendance. Checking stations or offices dispensing INFORMATION rather than interpretive service should not be considered as attended Interpretive Stations.

INFORMATION is factual matter relative to physical developments, physical facilities, geographic locations, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, hotel accommodations, bus and train schedules, and similar matters outside of the area regarding which visitors inquire.

INTERPRETATION is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visitor using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive services, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or provided by Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Please total each column in all blocks.

Column #3 shows the AVERAGE amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should NOT be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive devices, this attendance may record a total considerably in excess of the visitors registered in the area during the same period. For comparison, the total number of visitors to the area during the month should be shown.

THIS REPORT DUE: from all National Park Service areas providing any interpretive services. Send two copies to the Regional Director who will forward one to the Director. One copy should be retained by the superintendent or custodian of the area in which the report originates. Coordinating superintendents also should be provided with a copy. Due in the Regional Director's Office not later than the 6th of the month following that covered by the report.

NAME _____

TITLE Park Ranger

REMARKS: (Please note below any factors influencing interpretive service, such as: "Museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

Talks: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

Attended Interpretive Stations: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.

INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS ENQUIRE.

INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

Unattended Interpretive Devices: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITORS USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE DEVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

Interpretive Activities Outside the Area: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS OR WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

Column #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

Column #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

Interpretive Activities Outside of the Area ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

Totals: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. Total Attendance SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

CONDUCTED TRIPS: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

TALKS: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

ATTENDED INTERPRETIVE STATIONS: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.

INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS INQUIRE.

INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

UNATTENDED INTERPRETIVE DEVICES: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITORS USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE SERVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

INTERPRETIVE ACTIVITIES OUTSIDE THE AREA: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

COLUMN #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

COLUMN #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

COLUMN #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

INTERPRETIVE ACTIVITIES OUTSIDE OF THE AREA ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

TOTALS: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. TOTAL ATTENDANCE SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE FIGURE WILL BE A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. Arches NATIONAL MONUMENT

Moab, Utah

October 28, 1947

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of October, 1947:

GENERAL: Despite heavy storms during the month the exceptional visitation to this area has continued. Most of our visitors are the type who want to spend several days in the country absorbing the scenery of the area and not the step-look-run type, but we have had to discourage their visiting the outlying sections due to impassable roads. Many of these parties, not to be discouraged, have made the hike from Balanced Rock to Delicate Arch, a round-trip of 12 miles, and stated that it was certainly worth the effort. The Courthouse Towers area continues to be one of the most popular sections, despite the two mile walk over rough country with no trail.

TRAVEL: Again this month our travel was well above normal with 181 cars and 465 people visiting the area, as compared with 70 cars and 185 people for October, 1946. We had representation from 28 states and Canada. Approximately 75% of the travel was out-of-state.

The Moab Lions Club held a picnic at the Windows on September 28th, honoring visiting Lions from Grand Junction, Colorado and Montisello, Utah with 75 people in attendance.

INTERPRETIVE SERVICES: Our interpretive contacts dropped considerably from the previous month but were still way above normal. One guided trip was taken in the Windows section with a party of 21 visitors. Ninety one people were contacted at the Windows parking area and 154 people were contacted at headquarters. Three hundred and seventy two people visited the Windows section unattended.

WEATHER: The first frosts of the year came during the month and the weather has been much cooler. Rain started falling on October 10th and continued intermittently throught October 14th, with showers of cloudburst proportions occuring each day. The official gauge at Moab registered 2 inches of precipitation for this storm. Heavy rains fell again on October 21st and 22nd.

SPECIAL ACTIVITIES: I was in attendance at a meeting of the Associated Civics Clubs of Southern and Eastern Utah on September 7th at Moab. Matters discussed were the Colorado River Pact and contemplated dams for this section, and ~~and~~ Southeastern Utah roads, both primary and secondary. Attendance was poor and very little was accomplished. A banquet was held in the evening honoring the visitors.

An official trip was made to Blanding, Utah on October 3rd to contact Ranger Redd regarding problems at Natural Bridges.

Mr. Walter H. Rosh, Field Examiner, Bureau of Land Management visited the area on October 5th on a belated investigation of unauthorized excavations of archaeological sites in San Juan County and dinosaur remains in the vicinity of Arches. A trip was made to the Dalton Wells dinosaur site, with him, on October 17th.

ROADS: The Director's office has approved construction of roads in Arches National Monument by Grand County and the Utah State Department of Publicity and Industrial Development and the contract between these two agencies has been approved, whereby, $16,000 is available for this work. Construction work was to have started on October 15th but the heavy storms have kept the county equipment busy on other jobs and it will probably be November 3rd before work can be started. The county has purchased a new FWD truck and a compressor for this job.

The heavy storms experienced during the month raised havoc with our roads. On October 13th three cars containing 6 people, were marooned near Courthouse Wash due to high water, and had to spend the night there. They were all good sports and enjoyed the experience very much. We have been able to keep the road to the Windows passable after these storms but for most of the month it has been very rough. The state hauled shale to Courthouse Wash and other bad spots on October 24th and 25th and the patrol graded the road from the highway to Balanced Rock on the 27th. The headquarters loop road was washed out in three places when a retaining wall gave way in the wash above quarters and flooded the headquarters area.

The road to the Devil's Garden and Delicate Arch, through Salt Valley, has been impassable since Octobe r 10th and I dont know when the county will be able to put it in passable shape.

PUBLICITY: The Viking Pictures Corporation of Chicago, Illinois have signed a contract with the Utah State Department of Publicity and Industrial Development for the making of two reels of color film of Southeastern Utah. Representatives of the company, Mr. Sullivan C. Richardson and Mr. Arnold Whitaker arrived on October 15th and the matter of the filming of Natural

Bridges and Arches National Monuments was discussed. They left for Natural Bridges on the 6th, to complete filming there before snow closed the road over the Elk Mountain. They returned on the 15th and shot the Windows and Courthouse Towers sections, after which they went to Monument Valley and finished their work there. They are at present filming the features of the Devil's Garden and Delicate Arch sections.

Mr. Charles C. Herbert, representative of Western Ways, Tucson, Arizona visited the area on October 5th, gathering information for an extensive series of pictures on Arches. No definite decision was made as to when this work would be accomplished.

PRIVATE LANDS: Funds have been made available for the purchase of the 160 acres of private land included in the monument, the Twinbow Homestead, and negotiations are under way for the acquisition of same.

MAINTENANCE: Our water pumping system ceased functioning on October 8th and upon investigation, it was found that the main shaft in the pump jack had broken. A new shaft was made in Moab and it was again in operation on October 9th.

Signs are being constructed for the new roads to Devil's Garden, Fiery Furnace and Delicate Arch and also for the trails in these sections. We hope to have all roads and trails adequately marked by the next travel year.

VISITORS: Mr. Jesse Nusbaum visited the area for a short time on October 9th and discussed the investigation now being carried on by the Bureau of Land Management of unauthorized archaeological excavations in San Juan County. He continued on to Blanding to contact Mr. Kock, who is making the investigation.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
AZTEC RUINS NATIONAL MONUMENT
AZTEC, NEW MEXICO

24 October 1947

MEMORANDUM for the Regional Director,
Region Three, National Park Service.

WEATHER. Generally excellent weather with some rainfall has prolonged the travel season and this month was some 7% ahead of October a year ago. Our first frosts have just arrived with a low of 28.

MAINTENANCE. We have completed repair to the public comfort station septic tank and are now preparing buildings for the coming winter cold.

SPECIAL ACTIVITIES. Oct 9, Custodian to Ft Lewis Branch of Colorado State College to present illustrated lecture on the National Park System. Oct 15, same to the Rotary International, Farmington, N.M. Oct 21, presented illustrated talks to students at Bloomfield and Rio Vista County Schools. Oct 1 Steen, from Regional Office in.

INSPECTIONS. Charlie Steen on Sept 30 and Oct 1 inspected the ruins generally and the roof of the small kiva in the plaza of the pueblo.

INVESTIGATIONS OF BOUNDARY CHANGE. Deed, abstract of title and pertinent facts relating to the acquisition of the Hubbard Mound were and are currently being handled with the lawyer for Clyde C. Hubbard, owner of the property.

INCREASE IN TRAVEL. There were 936 visitors in 335 cars from 37 states. This is an increase of 7% approximately, over the 868 people in 310 cars from 36 states of October last year.

INTERPRETIVE SERVICES. There were 628 visitors in 147 parties conducted thru the ruins and 936 people in 216 groups shown the museum.

Irving D. Townsend,
Custodian.

in triplicate

AZTEC

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

October 31, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of the activities at Bandelier National Monument for the month of October, 1947.

Weather

Beautiful Indian summer weather continued throughout the month with the first freeze of the fall occurring on October 22, the maximum of 85 degrees on October 4, and the minimum of 25 degrees on October 23 and 24. Precipitation from September 28 to October 27 totaled 0.65 inch.

Roads and Trails

Condition of the approach road has improved during the month and the hauling of clay to exposed rocky spots and gravel to the potentially slick areas is continually adding to the improvement. An additional allotment of Roads and Trails funds is enabling us to rebuild the headwalls on dips in the approach road and to improve and rebuild the road drainage. This will stop the severe washing of the road after rains and will enable us to maintain the road shoulders in better condition.

Directional signs along the approach road and in the Headquarters area have been reconditioned and painted. Mr. Bursey of the State Tourist Bureau was contacted and arrangements made to repaint and reset the road sign at Pojoaque which had been removed during road construction.

Special Activities

The custodian spent October 16 in Santa Fe conferring with Assistant Regional Director Davis, Supervisor Flock of the Forest Service, and Los Alamos officials headed by Chief of Engineers Diluzio concerning the powerline to Bandelier from a Los Alamos connection and the proposed relocation and rebuilding of the telephone line.

October 22 was spent with Landscape Architects Carter and Thomas of Region Three and Los Alamos officials on the Otowi Section making a preliminary study of the realignment of the present State Highway 4

RECEIVED OCT 29 1947

through this section of the monument to a construction camp to be established by Los Alamos just south of the Otowi Section. Pavement of this section of the road will add about 4.5 more miles of paved surface to our approach road.

Completion of the investigation of alleged "pot-hunting" on monument lands by Lee Middleton of Los Alamos revealed that all of his activities had been on land under the jurisdiction of the Atomic Energy Commission and that the impression conveyed by the article in the Los Alamos Times was erroneous. The Times carried a follow-up article explaining National Park Service policy with regard to "pot-hunting" in particular and natural features and their protection in general and describing the attractions of Bandelier National Monument.

The custodian and clerk have spent a large portion of their time contacting visitors, checking cars, and conducting ruins trips, re-emphasizing the need for one more permanent employee for visitor contact work. Indicative was the 16½ hours spent by the clerk on ruins trips and museum contact alone, not counting the time needed for car checking and giving information to the visitors.

Travel

This month surpassed last October in travel by 58½%. Although there was very little use of the campground, the daily travel held up very well. Of course, Sunday travel was in a large part responsible for the increased number of visitors as good weather prevailed on weekends.

Interpretation

Over 50% of the visitors to the monument went through the ruins. This rather low percentage reflects the large local travel figure, i.e. those who come for picnics.

Visitors

Official National Park Service visitors during the month were Regional Archeologist Hood, Naturalist King, Landscape Architects Thomas and Carter, and Engineer Bradley.

Stabilization

Two and one half days during the month were spent by the stabilization crew on necessary drainage at Long House and Group K. The remaining days were spent in cleaning and packing walls and testing walls for old masonry and foundations in Tyuonyi. Fifteen more rooms were completed during the month.

An interesting fact was uncovered during the sub-floor tests made to determine old walls. It was found that the interior rooms facing the plaza just north of the entrance passage are built on an old trash mound and two burials were found in it. It is probable that other burials are in the trash dump, since only a small section was dug into while testing walls. These are the first burials to be found associated with the large community house ruins. They were in an advanced state of deterioration and little can be determined as to their origin.

Protection

Fifteen "Contamination Area" signs were installed [illegible] and the contaminated area which extends from Los Alamos land for about a quarter of a mile into the Otowi Section near the lower end of Frijoles Mesa but which does not include ruins or other features of visitor interest. Nine "No Wood Cutting" signs were also constructed and installed at key places on the Otowi Section.

Frequent patrol of the Otowi Section resulted in contacts with a number of wood-cutters en route to the Forest Service land just south of the detached section. Mr. Gomez of San Ildefonso was apprehended cutting wood on monument land in Sandia Canyon, but charges were not preferred as a stern warning was felt to be preferable in this particular case. Prospective hunters were also contacted on patrol and informed of the regulations and monument boundaries.

Maintenance

Frijoles Canyon Lodge has been de-activated for the winter by draining the water system and closing up the cabins. The campground comfort station has also been closed to the public for the winter. National Park Service facilities for winter use have been checked and prepared for freezing weather.

The electric light plants have been changed so that the single-phase 10 KW gasoline plant can be used for heavy loads, the three-phase only for operating shop equipment, and the 3 KW for office lights during the winter. The Diesel will not be used during the winter and current will not be generated during the night after retirement hours.

Utilities

The status of the construction of new power and telephone lines is still in abeyance as indicated above under special activities. A request for a Star Route to Bandelier to improve our mail service was refused by the Division Superintendent of the Railway Mail Service in Albuquerque. The refusal was based chiefly on the lack of funds to establish new routes.

Lodge

Frijoles Canyon Lodge closed on October 15 and will probably reopen again about May 1. Notification of the closing of the Lodge was sent to newspapers, Chambers of Commerce, and travel agencies. Mrs. Frey, the manager, reported an increase of 258 guests and 2,513 meals over those of the summer season of last year.

Permits

A consolidated permit has been issued by the Regional Director to the Atomic Energy Commission to cover buildings and structures on the Otowi Section formerly covered by several permits.

Personnel

In-service-training meetings twice weekly began for all personnel on Tuesday, October 28 with the custodian as leader.

Mrs. Margaret Onstott has been terminated as WAE Fire Control Aide. WAE Guide Simon Joseph Thomas is still employed but his services were not used during October.

(SGD) FRED W. BINNEWIES

Fred W. Binnewies,

RECEIVED NOV 3 1947

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

.....NATIONAL MONUMENT
Canyon de Chelly National Monument
Chinle, Arizona

October 26, 1947 ..... 19.....

MEMORANDUM for the Regional Director, Region three.

The following is a report on activities at Canyon de Chelly National Monument during the month of October, 1947.

General

Fall lamb buying is over with the Navajo Indians receiving the highest price ever payed. Navajos in the Canyon de Chelly region seem better off economically than normal contrary to publicity released thru Newspapers. The Yei B'chai Ceremonies are starting and there have been three Squaw dances in the Canyons during the last month.

Weather Conditions

Unusual weather has prevailed during the month with unseasonal but welcome rains bringing 2.03 inches of moisture. It has remained much warmer than normal and our first killing frost did not occur until October 23 or almost a month later than usual. We also had several days of high wind which we do not ordinarily get in October. Vegetation has taken on its fall coloring which enhances the natural beauty of the area. The Maximum temperature was 86 degrees and the Minimum 28 degrees.

The unseasonal rains filled the canyon streams bank to bank but no damage of any extent was done to the bank protection work. Travel into the Canyons has been impossible the greater part of the month.

Administration

The Custodian has taken care of all work during the past month without other help. One trip was made to Gallup New Mexico on October 25 to pick up electrical wiring transferred to this area and other supplies.

Maintenance

Due to Rains much work was done on our roads and they were graded from the entrance to White House overlook. Dirt was hauled to fill the holes. One Navajo laborer was hired on October 23, and we are at present repairing the outside plaster and preparing for winter. When time from administrative and interpretive duties permitted, repairs were made to doors, locks, windows, etc. Stoves were cleaned and repaired as well as installed in both quarters.

RECEIVED NOV 3 1947

Visitors

Although our months figure of 165 visitors fall below the 203 registered in 1946, our Fiscal year to date is running well ahead of last year. Bad roads and the closing of Concession facilities have probably adversely affected our travel as well as uncertain weather.

Among the visitors of note this month were Gerard Curtis Delano, Artist who regularly gets in about twice each year and whose paintings of the Indian Country and particularly Canyon de Chelly are well known. Mr. and Mrs. Dan T. Kelly, Hon. Reno Hoegl and Mrs. O.W. Bloom from Santa Fe. A group of artists from Santa Fe including Danny Stockton, Barry Atwater and Wife.

Interpretive Services

Due to the pressure of other duties I was unable to devote as much time to conducted trips but was able to give most of our visitors orientation talks at headquarters or along the road. Only six conducted trips were made into the canyons. A total of 20 hours was spent in guide work and 10.5 hours in contact.

Meredith H. Guillet
Custodian

October 25, 1947.

Memorandum for the Regional Director
Region Three, National Park Service,
Santa Fe New Mexico,

There follows a report of the activities in and around Capulin Mountain National Monument for the Month of October 1947.

An estimated three thousand visitors to the Volcano for the Month, bringing total travel year to date to thirty one thousand four hundred sixty,
And total travel Fiscal year to date to twenty two thousand five hundred,

Weather
has been most beautiful growing slightly cooler each day until finally reaching a low of sixteen above, about one half inch precipitation in the form of rain was welcome.

Fall coloring is in full beauty around the foot of the Monument, The oak shows all the color of the rainbow and is predominant on the red and yellow with all the variations.

Roads
in the Monument have been maintained in splendid condition throughout the month, The entrance road from Highway sixty four to the Monument has not been in the best of condition and needs about fifty loads of cinders which the Custodian is attempting to get done. The State Highway Department has been very kind to us in this connection and it is believed they will cooperate.

The Fire hazard is now at its peak the grass is the tallest that I have ever seen and all vegetation is exceedingly dry all caution has been taken possible and so far we have been very very lucky, Not having a fire for about twenty years, I am holding my fingers crossed and knocking myself lightly on the head (wood).

Very Respectfully

Homer J. Farr,
Custodian.

RECEIVED
OCT 28 1947

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Oct. 25, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows the narretive report for Casa Grande National Monument for October, 1947.

General: Cotton picking has started ans according to early reports the yield should equal or surpass last years record breaking one. The price has been good so the valley should be in for a prosperous winter. To date there has been a lack of cotton pickers and a little trouble over wages, but this should remedy itself when the season ends in Texas.

Weather: According to the records October, 1947, has been one of the hottest on record. With the exception of five days during the report period maximums have been over 90. The maximum registered was 104 with a minimum of 47. Nights have been cool and comfortable sleeping but complaints are still heard about the days. 1.04 inches of rain was recorded which served to freshen up the plant life on the area. Irrigationhhad been stopped and with out of season heat the mesquite trees had started to wither away.

Administration: Sept. 30, Associate Regional Director Davis, Architect Saunders, and Engineer Hendricks of the Regional Office were in on Sept. 30, to go over various administrative matters. Oct. 3rd. & 7th. representatives of Glosserman Chev. Co. successful bidders on three of the pickups put out for bids, were in to pick them up. Oct. 7th. George's Tire Shop was into pickup balance of scrap awarded to them on invitation # 33-10. Oct. 22, Constructors Equipment Co. of New York were in to pickup the Plmouth which they were awarded on bid invitation.

Visitors: October 1947-2084, October 1946-2053, October 1941-1013. This slight increase could be accounted for by the fact that nice weather in the North was causing people to travel the Northern Route and by a shortage of personnel. With only one man on duty 4 days a week we are bound to loose visitors who we are unable to contact during noon hours and when we are at the Ruin.

Interpretive Services: Of the 2084 visitors to the area 1204 made the Ruins trip in 166 trips averaging 47.4 minutes per trip. 1067 made the museum trip in 135 trips averaging 24.4 Minutes. It seems that more people are debating now about spending the $.30 for Guide services as the percentage of visitors to the Ruins as compared to total visitors is dropping. Maybe the high cost of living has something to do with it.

Maintenance: A general cleanup of the area was made and the sewer line running from the rest rooms to the pumps was cleaned out. Linoleum was put down in kitchen and hall, electric hot water heater and new light fixtures were installed, in Quarters # 5. Cement base for propane tanks was poured. Considerable remodeling in the pumphouse was done to install work bench and etc. for maintenanceman.

Trips Taken: Oct. 7, 13, & 20; mechanic Stonehocker made trips to Organ Pipe Cactus National Monument to pickup grader and haul fencing materials. The first trip he returned from on the 9, second the 15, and the third the 21. On the 16 he made a trip to Phoenix for parts for the Organ Pipe grader. Oct. 7, Ranger Schuft made a trip to Phoenix hauling in acetylene and oxygen tanks for testing and filling and to pickup equipment for monument.

Visitors of Note: On Oct. 21, Rev. Charles Parker of Prescott and family were in to look over the area. Rev. Parker wrote "Peace Unto You" which has devotional studies on Grand Canyon & Tumacacori in it.

Library Acquisitions: Geology & Ground Water Resources of the Salt River Valley Area, Maricopa and Pinal Counties by Geologic Survey & Arizona Land Office. Manual of S.W. Desert Trees & Shrubs, a U. Of Arizona Publication. Excavations at Cave Creek: Skeletal Materials a Gila Pueblo publication and Tree Rings and Droughts another of their publications.

Geology & Ground Water, stated that since 1930 the water table had dropped an average of about 30 feet and that higher & higher concentrations of salt was being found in the waters of the Salt River and in the Salt River valley. Several wells had already been cutoff due to the salt injuring the drops. It summerized by saying that a balance between withdrawls and replenishment of supply would have to be reached or ultimate abandonment of the valley would result. All of which makes us wonder just what the future holds. "Is this going to be a dust bowl? Will history repeat itself and cause us to leave the area like it supposedly once did the Indians?"

Articles of Interest: Last issue of Saturday Evening Post had an article on Phoenix and the surrounding valley.

A. T. Bicknell,
Custodian.

NATIONAL PARK SERVICE

Report 1m1

~~Chaco Canyon~~ NATIONAL MONUMENT

~~Bloomfield, New Mexico~~

~~October 24,~~ 19 47

MEMORANDUM for the Regional Director, Region Three,
National Park Service.

There follows the report of activities in Chaco Canyon National Monument for the month of October, 1947.

Chaco Canyon had a total of 62 visitors this month. All 62 took a trip through the ruins, and formed 18 parties. There were 50 paid admissions, 10 ten only children, and two children less than 12 years of age. 43 persons listened to the museum talk, and formed 12 parties. Total time spent by the custodian was 28 hours and 55 minutes. The visitors were from the states of:- California - 4 cars, 8 visitors; Colorado - 2 cars, 5 visitors; Illinois - 1 car, 4 visitors; Kansas - 1 car, 2 visitors; New Mexico - 8 cars, 30 visitors; New York - 2 cars, 3 visitors; Tennessee - 1 car, 3 visitors and Texas - 3 cars, 7 visitors.

The last of the warm weather was 89 degrees on the 28th of September, and the coolest so far this fall was 26 degrees Fahrenheit on the 23rd of October. There was rain on three days, the 1st, 12th and 14th of October, which formed a total precipitation of 1.73 inches.

The roads were finally in passable shape, nearly all of them, after the flash-flood rain of last August. Then we had a repeater. On the morning of the 14th of October, about 3:30 a.m., a terrific rain began to fall. It rained about .85 of an inch in a few minutes. Two days before, we had a gentle soaking rain of 81/100 of an inch, so there was not much chance of this rain soaking in. Archaeologist Vivian and the Custodian were up at Chettro Kettle in the early hours to survey and prevent destruction. However, little damage was done to Chettro Kettle. When daylight came, we surveyed the road damage, and found them to be in approximately the same shape as after the rain last August! Since then, the main road through the Monument has been graded and put in shape, and some of the minor roads are back in shape.

In preparation for winter, most of the outside faucets have been shut off, the stoves have been cleaned and put in good working order; flue liner has been bought, installed, and the chimney made a little higher so that the draft would be better. Also, the winter's fuel oil has been bought, delivered and stored away.

Radio contact with El Morro Monument has been irregular but satisfactory.

The water pump failed us twice this month, and required overhauling. It is just about worn out. The new one ordered last April should be at the depot by today. Mentioning pumps, the barrel pump for fuel oil had to be overhauled.

Inspection trips were made to the pueblos of Penasco Blanco, Kin Klizhin, and Tsin Kletzin. No recent signs of vandalism were found.

Foreman Raymond Rixey brought a 4000 gallon tank back from Grand Canyon.

Rear motor supports were placed in the stake truck, and one half day was spent repairing the pickup truck. Other routine jobs were accomplished such as greasing the trucks, cleaning the weeds in Pueblo Bonito, keeping the camp ground clean and the like.

Chaco had only two National Park Service visitors this month, Charlie Steen on September 30 and October 1; and Ted Sowers, October 7th and 8th.

We were pleasantly surprised the other day when one of our Navajos lost his State driver's license and applied for another. The man issuing the licenses for the State told the Navajo that he didn't need one to drive a government truck. "Oh, yes," said the Navajo, "that little book (USDI Motor Vehicle Regulations) says we have to."!! But sed.

Our fire prevention was done just a month ahead of National Fire Prevention Week. All extinguishers were checked, and other fire precautions taken.

The Trader reports that business remains good despite the drop in tourist and University student trade. He has very few overnight visitors now. He has his lambs shipped, and states that the Navajos had better weight on them due to the good grass the past season and they got better prices for the lambs than he can ever remember. Rugs are still going as fast as he can get them from the Navajos. An interesting note is that he has a new stock of winter clothing bought, and it is cheaper and of better quality than last year. He states that it is getting the time of year when he will soon have to purchase coal from the Navajos.

Projects for the ensuing months:- put in the culverts and repair the wash near the bridge, install new water pump upon arrival, get cattle guard welded, get planting started and get water gaps closed and hope for no rain for a while.

At the end of the month, there were on hand:-

Free two-fold leaflets on Chaco Canyon, approximately.....	8,400
National Park Location Map, number 6, "	325

There follows the report of Archaeologist Gordon Vivian.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Chaco Canyon NATIONAL MONUMENT

Bloomfield, New Mexico

October 23, 1947 19

MEMORANDUM for the Custodian,
Chaco Canyon National Monument.

There follows the report of Mobile Unit activities in your area during the month of October 1947.

In general very good progress has been made in the clean-up work at Chettro Kettle. The number of men employed has been increased and throughout the month we have had an average crew of 15, a maximum of 19. Threatening the repair work just now is the cement shortage. The dealer who took the last bid was unable to supply us and we have not been able to find cement on the open market in Gallup, Aztec or Farmington.

Foreman Rixey made one trip to the Grand Canyon during the early part of the month and hauled back the first two tons of the 4000 gallon water tank.

The extremely heavy downpour at 3:30 A.M. October 14th did no further flood damage to Chetro Ketl though it did show forcefully the need to straighten and deepen considerably the shallow and silt clogged arroyo just east of the site. Following this last rain further work was done toward removing all of the dense brush from its course.

During the latter part of the month some time has been available for completing stabilization records. About a third of the records for Pueblo Alto are done and records are complete for an additional eight Chettro Kettle rooms. Foreman Rixey has completed the photographing of numerous objects recovered at Chettro Kettle, cleaned and preserved another two pieces of plank, and on his own time restored one bowl.

Removal of flood debris and fallen wall is complete on the eastern half of Chettro Kettle. All walls and fragments have been exposed down to the level of the original excavation. Some of this debris, as noted in last month's report, is six feet deep, full of great slabs of concrete capping, large vigas, small poles

and a surprising number of steel railroad ties left in backfill and earlier repair by the University of New Mexico.

Cleanup of the west side is complete but for two rooms. Also to be done on the west side is removal of the upper half of two stories of original fill, nothing but fallen wall, that is being held back by weakened walls in two of the northern rooms.

Casing was set and a door built for the room with painted plaster.

In the eastern section a large hole in the north wall, room 43, was repaired, concrete base courses were set or are in progress in rooms 39, 40, 41 and 42. This is the work now being held back for lack of cement.

On the west end of the damaged section extensive work has been done in 61. An overhanging wall supported by masonry enclosed jacks, one large break filled, one partially filled and the east wall raised a story and a half to buttress the leaning south wall. One story of loose sandy fill was removed from 62 to stop further pressure on this south wall of 61.

The west wall of 59 has been raised one story, and one half to three fourths story retaining and supporting walls raised in 55, north, south and west, 58 north and south. The dangerous west wall of 38 was partially removed.

The only further cracking and settling observed has been in the north east sector of the superimposed kivas G/H.

Gordon Vivian
Archeologist

NATIONAL PARK SERVICE

CHIRICAHUA NATIONAL MONUMENT

Dos Cabezos, Arizona

October 28, 1947

MEMORANDUM for the Regional Director, Region Three.

Following is a report of activities at Chiricahua National Monument for October.

General. Report is being submitted two days early as the custodian hopes to get started on annual leave within the next day or two for a two or three weeks trip to Illinois.

Weather Conditions. Weather has been generally fair, with only two light showers.

Approaches to Monument Area. Approach roads are all in fairly good shape, considering that they are all dirt roads.

Interpretive Service. 660 visitors were contacted in the museum in 183 parties. Interpretive work has been curtailed some due to the custodian being alone with the interpretive and administrative work.

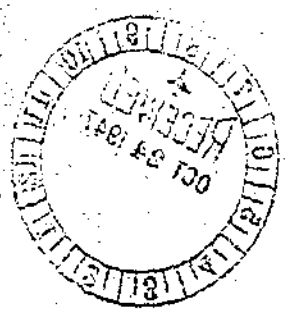
Travel. 751 visitors came to Chiricahua this month. While this is a big drop from the summer months it is 33 ahead of October of last year, so we are starting the travel year with a slight increase over last travel year.

Visitors. Assistant Superintendent Garrison of Grand Canyon paid the monument a brief visit on October 5 in connection with a trip he was taking through Southern Arizona.

Ranger Service. Chiricahua has no ranger since Ranger Sharp was promoted to Custodian of Tonto and Seasonal Ranger Hoffacker returned to school. Operator Marble and the custodian are getting along O.K. with the more important current work, but we will be able to keep a ranger busy when the position is filled.

Forest Fire Protection. On October 2, Operator General Marble discovered and put out a lightning fire in connection with working the monument highway.

Insects and Tree Diseases. Numbers of our douglas-firs are being killed, possibly by flat-head borers. Specimens of the bark and borer have



been sent to the Bureau of Entomology and Plant Quarantine for identification and advice.

El Morro NATIONAL MONUMENT

Ramah, New Mexico

October 25, 19 47

MEMORANDUM for the Regional Director, Region Three.

There follows the report of activities in El Morro National Monument for the month of October, 1947.

WEATHER: Maximum temperature reached 81 degrees on October 1st. and the minimum went down to 21 degrees on October 21st. Except for three consecutive days of rain, measuring 1.79 inches, we have had perfect fall weather.

TRAVEL: A decrease of 37 percent below October 1946 is noted and can be attributed to our very poor road conditions. They still have not recovered from the record rainfall of this summer. A total of 88 people visited the area in 31 cars from eight different states. The tour of the Inscriptions was made by all visitors in 28 trips and the total guide time was 28 hours and 20 minutes.

APPROACH ROADS: Both approach roads were graded this month i.e., from Gallup to Ramah and from Grants to within six miles of the Monument. Meeting the grader on the Gallup road I asked if he was going on to El Morro. The reply received was, "No set ees too rough down there for the grader". Que lastima!

RADIO CONTACT: Communication with Chaco Canyon has been a little irregular due to the complete failure of the old battery charger. A new charger has been installed and works perfectly.

Public Health: The report on our water supply shows the Sandstone Pool contaminated but safe below the doping tanks.

SPECIAL ACTIVITIES: On October 23rd. the Harry Sherman Pictures, Inc. sent a crew of Navajos from Gallup, at my request, to finish the job of grass seeding. They spent two days in the area. The seed planted last spring has made a fine showing and by next summer we should have a good stand of grass where it is badly needed.

GENERAL: Outside of guiding a few visitor most of the month has been spent in getting ready for the cold weather. Three loads of wood were hauled. The furnace and all stoves and flues were cleaned. One more load of gravel was hauled for the floor in the generator house. The walls in the kitchen of the Ranger Cabin were given a fresh coat of paint and the linoleum around sink and work table was replaced. Edie and daughter Julie have moved to Gallup. We dont trust the weather and certainly not the roads.

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

GRAN QUIVIRA NATIONAL MONUMENT
GRAN QUIVIRA, NEW MEXICO

October 26, 1947.

MEMORANDUM for the Regional Director, Region Three.

The following is a report of activities at Gran Quivira National Monument for the Month of October 1947.

General. After a 7 year absence from Southwestern National Monuments the writer returned to the organization as Custodian of Gran Quivira on Oct. 5, relieving Custodian Bright who transferred to Tuzigoot National Monument. Ranger Dean Dazey of Grand Canyon National Park accomplished the two-way transfer of household goods by government truck. Arriving as we did during the October homecoming of the local rattlesnakes we have tread lightly this Month. I would be the last to contest the snakes' rights to certain hillside caves of long use; however, the use of the back step and tool shed as a rest stop enroute is to be definitely discouraged.

Weather. Weather for the month has been clear and dry. Several days of high winds started dust storms around the farming areas. 0.13 inches of rain fell on October 14. Heavier storms were reported in surrounding areas. A high of 84 degrees was recorded on October 4; a low of 28 degrees on Oct. 23.

Roads. After two years at Grand Canyon National Monument, the writer has no criticism to make on local road conditions. Perhaps they are better than average now, but Highway 10 to Mountainair is a good country road in my opinion. Considerable activity is reported in progress by the State Highway Department on the letting of bids for construction of 8 miles of new road-bed south from Mountainair. Grading and laying of the base is presumably to be accomplished this Fall. A 22 foot blacktop is the reported goal. Local residents are quite happy over this and enthusiastic over the possibility of future extension to Gran Quivira. This in turn brings up the problem of relocating 8 miles of the Forest Service telephone line serving this community. A separate report on this matter was submitted dated October 25.

Travel. Visitors for October as indicated below show a slight decrease over the same month last year.

October, 1947	Cars	38	Passengers	113
October, 1946	Cars	43	Passengers	151
Difference		-5		-38
Percent		12% Decrease		25% Decrease

Decreases above are also applicable to the Travel Year.

C O P Y

Guide and Contact Service. A total of 109 visitors were conducted through the Mission in 36 guided tours for an average time of 40 minutes per party. Total contact time, 23 hours, 45 minutes.

Maintenance and Administration. The first 3 weeks here have been devoted largely to maintenance. A 200 foot temporary extension was put on the kitchen sink drain. When time and materials are available this drain will be stubbed back into the main sewer line outside the house as there appears to be no chance to reopen the original plumbing under the house. A new drainboard was put in and a grease trap installed on the kitchen sink. Some painting and other "moving in" maintenance was accomplished. The heating stove was set up and kerosene procured. Storm sashes were fitted to the kitchen and living room windows. One load of fireplace wood was hauled and work started on removing weeds from the Mission.

Publications Report. 500 Gran Quivira two-fold leaflets are on hand. No other free or for sale publications are on hand at this Monument.

/s/ Wm. L. Bowen

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
GREAT SAND DUNES NATIONAL MONUMENT
MOSCA, COLORADO

October 26, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in Great Sand Dunes National Monument for October, 1947.

WEATHER. It has turned decidedly colder and with a strong hint that winter will soon arrive in the San Luis Valley. The aspen have lost their leaves and snow covers the tops of the Sangre de Cristo range.

Rain fell on September 26, 27, 29 and 30; October 7, 11, 14 and 21. On October 12, the mountains were covered with snow from 10,000 feet upwards, and on the 21, it covered from 9,000 feet to the top. A snow flurry on October 25 at headquarters, melted as fast as it fell.

The so-called furnace in the residence has been in operation the entire report period.

At present, the Medano is no longer visible from the headquarter or picnic areas.

TRAVEL. Nine hundred fifty-one visitors in two hundred sixty-seven cars, visited the Sand Dunes during this report period. Twenty-one states were represented.

Three hundred thirty-nine people used the camp and picnic areas, and of these twelve camped over night.

INCREASE IN TRAVEL. For October, 1946, the record shows 110 cars and 409 visitors.

ROADS. The approach road was bladed by the State Highway on September 26. Todate it is again rough and corrugated. The monument road is in fair condition.

COMPLAINTS. With a decrease in visitation, there has been accordingly a decrease in complaints about roads, picnic areas and comfort stations. It is a pleasure to report that no cars became stuck in the sand.

WATER RIGHTS. Further correspondence was carried on with Linger Bros., in an effort to correct the problem of water rights on Mosca and Morris Gulch Springs.

The Alamosa Daily Courier on September 29, carried an article on the sale of the two ranches of Linger Bros., (Medano and Zapata ranches) to Malcolm G. Stewart of Dalhart, Texas for a reputed $900,000.00.

ACTIVITIES. Work still goes on in filling in the water line trench; 295 feet were filled during this report period. This brings the total amount filled to 480 feet with only 1020 more feet to go. The $64 question is: If winter comes, will the water line be covered?

Considerable time has been spent in chopping the winter's wood supply and hauling it to residence and adjacent area.

Camp and picnic areas were cleaned and with decrease in visitation, this job is not as back-breaking as in the summer.

Repaired light on back porch and installed new light switch in the garage. Installed a small water trough on front porch to carry off rain water and keep moisture off walks and wooden posts. Cleaned the stove and pipe on kitchen range in residence. Painted the top wooden board at roof edge on the front porch.

The repaired Dodge pickup was obtained from the Heide Garage and the dump truck was left for necessary repairs.

Two trips were made to Alamosa for gasoline, oil and supplies.

SPECIAL ACTIVITIES. From October 6 to 14, a trip was made to Bandelier, Chaco Canyon and Walnut Canyon National Monuments; Grand Canyon National Park and Region Three Office. Various supplies were hauled and distributed and the 950 gallon tank was obtained at Grand Canyon. The Bandelier stake truck was loaned for the trip. The tank was welded and all unnecessary openings were plugged at the Heide Garage. The tank was unloaded on hill in back of residence and when it is hooked up and filled with fuel oil, let it snow, let it snow, etc.

The stake truck will be returned to Bandelier before November 1, and the return trip made in the Dodge pickup which was left there.

PUBLICATIONS. There are on hand 38 old mimeographed informational leaflets and 1720 new leaflets were received from the Naturalist's Office, which brings the total leaflets to 1758.

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Montezuma Castle National Monument
Camp Verde, Arizona

October 24, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows the monthly report of activities at Montezuma Castle and Montezuma Well for the month of October, 1947.

Visitors this month - Montezuma Castle - 1524; travel year - 1524.
Montezuma Well - 451; travel year - 451.

Travel continues to climb with visitors to Montezuma Castle showing an increase of 1.6 per cent over October, 1946 and 94 per cent over 1941.

Administration Since the termination of seasonal ranger Frost on Sept. 27 we have not been able to keep up with all visitor contacts, office work, and maintenance. Except on Sundays we do not offer guided trips 12:00 - 1:00 and after 4:30 p. m. Otherwise we try to be on hand to climb the ladders into the Castle every hour throughout the day.

A shipment of photo packets was received from Frashers. We checked several packets and found that at least a third of them are short one of their ten pictures. The pictures are being returned to the distributing company for rechecking.

Ranger Leding was on sick leave October 17, 18, and part of the 19th, and on annual leave October 22.

Publicity On Sunday, October 5, Commander A. W. Scott, nationally known travel narrator, devoted a fifteen minute program to Yavapai County, especially the Verde Valley and its national monuments. Greyhound Bus Lines sponsor Mr. Scott. In his program he described Tuzigoot and Montezuma Castle and made Montezuma Well the subject of his "Unreal Reality" feature.

Maintenance & Equipment The worn-out Grunow refrigerator from Residence 1 has been surveyed and is to be offered for sale to the highest bidder.

Weather Most of the month has had clear cool days very agreeable for travel. The Maximum temperature was 97° and minimum, 31°. There has been a total of .41 inch of rain.

Use of Monument Facilities by the Public The Castle and the Well had a total of 1975 visitors actually counted and several more are known to have visited the Well. There was a total of 669 cars for both areas.

Tickets sold at the Castle 524; Complimentary Admission tickets used, 28; children who climbed free, 37.

Contact Time Total contact hours, 178.50; Hastings, 84.50; Leding, 76.50; Schroeder, 5.00; Frost, 8.50. Five hundred eighty seven visitors were guided through the ruins in 137 trips. Seven hundred forty one were contacted in museum in 164 groups. Those receiving other interpretive or informational service numbered 427.

Southwest Monuments Association A total of $186.93 was received from book sales for this month. There was a shortage of $5.75. Total sales were $102.68. The shortage developed in the "serve-ur-self" sales.

National Park Service Visitors Ranger Naturalist Brodrick and family from Petrified Forest on Sept. 27.

Messrs. Davis, Saunders, and Hendricks visited this monument and the Well October 2.

Ranger Dean Dacey, Grand Canyon.

Newsworthy Visitors On September 28 Mrs. Ethel McPherson spent all day making two oil paintings of the Castle.

Accessions A bound volume of "Popular Science Monthly" for 1890 was secured through SWMA. The issue for October, 1890 has an article "Ancient Dwellings of the Rio Verde Valley" by Dr. Edgar A Mearns, Ass't. Surgeon, U. S. A. then associated with old Fort Verde. His very informative article is complete with diagrams and a picture of the Castle.

Montezuma Well The following has been taken from Archaeologist Schroeder's report.

General Daily duty was maintained except for lieu days and as follows: Sept. 27-30, sick leave with injured back; October 6, four hours annual leave to take son to doctor; October 17-18 worked at Castle replacing Leding on sick leave.

Visitors The semi-annual Verde Valley Pioneer's picnic brought 138 visitors in 38 cars.

Administration Continued clean-up and maintenance of the area. Renovated pit toilet at picnic grounds. Straightened short section of fence on north boundary and checked southwest fence for breaks. Installed stove in museum. Completed stapling trail pamphlets.

Equipment The Verde Valley Butane Co. delivered the kitchen gas range Oct. 4 and will complete installation when the propane system is installed. The Wingfield Commercial Co. attached the aspirator to the well pump completing the installation.

Research Cleaned out a small portion of the Indian ditch by the museum to determine its depth for visitor information. It appears to average about 3½ feet in depth at this point.

Donations Mrs. Mildred Fain of Prescott, formerly an heir to this property, returned one skull and four mandibles which she had removed from the museum several years ago to prevent their loss.

Newsworthy Visitors Forest Ranger Pritchard came over to check on the status of the fence now in the process of purchase.

Ray Manley, wellknown photographer for Arizona Highways, took pictures in the area to illustrate an article by Mr. Nat W. McKelvey to appear in "Ford Times" in the near future.

Arches NATIONAL MONUMENT

Moab, Utah

October 31, 1947

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Natural Bridges National Monument for the month of October, 1947:

GENERAL: The monument was officially closed by Ranger Redd on October 15th. Due to stormy weather it was impossible to remove the equipment at that time but this will done on October 29th and 30th.

A radio announcement heard over station KSL of Salt Lake City today stated that the ferry at Hite Crossing on the Colorado River had sunk during high water and it was now impossible to travel this road.

TRAVEL: There has been no official check on the travel since October 15th but it is estimated that 17 cars and 50 people visited the area during the month.

INTERPRETIVE SERVICES: As of October 15th there had been 10 cars and 32 people visit the area. Of these three parties containing 11 people were accompanied on trips to the bridges. Seven parties of 25 people were contacted at headquarters.

WEATHER: Heavy storms struck the area on October 10th, for a period of three days, and again on October 21st. The balance of the month was ideal fall weather, clear and cool.

PUBLICITY: Representatives of the Viking Pictures Corporation of Chicago, Illinois visited the area during the month and spent three days filming the features for incorporation in a two reel publicity picture, in color, for the Utah State Department of Publicity and Industrial Development.

ROADS AND TRAILS: At the time of closing the area the roads and trails were in good shape but the recent storms probably had an adverse effect on them.

Russell L. Mahan
Acting Custodian

(in trip.)

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
NAVAJO NATIONAL MONUMENT
TONALEA, ARIZONA

Oct. 24, 1947

MEMORANDUM for the Director, Region Three

There follows a narrative report of activities in this area for the month of October, 1947.

WEATHER: Has been something to write about—Maximum temperature was 81 degrees on the 5th, minimum temperature was 25 degrees on the 22nd. Of special interest is the precipitation collected on the 11th, 12th and 13th which totalled 3.25 inches. Much more than our undrained roads can withstand.

VISITORS: Twelve visitors came to this area in 6 cars and accounted for 17 camper nites. One horseback party under the guidance of Rev. Shine Smith spent four days in the canyons. No visitor has been able to reach this area since Oct. 11th. Travel on the "main road" is greatly reduced also.

ROADS: (A very flattering term for the mud troughs between trading posts and points of interest)
Detours, by-passes and new ruts.
The detours and by-passes plowed by the USIS in August are now impassable and each day brings new ruts where-ever you chose to make them.
In a 4 wheel drive dump truck the Custodian and RCMP were bogged down twice in Klethla Valley and spent the nite in a warm sleeping bag. When one can't make it with 4 wheels driving it's tough. USIS trucks were mired, even the huge road patrol bladers were stuck and abandoned.

WORK PROJECTS: Road repair (emergency) and pick-up maintenance required most of our time.
The wiring connections and exhaust lines completed the installation of our #2 Kohler plant.
A hauling trip was made from Walnut Canyon National Monument. The load included all of the fine fire fighting tools assembled for Navajo. Three long timbers to be used in the construction of a grease ramp and repair platform. Eight half round pine logs to be placed as benches at strategic points on Sandal Trail and at Betatakin Point. One hundred feet of 1¼ pipe conduit to get our power lines placed underground.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
NAVAJO NATIONAL MONUMENT
TONALEA, ARIZONA

On the 20th Ranger and Ruth Aubochon returned our pickup to Navajo and returned to Walnut Canyon National Monument with the dump truck full of coal from the Cow Springs coal mine.
Inability to get all of the plumbing parts is holding up the installation of the 950 gallon gasoline tank.
Some recent accessions have been--11 pieces of prehistoric pottery from the Palmer Collection via Mesa Verde National Park.
The many fine fire-fighting hand tools.

Organ Pipe Cactus NATIONAL MONUMENT

Box 38, Ajo, Arizona,

October 25 19 47

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities for Organ Pipe Cactus National Monument for the month of October, 1947.

WEATHER

Precipitation recorded at headquarters totalled .08 of an inch for the month, this falling on the 12th. Maximum temperature was reached on the 4th with 101 degrees and minimum on the 24th of 44 degrees.

TRAVEL

With the approach of the travel season for Southern Arizona our visitors are increasing slowly but the press of other work has held contact to a minimum. Total travel for the month and travel year to date was 6,591.

GENERAL

The Custodian returned from annual leave September 27, and spent September 29 with Assistant Regional Director Davis, Engineer Hendricks and Architect Saunders on administration and road inspections and problems.

All materials were received and construction began October 20 on the soil and moisture fence project to complete the International Boundary. A six man crew is making rapid progress with about 1¼ miles complete to date.

Engineer Watson of the Public Roads Administration made the annual road inspection trip to the area on October 16 finding our highway, as usual, under County maintenance in a poor condition with some sections a distinct hazard to traffic.

Our new 9.4 K.V.A. power plant was installed this month and our 3 K.W. plant ceased to operate but as yet have not had time to find out the reason though it is believed that it will need to go to the shop for repair.

Work on the ranger's quarters and quonset hut was carried on as time permitted.

The Custodian along with other duties inherited the Presidency of the Ajo Rotary Club during the month so most of his days off will be accounted for the rest of the year.

Bees continue to be a menace around the headquarters area. Nearly everyone has been stung during the month. Ranger Ringenbach and Laborer Bowden stung once and the Custodian setting the record with four.

Pipe Cactus Narrative Report - October, 1947.

and poisons has been tried on them but to no avail.

MATERIALS ON HAND

NATIONAL PARK SERVICE

Saguaro National Monument
Tucson, Arizona

October 26, 1947.

MEMORANDUM for the Regional Director,
Region Three.

There follows the Monthly Narrative Report of activities at Saguaro National Monument for the month of October, 1947.

WEATHER. Daily temperatures in the eighties and low seventies, with only two warm days; two light showers; cool nights characterized the weather this month.

SPECIAL ACTIVITIES. October 1 Maintenanceman Barney made a trip to Organ Pipe Cactus to return one of their horses that we have used since May. On the 3rd, the Custodian returned the other animal.

MAINTENANCE. The Loop Road was dragged September 29 and October 13; on the last trip our homemade railroad-iron drag broke apart, so it is improbable that we can use it until some arrangement for obtaining welding gas is made. Work on the rehabilitation of the main packing trail to Orange Shack was commenced, but will be slow, since most of this trail will have to be practically rebuilt. Five man-days was spent in installing two horse drinking fountains in the smaller corrals at Madrona Canyon, and laying water lines. Work on our long delayed sign program got under way, and to date seven new signs, using the cut-out type letters similar to Wupatki's, have been completed and set up. Ten more remain to be installed. Four man-days were spent in cleaning up the old "Cactus" R.S. - really a tool house - to provide living quarters for our newest employee. The smallest of our light plants was set up temporarily to furnish current to the building, but a concrete base will be poured to make the installation permanent. Our 500-gallon water trailer was taken to Tucson to be sand-blasted and painted to remove the oil taste from the water, and to prevent its rusting through.

APPROACH ROADS. The Broadway approach remains as rough, or rougher, than last month. It is our considered opinion that we loose between 30 and 40 percent of the prospective visitors who start out to the monument due to the condition of the two miles included in Rincon Village. The Pima County Highway crew graded the remainder of this road, and the Vail approach road as far as Colossal Cave during the month, so at least the verbal complaints have decreased.

RECEIVED
OCT 29 1947

TRAVEL AND INTERPRETIVE SERVICES. For the first month since last February our travel increased instead of decreased. With 869 visitors, coming from 23 states, England, and Argentina, our total almost doubled over that of 441 in August. However, the travel is still 8% below that of October, 1946. Visitors arrived in 256 cars and two busses, one motorcycle, and five horses.

Of the total, 176 persons, in 61 parties, were contacted at the Monument Headquarters. Informational service occupied 930 minutes, for an average of 15.2 minutes per party.

PERSONNEL. Mr. Frank Stansberry entered on duty October 16. His position of Laborer-Leadman includes 5 months yearly as Packer, and it is hoped that he can receive permanent status to avoid the need for constantly replacing Packers, most of whom are inexperienced and require constant supervision and assistance on what is, actually, a very difficult job.

Mr. Lawrence D. Wilde was employed as Laborer, Trails, on October 23, and will work in that capacity until January, when we hope to secure his appointment to the temporary Ranger position. With Mr. Wilde's entrance on duty, we cannot quite match Tonto's record of 50% personnel being pilots, but we can claim 40%. Larry was one of the Custodian's Aviation Cadet students in 1943, and is a veteran of 30 combat missions over Germany as a B-17 pilot. Although his ships were hit several times, no member of his crews ever received a scratch.

Park Ranger Fulton returned from a month's annual leave October 24; while on leave he visited Grand Canyon, Bandelier, and Region Three Office. He and Mrs. Fulton spent the remainder of the time in Albuquerque.

FOREST FIRE PROTECTION. No fires occurred during the month. A very heavy lightning storm on October 2 with little or no rain should have resulted in fires, but an aerial patrol on the morning of the 4th revealed no smokes.

MISCELLANEOUS. The road leading out to the old north gate has been fenced at the south boundary of Section 8, owned by Mr. Tom Igo. This move has been anticipated for some months, but the actual blocking off of the road has resulted in several verbal complaints by visitors. It is somewhat embarrassing to explain that we do not own that section, and can do nothing about the matter. If Section 20, now owned by an individual who is trying to sell, is likewise blocked off, we shall lose the most scenic portion of the Loop Road.

Don W. Egermeyer
Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Sunset Crater NATIONAL MONUMENT

Flagstaff, Arizona

October 29, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows a report of the activities of Sunset Crater National Monument for the month of October, 1947.

Visitors this month: 2010 Travel Year to date: 2010

Travel: Visitation with only a small decrease has held up well for this season of the year. 804 visitors registered for the month. On the basis of actual registration there was an increase of 16.9 % over the same period for last year. Total travel for the month has been determined by adding an additional 60% of non-registrants.

Weather: Rain began sometime during the night of the 11th. By mid-day on the 12th it had changed to snow and continued until evening. The next morning however, all signs of winter's first visit had disappeared save for the white caps on the near by San Francisco Peaks. With this exception the month has brought most pleasant weather with only a few cloudy days.

Roads: The condition of the approach and entrance road is only fair. The stretchs of corduroy have become more numerous and much rougher. Some maintenance work was possible with the moisture that fell about the middle of the month but for the most part it has been much too dry to attempt even light dragging. The Wupatki back road remains open with an occasional visitor attempting the deep cinders.

General: The boundry survey for the monument was completed. During the short absence of Custodian Jones time was divided between Sunset Crater and Wupatki.

With the evident approach of winter, this no doubt will be the last report written from the tent quarters here at Sunset. It is anticipated that within another two or three weeks the Uptons will move back down to Wupatki and take up residence again at the Kaiser house. It isn't often you know that one in the Park Service has both a summer and a winter home.

Interpretive Services: Although the visistrs are more scattered, it has been possible to contact a fair proportion of them. The completion of the mounting of 2x2 color transparancies is now possible with the rush season over. Bird and mammal check lists and the fact file came for their share of attention. These are being put in final order for the close of

the season.

Visitors: On the 1st A. W. Whiting, Botanist, formerly affiliated with the Museum of Northern Arizona, spent the day at Sunset assisting in the identification of the flowering plants that were photographed during the summer. We were most appreciative of his interest and the time he gave so willingly.

According to the register Landscape Architect Carl Alleman was a passing visitor on the 28th of the month.

Congratulations: Our sincere congratulations to the proud parents of a beautiful baby girl which recently arrived at Wupatki. Jane is one mighty sweet baby. Can't blame Davy and Corky for being so proud.

Publications on Hand: Sunset Crater National Monument 2-fold leaflets on hand - 250 Copies.

Robert F. Upton
Ranger in Charge

Tonto National Monument
Roosevelt, Arizona

October 25, 1947

MEMORANDUM for the Regional Director, Region Three.

Following is a report of activities at Tonto National Monument for the month of October, 1947.

Weather. The hot weather was broken by good rains on October 11 and 12, and it has been bright, comfortable and pleasant since then. Tonto is now at its golden best. The lake is filling very slowly.

Inspections. Assistant Regional Director Davis, Architect Saunders, and Engineer Hendricks visited Tonto on October 1, and discussed fiscal affairs, trails, and other problems. Mr. Davis discussed the question of moving the Monument fence with Mr. Lyall, whose ranch adjoins Tonto on the east boundary.

Investigation of Monument Boundary. At the suggestion of Mr. Davis, I made a map of the fences which form a trap along the ridge east of Cholla Canyon. This took considerable time to inspect fence locations on and over the ridge. It would take an aerial photograph to convey the actual relationships of the fence to the ridge, as it is a rough area.

Approaches to Monument. The Apache Trail has been variously good and bad as occasional hard rains cut it up. The road is usually not too bad, though corrugated in places.

Interpretive Service. This month Archaeologist Malcolm Sull was on a special assignment at Aumcacori from Sept. 25 to Oct. 12, then left on annual leave after work October 14, for about a three weeks trip. Thus much of the custodian's time was spent with the month's 520 visitors, 272 of whom visited the ruins in 90 parties, and480 of whom were contacted in the museum in 150 groups.

Travel. Cooler weather the last of the month has increased the number of groups climbing to the ruins, but the winter type of travel beginning now is characterized by fewer persons per car. A slight decrease in travel occurred in lieu of the expected increase.

Noteworthy Visitors. Naturalist Harold Broderick and family of Petrified Forest were in for a short time. We had not seen them since leaving Carlsbad several years ago. Claude Brooks of the Douglas C. of C. dropped in to Tonto this month.

General. Two official trips were made to Globe to get gasoline, propane, sheetrock for room in custodian's house, and other supplies. 550 gallons of stove fuel were delivered to the Monument. The stoves have be en cleande up and installed for the winter. I can't seem to get much done when the ranger is not here. Still doing some painting on ceiling of the custodian's residence.

Charles C. Sharp
Custodian

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
TUMACACORI NATIONAL MONUMENT
Tumacacori BOX 2225, TUCSON, ARIZONA

Tumacacori, Arizona

October 25 47

MEMORANDUM for the Regional Director,
Region Three.

Follows the monthly narrative report for Tumacacori National Monument for the month of October, 1947:

WEATHER CONDITIONS: The drouth here continues with unabated severity. Precipitation for the month was .04, far below normal. High temperature for the month was 100 on September 25. Minimum was 37 on October 23 and 24.

MAINTENANCE: Routine maintenance, including much more irrigating than is usually necessary, was kept current. Woodwork in the kitchen of the ranger residence was re-painted and repairs made to the front door. The annual burning out ofalarge borrow pit which serves as our trash pit, was effected. There was considerable cleanup of grounds and trails.

INTERPRETIVE SERVICE: 673 visitors went on 136 guided trips through the mission and grounds, receiving an average of 37.86 minutes per trip. 1190 visitors received combined Information and Interpretation service in the museum lobby, patio garden, and view room. 1166 visitors saw the museum.

INCREASE OR DECREASE IN TRAVEL: Our visitor total of 1259 persons this month has been exceeded by only one October, that of 1503 for 1946. This makes the second consecutive month in which travel has dropped below that for the same period last year, and may be the beginning of a trend. We are surprised by these figures.

VISITORS: October 3 - Allan Phillips, well known ornithologist.
October 6 - Custodian and Mrs. C. Sharpe, of Tonto National Monument. They spent a day getting acquainted with Tumacacori and the border area, and their visit was much enjoyed.
October 7 - Assistant Superintendent Lon Garrison, of Grand Canyon National Park.

INSPECTIONS: September 27 - Assistant Regional Director Davis, Architect Kenneth M. Saunders, and Engineer Sam Hendricks. Monument matters were gone into thoroughly.

PERSONNEL: Ranger Brewer was on annual leave for the period September 26 - October 14, inclusive. Archaeologist Malcolm T. Bull, of Tonto National Monument, was on assignment here during Ranger Brewer's absence. We greatly enjoyed the process of getting acquainted with Malcolm and his wife, Margaret. It might be of interest to a statistician that during the period of this assignment the staff at Tumacacori National Monument averaged over 6'4" tall!

RED CROSS FIRST AID WORK By expenditure of much after-hours talking and running about in the valley we have succeeded in organizing a Red Cross First Aid class. A class of a dozen meets each Wednesday evening in the museum lobby for instruction in the Standard Course in First Aid, with an instructor who comes out from Nogales to teach. When we are finished with the course each adult person living on the monument will have a certificate, and we will have a First Aid station installed here. This station should be of real value, as the Tucson-Nogales highway is a particularly dangerous one, with frequent auto wrecks in the vicinity of the mission.

STABILIZATION OF MISSION CHURCH 24 man days of laborer time were spent in furthering stabilization work on the mission church this month. At this writing it can be reported that all of the exterior of the church, save for about 225 square feet on the north and east sides of the sacristy, has been given permanent stabilization. This work has consisted of putting cement-lime mortar in innumerable weathered holes in old plaster work, and replacing long sections of completely missing original plaster along the upper portions of the walls. Where large areas were covered, we used expanded metal lathe for a base, then a scratch coat, then a thin colored finish coat. For small patches we used simply the color coat.

The 225 square feet referred to above is where bare adobe wall on north and east of the sacristy was covered with stabilized soil mortar a year ago last June. That work was temporary in nature, but is still strong enough there seems little point in tearing it all out now for placement of lime-cement mortar. Weather is turning cold, and when the nights begin freezing it would be ill-advised to do plaster work.

Some repair is now being done to spots most in need of it on the inner wall surface of the cemetery. In a few days this will be closed down for the winter.

There remains a great deal of permanent stabilization work necessary on the mortuary chapel, cemetery wall, and wall remnants for the rooms of the old patio east of the church. Such work will be resumed next spring and will be carried out as far as present funds will carry us.

Earl Jackson,
Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

TUZIGOOT NATIONAL MONUMENT

CLARKDALE, ARIZONA

OCTOBER 26, 1947 19....

MEMORANDUM for the Regional Director, Region Three.

Following is the monthly narrative report for Tuzigoot National Monument for September, 1947.

Travel Data: Visitors this month totaled 1211 an increase of 17% over the corresponding month of October, 1946. California leads by far all out-of-state travel. Arizon's fine fall weather appears attractive to those from the golden state.

Guide and Contact Service. Museum, ruins and orientation contacts totaled 3042 for the month. 980 people in 200 parties were shown the museum, and 988 people in 212 parties were conducted through the Ruins. All visitors in the Museum were contacted.

Personnel Time: Museum 110 hours, 15 minutes; Ruins: 77 hours, 56 minutes. Total time for Bright: 67 hours, 55 minutes; for Richert: 130 hours, 15 minutes.

Changes in Personnel. On October 7, Eleanor and Everett Bright returned to Tuzigoot from Gran Quivira National Monument where he was relieved by Bill Bowen from Grand Canyon. Good luck Bill and Gertrude at G. Q. It was great to find the plant and office at Tuzigoot in such fine order, thanks to the very able administration of Ranger Richert who has done an excellent job of handling the heavy visitation during the past few months

N.P.S. Visitors: John Davis, Kenneth Saunders add Sam Hendricks on October 3. Also a visit by Park Naturalist H. J. Broderick and family from Petrified Forest.

Maintenance and Administration. New drainage ditches were dug in rear of the garage and along the entrance road to the museum building. We are still waiting final delivery of 297 feet of 2 inch pipe which will complete a 1200 foot section of water line replacement to Clarkdale. Fortunately no leaks have developed during the past month. The county grader did a fine job of grading and smoothing the entrance road to the monument.

Publications: 9000 Tuzigoot Two-fold leaflets and 700 mimeo informational sheets on hand. No other free or for sale publications on hand at this Mon.

Everett W. Bright
Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Walnut Canyon National Monument
Flagstaff, Arizona.

October 30, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities in Walnut Canyon National Monument for the month of October, 1947:

Weather. The first snow of season occurred October 18. In general, the days have been pleasant with the temperature falling below freezing at night.

Visitors. Of the 1,349 total, 1,142 were contacted, and it is estimated that 1,011 made the trail trip unattended. Twenty two parties, or 92 people, used the picnic area.

Some time was spent with the following Park Service people: John M. Davis, Kenneth Saunders, Sam Hendricks, Ted Sowers, Jim Brewer, Bob Upton, Joe Bean, David Jones, Everett Bright, Erik Reed and John Hall.

Activities Other than Routine. Trail Laborer Viklund, assisted some by Ranger Ambuehen, spent five days on the ruins trail. The USFS District Ranger was accompanied when he marked 21 trees for sale on the right-of-way of the power line across Forest Service land. Invitations to Bid were sent coal dealers for our winter's supply, and to building contractors for the repair job proposed for the Admin. Bldg. Four reels of #6 copper-weld wire were sent Bandelier while other supplies were sent to Canyon de Chelly and El Morro. A load of supplies was taken to Navajo Nat'l Monument, and a load of coal procured from the Cow Springs coal mine on the return trip. Radiators of the pick-up truck and the light plant were repaired, and "Prestone" installed. All soda and acid extinguishers, except one in #2 Cottage, were emptied to prevent freezing. All outside water outlets were cut-off until next spring. We dont have a lot of building fire protection now. Two oil stoves have been overhauled. A "Barco" gas hammer was received from the W.A.A.

Paul L. Beaubien
Paul L. Beaubien
Custodian

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
WHITE SANDS

Box 231, Alamogordo, New Mexico

October 28, 47

MEMORANDUM for the Regional Director, Region Three.

OCTOBER - 1947	TRAVEL YEAR 1948 TO DATE
Visitors 6,147 Cars 1,684	Visitors 6,147 Cars 1,684

October, seemingly in line with every other month, continues to surpass like months of a year ago, we are showing over 8,000 visitors gained over last fiscal year to date. This increase, if it continues over last year's banner travel, truly has us worried. Our facilities are taxed at present.

No official trips were made off the area by the Custodian. One trip was made by Operator Sheppard to Deming, New Mexico for tables loaned by the Alamogordo Board of Education for use in the picnic area.

Weather conditions have been normal with possibly warmer days throughout the month than usual. .42 inches of rain added to the relief of the long drouth, but was too late for many plants.

We have had little time for much of anything outside of routine. Minor troubles with pumps, lines, cars, etc have kept the boys on the jump. Paul has held the office, and helped outside as he could, and Joe and Harold tried to keep the outside going. Joe took advantage of the rain and bladed his road several times. Winds have dried them out much faster than usual this time of year. Harold has, over the past several weeks, taken parts on two motors and has the black Ford pickup in running order again. The green coupe-pickup has been parked and the purchased notified that it was available for release. We were scared to drive it another mile for fear it would fall apart. We have been notified that our new pick-up is enroute so perhaps before long we can breathe easy again from the standpoint of transportation.

Water continues to be the subject of vital concern in Alamogordo and drastic measures are being taken in an attempt to assure the town of an ample supply. It will certainly be a benefit to all concerned when we get our Dog Canyon water and are no longer dependant on the town.

Concession sales have been slightly above normal with no complaints from any source.

The museum has functioned with its usual high efficiency. The driving rain came through the roof in one place and watered one case thoroughly but aside from that the museum has been 100%. We are trying again to purchase the old type fluorescent starter in an attempt to get all lights functioning once more.

We had one car wreck in the Sands. Three boys and three girls were out, and from the story we can get the boys were hunting the girls and turned over. Actually, according to the State Police investigation, the fellow were driving too fast and in trying to show off turned overlanding the car squarely on its top. No one was injured but they were just lucky. In lesser rolls people have been killed or seriously injured.

Sam Hendricks paid us an official call in connection with our road job. Naturalist Sullivan and his family were in for a night and Mr. and Mrs. Tom Conley accompanied by Harry Linder paid us a brief call. Mr. and Mrs. Weldon P. Heald of the Flying H Ranch at Hereford, Arizona were here a few hours. They wish to be remembered to all their Service friends.

With water line and tank troubles, almost seven hundred visitors Sunday with one man on the gate, while the other two worked on the water system, I guess we can look forward to lots of visitors and lots of fun for November.

Johnsill Faris,
Custodian.

in triplicate.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Wupatki NATIONAL MONUMENT

Flagstaff, Arizona

25 October 19 47

MEMORANDUM for the Regional Director, Region Three.

Following is a report of activities at Wupatki National Monument for the month of October, 1947:

Visitors this month: 379 Travel Year to date: 379

Weather: Delightful fall weather prevailed most of the month with the exception of one week during which we received 1.55 inches of precipitation.

Roads: Minor road repairs were undertaken following the storms, but the roads are in good condition from the rains. While visitors complain about the "washboard", none have encountered any difficulty on the cinder sections.

Travel: Record travel was established again this month with an increase of 44% over that of last October. Actually travel is even heavier than we have recorded, but we do not have any satisfactory figure to compensate for those who do not register.

Personnel: Mr. Joe Bean was employed as laborer on Roads and Trails pending assignment to the permanent roads and trails position. Mr. and Mrs Bean were formerly at Tonto National Monument, and come to us with experience in our problems.

Activities of Outside Agencies: The Barron-Steele oil prospect on Spider Web Ranch north of the Monument struck water at approximately 1300 feet. Apparently there is a fairly good flow at this depth which is approximately the same depth as Deep Well near the Citadel Ruin. Drilling continues in search of oil.

NPS Visitors: Brief discussion of some monument problems was held with Assistant Regional Director Davis, Architect Saunders and Engineer Hendricks in Flagstaff on the 11th.

Unusual Observations: Apparently we had earthquakes of local origin the evening of October 26. At 8:55 PM a thundering noise lasting several

RECEIVED NOV 3 1947

seconds was heard. At 9:14 a longer and louder thundering was heard and we observed a suspended vase swinging. The sky was cloudless even over the San Francisco Peaks. The Peshlacai family noticed the disturbance and say that the Navajos near Gray Mountain felt the earth tremor and heard three rumblings. Apparently nothing was observed at Flagstaff, although Ranger Upton noticed it a Sunset Crater. An official report will be made after we have gathered more observations.

Navajos: Grandpost, the medicine man, has returned from his sojourn in the penetentiary at Florence. He looks much younger and is the envy of the older Navajos because he had all his teeth extracted and store teeth installed at the expense of the State. Sally Peshlacai, formerly Clyde's #1 wife, has married Emmett Lee of Wupatki Basin.

General: Aside from routine maintenance, visitor contact and preparation for winter projects, we have been able to complete the installation of directional markers or signs using cut-out letters.

David J. Jones
Custodian

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

November 4, 1947.

MEMORANDUM for the Regional Director, Region Three.

Following is the narrative report of naturalists of the Southwestern National Monuments for the month of October, 1947.

Staff Activities - General

Naturalist Dale S. King was in the office during the month except for a trip to Bandelier on October 21.

At the beginning of the month Archeologist Charlie R. Steen was in the field at Aztec Ruins and Chaco Canyon National Monuments. He spent the balance of the month in the office except for two one-day trips to Bandelier to look over the stabilization work at Tyuonyi Ruin. Most of Steen's time was spent cataloging library accessions and keeping stabilization records current.

Naturalist Maurice Sullivan spent the month in the office.

Planning - Other Than Within

Sullivan completed the rough draft of the interpretive outline for Saguaro National Monument and send it to the custodian for comment on October 14. He assembled bibliographical references and started on the interpretive outline for Great Sand Dunes toward the end of the month. He finished the "Concise Statement of Significance" and "General Theme of Development" for Montezuma Well and turned it over to the Branch of Planning for comment.

Progress of Exhibit Plans and Projects

King discussed with the staff at Bandelier and with artist Pablita Velarde Harding the proposal to employ Mrs. Harding at the monument to complete the ethnological illustrations in the museum there. Arrangements were made to employ her as soon as the museum preparatory job is set up, and it is hoped to complete the illustrations for the room with Headquarters Naturalist funds which will be completely exhausted for the year by the project. A description of the job was prepared for the personnel division, which forwarded it to the Director for approval.

Accessions - Other Than Library

Sullivan obtained for our stencil punch machine a supply of ink and stencil boards.

Region Three Office Loan Library

Accessions for the month were 4 books, 57 reports, and 22 pamphlets, making a total of 83 items.

Steen cataloged 50 books and sent them to various monument libraries on permanent loan.

Books received during the month:

Leighton and Kluckhohn - Children of the People (Navajo)
Clarence S. Jackson - Picture Taker of the Old West
Harry Tschopik - Highland Communities of Central Peru
Spirit of the Pioneers, Biography and Diary of Lorenzo Dow Young (Utah)

Southwestern Monuments Association

There were several major happenings during the month, not the least of which was the publication of "Poisonous Dwellers of the Desert" by Nate B. Dodge, copies of which were received on October 21. A considerable number of the booklets were sent out to various periodicals as review copies, and copies were distributed throughout the National Park Service. This booklet was obtained at a price which will allow us to supply a jobber whose salesmen will place in most of the book stores of the Southwest, thus heightening the ceiling of our sales.

A lengthy annual report, the seventh sent to the Association was started, was mimeographed and distributed to our Board of Directors and all the field stations of the National Park Service to whom it might be of benefit. The encouraging increase in our sales and assets were carried in last month's report.

Considerable editing was done on the two papers concerning Montezuma Castle. It is hoped that this book can go to the printers sometime late this month.

Discussions were had with a representative of the Museum of New Mexico in regards to a possible price lowering on First Penthouse Dwellers of America.

A commission was given Arthur Woodward of the Los Angeles Museum to write for the Association a booklet describing Southwestern Indian handicraft.

Preparation of stencils for the mailing list was begun on Saturday, October 25, utilizing paid services of stenographers drawn from Region Three personnel.

A pleasant visit by Mr. Horace M. Albright, a member of our Board of Directors, was enjoyed on Friday, October 24. Mr. Albright expressed himself as being pleased with the progress of the Association.

The audit of the fiscal year 1946-47 was completed by Mr. W. C. Neal, a commercial auditor of Santa Fe, and it agrees with what the Treasurer had previously submitted, except for minor differences which do not affect the totals given by the Treasurer to the Executive Secretary.

This month 196 covers were mailed including 22 purchase orders, and 45 letters, which is a considerable increase. Last month 123 covers were mailed.

Visitors

Arthur Woodward of the Los Angeles Museum, Horace M. Albright of the United States Potash Company, Custodian Sowers of Great Sand Dunes, Custodian Binnewies of Bandelier, Ranger Fulton of Saguaro, and Ranger Onstott of Bandelier.

Unusual Activities - Conferences

On Thursday, October 23, Mr. Fred Worman and Student Jack Tierney of Adams State College of Alamosa, Colorado, visited the office, conferring with staff members and men from Bandelier on a proposed program of archeological research on and near Bandelier National Monument. In view of the change in land ownership which will occur concerning the territory between the two sections of the monument, it was decided that the institution should apply for archeological excavation and survey permits in that area, although base camp will be in Frijoles Canyon at Bandelier. If the National Park Service approves, and permits can be obtained, it is probable that this institution will complete a five-year program which should do much to add to the incompletely known interpretive story of the monument.

One of the results of the conference was a decision that at least two and probably more of the major ruins now on Forest Service land should be studied with a view of possible inclusion as detached sections in Bandelier National Monument. A memorandum recommending that Navawi and Tsirege Ruins be added to the monument was prepared.

Dr. Walter W. Taylor, Jr., research associate of the United States National Museum, doing archeological survey in Coahuila, wrote the office asking for pictures of coatimundi. He is attempting to establish present ranges of animals, the bones of which have been found in his previous excavations in caves there. Luckily, good pictures of the animal were

found in the library, and photographic reproductions sent Dr. Taylor in time to save his expedition considerable expense.

Ruins Stabilization

Steen spent considerable time keeping the voluminous stabilization records current. He made arrangements for personnel from the Chaco unit to go to Aztec Ruins to superintend the repair roofs on kivas there. He also inspected and superintended the stabilization work at Bandelier, which was also inspected by Naturalist King and Archeologist Reed.

Technical Aid to Administrators

Sullivan completed the rough draft on an informational booklet for instruction of Region Three employees. This is a major job, and he is to be congratulated on the considerable work involved.

Several letters were written to distribute surplus property in various national monuments.

Projects for the Ensuing Month

King will travel to the monuments near Flagstaff, Arizona early in the month for a period of two or three weeks to complete old stabilization and excavation reports, inspect stabilization activities, and do some work on the Walnut Canyon Museum plan.

Steen will leave the office on November 3 on a ten-day trip to Chaco Canyon, Aztec Ruins, Canyon de Chelly, Gran Quivira National Monuments.

Sullivan will make a short trip to Great Sand Dunes, and will spend most of the month on routine activities and master plan statements.

(SGD) DALE S. KING
Dale S. King,
Naturalist.

(SGD) JOHN M. DAVIS

Approved for Distribution _____, November 4, 1947.
Assistant Regional Director.

cc: Mr. Dodge.

REMARKS: (Please note below any factors influencing interpretive service, such as: "museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

Fill Out Only Those Blocks That Apply

EXPLANATION OF TERMS USED

"INTERPRETIVE" personnel are naturalists or ranger naturalists, historians, and historical aides.
"ADMINISTRATIVE" are custodians, superintendents, etc., called on to assist with interpretation.
"OTHER" are rangers, clerical personnel, and the like who may be called in to help interpret the area.

Conducted Trips: Trips conducted by N.P.S. personnel in the field on through rides, to historic structures, or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (library, contact station, exhibit rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispensing INFORMATION rather than interpretive service should not be considered as attended interpretive stations.

INFORMATION is factual matter relative to physical developments, physical facilities, geographic locations, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, motel accommodations, bus and train schedules, and similar matters outside of the area regarding which visitors inquire.

INTERPRETATION is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visitors using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive devices, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or provided by Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Please total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should not be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive devices, this attendance may record a total considerably in excess of the visitors registered in the area during the same period. For comparison, the total number of visitors to the area during the month should be shown.

RECEIVED JUL 28 1942 DIRECTOR'S OFFICE

THIS REPORT DUE: From all National Park Service areas providing any interpretive service. Send two copies to the Regional Director who will forward one to the Director. One copy should be retained by the superintendent or custodian of the area in which the report originates. Coordinating superintendents also should be provided with a copy. Due in the Regional Director's office not later than the 6th of the month following that covered by the report.

TITLE Custodian.

REMARKS: (Please note below any factors influencing interpretive service, such as: "museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

Fill Out Only Those Blocks That Apply

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures, or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (Library, contact station, exhibit rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispensing INFORMATION rather than interpretive service should not be considered as Attended Interpretive Stations.

INFORMATION is factual matter relative to physical developments, physical facilities, geographic locations, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, hotel accommodations, bus and train schedules, and similar matters outside of the area regarding which visitors inquire.

INTERPRETATION is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visitors using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive services, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or provided by Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Please total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should not be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive devices, this attendance may record a total considerably in excess of the visitors registered in the area during the same period. For comparison, the total number of visitors to the area during the month should be shown.

THIS REPORT DUE: from all National Park Service areas providing any interpretive services. Send two copies to the Regional Director who will forward one to the Director. One copy should be retained by the superintendent or custodian of the area in which the report originates. Coordinating superintendents also should be provided with a copy. Due in the Regional Director's Office not later than the 6th of the month following that covered by the report.

Archeologist position is still unfilled.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED ON TO HELP INTERPRET THE AREA.

CONDUCTED TRIPS: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

TALKS: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

ATTENDED INTERPRETIVE STATIONS: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.

INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS INQUIRE.

INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

UNATTENDED INTERPRETIVE DEVICES: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITORS USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE DEVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

INTERPRETIVE ACTIVITIES OUTSIDE THE AREA: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

COLUMN #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

COLUMN #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

COLUMN #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

INTERPRETIVE ACTIVITIES OUTSIDE OF THE AREA ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

TOTALS: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. TOTAL ATTENDANCE SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures, or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (library, contact station, [illegible] rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispensing INFORMATION rather than interpretive service should not be considered as attended Interpretive Stations.
INFORMATION is factual matter relative to physical developments, physical facilities, geographic locations, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, hotel accommodations, bus and train schedules, and similar matters outside of the area regarding which visitors inquire.
INTERPRETATION is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visitors using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive services, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or provided by Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Please total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should not be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive devices, this attendance may record a total considerably in excess of the visitors registered in the area during the same period. For comparison, the total number of visitors to the area during the month should be shown.

This Report Due: From all National Park Service areas providing any interpretive services. Send two copies to the Regional Director who will forward one to the Director. One copy should be retained by the Superintendent or Custodian of the area in which the report originates. Coordinating Superintendents also should be provided with a copy. Due in the Regional Director's Office not later than the 5th of the month following that covered by the report.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

Talks: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

Attended Interpretive Stations: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.

INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS INQUIRE.

INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

Unattended Interpretive Devices: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITOR USERS EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE DEVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

Interpretive Activities Outside the Area: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

Column #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

Column #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

Interpretive Activities Outside of the Area ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

Totals: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. Total Attendance SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 5TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

NAME Ted C. Sowers

TITLE Custodian

REMARKS: (Please note below any factors influencing interpretive service, such as: "museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures, or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (Library, contact station, exhibit rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispensing INFORMATION rather than interpretive service should not be considered as attended Interpretive Stations.

INFORMATION is factual matter relative to physical developments, physical facilities, geographic location, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, motel accommodations, bus and train schedules, and similar matters outside of the area regarding which visitors inquire.

INTERPRETATION is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visitors using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive services, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or provided by Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Please total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. This should not be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive devices, this attendance may record a total considerably in excess of the visitors registered in the area during the same period. For comparison, the total number of visitors to the area during the month should be shown.

THIS REPORT DUE: from all National Park Service areas providing any interpretive services. Send two copies to the Regional Director who will forward one to the Director. One copy should be retained by the Superintendent or Custodian of the area in which the report originates. Coordinating superintendents also should be provided with a copy. Due in the Regional Director's Office not later than the 5th of the month following that covered by the report.

NAME _____
TITLE J.W. Brewer, jr. Custodian

REMARKS: (Please note below any factors influencing interpretive service, such as: "museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures, or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (library, contact station, exhibit rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispensing INFORMATION rather than interpretive service should not be considered as attended Interpretive Stations.

INFORMATION is factual matter relative to physical developments, physical facilities, geographic locations, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, hotel accommodations, bus and train schedules, and similar matters outside of the area regarding which visitors inquire.

INTERPRETATION is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visitor using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive services, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or provided by Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Please total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should not be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive devices, this attendance may record a total considerably in excess of the visitors registered in the area during the same period. For comparison, the total number of visitors to the area during the month should be shown.

THIS REPORT DUE: from all National Park Service areas providing any interpretive services. Send two copies to the Regional Director who will forward one to the Director. One copy should be retained by the Superintendent or Custodian of the area in which the report originates. Coordinating Superintendents also should be provided with a copy. Due in the Regional Director's Office not later than the 5th of the month following that covered by the report.

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

CONDUCTED TRIPS: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

TALKS: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

ATTENDED INTERPRETIVE STATIONS: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.
INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS ENQUIRE.
INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

UNATTENDED INTERPRETIVE DEVICES: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITORS USING EXHIBITS-IN-PLACE, ORIENTATION PANELS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE SERVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS, AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

INTERPRETIVE ACTIVITIES OUTSIDE THE AREA: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

RECEIVED OCT 20 1941 12 M

INSTRUCTIONS FOR FILLING OUT THE FORM

COLUMN #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

COLUMN #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

COLUMN #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

INTERPRETIVE ACTIVITIES OUTSIDE OF THE AREA ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

TOTALS: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. TOTAL ATTENDANCE SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

NAME Charles C. Sharp

TITLE Custodian

REMARKS: (Please note below any factors influencing interpretive service, such as: "museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

Archeologist on special assignment at Tumacacori first 3 weeks of month, on annual leave last week of report month.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

CONDUCTED TRIPS: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

TALKS: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

ATTENDED INTERPRETIVE STATIONS: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.); COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.
INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS INQUIRE.
INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

UNATTENDED INTERPRETIVE DEVICES: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITOR USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE SERVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

INTERPRETIVE ACTIVITIES OUTSIDE THE AREA: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR INTERPRETIVE DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

COLUMN #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

COLUMN #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

COLUMN #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

INTERPRETIVE ACTIVITIES OUTSIDE OF THE AREA ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

TOTALS: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. TOTAL ATTENDANCE SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT INTERPRETIVE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

NAME Earl Jackson

TITLE Earl Jackson, Custodian

REMARKS: (Please note below any factors influencing interpretive service, such as: "museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*Estimate. ** Including 63 runarounds.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures, or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (Library, contact station, exhibit rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispensing INFORMATION rather than interpretive service should not be considered as attended Interpretive Stations.

INFORMATION is factual matter relative to physical developments, physical facilities, geographic locations, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, hotel accommodations, bus and train schedules, and similar matters outside of the area regarding which visitors inquire.

INTERPRETATION is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visitors using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive service, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or provided by Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Please total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should not be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area as provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive devices, this attendance may record a total considerably in excess of the visitors entertained in the area during the same period. For comparison, the total number of visitors to the [illegible] should be shown.

THIS REPORT DUE: From all National Park Service areas providing any interpretive services. Send two copies to the Regional Director who will forward one to the Director. One copy should be retained by the Superintendent or Custodian of the area in which the report originates. Coordinating superintendents also should be provided with a copy. Due in the Regional Director's office not later than the 6th of the month following that covered by the report.

REMARKS: (Please note below any factors influencing interpretive service, such as: "museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures, or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (library, contact station, exhibit rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispensing INFORMATION rather than interpretive service should not be considered as attended Interpretive Stations.
INFORMATION is factual matter relative to physical developments, physical facilities, geographic locations, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, hotel accommodations, bus and train schedules, and similar matters outside of the area regarding which visitors inquire.
INTERPRETATION is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visitors using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive devices, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or provided by Service personnel outside the area. Number of replies to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Please total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should not be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive services, this attendance may record a total considerably in excess of the visitors registered in the area during the same period. For comparison, the total number of visitors to the area during the month should be shown.

This Report Due: From all National Park Service areas providing any interpretive services. Send two copies to the Regional Director who will forward one to the Director. One copy should be retained by the superintendent or custodian of the area in which the report originates. Coordinating superintendents also should be provided with a copy. Due in the Regional Director's Office not later than the 10th day of the month following that covered by the report.

NATIONAL PARK SERVICE

Region Three

Santa Fe, New Mexico

December 15, 1947.

MEMORANDUM for the Regional Director, Region Three.

Following is a narrative report for Naturalists of the Southwestern National Monuments for the month of November 1947.

Staff Activities - General

Naturalist Dale S. King was in the field during the entire month. He worked at the Museum of Northern Arizona on a stabilization and excavation report of Nalakihu ruin at Wupatki. While at Flagstaff, he Also visited Walnut Canyon, Tuzigoot and Montezuma Castle National Monuments and Grand Canyon National Park.

Archeologist Charlie R. Steen visited Chaco Canyon, Aztec Ruins, Canyon de Chelly, Gran Quivira and Bandelier National Monuments. All of these trips were in connection with ruins stabilization projects, either those in operation or planned jobs. These trips took a total of about two weeks, the balance of the month was spent in the office.

Naturalist Maurice Sullivan was in the office until November 18, when he was transferred to Museum Survey. He will work on museum plans for a couple of monuments until he transfers to Lake Mead Recreational Area in January.

Administration - Interpretation

Routine reports were prepared and twenty-eight letters written.

Progress of Exhibit Plans and Projects

Naturalist Sullivan spent several days at Arches National Monument in order to familiarize himself with the area so that he can start work on an exhibit plan for the monument.

Region Three Office Loan Library

Library accessions during November included 15 books, 38 periodicals, 9 reprints and pamphlets. Fifty books were accessioned and catalogued.

Books received were:

Bernheimer, Charles L. - Rainbow Bridge - Doubleday Page and Co., New York, 1926.

Bill, Alfred Hoyt - Rehearsal for Conflict (Mexican War) History Book Club, New York, 1947.

Brown, G. Baldwin - The Care of Ancient Monuments MacMillan Co., Cambridge, 1905.

Cahalane, Victor H. - Mammals of North America MacMillan Co., New York, 1947.

Cressman, L. S., and Williams and Krieger - Early Man in Oregon University of Oregon, Eugene, 1940.

Dowdey, Clifford - Experiment in Rebellion (The Confederacy) Doubleday and Co., Inc, Garden City, 1947.

Fierro Blanco, Antonio - The Journey of the Flame Houghton Mifflin Co., Boston, 1933.

Flint, Richard F. - Glacial Geology and the Pleistocene Epoch John Wiley and Sons, Inc, New York, 1947.

Martin, Paul S., with Quimby and Collier - Indians Before Columbus University of Chicago Press, Chicago, 1947.

Marti, Manuel G. - Ceramica Espanola Editorial Labor, S.S., Buenos Aires, 1933.

Ramsey, Charles G. and H. R. Sleeper - Architectural Graphic Standards John Wiley and Sons, Inc, New York, 1941.

Smithsonian Institution, Annual Report, 1946 Government Printing Office, Washington, 1947.

Underhill, Ruth M. - Hawk Over Whirlpools J. J. Augustin, Inc, New York, 1940.

Southwestern Monuments Association

Treasurer Vodder worked 18 days, one of which was a Saturday spent supervising typists who were cutting mailing stencils. It has proven more efficient, however, to have stencils cut on a piecework basis at two cents each. Temporary employees Luis Castellum and Barbara Vodder cut a total of 2,876, making the mailing list about 6,000 names at the present. Files were rearranged in newly obtained steel file drawers. During the absence of Executive Secretary King, the Treasurer spent much time in taking care of daily mail or posting inventories on control

Visitors

Custodian Sowers of Great Sand Dunes National Monument; Custodian Bowen, Gran Quivira National Monument; Custodian Binnewies and Ranger Onstott, Bandelier National Monument; Archeologist Vivian, Ruins Stabilization Mobile Unit and Dr. Dario O'Brien, Gila Pueblo.

Ruins Stabilization

Work at Chettro Kettle ruin, Chaco Canyon National Monument, continued during the month. At Bandelier about two week's work were spent at Tyuonyi ruin; this work will continue through the winter as weather permits. Plans were made for work in the spring at Gran Quivira and Canyon de Chelly.

Projects for December

King will return to the office and will probably spend the month at Santa Fe. Steen will return to Canyon de Chelly with Archeologist Vivian for an inspection of a wall at White House ruin and will probably spend the balance of the month at Santa Fe.

Charlie R. Steen,
Archeologist.

Approved for Distribution _____, December 15, 1947.
Assistant Regional Director.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
Arches
NATIONAL MONUMENT
Moab, Uta h

November 25, 47

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of November, 1947:

GENERAL: Visitors continue to come to the area despite the cold and stormy weather and our travel continues much above normal. Most of our visitors were in to do the area in color and stated that they wanted to miss the summer crowds and work in the area while it was cool.

INSPECTIONS: An inspection was made at Natural Bridges National Monument on October 29th and things were put in shape for the winter.

Field Examiner Koch of the Bureau of Land Management visited the area again on Nov. 22nd regarding the investigation of unauthorized excavations at Dalton Wells dinosaur deposit.

TRAVEL: Our travel for the month was considerably less than October but was practically double that for November, 1946. We had a total of 69 cars and 185 people. There was representation from 21 states and the District of Columbia.

Several parties of photographers visited the area during the month and spent from four to seven days covering all the features of Arches and surrounding Moenie points.

INTERPRETIVE SERVICES: Our interpretive contacts dropped again this month with only 274 people receiving this service. We had three auto caravans to various sections of the area with 8 people and two hikes were made to Delicate Arch with 6 people. Seventy five people were contacted at headquarters and 18 people at the Windows parking area. One hundred sixty seven people visited the area unattended.

WEATHER: Cold weather closed in during the month and freezing temperatures have occurred each night. Rain and sleet fell on November 8th and 19th with snow on the 21st which left 2 inches on the ground. Heavy winds were experienced on three occasions during the month.

COOPERATING GOVERNMENTAL AGENCIES: Grand County started construction of approach roads to the Devil's Garden and Fiery Furnace sections on November 5th. To date 3 miles of this road, to the Salt Gorge, has been roughed out with a bulldozer. The first 1.2 miles has all culverts installed and is ready for finishing with a patrol. Next week work will start on the spur through Salt Valley to the Devil's Garden.

County Commissioner L. L. Taylor informed me that the Utah State Road Commission were seriously contemplating the spending of $7000.00 to improve the 6½ miles of approach road from the highway to the boundary in the Windows section. They have asked the county to furnish the equipment and perform the work.

NATIONAL PARK SERVICE VISITORS: Landscape Architect Alleman arrived at the monument on November 1st and the 2nd and 4th were spent in flagging the first two miles of road to the Devil's Garden and Fiery Furnace. On November 5th he drove me to Thompson, Utah to take delivery on a new pickup truck after which he departed for Santa Fe.

Road Maintenance Engineer Miller of Washington office and Regional Road Maintenance Engineer Hendricks visited the area on November 7th and the pressing problem of maintenance of our roads was discussed with them.

ACQUISITIONS: Delivery was received on a 1947 Dodge pickup truck on November 6th, to replace the veteran 1937 Chevrolet Coupe pickup. It is quite a sensation to have a new truck to break in, the first in my 13 years with the Service.

PRIVATE LANDS: On November 14th County Commissioner L. L. Taylor and myself visited Mr. Emmett Elizondo at Harley Dome, Utah to discuss the purchase of the 160 acre Turnbow Homestead, only private land in the monument. An option was obtained from him in favor of the Service and this was submitted, with an appraisal, for action by the Director.

NEWSWORTHY VISITORS: Mr. John Clark, vertebrate geologist of the Carnegie Museum and his field assistant A. D. Lewis arrived in Moab on November 23rd. They are making a reconnaissance survey of the Chinle formation for vertebrate fossils and will spend a week or 10 days in the vicinity of Moab.

MAINTENANCE: Small trees, donated by several Moab residents, were planted completely around the quarters with the hope that they will serve as an effective windbreak in a year or two.

Prestone was placed in all water cooled equipment during the month.

Repairs were made to the water lines at the office to protect them from freezing weather.

Work continued during the month on new signs for the roads and trails.

ROADS: The Windows section road has been in fair condition the entire month. No maintenance work has been done by the state during this time. Work has been carried on all month on the 2.8 miles inside the boundary and we are gradually getting it in shape with a stake truck and a no. 2 shovel.

The Salt Valley road to the Devil's Garden and Delicate Arch has been in very poor shape but several parties have made the trip to these sections despite bad roads.

NATURAL BRIDGES NATIONAL MONUMENT: An inspection trip was made at this area on November 28th, at which time most of the equipment was removed to Arches for the winter. The trails were found to be in fair shape despite the heavy storm and the approach road was in good condition. A trip was made to Kachina Bridge and Wiley's "Atomic Rock" via the White Canyon road. That portion of the White Canyon road, over which we travelled, was in very poor shape and Redd advised me that the entire distance to the Colorado River is badly washed out.

Erskell L. Makan
Custodian

(in trip.)

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
AZTEC RUINS NATIONAL MONUMENT
AZTEC, NEW MEXICO

24 November 1947

MEMORANDUM for The Regional Director,
Region Three, National Park Service.

There follows the report of activities in Aztec Ruins for November 1947.

Weather. Colder weather with snow and sleet has held back visitation. We have experienced considerable sub-freezing weather with a low of 11 above.

MAINTENANCE. Both the great kiva and the museum buildings' roofs have developed leaks which were repaired. Drains for the parking area were quite thoroly cleaned of roots and other accumulations. Three additional lengths of 30 inch concrete pipe were purchased and hauled from Farmington for use in the new manholes of the drainage ditch. These will be placed during December, just as soon as the ground is frozen so a derrick truck may operate.

SPECIAL ACTIVITIES. Gordon Vivian's crew from Chaco Canyon worked Nov 3-7, uncovering the small covered Kiva "E", for repairs to the roof. The Custodian presented the colored film, "Big Bend" to the local Parent-Teachers Association Nov 12, and on Nov 21 presented the films to the science classes of the High School.

INSPECTIONS. Charlie Steen inspected the work on the covered kiva "E" Nov 5, and Paul Balch was in for willows to be planted at Chaco and Canyon de Chelly in stream control work.

INVESTIGATIONS OF BOUNDARY CHANGE. The deed from Clyde Hubbard to The Southwest Monuments Association and the deed from them to the US Government were recorded in the San Juan Co. Court House 1 November 1947. This concerns the acquisition of the Hubbard Mound as an addition to the Monument.

INCREASE IN TRAVEL. There were 555 visitors in 173 cars from 29 states, Wash. D.C., Alaska and Guam. This is an increase of approximately 39% over travel for November last year.

Interpretive Services. There were 235 visitors in 89 parties conducted thru the ruins and 553 people in 153 groups shown the museum.

Irving D. Townsend,
Custodian.

in triplicate

RECEIVED
NOV 28 1947

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
BANDELIER NATIONAL MONUMENT
SANTA FE, NEW MEXICO

November 29, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of the activities at Bandelier National Monument for the month of November 1947.

Weather

The beautiful weather of October continuing on a slightly cooler scale through the first half of November stimulated travel over 50% for the entire month. Storms throughout the remainder of the month caused a low of one degree above zero on November 24 and a total of 0.74 inches of moisture. Snow reached a depth of seven inches on the level on the 23rd. The maximum temperature was 76 on October 28.

Roads and Trails

The approach road is in better condition now than it has been for some time except for snow on Ancho Hill. The road was bladed just before the heavier snows fell and now contains enough moisture to keep it in good condition. Little difficulty was encountered in opening the road after the snowfall. Almost two weeks work was spent by the road crew on building stone headwalls below the dips and improving the drainage of the road.

The preliminary survey for realignment of the approach road was begun during the month by the Public Roads Administration beginning at the detached Otowi section and working towards headquarters. Only part of the road is to be surveyed at this time with the remainder to be done in the spring.

Cooperating Non-governmental Agencies

Approval has been received from the Director for the Adams State College, Alamosa, Colorado to conduct an archeological field session in the monument during the summer of 1948. During the session an archeological survey and test excavations will be conducted on the Pajarito Plateau and a small pueblo ruin near monument headquarters will be excavated.

Travel

The travel for November this year showed an increase of 50% over that for the same period last year. This increase occurred during the first half of the month for there were three days with no visitors and four more days with not over two cars during the stormy latter half of the month. Taking care of the 733 visitors added to the other duties such as patrolling during the hunting season, stabilization of ruins etc. made November a busy month for all personnel.

Visitors

National Park Service visitors during the month were Assistant Regional Director Davis, Regional Forester Carlson, Archeologist Steen, and Custodian Bill Bowen of Gran Quivira. Foreign visitors consisted of one from Barcelona, Spain.

Stabilization

Stabilization work for the month resulted in cleaning walls for packing and testing the foundations of 21 rooms. Room drawings for the first fifty rooms stabilized were completed. 40 man days were spent on stabilization.

Protection

Special patrols were maintained over all sections of the monument during the deer hunting season November 10 to 21. Fewer hunters than we had anticipated were encountered in the areas surrounding the monument and hunting was poorer than last year due to the dry weather. No violations of either the state laws or National Park Service regulations were detected.

Posting of the boundary along the north rim of Frijoles Canyon was finished before the opening of the hunting season.

Regional Forester Carlson made an inspection both sections of the monument for forest insect infestations. Some infestation was found but it is not serious enough at present to necessitate control measures although if it continues to spread some control will have to be started.

Concessioner

The proposed rates for the 1948 season forwarded to the Director through channels by Mrs. Frey, Manager of Frijoles Canyon Lodge, were basically the same as for the 1947 season except for a few minor justifiable raises.

Utilities

Verbal confirmation was received from the Atomic Energy Commission that the necessary arrangements have been completed with the telephone company to enable us to connect with the Mountain States Telephone Company line in the vicinity of the Otowi Section, thus solving our communications problem.

Personnel

Canyon de Chelly National Monument
Chinle, Arizona

November 25, 1947

MEMORANDUM for the Regional Director, Region three.

The following is a report on activities at Canyon de Chelly National Monument during the month of November, 1947.

Weather Conditions

Winter weather set in in earnest with a Snow Storm on November 17 with a small flurry every night for about a week. This brought us a total of around six inches at headquarters with over a foot at Spider Rock. Weather has been much colder than for the last six years with a minimum temperature of five degrees. November 1 was our warmest day with a Maximum of 73 degrees but for the last ten days the temperature has not gone above 58, with minimum temperatures ranging between five and fifteen above. A total of .92 inches of snow and rain moisture was registered

Administration

Although relatively small amount of time was spent in the office, most of our work is up to date. Pictures and information for the publicity story on our mummified turkey were submitted. Employment papers for workers on Soil and moisture and road repair projects were submitted.

Maintenance

The greater part of the Custodian's time has been spent in maintenance and repair work this month. A Dunn Saw was borrowed and our winter supply of fireplace wood was cut and hauled. The white house trail was repaired and 25 man days were put in on hauling dirt and repairing the road to Chinle. This road has been impassable during and after heavy rains and it has been necessary to detour travel out into the wash. Drainage ditches were dug and approximately 45 yards of gravel and sand were dumped in the holes with about that much more needed to make it passable all winter. Due to adverse weather conditions maintenance and repair of equipment used in the canyons on the planting job takes considerable time.

Soil and Moisture

The S&M planting project got underway on November 14 with the cutting of cottonwood poles for the spiders. Living willow cuttings were hauled from Aztec in the S&M stake truck by Mr. Balch and Joe Cly. Work at Antelope house was started on the 17th and construction and planting of peachleaf willow was finished on the 21st. The crew has started work on construction of Spiders at White house but due to the adverse weather conditions are a little behind schedule.

RECEIVED DEC 2 1947

N.P.S. Visitors

Archeologist Charlie Steen was in November 6 and 7th looking over Stabilization needs at White house and other ruins. Regional Soil Conservationist Balch arrived November 16 and was here intermittently until November 19 going over the SCS project and hauling post cards from Artec.

Travel

Road and weather conditions combined to make travel disagreeable during the greater part of the month but there were fifty visitors which is a sizeable increase over the 26 registered last year.

General

Mr. Kenner Robbins and party of Affiliated Film Producers Inc. visited the area in order to take pictures for incorporation into a film on the Southwest which they were making for the U.S. Department of State. Weather conditions prevented their taking pictures.

Government Publications on hand.

2000 Two-fold leaflets on Canyon de Chelly were received during month.

ADDRESS REPLY TO SUPERINTENDENT

Capulin New Mexico

Memorandum for the Regional Director
Region Three, National Park Service,
Santa Fe, New Mexico,

There follows a report of the activities in and around Capulin Mountain National Monument, for the Month of November 1947.

About fifteen hundred visitorsthis month bringing total travel year to date to four thousand five hundred, and total travel fiscal year to date to twenty four thousand.

None of the Park Service officials were visitors during the month and no special visitors of Note.

Porcupines are again invading the Monument and from all appearances they have come in numbers and will necessarily need thinning. This fall they are attacking the large pines on the west border of the Monument and are already doing considerable damage. The Custodian will make a thorough inspection this coming week and decide on such control methods are deemed advisable.

Another warm air vent has been discovered near the base of the volcano. this one is on the north west side of the Mountain just off the reserve This warm air comes from a large vent or crack in a lava bed and is just warm enough to prevent any snow from staying within ten feet of the vent, on cold days on can see this for some hundred yards or more steaming. I have not tested this one yet but believe it to be about 50F.

This week the Custodian together with a County grader have been overhauling the approach road from Highway 64 to the Monument line, this is needed very bady and we are doing a good job of it. I hope to be able to get the State to gravel this portion.

Weather has been mighty fine nearly all month but the last week has given us a couple of four inch snows which was appreciated very much.

Roads are in splendid condition in the Monument.

Very Respectfully,
Homer J Farr,
Custodian.

November 25, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows the narrative report for Casa Grande National Monument for November, 1947.

General: The big item of interest is that on Nov. 23, 1947 the biggest total of ticket sales and the most visitors to the Ruin, since admission was charged, was recorded at this monument. 300 paid admissions. 3 tax charges, and 41 children under 12; totaling 344, were taken through the Casa Grande. Beside this there were 100 people who looked over the area, but did not make the guided trip. The big total was due mainly due to the "Don's Trek" , which brought in 175. The write up from the Arizona Republic is attached. The "Dons" are an orginization sponsered by the Phoenix Junior Chamber of Commerce, which every Sunday during the winter season , takes a group of visitors to some point of interest in the Valley.

Weather: Although everybody says this is the coldest winter so far and this is going to be like 1940, the facts from figures don't carry this out. Actually to date Nov. 1946 was colder. Nov. 1947's maximum was 92, with a minimum of 23 being registered. .78 inches of rain fell.

Visitors: November 1947 : 3336; November 1946 : 3058. Travel year to date 1947 : 5620; Travel year to date 1946 : 5111. An increase which is routine now is reported and one begins to wonder just what the ceiling is on visitor use by the public.

Interpretive Service: Of the 3336 visitors to the area, 2333 made the Ruins trip in 194 trips, averaging 50.2 minutes. 2029 made the museum trip in 164 trips spending 24.7 minutes per trip. 1303 people came into the area but did not make the Ruins trip. Interest in the area is very high as shown by the length of the Ruins trip.

Maintenance: Ditches on both sides of the entrance road are being cleaned out and regraded. One coat of paint was given to the bathroom in quarters # 2-5. Cement bases were poured for propane tanks at the laundry and two residences. All roofs in the resedential area were checked for leaks and sealed with mastic.

Administration: The map case is in process of being worked over maps catalogued, and placed back in the files.

Trips Taken: Mechanic Stoneshocker made one trip to Saguaro National Monument to repair light plants and check over other equipment. He left here on the 17th. returning on the 19th.

Personnel: Ranger and Mrs. Schuft announce the arrival of a son, Thomas Peter: Weight; 8 lbs. 12 Ounces. He was born Nov. 8 at 4:20 A. M. at the Florence hospital. Mother and baby are now back on the monument and getting along fine.

N. P. S. Visitors and Visitors of Note: Dr. J. R. Mahaney, Legislative Reference Service Library of Congress, Washington, D. C., Special investigator, checking into the water situation for Congress, was an interested visitor. Rev. L.V.C. Kaufman, Missionary to Papago tribe and amateur Archeologist; Mrs. Emma Mockett, Papago Interpreter, and Mrs. Lena Mendez, Painte Indian, all of Sells, Arizona, were in and added much to the early history of the area.

Newspaper & Magazine Articles: Arizona Republic had an article on the Bonz trek to the mines with several good pictures. The November issue of "Holiday" was all on Arizona.

A. T. Bicknell,
Custodian.

UNITED STATES

NATIONAL PARK SERVICE

Chaco Canyon NATIONAL MONUMENT

Bloomfield, New Mexico

November 26, 19 47

MEMORANDUM for the Regional Director, Region Three,
National Park Service.

There follows the report of activities in Chaco Canyon National Monument for the month of November, 1947.

There were thirty-three persons visited Chaco Canyon this past month. All thirty-three persons took a trip through the ruins, and formed fourteen parties. Nineteen persons formed five interested museum parties. Total time spent by the custodian was nineteen hours and fifty-five minutes. There were thirty-two paid admissions, and one tax only child. The visitors came in 10 automobiles from the states of:- Arizona 1 car, 2 visitors; California - 2 cars, 6 visitors; Colorado - 4 cars, 15 visitors; Kansas - 1 car, 5 visitors, and New Mexico - 2 cars, 7 visitors.

The coldest this month was 12 degrees on the 15th, and the warmest was 75 degrees Fahrenheit on the 1st of November. The precipitation amounted to .12 of an inch.

This month, as usual, we have been as busy as beavers, but this month, we have something to show for it. At long last, the cattle guard has been welded, and thanks to everybody, including Bill Guillet, it is one of the smoothest cattle guards in this section of the country.

A still higher addition was built on the chimney at the residence to make the draft better. Now, when one opens the stove door to put in a lighted match, the draft not only takes the match but almost takes oneself up the chimney!!! Also, the house has been repointed, a job that has been neglected, through no one's carelessness, for a number of years. It not only aids the appearance of the house, but the house is warmer and will last longer.

Last month, a four thousand gallon water tank was brought in from Grand

Canyon National Park. This month, a base was excavated for it on the talus slope near Pueblo Bonito. The tank was then hauled in pieces by hand up the incline and put together. There were something like seven or eight hundred bolts, nuts and washers. It is a wonderful looking tank, and is ready for connection, but we may defer that until next spring because of the possibility of leaks, which may develop at first, wetting the ground and causing the main line to freeze this winter. The water pump has arrived, but has not yet been installed.

Several trips were taken to nearby towns and one to Santa Fe by Monument personnel. The custodian made a trip to Gallup, early in the month, to take delivery of a new 4-speed-transmission Dodge pickup, and a few days later went back to have some adjustments made on the truck. A trip was made to Farmington to pick up propane; on the same trip, the old pickup was taken to Aztec Ruins National Monument for the Soil and Moisture crew. Several loads of cement and sand were hauled in. Archaeologist Vivian went to Santa Fe to take delivery of a new International pickup.

We got hold of some cable, and placed the four large culvert sections (forming two complete culverts) in position, put the collars on, clamped on the cable, clamped the other end of the cable to a huge rock, built a wall of rock, brush and wire mesh adjacent to the culvert on the upstream side, and covered them over. It is hoped that the next heavy rain will not wash the two tons of culvert a quarter of a mile down stream as was done with the one culvert, weighing one ton, last summer.

The heavy rain of last month washed a gash in one of our minor roads that was roughly ten feet deep and twenty feet across. It was necessary to dig a new crossing of the arroyo, and relocate the road for about an eighth of a mile in distance. This job was completed.

The fence job was practically completed with the welding of the cattle guard, mentioned earlier, the closing of the water gaps and the fencing off of the mesa top this month.

Now, the planting program is in full swing. Yesterday, a truck load of post size willows was brought in at noon. Most of the large ones were in the ground by nightfall. The men are working well despite the ground, which has several inches of top crust frozen.

The National Park Service visitors this month included Paul Balch, who was in several times on Soil and Moisture problems, and Charlie Steen.

The Trader reports that he is steadily selling more merchandise to more Navajos. He is making necessary minor repairs on his buildings, and purchasing supplies before winter sets in in earnest.

Projects for the ensuing months:- install the water pump, take inventory, finish the planting program, etc.

At the end of the month, there were on hand:-

Free two-fold leaflets on Chaco Canyon, approximately.....8312
National Park Location, map number 6,....."..... 322

Chaco Canyon National Monument
Bloomfield, New Mexico
November 24, 1947
..... 19.....

MEMORANDUM for the Custodian,
Chaco Canyon National Monument.

There follows the report of Mobile Unit activites in your area for the month of November, 1947

GENERAL:

Two trips were taken this month by Mobile Unit personnel. Foreman Rixey spent the week of Nov. 2nd at Astec Ruins removing the cribbed roofing from the small kiva in the plaza. He encountered considerable difficulty since it was cold and windy and part of the time only two out of his crew of six came to work. His other troubles came from the roofing itself. Half of the cribwork was spiked and toe-nailed together and the remainder was held in place by large boulders. It was all taken out and the cribbing stacked up to dry. He reports that about half of the logs will have to be replaced.

Archeologist Vivian made a trip to Santa Fe to pick up a new truck. On the return trip the Safeway steel scaffolding and two tires were loaded in Albuquerque.

Al so recieved this month was a new typewriter and a Crown tripod.

The Chevrolet dump truck was taken to Gallup for repairs on the 19th and returned the 22nd. Part of the cement recieved on the last contract has been hauled and the remainder will be brought out this week.

Some labor was furnished the Monument toward the installation of the new 4000 gal. water tank and repair of the chimney on the Custodian's residence. At this writting the new Monument water pump is being installed b y foreman Rixey.

CHETRO KETL

During the middle of the month Paul Balch of the Regional office ran a series of levels north and east of Chetro Ketl as a basis for improving the drainage there. It appears from this survey that the principal work involved will be the deepening of the present arroyo channel to remove accumulated silt and the construction of a low dam to confine the runoff to this channel.

In the west end of the damaged section of Chetro Ketl repair has centered ✗ around the remaining high walls in and close to room 61. Here three large patches were placed in the foundations of 61 itself and a break in the north wall is being filled at present. The dividing wall between 60 and 65 has been partially rebuilt to provide support for the exterior wall and a two story section of 64.

The east and west walls of 58 and the partition wall between 58/ 55 have been raised a little over one story as a brace between the north exterior wall and those holding back fill around Kiva J. Due to shortage of cement these walls were not capped nor was that between 60/65; this final work here is being held till warmer weather.

Also in the western half a break was filled in room 47 north.

A small amount of additional clean-up was done in 56 and 48. Soil piled outside the north wall was removed and all stone has been moved back from the outside wall.

At the east side work has centered around providing support for the superimposed kivas G/H. The south wall of rooms 39 and 40 are being relaid in order to hold back the fill around the two kivas. As braces for this wall the partition walls of 39/40 and the west wall of 41 are also being raised. All of this work is in reinforced concrete and some trouble is had i n protecting it from freezing.

Back on the west side, a surprising find was made November 6th when clearing out the upper levels of some debris to relieve pressure on the north wall and adjecent rooms excavated to a depth of nearly three stories. Mixed with a fallen ceiling were numerous small painted boards which appear to have been either portions of tablitas and dance paraphernalia or parts of an altar set-up. Most are well preserved but rather dirty.

Also recovered from a slumped area in 57 were additional pine boards. These show remarkable workmanship and finish; they range from pieces about 1 x 10 to 2 x 8 and in length from 1 to 4 feet. The total recovered from fallen areas is now 13. They have been cleaned, treated with preservative and placed in the museum.

Gordon Vivian
Archeologist

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

~~Chiricahua~~ NATIONAL MONUMENT

~~Dos Cabezos, Ariz.~~

November 28, 47

MEMORANDUM for the Regional Director, Region Three.

Following is a report of activities at Chiricahua National Monument for November.

General. The custodian went to Chicago on annual leave October 23 and returned November 4. Since returning he has been on sick leave most of the time. Operator, General Marble has been managing the monument during the custodians absence and sickness. After two or three more treatments for sciatica, the custodian hopes to be back on the job permanently. Due to the above circumstances, this report covers the period from October 22 to November 27.

Our new International pickup was thankfully received and the old panel wagon was turned over to the purchasers in Phoenix.

Weather Conditions. The first snow storms of the season fell this month and the thermometer went down to 18. This is considered about the minimum for winter weather here. These storms slowed travel down for a few days but weather is good again and travel is picking up.

Inspections. Forester and Mrs. Ratcliff visited the monument on November 15. Unfortunately the custodian was on sick leave at the time and unable to show him around the monument. The Douglas fir beetle infestations were inspected by Mr. Ratcliff.

Approaches to Monument. Approach roads are in fairly good shape at this time.

Work is starting on the grading and blacktopping of State Highway 181 from U. S. Highway 666 to the monument boundary. When this 26 miles is surfaced visitors can come all the way to Chiricahua on the oil. Newspaper reports say it is planned to have this job done by next May or June. If the work is completed by then we can look for a large increase in travel to Chiricahua within the next year or two.

Concessioners. Chiricahua has no concessioner for meals and lodging. For this reason the status of the Silver Spur Guest Ranch, which is one fourth mile from Monument Headquarters on private land, is of primary interest and importance to the monument. This ranch was closed down the last of August for a change of management and remained closed until November

RECEIVED NOV 30 1947

8. On this date it was reopened under new management. Mrs. Edna Wallitz is in immediate charge. A number of monument visitors have stopped there for meals and all reports say the food is good and that a very friendly spirit prevails. The new management has a very friendly and cooperative attitude toward the Park Service and a visit by the custodian and wife showed the accommodations to be clean and minor improvements are being made to make the rooms more livable.

Interpretive Service. Due to the absence of the custodian little interpretive work was possible. 662 visitors in 185 parties were contacted in the museum.

Travel. 890 visitors were recorded this month and a few were undoubtedly missed. This makes 1641 for the first two months of the travel year as compared with 1437 for the same time last year.

Wildlife. A coati was killed by a pair of dogs on the National Forest about a mile south of the monument. This interesting Mexican animal has been reported previously in the Chiricahua Mountains and it is interesting to find one so close to the monument. The owner of the dogs gave the animal to Operator Marble's boys who are amateur taxidermists.

Clair V. Cooke

Clair V. Cooke,
Custodian.

GRAN QUIVIRA, NEW MEXICO

NOVEMBER 30

MEMORANDUM for the Regional Director, Region Three.

The following is a report of activities at Gran Quivira National Monument for the Month of November, 1947.

General. November 5 to 8 inclusive were spent in the Regional Office. Much valuable training was received from the department heads. Plans and problems of Gran Quivira were discussed with regional personnel.

The custodian was on annual leave November 11 to 30 inclusive. Lois Kite, local rancher did an excellent job as caretaker during my absence.

Weather Conditions. Weather for the month has been rather spotty with snow and rain totalling 0.49 inches of moisture. The maximum temperature recorded was 68° on November 2; minimum 13° on November 22.

Special Activities. While on annual leave the custodian gave three Kodachrome talks; one to the New Liberty Community Club, Mack, Colorado, and two to the Loma Grade School, Loma, Colorado. Attendance totalled 150.

Maintenance. On November 5 the U. S. Forest Service graded the Monument entrance road. They did an excellent job of pulling the ditches and crowning the road. The gravel surface has, however, broken through in several places and it will be necessary to have several loads of gravel hauled in the near future.

P.C.P. sheets for repair and rehabilitation of quarters and facilities were prepared and submitted during the month.

A 2-wheel trailer chassis was secured from surplus at Bandelier National Monument. When time allows for the completion of the body, the water and wood hauling problem should be alleviated somewhat.

Approaches to Monument Area. Preparation for oiling 8 miles of State Highway 10 from Mountainair is complete and work should start within a week or two. Moving of 8 miles of telephone line off of the right- of-way will begin December 1, with the custodian contributing his time in lieu of money.

Interpretive Service. Due to my absence during most of the month, interpretive service was not too good. The same is expected during December while the telephone line is being moved. In November 19 parties totalling 52 visitors were conducted through the Mission. Average trip time, 56 minutes.

Increase or Decrease in Travel. Visitors for November as indicated below show a slight increase over the same month last year:

November, 1947	Cars	31	Passengers	82
November, 1946	Cars	28	Passengers	71
Difference		3		11
Percent		11% increase		15% increase

Forest Fire Protection. One non-reportable grass fire on November 3, cleaned off a part of the Indian Ruins in front of the Mission. Evidently a tourist dropped a cigarette along the path. Grass growth around the ruins constitutes a considerable fire hazard.

Publications Report. 450 Gran Quivira two-fold leaflets are on hand. No other free publications are on hand at this Monument.

William L. Bowen,
Custodian.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

GREAT SAND DUNES NATIONAL MONUMENT

MOSCA, COLORADO

November 26, 1947

MEMORANDUM for the Regional Director,
Region Three.

There follows the report of activities in Great Sand Dunes National Monument for November, 1947.

WEATHER. Winter has arrived in the San Luis Valley, comprising of exceptionally cold weather for this time of the year and of course, snow. Snow fell at headquarters on November 3, 6, 12, 17, 19, 20, 21 and 22. At present writing there is about one-half inch on the ground. On November 19 snow measured two inches.

Alamosa, Colorado had the dubious distinction of being the coldest spot in the U.S.A., on November 6, with a temperature of 4 below. Average temperature at headquarters has ranged from zero to about 40 degrees F. The Sangre de Cristo range is covered with snow and is very spectacular. The sand dunes have been covered with several snows, but sun and wind soon remove the light covering.

TRAVEL. Three hundred ninty-nine visitors in one hundred twenty-four cars, visited the sand dunes during this report period. Fifteen states and the District of Columbia were represented.

One hundred thirty-nine people used the camp and picnic area, and of these six camped (unexpectedly) over night.

INCREASE IN TRAVEL. For November, 1946, 24 cars and 85 visitors.

ROADS. The approach road received a surprise on November 26, when the State Highway bladed it - first time in over two months. The monument road to headquarters was also bladed. It is again in excellent condition.

COMPLAINTS. Fewer visitors, fewer complaints. The approach road received the most complaints. One car became stuck in the sand (see Special Activities).

N.P.S. VISITORS. Architect Saunders and Naturalist Sullivan spent November 4 at headquarters, going over PCP sheets and plans for future museum and interpretive development for the monument.

NEWSWORTHY VISITORS. Twenty students of the Geology Class of Western State College, Gunnison, Colorado on November 1.

RECEIVED
DEC 3 1947

ACTIVITIES. Very few. Returned the Bandelier stake truck on October 29 and returned to Great Sand Dunes via Santa Fe on October 30. Several hours were spent at Region Three Office.

Mr. George Ziegler removed his cattle from his land on October 31.

Most of this report period has been spent lying on my back and taking sick leave. Sick leave was taken from October 27-28; November 2,3,5 thru the 29.

On October 24, when unloading the 950 gallon storage tank, I sprained my back, but didn't know it until the 27. The Doctor taped me up and said wait and see. The sciatic nerve in the right leg began to give terrific pain and on the 5 of November, the Doctor put me in the Alamosa hospital with fourteen pounds pulling the leg out straight. Remained there until November 11, and then returned to headquarters and bed again. Condition is much improved, but am weak in the legs and unable to pick up heavy objects.

As time and my legs permit, fuel oil and gasoline must be hauled from Alamosa, and the Dodge 4x2 must be taken to the Heide Garage for a new front spring and some welding. The water line will remain uncovered for the duration of the winter and it is sincerely hoped that it doesn't freeze up. It is hoped too, that the 950 gallon tank can be hooked up so as to have fuel oil for the winter.

SPECIAL ACTIVITIES. The HCWP found the house broken into on her return from the hospital on November 8 at 10:30 PM. The front door had one pane of glass smashed and also the office door. Upon investigation, she found a note and money on the dining room table. The note said a Vernon Van Winkle of Ransom, Kansas had broken into the house in search of a phone as he was stuck in the sand and scared to death. The wording of the note led her to believe he had extracted the car and had returned to leave money for the smashed windows. The following morning he appeared at 9 AM, and said his family - (wife, 2 year old daughter and 4 month old son) and two Monte Vista girls had spent the night in their car stuck in the sand. The baby had nothing to eat since 5 PM of the 8. He was desperate enough to break into the house to look for a phone, but had not enough sense to return with his party to warmth and food for the children. They spent a very uncomfortable night thru sheer stupidity.

The HCWP went up to rescue said party and found the car buried in sand about 100 feet past the "STOP" sign. They were brought down to the residence where food was given them and baby warmed up with milk. Van Winkle was taken to Alamosa where he could obtain help in getting his car out and party finally left the monument late in the afternoon. It is hoped that Great Sand Dunes does not again encounter the Van Winkles, and no doubt they never want to see the Sand Dunes again

PUBLICATIONS. There are on hand, 1738 mimeographed informational leaflets.

Ted C. Sowers,
Custodian.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Montezuma Castle National Monument
Camp Verde, Arizona

November 24, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows the monthly report of activities at Montezuma Castle National Monument for the month of November, 1947.

Visitors this month - Montezuma Castle - 1020; travel year - 2544.
Montezuma Well - 342; travel year - 793.

Administration As this is written Custodian and Mrs. Hastings and family are en route to Montrose, Colorado after being notified of the death of Mr. Hastings' mother the night of the 21st.

Archaeologist and Mrs. Schroeder and son are en route to New York for a month vacation. Mr. Schroeder maintained daily duty at the Well except for lieu days and as follows: Oct. 24 to Cottonwood and Prescott on official business, Nov. 11, holiday. He began annual leave at noon on November 18 to continue until December 19.

Although travel has dropped off rather sharply the last two weeks of the month visitor contact demanded the attention of at least one man full time. Cold and stormy weather, as usual, are undoubtedly responsible for the slack in travel. This month brought nearly a hundred more visitors than Nov. a year ago and nearly two hundred more than the same month in 1941. Interpretation service was maintained daily at the Castle and although the demand was not extremely heavy it was none the less continuous. No interpretive service was offered at the Well on November 11 in order to conserve funds. There was only one on guide duty at the Castle on that date.

Two Apache Indian laborers were started to work on October 29. Nineteen man days of labor have been expended on roads and trails at the Castle and ten man days at the Well.

Official car USDI 13829 was left at this monument for repairs by Dale King after the motor "froze" on November 16. It was returned to Dale at Flagstaff on November 22.

A load of picnic ground fire wood and a load of fire-place wood for the residences were hauled on the Custodian's lieu days.

Publicity Custodian Hastings gave a slide illustrated lecture on Montezuma Castle at a meeting of the Rotary Club in Clarkdale on Nov. 6.

RECEIVED DEC 1 1947

Assistance was given photographer Ray Manley on Nov. 7 in securing a "different" view of the Castle Ruins. He plans to photograph all the Arizona monuments for National Geographic Magazine.

Weather Several stormy periods beset us this month. A light snow fell the night of the 22nd but was all gone within the hour. Several "killing" frosts have been experienced. The maximum temperature was 85° and the minimum was 21°. There was .60 inch precipitation.

Maintenance Loose "pea" gravel was gathered from the edges of the entrance road and used as a "blotter" for bitumuls in patching holes and rough areas in the paving. Encroaching brush along the sides of the entrance and picnic ground roads was cut back. Most of the picnic ground road was re-surfaced with gravel.

The refrigeration unit from the Westinghouse in residence 2 was taken to Prescott for adjusting.

The Castle pick-up was taken to Cottonwood for front wheel realigning.

The following was performed at the Wells Drainage ditches were dug on both sides of the road on the hill approaching the Well; two road culverts were cleaned out; a revetment was built to divert drainage from the county road away from the museum; dirt fill was removed from the lawn irrigation ditch and the prehistoric ditch; several loads of gravel were spread on the hill road approaching the Well; plumbing leading from the pump to the quarters was winterproofed; the pump was covered to prevent freezing and the water pipes in the house were drained; a small foot bridge was constructed over the ditch to the picnic grounds; a flagstone walk was laid in front of the museum and a similar one begun for the residence.

Vandals Vandals climbed over the locked boards on the ladder to the castle at noon one day. No serious damage could be noted but indications that they had been where they shouldn't was in evidence.

Southwest Monuments Association A set of wooden shelves was constructed in the publication storage and display case making the books more accessable.

Damaged books from two publishers were returned for replacement.

SWMA labels and postcards were placed in all publications for sale.

Total sales for the month came to $72.45. There was a shortage of $4.65 in the serv-ur-self sales.

N. P. S. Visitors Naturalist Dale King on a stormy November 16.

J. A. Gaustad from Grand Canyon on November 8 to the Well.

Interpretation & Research A long delayed project to bring the Castle museum catalog up to date was begun. Several accessions must be made and their appropriate notations in the catalog recorded.

Sixty seven artifacts at the Well were cataloged leaving around eighty still to be done. In the past six months over 100 species of birds have been recorded in the Well area. Archaeologist Schroeder reports recording a Southern Sinagua ball court, the only one so far known. The other three ball courts in the valley are associated with Hohokam like sites.

Use of Monument Facilities by Public Together the Castle and Well areas record1362 visitors for the month. No travel was recorded at the Well for the last six days of the period, however, because no one was on duty there. There was a total of 459 cars. Two hundred and forty four guide tickets were sold at the Castle; twenty complimentary admission tickets were issued; thirty six children were admitted free; and one member of the armed forces went through the ruins without charge.

Contact Time Total contact hours, 115.00; Hastings, 41.50; Leding, 73.50. Eighty trips were made through the ruins for 301 visitors. Five hundred twenty six people were contacted in the museum in 117 parties. Other interpretive and information service was extended to 153.

As an interesting side light, approximately one third of the total "on duty" time for the personnel at the Castle was spent on actual contact. The break down could be made thusly: 344 hours on duty (43 actual man days, two men); 115 hours actual contact; 272 hours devoted to contact duty (34 days of limited time when contact man-or non-must limit their work in order to remain on hand for contact). So it develops that well over two thirds of the time was "controlled", so to speak, by the interpretive program.

MEMORANDUM for the Director, Region Three

There follows a narrative report of activities in this area for the month of November 1947.

WEATHER: More cloudy than clear days and a bit of premature winter descended on us the 19th. By the 23rd we had 6 inches of accumulated snow. The temperature range was between 70 degrees and 12 degrees.

VISITORS: Only two parties of visitors reached this area this month. One of these parties was Photographer Ray Manley and his family who arrived while the Custodian was on annual leave.

ROADS: The snow has melted in all but the high and shaded areas and roads are passable and comparatively smooth.

The road sign for Cow Springs has been brought in for repairs and changes.

PROGRESS REPORT: Much dragging has whipped the entrance road into good shape.

We have finally obtained most all of the plumbing fittings required to install the 950 gallon gasoline tank. The only unavailable fitting is the tank-bushing (Bosch). We are going to cap this outlet and proceed to wire-brush both inside and outside of the tank. We have a specialized preparation for coating the outside of the tank and it's fittings and we will then bury the assembly.

GENERAL: The Custodian (with Ida and Father) took Annual Leave from Nov. 2 to Nov. 13th. A swell vacation was had including big fish at Guaymas, a conducted tour thru the new University of Sonora. At Hermosillo we also looked thru the unroofed old mission complete with a family living inside.

Upon our return to Flagstaff we learned that the new Dodge pickup had just come in. Disregarding our so-called days off we jumped in and got the pickup ready to serve on backroads. This new equipment helps us face the with with a feeling of security.

P.S. We were expecting Bill and Kathryn Wilson over for Thanksgiving dinner--but on Thanksgiving Eve the Heflins of Shonto brought word (Phoned from Navajo Mountain) that Bill was sick and his wrangler was stuck out in the snow. Knowing the Navajo Mountain School was vacated for the holiday this condition might have been serious. So on Thanksgiving morning we started for the Lodge. Enroute we spent two hours digging the wrangler and Bill's car out of a snow-covered ditch--and proceeded to the Lodge. Bill is laid up with rheumatism and gets around only on crutches. The day was not without it's cheer because Ida had packed up the turkey and all the trimmings which Kathryn warmed up and served in the evening.

Organ Pipe Cactus NATIONAL MONUMENT

Ajo, Arizona

November 25, 1947

MEMORANDUM for the Regional Director, Region Three.

There follows a report of activities for Organ Pipe Cactus National Monument for the month of November, 1947.

WEATHER:
After a maximum of 90 on the 1st, November cooled to unusually cold days, usually in the 60's for the rest of the month. Low for the month was 32 degrees on the 22nd; however, nights were usually around 40. Four rains during the month totalled 1.31 inches precipitation.

TRAVEL:
While travel through the area is nearly normal, out of state visitor travel is below that of last year with fewer campers than we were having at this time a year ago. Reports promise that Arizona will have a bumper crop of tourists but reservations show a trend for the later winter months. Total travel for November through the area was 6,158, bringing the fiscal year to 12,749.

GENERAL:
Most spare time was spent on the rehabilitation of the ranger quarters with considerable time being allotted to supervision of S.& M. work and fence repairs.

The soil and Moisture fencing project is coming along well with about five miles completed.

Communications Engineer Rowley spent November 14 on the area going over our communications and power problems.

Word has been received that our rehabilitation work on utilities has been approved and work on this project will be started this coming month.

Our new Dodge Pickup was received on the 18th and it is a relief to feel that we might get home without assistance when starting out through the area.

ACCIDENTS:
Two accidents occurred on the monument with one car killing a cow belonging to the grazing permittee, and the driver of the other car going to sleep and hitting a culvert. No persons were injured in the accidents, damage being confined to property.

PUBLICATIONS ON HAND:

RECEIVED DEC 1 1947

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Saguaro National Monument
Tucson, Arizona

November 29, 1947.

MEMORANDUM for the Regional Director,
Region Three.

There follows the monthly NARRATIVE REPORT of activities at Saguaro National Monument for the month of November, 1947.

WEATHER. The early part of the month was cool or cold, with two weeks of cloudy days, and frequent light rains. Precipitation in the city of Tucson for the first ten months of this year totaled 4.26", as against an average of 9.76". The last week has been warm and sunny, with daily temperatures in the seventies. Snow on the mountains.

INSPECTIONS. Forester Ratcliff was here from November 9 to 14, for the purpose of making a range inspection of our four grazing allotments in company with personnel of the Coronado National Forest.

Communications Engineer Rowley, of the Director's office arrived on the 15th, to make a survey of radio equipment needs for the area.

MAINTENANCE. One and one-half miles of the "Grass Shack" trail was maintained during the period; emphasis is being placed on replacement of drainage structures. Only three man-days were spent on signs, so the current replacement program is still incomplete. Minor improvements were made at the old Cactus Ranger Station by installation of a sink, shelves, and a temporary canvas ceiling to render the building barely habitable. Frequent, almost constant, repairs were made to the water pump at Madrona Ranger Station in order to pump water hauled from town into the storage tanks. Mechanic Stoneshocker spent three days overhauling the two 3-KW light plants at Madrona, and a smaller 350-W unit at the Cactus R.S. Six man-days were expended in gathering our mules and moving them from the Spud Rock pasture down to the vicinity of the Converse well for winter pasture; Packer Stansberry reported eight inches of snow at Manning Camp when they were up there on the 17th. Since the breakage of our home-made road drag last month, it has been impossible to maintain the Loop Road, and we are hoping for early delivery of the patrol grader recently ordered by the Region Three office. Fortunately, the road is still in fair condition.

APPROACH ROADS. Condition very bad, rapidly becoming worse, with the seasonal increase in traffic. Numerous complaints are received from visitors on this condition.

TRAVEL AND INTERPRETIVE SERVICES. Travel almost doubled this month, with 1620 visitors, in 465 cars, as against the 869 during October. This is also a decided increase over the travel of last November, when 960 persons visited Saguaro. Contacts have not kept pace with the increase of visitors, however, as only 277 persons, in 106 parties, were supplied with information at the Headquarters. Total time spent in contact work - 1495 minutes.

PERSONNEL AND RANGER SERVICE. Park Ranger James T. Fulton resigned, effective November 20, to transfer back to the Corps of Engineers, from which he had transferred to the Service a year ago. Laborer Lawrence D. Wilde, Jr. was appointed as Temporary Ranger, effective November 17, pending appointment of a permanent replacement for Mr. Fulton. Word was received that Maintenancemen Ollie O. Barney, Jr. had received probational appointment to this position, after 14 months service in temporary and temporary-indefinite classification. Mr. Frank Stansberry received temporary-indefinite appointment at the termination of his 30-day employment November 16.

The custodian took annual leave for the first week of the month, and on November 23 and 26.

POLICE PROTECTION. One arrest for violation of the no-hunting regulations was made during the month. The offender pleaded guilty in local Justice Court, and was fined $100. One other instance of illegal hunting within the monument was encountered, but the violators were not caught. Patrols were made only on week-ends and Holidays, since few indications of hunting during the week came to our notice.

ACCIDENTS. A building fire on the night of November 6 caused slight damage to the bunkhouse at Madrona Canyon. The kerosene-operated Superfex refrigerator which caused the fire is a total loss. Separate report of this fire has been made.

On November 19 our horse-trailer broke an axle on the road between Headquarters and Madrona R.S. Fortunately there were no animals being hauled at the time, and damage is slight, necessitating only replacement of the axle.

WATER SUPPLY. During all but the last week of the month it has been necessary to keep one man hauling water to Madrona R.S. With the creek dry, and our storage tanks finally emptied, it became a race between our truck and the water truck to see which came out ahead at the end of each week. After over 5000 gallons had been hauled, the pot-holes in the creek-bed filled from a rain, and the animals lost. However, the creek water is unpotable, and it is still necessary to haul all drinking water from Tucson.

NEW EQUIPMENT. The International ½-ton Pickup truck was received on November 7.

Don W. Egermayer
Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Sunset Crater NATIONAL MONUMENT

Flagstaff, Arizona

November 30 19 47

MEMORANDUM for the Regional Director, Region Three.

There follows a report of the activities of Sunset Crater National Monument for the month of November, 1947.

Visitors this month: 770 Travel Year to date: 2780

Travel: Comparing registration for the month with that for November a year ago, it appears that travel has been about the same. 231 visitors registered for the month, in spite of the entrance road being impassable for about a week. The register indicates representatives from 13 different states as well as travelers from Hong Kong, China and Hyder, Alaska.

Weather: Frequent showers and light snows have been the order for November. Snow closed the entrance road for about a week preceding Thanksgiving. 3.50 inches of precipitation was recorded for the past three months.

Road: The approach and entrance road is in fair condition. Long stretches of the cordurory still persist. No maintenance work has been attempted this month. However with the moisture that has come within the last couple weeks it is hoped that some badly needed work can be done soon.

General: Tent quarters were abandoned for a warmer clime with the arrival of winter's snappy weather. The move was made on the 10th, residence again being taken up at Heiser. By the 13th the area had been cleared. The change was made at a most opportune time for the following day winter really arrived with snow covering the ground even down in the Wupatki country.

During the hunting season from November 1-17, numerous hunters crossed through the monument but no difficulty with hunting on the area was encountered. The fact that few deer are ever actually present on the monument reduce this problem to a minimum.

Visitors: Landscape Architects Paul Thomas and Carl Alleman were Sunset visitors on the 21st. Further development of the Master Plan was considered.

Publications on Hand: Sunset Crater National Monument 2-fold leaflets on hand - 150 Copies.

.....NATIONAL MONUMENT
TONTO NATIONAL MONUMENT

ROOSEVELT, ARIZONA

19
November 25, 1947

MEMORANDUM for the Regional Director, Region Three.

Following is a report of activities at Tonto National Monument for the month of November, 1947.

Weather. Cool nights and good days characterized about half of the month, but the week November 14 to 22 was overcast, cloudy, and two good rains fell, on the 16th and 19th.

Approaches to Monument. The Apache Trail is in good condition for the present. The Monument road is rough due to recent rain and lack of time for the State road man to make a trip over it. It will not be maintained properly until we locate a small grader that can be pulled with the Dodge pickup.

Interpretive Service. Archaeologist Bull was absent on leave a considerable part of November, and resigned effective November 27, leaving after work Nov. 25, so Tonto is short-handed again. Of 918 visitors, 594 visited the Ruins in 193 parties, and there were 854 museum visitors in 259 groups.

Travel. The expected seasonal increase in travel began to show up in November, with a slight increase over November last year.

General. Some maintenance work was accomplished, with a lot more to be done when the ranger job is filled. Two trips were made to Globe for gasoline and supplies. The Dodge pickup had considerable work done on the engine, lights and radiator at Stuart Orme garage in Globe. It was in bad condition, but seems willing to run now. Prestone was put in the pickup and light plant. A little sign work was done. On the morning of the 25th a local young fellow, Pat Cook, was hired as a trail laborer, and is now trying to find enough earth in the rocks here to re-surface the trail. Ray Manley took some pictures of the Lower Ruins for the National Geographic Society. The Custodian furnished a supply of leaflets for the Globe Chamber of Commerce.

Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
TUMACACORI NATIONAL MONUMENT
Tumacacori
BOX 2225, TUCSON, ARIZONA

Tumacacori, Arizona

November 25, 1947

MEMORANDUM for the Regional Director,
Region Three.

Follows the monthly narrative report for Tumacacori National Monument for the month of November, 1947:

WEATHER CONDITIONS: The drouth relented a little. .92 inches of rain fell this month. Temperature ranged from a minimum of 19 on the night of November 7 to a high of 91 on the day of November 1. Cattle ranges of this region continue in very poor condition.

MAINTENANCE: Routine was kept current. Our recalcitrant basement furnace in the museum building has been coaxed along (with a little profanity mixed in) and is now doing all right. Soil in the east end of the patio garden has been turned and a lot of old manure added to it, and some sandy loam. While this was in process, much Bermuda Grass was removed. A new shrub was planted in a bare spot near the arcade, in the garden. Repairs were made to front doors of the museum. Locks on drawers were worked over, and one new lock installed. Three bi-lingual signs were made, painted, and installed to advise visitors they should not visit the mission church without a guide. Three highway road signs were taken down, completely re-painted and lettered, and replaced.

INTERPRETIVE SERVICE: 896 visitors went on 184 guided trips through the mission and grounds, receiving an average of 33.88 minutes per trip. Average trip time dropped because of inclement weather. 1691 visitors saw the museum. 1709 persons received combined Information and Interpretation Service.

INCREASE OR DECREASE IN TRAVEL: Our visitor total of 1773 persons this month has been exceeded by one previous November - that of 1819 for 1946. This makes the third consecutive month in which travel has dropped below that for the same period of last year.

VISITORS: November 6 - Louis P. Lochner, A. P. Correspondent for American occupied zone of Germany.
November 9 - Chief Clerk and Mrs. Charles F. Hill, Yosemite National Park.

PERSONNEL: Ranger Brewer spent 1 hour on leave, 4 hours on sick leave.

PUBLICITY: The October 17 Holbrook Tribune-News reprinted a Tumacacori article from Arizona Highways.

Holiday Magazine in its December issue has a full two-page color view of Tumacacori mission church.

November 8 - Mike Roberts, photographer, was in for pix to use in February issue of Arizona Highways.

November 11 and 13 - Bill Sears, photographer, was taking pix for an assignment for National Geographic Magazine.

COMMUNITY ACTIVITY: The custodian and ranger are continuing in attendance at the weekly evening classes in American Red Cross First Aid, held in the museum lobby.

On the evening of November 4 the custodian was gratified, after much personal-time promoting, to see a community meeting in the museum lobby for purposes of re-activating a dormant Boy Scout Troop. There was a good turn out, and considerable interest is being shown. 27 neighborhood boys attended the first Troop meeting. Cub Scouting is in demand, and the custodian has been requested to serve as Cubmaster for the communities within a radius of about 12 miles.

STABILIZATION OF MISSION CHURCH: 45 hours of laborer services were used during the month in pointing up holes in original plaster of the west wall of the cemetery (interior) and pointing ragged edges where long sections of plaster were missing; in plugging a large hole in the east wall of the west remnant of patio rooms with a set of bricks and stones which are not set in mortar; in removing a number of bricks from the sacristy floor (not originals) which had been badly eaten into by bat droppings, and replacing them; and in cleaning up the equipment and grounds from the results of stabilizing work. This work has now been discontinued for the winter, because of inclement weather. It is planned to continue stabilization work in March or April.

THEFT OF GOVERNMENT PROPERTY: On Thursday, November 20, while the custodian was absent on a day off, and during the noon hour while Ranger Brewer was at lunch, a thief entered the office from the museum lobby, helped himself to a 45 revolver which I keep in the drawer of the office desk, then jimmied the locks of the government change drawer, taking $157.75 in government funds. The locked change drawer of the SWM Association was also jimmied open and $29.95 taken. The sheriff's office and the FBI have to date uncovered no promising leads, and it is very doubtful that anything will be recovered. This matter has been reported in considerable detail by separate memorandum.

Earl Jackson,
Custodian

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

~~TUZIGOOT~~ NATIONAL MONUMENT

~~CLARKDALE, ARIZONA~~

~~NOVEMBER 28,~~ 1947

MEMORANDUM for the Regional Director, Region Three.

Following is the monthly narrative report for Tuzigoot National Monument for November, 1947.

Travel Data: The onset of winter with its accompanying snow flurries occurring above the 5,000 ft. altitudes in the Flagstaff-Oak Creek Canyon region and Mingus Mt. area has deterred many tourists from coming this way. A light snow fell at Tuzigoot the night of November 22. However, a surprisingly high total of 852 visitors braved the elements to see the Monument. This again is the largest number for any corresponding period in the Monument's Travel Records. Figures for November 1946 and 1941 showed totals of 658 and 649 respectively.

Guide and Contact Service: Museum, ruins and orientation contacts totaled 2363 for the month. 786 people in 224 parties were shown the museum, and 767 people in 212 parties were conducted through the ruins. Custodian Bright is now on Annual Leave. Interpretive service is not interrupted as the Monument is kept open to the public on the Acting Custodian's lieu days.

Personnel Time: Museum: 84 hours, 30 minutes. Ruins: 70 hours, 40 minutes. Total time for Bright: 51 hours. For Richart: 104 hours, 10 minutes.

Administration: Custodian Bright has taken a month's Annual Leave. He and Mrs. Bright left by car for New York on November 10, where they plan to visit friends and relatives. All good wishes for a pleasant, well-deserved vacation, Everett and Eleanor!

Advertisements to bid on the re-roofing job for the Museum and Garage were placed in the Post Offices at Clarkdale and Cottonwood. Bid forms and allied papers were sent to three firms. A recent memorandum from Architect Saunders discloses that the Webb Contracting Company of Prescott, Arizona, will be awarded the contract pending approval from the Director's Office of additional funds. Wages and cost of materials have increased to the extent that an $800 job two years ago now costs $1300. The Webb bid seems a fair one, and it is hoped that we can see the badly needed roofing project completed in 1948.

Special Visitors: During the month we were glad to have nice visits from Montezuma Castle and Wall personnel including Custodian and Mrs. Hastings, Ranger and Mrs. Leding, and Archeologist and Mrs. Schroeder.

Publicity: The December issue of HOLIDAY Magazine features colorfully illustrated articles on Arizona. Included are such titles as: "Indians", "Dude Ranches", "Phoenix", "Jerome", etc. Under the article, "Arizona" and its sub-topic- "What To See", Tuzigoot and other National Monuments are mentioned and described.

RECEIVED
DEC 1 1947

Southwestern Monuments Association: An excellent metal display rack for post cards and photo-packs was received at no cost from the Lollesgard Co. We highly appreciate this courtesy from the Tucson firm. The display stand was placed in operation immediately, and has greatly increased postcard sales. In fact, that's about all we have sold this month, with total sales approximating $40.00.

Roland Richert

Roland Richert,
Acting Custodian.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Walnut Canyon National Monument
Flagstaff, Arizona.

November 29, 1947.

MEMORANDUM for the Regional Director, Region Three. 19

There follows a report of activities in Walnut Canyon National Monument for November, 1947:

Weather. Several snow storms raised our hopes of having an average amount of precipitation this winter. As a local USFS man was heard to say, we would like moisture in any form even if came in four inch balls. There are several thousand bug trees in the cinder area to the north which were believed to have been originally weakened by several consecutive drouth years.

Visitors. Of the 812 total, 735 were contacted, and it is estimated that 544 made the ruins trip unattended. Only a few small parties used the picnic area.

Activities Other than Routine. All valve boxes of water system were packed in saw dust. Some patroling of boundary was done during deer season. Building contractors were recontacted when they failed to submit bids on the proposed Admin. Bldg. roof repair job. It has been decided that the rehabilitation work will be readvertised after the worst part of winter is over. By word of mouth, I've learned that Walnut had some ruins stabilization funds, but I believe we should await spring to use them. Engineer Bradley came to do some surveying but was driven out by snow before completing project. Dale King arrived Nov. 4 to work on his Malakihu report. Ranger Anbuehen made a thorough inventory of Walnut's equipment and prepared Board of Survey Reports. Carl Alleman and Paul Thomas a little more than two days on Master Plan studies.

A meeting was held in regard to a new approach road to connect Walnut with the new pavement on Highway 66. Those in attendance were: Norman G. Wallace, Chief Loc. Engr., Ariz. Highway Dept.; Ralph G. Barney, Coconino Co. Engr.; Supervisor Rotty, Coconino Nat'l For.; R7 M. Rutledge, P. R. A. Engr.; Alleman and Thomas of Region Three; and, Custodians Jones and Beaubien.

Publicity. The October issue of PLATEAU, a quarterly publication of the Museum of Northern Arizona, contained an excellent article about the plants of Walnut. In the same copy was an article about the birds of the San Francisco Mts. which mentioned some observations made at Walnut. A well-illustrated article about "The Cliff City" at Walnut appeared in the November issue of the Natural History Magazine

WHITE SANDS NATIONAL MONUMENT

P. O. Box 231, Alamogordo, New Mexico

November 24, 19 47

MEMORANDUM for the Regional Director, Region Three.

NOVEMBER TRAVEL, 1947
Visitors 4,754 Cars 1,355

1948 TRAVEL YEAR TO DATE
Visitors 10,901 Cars 3,037

November shows less visitors than a year ago, the first not to show an increase since May. Part of our drop may be due to weather and road conditions. Several stormy days have shown a drop in visitors.

Replacement instruments have finally been received for our weather station. High since receipt was 80° on the 19th and 20th and low was 26° on the 20th. Precipitation total was 0.74, enough to permit working our clayed road section thoroughly.

One official trip was made to El Paso with Engineer Carroll to check on some material and also to check a shipment of pipe misssent to the White Sands Proving Ground. Operator Sheppard accompanied by Ranger Chittum made a trip to Las Cruces to pick up this pipe after a release was secured. We hope to be able to wait until spring before putting in this pipe, in fact we may be lucky to obtain fittings by that time. We have been advised by Johns-Manville of two possible sources for fittings and shall contact them as soon as we can.

Contacts and museum interpretation have been about normal. We have had heat in the lobby and museum which encourages longer visits.

The seal coat was applied to our entrance road, parking area, etc, during the month. The weather was very cold and Engineer C. H. Carroll worked under extreme disadvantages. I am very dubious of he job prematurely but the engineer and several road men tell me it is alright.

White Sands also received a new Dodge pickup November 4 and the old Ford coupe-pickup from Lake Mead has been discarded for better or for worse.

Road contracts let on U. S. 54 between Tularosa and Carrizozo should give us pavement all the way to Albuquerque and Santa Fe by next travel season and should increase our attendance since many skip us now who would come by if the road was paved.

WHITE SANDS NATIONAL MONUMENT
ALAMOGORDO, NEW MEXICO

November 24, 1947

(2) Narrative Report

We have had considerable trouble with our water system and hauling tank. At present we are planning to repair our present tanks, and hope for the best.

Ranger Chittum has been on leave most of the month. He bagged his buck during the hunting season so we are all eating venison steaks this week. Operator Sheppard spent three days in the mountains too during the season but, no steaks.

Charles and Mrs. Chrisler from the Region Three Office were in on a "business holiday". Leon Hallis from Mesa Verde picked up a roller and mower from our surplus stock.

Next month will see us attempting to get our water system back in operation. The Custodian will be on leave much of the month so the boys will not have anything to hinder their progress.

A little early but, Merry Christmas to all and a Most Happy and Prosperous New Year is the wish of the White Sands and its personnel to the entire National Park Service and its personnel.

Johnwill Paris,
Custodian.

RECEIVED NOV 28 1947

National Archives and Records Library

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Wupatki NATIONAL MONUMENT

Flagstaff, Arizona

November 30, 1947

MEMORANDUM for the Regional Director, Region Three.

Following is a report of activities at Wupatki National Monument for the month of November, 1947:

Weather: The onset of winter has been marked by freezing temperatures at night, uncommonly cloudy weather, light rains and one snowfall of 3½". Perhaps we can look forward to a break in the long drought. Precipitation for the past two quarters has been erratic, but it is more like that of 1940 than any year since.

Roads: The additional moisture has considerably improved our roads and they are in excellent condition to be bladed--if we had a blade. We are looking forward with great expectation to the promised road equipment.

Travel: Again this month travel records were broken and exceeded last November by more than 30%, in spite of inclement weather. As our roads are improved there will be more and more use of this area during the winter months. Snows seldom last long enough to discourage visitor use even now.

Plans, Maps, Surveys: Engineer Willard Bradley completed the survey of the Heiser Springs property and developments therein, and copies of the finished map have been received. A survey was also made of a possible pipeline from Black Falls to Wupatki in the event that we pump water from the Little Colorado River valley. Incidental to this survey we uncovered two permanent survey reference points (4 and 5) in the vicinity of Wupatki Ruin. There was a deposit of two inches of soil covering each of them.

Regional Landscape Architects Alleman and Thomas spent several days on problems relating to Wupatki-Sunset, and the new master plans. One half day was spent in conference with Forest Service and P.R.A. officials concerning entrance road location at Sunset Crater.

Activities of Outside Agencies: The Barron Steele oil prospect produced a

RECEIVED NOV 29 1947

showing of oil at approximately 1700 feet, and the intention is to drill into the Devonian formations at an estimated depth of 4000 feet if necessary. At 1325 feet they encountered water estimated at 400 gallons per hour. This corresponds quite closely with the depth of water in the vicinity of Citadel Ruin-- about 1200 feet at Deep Well. The location of the Barron Steele prospect is about ten miles north of the Monument.

The botanical class specializing in grasses at Arizona State College spent several hours on the Monument making a preliminary reconnaissance for future work and studying our herbarium collections. They hope to make long term studies in the cinder area, relating their work to our interpretive program.

Anthropologist A. F. Whiting spent a day in this area investigating possibilities of encouraging local arts and crafts among the Navajo.

Research: Naturalist King has spent the past month in Flagstaff completing his archeological report of the Salakibu excavation. This publication will make available much archeological data for our use and will mark the best and most complete work which has been done in this area to date.

Signs: The two cut-out letter signs at Citadel and the Earth Cracks were vandalized, some of the letters being removed. The only likely explanation we can figure is that some photographer wanted the letters for titling his shots of the major features of this area. The letters have been replaced and steps will be taken to make it less likely that people will readily recognize the letters as being attached.

Personnel: Laborer Joe Bean was appointed to the Road Maintenance position pending establishment of a register.

Accessions: The donation of H. M. Wormington's "Indians of the Southwest" by the Southwestern Monuments Association is acknowledged.

General: The residence at Keiser was put in shape for occupancy by Ranger Upton. Refrigerators and the new gas range were installed, although we are having some trouble with the new 8 cubic foot job. Plumbing was winterized and wood hauled to meet our needs. The small one room cabin just outside our boundary which we have always used to house occasional personnel was removed by the owners. This necessitated the erection of a tent for Maintenanceman Bean, an installation which is just being completed.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
Region Three

Santa Fe, New Mexico

January 15, 1948.

MEMORANDUM for the Director.

Monthly narrative report, Southwestern National Monuments, December 1947:

Weather

Unusually cold in the north, almost preventing travel to several isolated monuments. Great Sand Dunes reported 13 below zero on December 11. The first half of the month particularly cold in the southern part of the Southwest, but almost all areas received some precipitation except Tumacacori, which still is dry.

Special Activities

The American Anthropological Association held its national meeting, first one west of the Mississippi, December 28 through 30, at the University of New Mexico, Albuquerque, New Mexico, and in Santa Fe. Naturalist Dale S. King attended all of the meetings, but Archeologist Charlie R. Steen missed the first two days due to illness. Several fieldmen who attended a ruins stabilization conference on the 30th and 31st in Santa Fe were able to come early and participate in some of the anthropological meetings.

Bandelier. The Atomic Age approached to within one and a half miles of the Prehistoric Age in the form of a new site being built by the Atomic Energy Commission on a mesa north of Frijoles Canyon. Custodian Binnewies held in-surface training meetings from October through December 15 for all Bandelier employees, emphasizing protection, law enforcement, anthropological, and fiscal matters. Meetings were on Tuesdays and Thursday evenings and lasted one and a half hours. Ranger Thomas Onstott took the Archeologist P-1 examination during the month.

Great Sand Dunes. "The stork skidded on the icy sand dunes, making a 3.2 landing. Jenny Anne Sowers arrived 45 days too soon at the Alamosa Hospital. Born on December 7, at 5:43 p.m., weighin at 4 pounds 9¼ ounces."

Montezuma Castle. One trip was made to the country court house at Prescott to investigate water rights at Montezuma Well. Archeologist Schroeder and Ranger Leding took the archeological examination.

Tumacacori. Red Cross first aid instruction meetings, which have been held each Wednesday in the Museum lobby, were completed on December 17 with 12

persons, including all adults on the monument, receiving cards. The second annual Christmas party for local children was held Christmas Eve in front of the mission, with each child receiving a filled stocking and adults enjoying coffee and doughnuts. Gifts were bought by various local persons. Publicity was not sought, and the event kept on a local basis.

Wupatki. Navajos of the Wupatki Basin were given a Christmas party at the Black Falls Trading Post, with clothing, food and other items contributed by several philanthropic visitors.

Inspections

Arches. Naturalist Sullivan on December 2, 3, and 4.

Canyon de Chelly. Archeologist Steen and Vivian on December 9 and 10.

Casa Grande. Regional Director Tillotson on December 3. Mr. P. L. Richardson of the Phoenix Weather Bureau checked weather equipment on December 4. Custodian Egermeyer came in on business on December 4.

Chaco Canyon. Archeologist Steen, Soil Conservationist Balch.

Organ Pipe Cactus. Regional Director Tillotson.

Saguaro. Regional Director Tillotson, Director's Aide Ben Thompson.

Tumacacori. Regional Director Tillotson, Chief Clerk Castellum.

Status of Private Lands

Bandelier. Since it is now known that the Atomic Energy Commission is taking over the whole of the Ramon Vigil Grant, consideration must be given to the proposed extension of the north boundary of Bandelier National Monument to Highway 4. The area just north of our boundary contains many small ruins. The great ruin of Tsirege several miles north should also be made a detached section.

Chaco Canyon. Assistant Regional Director John M. Davis, Chief of Lands Hilton J. McColm, Regional Archeologist Erik K. Reed, and Naturalist Dale S. [illegible] visited the University of New Mexico Comptroller and members of the Anthropology Department there, discussing on the proposed transfer of University lands to Chaco Canyon National Monument. Discussions apparently satisfactory to both parties ensued, but the outstanding difficulty seems to be that the University cannot obtain mineral rights on two involved sections.

Saguaro. Ben Thompson visited Saguaro, making investigation of developments on various private lands within the National Monument.

Plans, Maps and Surveys

Casa Grande. The map case extensively re-catalogued and re-filed.

Maintenance

Arches. Trail signs completed and ready for installation.

Aztec Ruins. Three sections of concrete pipe purchased and hauled to the monument ready for installation in the manholes in the drainage ditch. The roof of the Great Kiva patched and tarred as an emergency stop-gap measure.

Bandelier. Electrical trunk lines to the residences rearranged to distribute the power load more evenly. Painting completed of the interior of Residence No. 3 and the floors of Residence No. . Representative of a roofing company inspected the roof of the Hotel Lobby in an attempt to find a leak which has developed. Annual inventory of property completed.

Canyon de Chelly. Repairs completed on automotive equipment, pump engine, and water and sewer systems. The road to Garcia's Trading Post graded.

Casa Grande. Entrance road ditches cleaned and re-graded. Penetration in Residence 2-4 repaired involving some plaster work. The mechanic worked on nine pieces of equipment for four areas.

Chaco Canyon. Stoppage in sewer and water lines cleared, water pump installed, main road graded through the monument, but the motor patrol blade is not heavy enough to work on frozen ground.

Chiricahua. Much time spent thawing out the comfort station plumbing and obtaining propane gas.

Gran Quivira. A total of 8½ miles of telephone line was moved from the highway right of way. Construction on the new 2-wheel trailer almost completed.

Montezuma Castle. Signs, automotive equipment, water fountains, Museum lighting, and irrigation ditches received attention.

Navajo. A new drill press was used as a router to prepare and improve existing signs. A 950-gallon hot water tank was coated on the inside and converted to a gas tank, equipped with fittings, and installed complete with pump. A new 5-kilowatt electric plant was received from Walnut Canyon as a standby.

Organ Pipe Cactus. Work continued on the ranger quarters.

Saguaro. Improvements were made on the Madrona Ranger Station-South boundary road. Two large sectional tanks were partially assembled at the Ranger Station and at Headquarters. An electric fence transferred from Bandelier was placed temporarily around the Madrona Ranger Station to protect it and the water drainage area from cattle. Drainage structures were installed at the beginning of the Grass Shack trail.

Tonto. The trail to the lower ruin was partially resurfaced. The Custodians residence was connected to the light plant by an overhead line.

Tumacacori. A cold frame was constructed to facilitate the growth of plants for the patio garden.

Tuzigoot. A large section of the sewer line was dug up to remove roots.

Walnut Canyon. A 7000-pound air compressor was received from WAA and placed in storage. Repairs were made on the 5-kilowatt light plant.

White Sands. Considerable work was expended on the underground water storage tank, as a tank for the water hauling truck and on the diesel engine. The road into the sands received clay plating.

Wupatki. A new tank house was constructed, refrigerators repaired, and fire equipment reconditioned.

Approaches

Arches. Snow hindered travel. Grand County carried on construction work on the approaches to Delicate Arch, Fiery Furnace and the Devil's Garden sections. A total of 4.6 miles were roughed out, although work was hampered by snow.

Bandelier. The entrance due to recent work was the best as has been for some time, but heavy traffic by Atomic Energy Commission trucks is already roughening its condition.

Canyon de Chelly. Entrance roads were bad early in the month, but later became frozen and passable.

Capulin Mountain. The road to the volcano was closed several days due to snow.

Chiricahua. Work has started on the grading of State Highway No. 81 in preparation for oiling this spring.

El Morro. The U. S. Indian Service graded 14 miles between Ramah and the Ramah Day School for the first time in two years. The Grants road was passable only when frozen.

Gran Quivira. Entrance road was in above average condition. Work began December 11 on the construction of 8½ miles of State Highway No. 10 south of Mountainair.

Great Sand Dunes. Entrance road excellent although snowy.

Natural Bridges. The approach road closed due to snow early in December. No travel is possible from Mite, because the ferry sunk in the autumn.

Navajo. All roads are passable. The troublesome drainage in Klethla Valley is being dammed and the road elevated to provide a secondary check dam.

Sunset Crater. The road closed was closed most of the month due to snow, and there was almost no traffic to Wupatki due to blockage of the shelf road around the base of the volcano.

Tonto. Both the Apache trail and the road from Payson were good.

Wupatki. Weather was mild and the entrance road from U. S. 89 open all month, although the Sunset Crater approach was usually closed.

Concessioners

Chaco Canyon. The trader gave a Christmas party with presents and food for the Navajos, who built fires and cooked their own picnic lunches.

Cooperation

Bandelier. Ranger Onstott gave three illustrated talks, one to the assembly of Adams State College, one to the San Luis Institute of Arts and Crafts, and one to the Colorado Archeological Society, Alamosa Chapter. Total attendance, 556.

El Morro. Custodian Wilson gave an illustrated talk to the Gallup Kiwanis Club on December 11.

Gran Quivira. Custodian Bowen gave an illustrated talk to the Belen Rotary Club on New Mexico National Park System areas.

Organ Pipe Cactus. The International Boundary Commission made a preliminary survey from the southeast corner of the monument to Papago Wells for a proposed 15 to 20-mile fence which would seal off canyons and passes and eliminate most of the drift stock into Growler Valley.

White Sands. A Navy party searching for a fallen rocket almost entered the monument on December 1, but after discussions decided not to do so. An Army party on December 8, searching for a fallen V-2 rocket 4½ miles west of the Loop Drive were given permission to enter the monument and cooperated nicely.

Wupatki. A motion picture being taken by R. J. Fleming of Santa Barbara, California, progressed nicely when Mr. Fleming visited the monument to take pictures and distribute gifts to the Navajos. The only scenes which remain to be taken are those of visitors going through Wupatki ruin.

Museum Activities and Exhibits

Arches. Naturalist Sullivan spent three days at the monument working with the Custodian on an interpretive development outline and Museum prospectus.

Bandelier. On December 12 was approved a position as Museum Preparator, SP-5, at $2834 per annum, for the Southwestern National Monuments. It is proposed to employ Mrs. Pablita Velarde Hardin in this position to accomplish paintings for 2½ months to complete the illustrations for the ethnology room at Bandelier. Due to lack of heat in the Museum, visitors spent very little time viewing the exhibits.

Tumacacori. A new exhibit was installed in a small case showing a photograph of Pete Kitchen. Also included is the Sharps rifle owned by the old Indian fighter who had a ranch in the 1870's 14 miles south of Tumacacori.

White Sands. Oil burning stoves proved insufficient to warm the Museum comfortably during morning hours.

Research and Observations

Chaco Canyon. Cleaning progressed on the wood specimens recovered by the ruins stabilization crew from Room 93. Some material was sent off for identification; hide, tanned buckskin, cordage, sinew (?), beans, pumpkin seeds, and some scatological remains.

Montezuma Castle. Cataloguing of museum artifacts continued. Two skulls were taken to the Museum of Northern Arizona to be photographed for illustrations in the forthcoming report to be published by the Southwestern Monuments Association.

Organ Pipe Cactus. More deer were killed in the Ajo Mountains this season than ever before, a fact which may be partially due to the National Park Service Conservation Program at Organ Pipe Cactus. The supervisory personnel of the Cabeza Prieta Big Horn Sheep Refuge west of the monument state that predator control has resulted in a marked increase in the Big Horn sheep population.

White Sands. Correspondence was initiated in an attempt to obtain a storage case for the insect collections which will be given to the monument by a scientist who made researches there last summer.

Wupatki. Naturalist King finished except for the general conclusions the Archeological excavation report on Nalakihu, a small pueblo ruin on the northern part of the monument. This will be published by the Museum of Northern Arizona as one of their bulletins this spring or summer.

Soil and Moisture Conservation

Aztec Ruins. The special work for Canyon de Chelly and Chaco Canyon of cutting willows and transferring them to the respective areas was completed.

Canyon de Chelly. The bank protection and planting program was completed on December 3 despite adverse weather.

Chaco Canyon. The planting program was completed. 1000 posts were brought in and placed for "living spiders" to retard stream flow in the arroyo. Tamariks were out for spring planting.

Organ Pipe Cactus. The project of fencing the southern boundary was completed on December 26. A total of 7.4 miles to the west boundary and a small gap west of Dowling Well were involved.

Travel

Adverse weather conditions made a marked reduction in visitors to northern monuments, but Casa Grande and Tumacacori reported record breaking totals for the month. All areas are running ahead of last travel year.

Ruins Stabilization

Archeologist Steen assembled all ruins stabilization reports completed since 1940 and prepared them for binding. He analyzed fiscal balances remaining, and notified field areas.

Bandelier. Sub-floor tests were made in 25 rooms of Tyuonyi ruins. Deep trash was encountered underlying the pueblo. A test trench northeast of the ruin disclosed no architectural remains. "Before" pictures were obtained on 39 ruins and "after" pictures on 49 others; thus, 80 rooms are now ready for mortar re-painting when weather permits. Work will be stopped in January and not resumed until warmer weather.

Canyon de Chelly. Archeologist Steen and Vivian inspected a cracked wall in White House Ruin.

Chaco Canyon. Weather was cold, but work suffered little because days were clear and snow did not lay on the ground. A large wildcat apparently inspects stabilization work nightly, even visiting rooms inside the ruin of Chettro Kettle. Truck trips, averaging two weekly, to Farmington or Aztec for supplies take much time, for the road is deplorable. It "resembles nothing so much as either a lava flow or a Chaco road". Preliminary work began with the motor grader on the drainage channel east of Chettro Kettle, soil conditions being perfect for this type of endeavor. Considerable drainage alteration was performed in the ruin, masonry was repaired in the eastern portion, and various patching was accomplished. The sectional steel scaffolding is proving to be quite efficient.

Visitors

Arches. Harry Goulding of Monument Valley said that Photographer John Ford will make pictures at Arches in the spring. Ranger E. Guillet of Colorado National Monument.

Casa Grande. Dr. Doris O'Brian, Custodian Hastings.

Great Sand Dunes. Clerk Glen Bean and Ranger Custett of Bandelier.

Navajo. Joe Dean of Wupatki. John Stewart and Doug Harrington of the Indian Service.

Organ Pipe Cactus. Ranger Wilde of Saguaro.

Saguaro. Custodian Hastings, Roy Chapman Andrews of the American Museum of Natural History.

Tonto. Custodian Egermayer and Packer Stansberry of Saguaro, Custodian Hastings.

Tumacacori. Custodian Hastings.

Tuzigoot. Naturalist King, Custodian Beaubien, and Alfred Whiting of the Museum of Northern Arizona.

White Sands. Sam Hendricks, Custodian Bowen, of Gran Quivira, and former Custodian Henry Schmidt.

Police Protection

Casa Grande. Two inspection trips to the Adamsville Ruin, with some evidence of vandalism being discovered on the second trip.

Wildlife

Saguaro. A pair of timber wolves have been frequenting the monument for several months. One was run over by a car near the X-9 Ranch early in December. The other wounded by gunshot three miles south of the monument but escaped, and has reported again on the monument.

A herd of 20 javelinas was seen along the Loop Road.

Accidents

Arches. A driver from Salt Lake City burned out the clutch of his car and spent all night on the monument.

Saguaro. The Chevrolet pickup was involved in an accident on December 25; total damage was $79.

Public Health

El Morro. Water contamination below the doping tanks was found to be due to one valve not closing completely. This will be replaced when the valve can be obtained, and chlorination is being added in the meantime.

Montezuma Castle. The water supply system at the Castle was disinfected with chlorine.

Saguaro. Water samples from the Madrona Creek were returned again with analyses of "unsafe" for human consumption. This makes 11 times out of the past twelve months that such a report has been received.

Wupatki. Wupatki spring is flowing 10 per cent above last year, but Heiser Spring is 50 per cent lower, due to leaks in the intake lines.

Personnel

Arches. Laborer-Leadman Winbourn was terminated on November 29.

Aztec Ruins. Ranger W. G. Reed was terminated on December 19.

Saguaro. Temporary Ranger Lawrence C. Wilde was appointed ranger on November 30, pending establishment of a Civil Service register.

Tonto. Joe Hendricks received an emergency appointment as P-1 Archeologist on December 26.

Southwestern Monuments Association

Plans for card dispenser boxes and for display cases at Tumacacori and White Sands were received and placed in production. The Headquarters supply (2761 copies) of "Poisonous Dwellers of the Desert" was received and stored. Sales are going rapidly. Because the National Park Service is unable to answer informational requests due to shortage of franking privilege, the Association donated a quantity of envelopes and stamps to Southwestern Monument areas so that such requests can be answered by fieldmen and by headquarters naturalists.

Miscellaneous

Canyon de Chelly. Nation-wide publicity concerning the supposed desperate plight of the Navajo Indians has focussed the attention of the whole country on the section. However, the Navajos near Canyon de Chelly are better off than they have been for some years and do not face starvation. Weaving has slowed down and workmentare quitting their jobs to take advantage of relief.

Capulin Mountain. The special elk season nearby was quite an event; more than 100 elk were killed by 115 permittees.

El Morro. The custodian had to take 8 days annual leave because of a new baby in the house. He stated that a Navajo woman would have been better help, but none wanted to work.

Navajo. "Too much has already been spoken and written about the starving Navajos. In this area there seems to be only resentment. Their expressed opinion in this locality is that they are better off this year than any previous year....I asked Max (Littlesalt) what he was doing with the clothes. (Often the clothing is worn out or of a type unsuitable for Navajo use) Max said he guessed he could use the clothes to make a scarecrow in his corn field. Well, I guess, some good comes from these campaigns even if it is only to remove the fire hazards in the attic of the donors."

P. P. Patraw,
Associate Regional Director.

cc: Monument Distribution (2).
Region Three Files.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
Region Three

Santa Fe, New Mexico

January 14, 1948.

MEMORANDUM for the Regional Director, Region Three.

Following is the narrative report for Naturalists of the Southwestern National Monuments for the month of December 1947.

Staff Activities - General

Naturalist Dale S. King returned from Flagstaff, Arizona, on December 3. He made one trip to Albuquerque on land matters and attended the American Anthropological Association meetings from December 28 through December 31. Five days of annual leave were taken.

Archeologist Charlie R. Steen made a trip to Canyon de Chelly National Monument on ruins stabilization matters and also attended the last day of the Anthropological Association meetings.

Administration - Interpretation

Several letters were written to applicants for positions in the Southwestern Monuments.

Considerable difficulty was experienced in handling informational requests, not only due to lack of stenographic personnel, but also to the shortage in leaflets. As 2-fold leaflets are exhausted, mimeographed supplies, which are unsatisfactory and difficult to produce, must be issued. In addition, the edict against mailing out answers to informational requests has placed a considerable burden on the Southwestern Monuments Association personnel and finances.

Public Relations and Extension Services.

While on annual leave at Alamosa, Colorado, King was fortunately able to attend the meeting of the local chapter of the Colorado Archeological Society and to visit the Museum of Adams State College. Ranger Thomas Onstott of Bandelier was the speaker of the evening and gave an excellent illustrated talk on problems of Pueblo Archeology, particularly those of the Pajarito Plateau surrounding Bandelier National Monument.

Progress in Exhibit Plans and Projects

On December 16, 1947, there was established for Southwestern National Monuments a W.A.E. Museum Preparator position, GP-5, at $2394 per annum. It is limited to an expenditure of $720 per annum. With the total of $500 of naturalist funds allotted to this department, we plan to employ Pablita Velarde of Santa Clara Pueblo to work two and a half months at Sandelier in an attempt to finish the illustrations for the ethnology room in the museum there. Funds are not available for paper and artist supplies, which must be, apparently, donated by the Southwestern Monuments Association.

Accessions - Other Than Library

A memorandum was addressed to the Director in an attempt to obtain seven surplus telescopes which may be received from the Navy. These can be placed to good advantage at Navajo, Walnut Canyon, Arches, Chiricahua, Montezuma Well, and other areas.

Research and Observations

King accomplished considerable work on the Malakibu report which will be published as a bulletin of the Museum of Northern Arizona. The final version of the manuscript is complete except for comparative trait listing and the general conclusions. He plans to spend mornings on the report beginning with the second or third week in January. Correspondence was initiated in an attempt to obtain by donation from an interested party an insect case for White Sands National Monument, which will receive a considerable number of specimens gathered there by a graduate student last summer.

Archeologist Gordon Vivian submitted to this office for approval an excellent popular article on some recently discovered historical inscriptions at Chaco Canyon National Monument.

Cooperative Activities

On annual leave, King called Editor Raymond Carlson of Arizona Highways Magazine and conversed with him concerning several cooperative projects of interest to the Service and to the Southwestern Monuments Association.

Region Three Office Loan Library

Accessions for the month were 17 books, 37 periodicals, and 34 reprints and pamphlets. Books received included:

Franciscan Fathers, St. Michaels, Arizona - An Ethnologic Dictionary of the Navajo Language. St. Michaels, 1910. 2nd edition, Leipzig, 1928.

Haile, Berard - Learning Navajo. 2 Vols. St. Michaels Press, St. Michaels, Arizona, 1941.

- - - - - Origin Legend of the Navaho Flintway. University of Chicago Publications in Anthropology, University of Chicago Press, Chicago, 1943.

Hera, Harry P. - Navajo Textile Arts. Laboratory of Anthropology, Santa Fe, New Mexico, 1947.

Morgan, Richard G. and James E. Rodabaugh - Bibliography of Ohio Archeology. Ohio State Archeological and Historical Society, Columbus, 1947.

Strong, Reuben Myron - A Bibliography of Birds. Zoological Series, Field Museum of Natural History, Vol. 25, Nos. 1, 2, and 3. Chicago 1939 and 1946.

Spencer, Frank C. - Colorado's Story. The World Press, Inc., Denver, 1940.

Stout, D. B. - San Blas Cuna Acculturation: An Introduction Viking Fund Publications in Anthropology, No. 9, New York, 1947.

Southwestern Monuments Association

Treasurer Vedder worked 17 days, sending out 20 letters and 248 covers, including 40 purchase orders. Considerable of his time was spent on turn-ins and posting warehouse cards, both operations taking much more effort than is necessary because various fieldmen have been somewhat lax in their records, which do not agree with ours.

The headquarters shipment of "Potsherd Dwellers of the Desert", consisting of 2701 books, arrived on December 15. Many back orders were filled and about eight orders a day are received by mail. This accounts for the great increase in covers mailed.

Architect Lovelady completed during the month the plans for card dispenser boxes and for display cases at Tumacacori and White Sands. These plans were distributed to local cabinet makers and more than three quotations were received on each. The boxes were placed in production and will be received early in January. The display cases will be made during the month of January, and it is hoped they can be sent to White Sands and Tumacacori by the end of the month.

Because the National Park Service is unable to send out answers to informational requests, the Association sent each monument custodian a small supply of stamps and Association envelopes which can be used for this purpose.

Unusual Activities - Conferences

King attended the meetings of the American Anthropological Association in Albuquerque and Santa Fe, and on the last day Steen attended, having missed the first two sessions because of illness. Several fieldmen of the Southwestern National Monuments were able to visit at least part of the sessions. After the meetings, the National Park Service personnel held an informal session at the Region Three Office, discussing ruins stabilization, research, and interpretation problems.

Ruins Stabilization

Steen and Gordon Vivian visited Canyon de Chelly to inspect a cracked wall at White House Ruin.

Steen assembled and prepared for binding all of the stabilization reports which have been completed since 1940. He also notified all field areas of their remaining stabilization balances for the fiscal year.

Field work continued at Chaco Canyon and Bandelier. It is planned to stop the Bandelier work in January due to bad weather and to take trained personnel to Casa Grande to begin stabilization on Compound A.

Projects for January

King will be in the office the early part of the month clearing up accumulated matters, will go to Bandelier for a week to start the museum preparation work there, will work the remainder of the month on routine work and finishing the Malakihu excavation report.

Steen will visit Gran Quivira and Casa Grande early in the month on stabilization matters and will spend the remainder of the month in the office purchasing stabilization materials and handling stabilization reports.

Dale S. King,
Naturalist.

Approved for Distribution _____, January 14, 1948.
Associate Regional Director.

cc: Mr. Dodge.
Monument Circulation (2).

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
Arches
.....NATIONAL MONUMENT
Moab, Utah

December 27, 47
.....19.....

MEMORANDUM for the Regional Director, Region Three:

The following is a narrative report for Arches National Monument for the month of December, 1947:

GENERAL: Travel dropped practically to zero for the month due to unusually cold weather and snow on the approach road.

WEATHER: Rain fell on December 2nd and 5th and on the 8th we had two inches of snow at headquarters. Temperatures during the month were very cold for December with a low of 16 degrees registered at Moab. It did not warm up during the day and the snow that fell on December 8th is still present on some portions of the monument.

TRAVEL: Our travel fell way down this month with only 19 cars and 43 people as compared with 185 people last month and 91 visitors for December, 1946. We had representation from seven states, France, China and Italy.

INTERPRETIVE SERVICES: Three parties were accompanied into the Windows and Delicate Arch sections during the month. Sixteen visitors were contacted at headquarters and 48 people visited the Windows section unattended.

COOPERATING GOVERNMENTAL AGENCIES: Construction work on approach roads to the Delicate Arch, Fiery Furnace and Devil's Garden was carried on the entire month by Grand County. To date 4.6 miles of road have been roughed out, with all drilling and shooting completed and all culverts installed. This includes 2.6 miles from the Windows road to the Devil's Garden - Delicate Arch junction and 2 miles of the Devil's Garden spur. The power grader arrived on the job on November 21st but accomplished about only 4 hours work before it ceased functioning. An engine overhaul was necessary and it has not been back on the job to date so that no finishing has been accomplished. Snow and cold weather have hampered the work considerably and only the foreman, acting as dozer operator, and one laborer are on the job. Work was closed down on December 20th for the Christmas holiday and will be resumed on December 29th.

NATIONAL PARK SERVICE VISITORS: Naturalist Sullivan spent December 2nd, 3rd and 4th at the monument going over the museum prospectus and interpretive problems. Stormy weather prevented his visiting all sections of the monument.

Ranger Bill Guillet of Colorado National Monument stopped by to say hello on December 7th.

NEWSWORTHY VISITORS: Harry Goulding of Monument Valley visited the area on two occasions during the month. He stated that John Ford, director for RKO pictures was interested in filming pictures in this vicinity and he was looking over the possibilities before bringing Mr. Ford in during the spring.

MAINTENANCE: Laborer-Leadman Winbourn was terminated on November 29, 1947.

Carving of new signs for roads and trails has been completed and hope to have them painted and ready for installation during the coming month.

MISCELLANEOUS: A visitor from Salt Lake City, Utah, who did not believe the road closed sign, tried out the new road on December 7th and in trying to get back out of Salt Valley, over the switchbacks, burned out a clutch due to slick roads. No one was at the County trailer camp so he spent the night in his car. He was found the next morning by the construction crew and his car was towed to Moab for repairs. He stated that he would believe in signs in the future, after spending a frigid night in his car.

NATURAL BRIDGES NATIONAL MONUMENT: This area became inaccessible during the early part of December due to heavy snow on the Elk Ridge. No travel can come to the area via Mite due to the fact that the ferry over the Colorado River was sunk during the fall.

INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES. "ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION. "OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures, or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (Library, contact station, exhibit rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispensing INFORMATION rather than interpretive service should not be considered as attended Interpretive Stations.

INFORMATION is factual matter relating to physical developments, physical facilities, geographic locations, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, motel accommodations, bus and train schedules, and similar matters outside of the area regarding which visitors inquire.

INTERPRETATION is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visitors using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive services, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or provided by Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Please total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should NOT be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive devices, this attendance may record a total considerably in excess of the visitors registered in the area during the same period. For comparison, the total number of visitors to the area during the month should be shown.

THIS REPORT DUE: From all National Park Service areas providing any interpretive services. Send two copies to the Regional Director who will forward one to the Director. One copy should be retained by the Superintendent or Custodian of the area in which the report originates. Coordinating Superintendent also should be provided with a copy. Due in the Regional Director's Office not later than the [illegible] the month following that covered by the report.

NATIONAL PARK SERVICE
AZTEC RUINS NATIONAL MONUMENT
AZTEC, NEW MEXICO

24 December 1947

MEMORANDUM for the Regional Director,
Region Three, National Park Service.

There follows the report of activities in Aztec Ruins for December 1947.

WEATHER. With the usual December weather remaining thruout the days from freezing temperatures to lower forties, with considerable cold to a low of plus 2, snow and sleet, our visitation has suffered proportionately.

MAINTENANCE. The special Soil and Moisture Control Work for Canyon de Chelly and Chaco Canyon, which headquartered at Aztec Ruins, completed their willow cutting in this area and transferred the cuttings for replanting to the above areas.

We have purchased and hauled 5 sections of concrete pipe to be used in the completion of manholes on the ruins drainage ditch. As soon as the ground will allow, the pipes will placed in position by use of a crane truck.

The great kiva roof was patched considerably and the entire surface tarred. This is a stop-gap measure to prevent deterioration of the roof supports until the entire roof may receive long delayed attention.

Some difficulty has been experienced with the domestic water pump and motor. Complete overhauling of this unit will be required in the immediate future.

PERSONNEL. Park Ranger, William C. Reed's services were terminated close of business 19 December 1947.

Decrease in Travel. There were 273 people in 91 cars from 23 states, Wash. D.C., Alaska, Canada and Venezuela. This is an approximate decrease in travel of 10% over December 1946.

INTERPRETIVE SERVICES. There were 180 visitors conducted in 45 trips thru the ruins, and 273 visitors in 70 trips were shown the museum.

Bandelier National Monument

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
BANDELIER NATIONAL MONUMENT
SANTA FE, NEW MEXICO

December 28, 1947.

MEMORANDUM for the Regional Director, Region Three.

There follows a report of the activities at Bandelier National Monument for the month of December, 1947.

Weather

Cold snowy weather restricted travel during the greater part of the month to 48 less visitors than in December, 1946. The maximum temperature of 55 degrees occurred on December 26 and the minimum of 1 degree above zero came on December 11. 0.68 inches of precipitation fell in the form of snows on December 2, 3, 6, and 9.

Approach Roads

The approach road was in the best condition for some time at the beginning of the month but heavy truck traffic from the Atomic Energy Commission to new construction by them just south of Ancho Hill has had its effect and the road is again developing rough stretches. No snow is on the road except in the shade on Ancho Hill.

The road maintenance man spent much of his time on the rehabilitation and construction of signs and putting his tools into shape for next year.

Travel

Travel for the month of December of 373 visitors dropped 11% from that of December, 1946 as a result of cold weather, snow, and icy roads. The figures for the travel year still show a 43% increase with 3132 visitors.

Interpretation

The average party time in the ruins dropped to 59 minutes due to the inclement weather. The attendance in the museum was very low and

FOR DEFENSE
BUY
UNITED STATES SAVINGS BONDS

the time spent there by each party was very short as the lack of heat in winter weather makes even the best exhibit uninteresting. Only when people were guided through the museum would they spend much time there.

Three illustrated talks were given outside of the monument by Ranger Onstott on the 10th of December. One was given to the assembly at Adams State College at Alamosa, Colorado, one to the assembly of the San Luis Institute of Arts and Crafts at San Luis, Colorado, and the third to the Colorado Archeological Society at Alamosa, Colorado. Total attendance at the three lectures was 335 people.

Boundaries

The latest information from the Atomic Energy Commission indicates that they plan on acquiring all of the Ramon Vigil Grant north of Highway 4 from Ancho Canyon to present Post 11. Their boundary would also continue down Frijoles mesa along Doe Canyon to the Rio Grande to include all of Ancho Canyon. In view of the acquisition of this land by the Atomic Energy Commission with the resultant closing of the area for security purposes, it has been recommended that consideration be given to extending the monument boundaries to Highway 4 to give a common boundary with Atomic Energy Commission lands. This would extend the monument boundaries from one half to one mile north of the present boundary and would include an area that is rich in numerous small Indian ruins.

Stabilization

Subfloor foundations tests were made during the month in 25 rooms of tiers 1 through 7 of Tyuonyi. Much deep trash in well defined layers was found under most of the rooms. Hard frozen ground to a depth of one foot has stopped testing indefinitely. A trench was dug along the northeast side of the community house in an effort to locate the rooms which are supposed to be under the over-burden behind tiers 4 through 8. No walls have been found as yet and it is hoped that after the ground thaws further trenching will show definitely whether or not such rooms exist.

"Before" pictures were taken of the 59 rooms of tiers 19 through 29 and the "after" pictures of the 49 rooms of tiers 12 through 18 were done. The walls of the 59 rooms of tiers 19 through 29 have been cleaned, thus making a total of 80 rooms ready for wall packing when the weather permits.

The walls of four rooms were packed as an experiment on the 22nd of December after three days of good clear weather. The mortar was wall frosted the next day, so further packing was discontinued. As the weather has become so unfavorable to the bulk of the work necessary for stabilization, it is contemplated that about four more weeks of work will be done on the walls of Tyuonyi and the Long House and then work will be

terminated until the ground thaws in the spring.

Maintenance

John Bell of Santa Fe spent two days rearranging the electrical trunk lines to the residences to distribute the load more evenly between circuits. It appears that the single wire conduit laid to provide a three wire system was defective so all circuits were wired to the remaining two wire cable.

Painting the interior of Residence No. Three and the floors of Residence No. 1 was completed by Laborer Pino and Maintenance-man Valencia during the month.

The Standard Roof Company was requested to make inspection and correction of a leak which has developed in the roof over the lobby of the Lodge. No answer has as yet been forthcoming.

Administration

The custodian took annual leave from December 16 through December 28. Maintenance-man Valencia took annual leave from December 18 through December 27.

The annual inventory of property and equipment was completed during the month.

The Atomic Age approached within 1½ miles of the monument to the Prehistoric Age in the form of a new site being constructed by the Atomic Energy Commission on a mesa north of Frijoles Canyon.

The In-service-training meetings that were started in October for the National Park Service employees at Bandelier continued through the middle of December with emphasis on protection and law-enforcement, the archeology of the monument, and fiscal matters. Two meetings were held each week on Tuesday and Thursday evenings, and generally lasted for one and one half hours.

Fred W. Kinnevies,
Custodian.

CANYON DE CHELLY NATIONAL MONUMENT
CHINLE, ARIZONA

December 19, 1947

MEMORANDUM for the Regional Director, Region three.

The following is a report on activities at Canyon de Chelly National Monument during December, 1947.

General

The nationwide publicity given the story that 60,000 Navajo Indians are starving has focused the attention of the whole country on this section.

Although there might have been some need for help in some localities, the Navajos in this region are better off than they have been for some years and do not face starvation nearly as much as they have in past years. As a result of stories that they will be taken care of, weaving has slowed down and workmen are quitting their jobs in other localities to come home and get in on the free eats and clothing.

Weather Conditions

Winter weather began in November and has continued to date. Both Maximum and Minimum temperatures have been below normal for the past two weeks with minimum temperatures below 10 degrees the lowest being 4 on several days. Maximum temperatures have risen above 35 degrees on only a few days, the highest being 49 degrees on December 3. There has been 1.15 inches of rainfall and snow. Roads were in bad shape during the early part of the month but since the cold weather has set in they have frozen and are passable.

Maintenance

The Pump engine was worked over again and some repairs made to the water and sewer systems. Roads have been graded twice to Garcias store to take off high centers. Small maintenance jobs and cleanup. The automotive equipment was also worked over and a new brake cylinder installed in the dodge 2x4.

Soil and Moisture

The bank protection and planting project was completed on December 3. Adverse weather conditions made work disagreeable but I believe that much good will be accomplished.

Administration

This report is being made early as the Custodian entered on annual leave status December 15. He did not leave the area until December 20. A caretaker has been employed to look after things while he is away.

All reports have been made and office work brought up to date before leaving.

One trip was made to Gallup, New Mexico for supplies and equipment on December 2.

Travel

As to be expected under existing road and weather conditions travel was very light with only 16 visitors. A party of four accompanied me to Antelope and White House during the drill and moisture work. One visitor spent considerable time in my office getting information. I finally found out that he was organizing a group called "The Band of Caleb" and that this country would be used to make a last ditch stand against the forces that are undermining Democracy.

Visitors

Mr. Hart Thelsen of Look magazine and Mr. Silver Meyers of Kanab Canyon were in getting pictures of Starving Navajos for a forthcoming article. N.P.S. visitors were Charlie Steen and Gordon Vivian who visited the area on December 9 and 10 to look over stabilization needs at White House.

Custodian on Annual leave starting December 16.

Arizona Archeological Center Library

INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

FILL OUT ONLY THOSE BLOCKS THAT APPLY

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

CONDUCTED TRIPS: TRIPS CONDUCTED BY N.P.S. PERSONNEL IN THE FIELD OR THROUGH RUINS, TO HISTORIC STRUCTURES, OR OTHER FEATURES OF THE AREA.

TALKS: REGULARLY SCHEDULED TALKS WITHIN SERVICE AREAS PRESENTED EITHER BY SERVICE PERSONNEL OR BY OUTSIDE SPEAKERS UNDER SERVICE SPONSORSHIP. NOT TO INCLUDE ANY TALKS MADE AS PART OF A CONDUCTED TRIP OR OTHER INTERPRETIVE DEVICE.

ATTENDED INTERPRETIVE STATIONS: ACTUAL COUNT OF PERSONS USING THE STATION (LIBRARY, CONTACT STATION, EXHIBIT ROOMS, STUDY COLLECTIONS, ETC.), COUNT BEING MADE BY SERVICE PERSONNEL IN ATTENDANCE. CHECKING STATIONS OR OFFICES DISPENSING INFORMATION RATHER THAN INTERPRETIVE SERVICE SHOULD NOT BE CONSIDERED AS ATTENDED INTERPRETIVE STATIONS.
INFORMATION IS FACTUAL MATTER RELATIVE TO PHYSICAL DEVELOPMENTS, PHYSICAL FACILITIES, GEOGRAPHIC LOCATIONS, RULES AND REGULATIONS OF THE AREA, AND THE UTILIZATION OF THESE FACILITIES BY THE PUBLIC. IT INCLUDES DATA ON ROUTES AND ROADS, HOTEL ACCOMMODATIONS, BUS AND TRAIN SCHEDULES, AND SIMILAR MATTERS OUTSIDE OF THE AREA REGARDING WHICH VISITORS INQUIRE.
INTERPRETATION IS AN ACCURATE EXPLANATION OF THE MANIFESTATIONS OF NATURAL HISTORY AND HUMAN HISTORY FOUND WITHIN THE AREA.

UNATTENDED INTERPRETIVE DEVICES: UNDER THIS HEADING SHOULD BE ESTIMATED AS ACCURATELY AS POSSIBLE ALL VISITOR USING EXHIBITS-IN-PLACE, ORIENTATION STATIONS, AND OVERLOOKS, WAYSIDE SHELTERS HOUSING INTERPRETIVE SERVICES, TRAILSIDE EXHIBITS, SELF-GUIDING NATURE TRAILS AND AUTO CARAVAN ROUTES, AND THE LIKE AT WHICH SERVICE PERSONNEL IS NOT ON DUTY. HISTORICAL AREAS WILL FIND IN MANY CASES THAT THIS SECTION OF THE FORM DOES NOT APPLY.

INTERPRETIVE ACTIVITIES OUTSIDE THE AREA: THIS INCLUDES ALL INTERPRETIVE ACTIVITIES PERFORMED OR PROVIDED BY SERVICE PERSONNEL OUTSIDE THE AREA. NUMBER OF REPLIES IN RESPONSE TO WRITTEN REQUESTS FOR "INTERPRETIVE" DATA SHOULD BE INDICATED.

INSTRUCTIONS FOR FILLING OUT THE FORM

COLUMN #1 RECORDS THE NUMBER OF TRIPS CONDUCTED DURING THE MONTH, THE NUMBER OF TALKS MADE, AND THE NUMBER OF DAYS ON WHICH INTERPRETIVE STATIONS AND DEVICES ARE OPEN TO THE PUBLIC.

COLUMN #2 INDICATES THE TOTAL ATTENDANCE OF VISITORS AT EACH CLASS OF TRIP, TALK, STATION, OR DEVICE. PLEASE TOTAL EACH COLUMN IN ALL BLOCKS.

COLUMN #3 SHOWS THE AVERAGE AMOUNT OF TIME OF EACH CLASS OF SERVICE, OR THE AVERAGE TIME SPENT BY VISITORS IN USING EACH INTERPRETIVE DEVICE. SOME STUDY OF VISITOR HABITS MUST BE MADE WITH PERIODIC CHECKING AT OCCASIONAL INTERVALS.

INTERPRETIVE ACTIVITIES OUTSIDE OF THE AREA ARE INCLUDED ON THIS FORM AS A MATTER OF RECORD ONLY. THEY SHOULD NOT BE INCLUDED IN THE TOTALS IN THE LOWER RIGHT-HAND CORNER OF THE FORM.

TOTALS: A SUMMARY OF INTERPRETIVE SERVICES FURNISHED VISITORS WITHIN THE AREA IS PROVIDED FOR IN THE LOWER RIGHT-HAND CORNER. TOTAL ATTENDANCE SHOWS THE ACTUAL NUMBER OF VISITORS WHO TOOK ADVANTAGE OF THE VARIOUS INTERPRETIVE SERVICES OFFERED. SINCE EACH VISITOR MAY USE SEVERAL DIFFERENT ENTERP TYPE DEVICES, THIS ATTENDANCE MAY RECORD A TOTAL CONSIDERABLY IN EXCESS OF THE VISITORS REGISTERED IN THE AREA DURING THE SAME PERIOD. FOR COMPARISON, THE TOTAL NUMBER OF VISITORS TO THE AREA DURING THE MONTH SHOULD BE SHOWN.

THIS REPORT DUE: FROM ALL NATIONAL PARK SERVICE AREAS PROVIDING ANY INTERPRETIVE SERVICES. SEND TWO COPIES TO THE REGIONAL DIRECTOR WHO WILL FORWARD ONE TO THE DIRECTOR. ONE COPY SHOULD BE RETAINED BY THE SUPERINTENDENT OR CUSTODIAN OF THE AREA IN WHICH THE REPORT ORIGINATES. COORDINATING SUPERINTENDENTS ALSO SHOULD BE PROVIDED WITH A COPY. DUE IN THE REGIONAL DIRECTOR'S OFFICE NOT LATER THAN THE 6TH OF THE MONTH FOLLOWING THAT COVERED BY THE REPORT.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
SOUTHWESTERN NATIONAL MONUMENTS

ADDRESS REPLY TO THE SUPERINTENDENT

Capulin New Mexico,

Memorandum for the Regional Director
Region Three, National Park Service
Santa Fe, New Mexico.

There follows a report of the activities in and around Capulin Mountain National Monument for the Month of December 1947.

Approximately six hundred visitor to the Volcano during the month, bringing the total visitors Travel year to date to five thousand one hundred and the visitors, Fiscal year to date to twenty four thousand six hundred.

Weather has been the chief topic of the day Probably the coldest December on record here, cold weather beginning about the fifth of the month and lasting up until Christmas, between the tenth and twentieth we had six days showing below Zero on the morning of the thirteenth seventeen below Zero, and four days as low as ten below, about fifteen inches of snow alltogather during the month, Today the 26th it is much warmer and snow is melting some and the ground is still solid covered.

The spiral road to the top of the Volcano is not open and has been closed for several days account of the deep drifted snow, The Custodian will probably be able to get it open to the public by tomorrow, at least we hope.

All roads off the Paved highways are in bad condition in the vicinity, very muddy some snow and ice are mostly impassable without chains.

The Special Elk season in the vicinity of this Monument was quite an event this season, One hundred fifteen permits were issued and well over one hundred kill was reported, The Custodian here has been eating Elk venison but not thru his own efforts, his Son got a permit.

Very Respectfully,

Homer J. Farr,
Custodian

REMARKS: (Please note below any factors influencing interpretive service, such as: "museum closed for repairs", "closed for season", "naturalist on sick leave", etc.

*INSTRUCTIONS FOR FILLING OUT THIS FORM ON OTHER SIDE. Please read them carefully.

THE PURPOSE OF THIS FORM IS TO SECURE AN ACCURATE RECORD OF INTERPRETIVE SERVICES FURNISHED VISITORS ON A UNIFORM BASIS FOR ALL N.P.S. AREAS.

Fill Out Only Those Blocks That Apply

EXPLANATION OF TERMS USED

"INTERPRETIVE" PERSONNEL ARE NATURALISTS OR RANGER NATURALISTS, HISTORIANS, AND HISTORICAL AIDES.
"ADMINISTRATIVE" ARE CUSTODIANS, SUPERINTENDENTS, ETC., CALLED ON TO ASSIST WITH INTERPRETATION.
"OTHER" ARE RANGERS, CLERICAL PERSONNEL, AND THE LIKE WHO MAY BE CALLED IN TO HELP INTERPRET THE AREA.

Conducted Trips: Trips conducted by N.P.S. personnel in the field or through ruins, to historic structures, or other features of the area.

Talks: Regularly scheduled talks within Service areas presented either by Service personnel or by outside speakers under Service sponsorship. Not to include any talks made as part of a conducted trip or other interpretive device.

Attended Interpretive Stations: Actual count of persons using the station (library, contact station, exhibit rooms, study collections, etc.), count being made by Service personnel in attendance. Checking stations or offices dispensing INFORMATION rather than interpretive service should not be considered as attended Interpretive Stations.

INFORMATION is factual matter relative to physical developments, physical facilities, geographic locations, rules and regulations of the area, and the utilization of these facilities by the public. It includes data on routes and roads, hotel accommodations, bus and train schedules, and similar matters outside of the area regarding which visitors inquire.

INTERPRETATION is an accurate explanation of the manifestations of natural history and human history found within the area.

Unattended Interpretive Devices: Under this heading should be estimated as accurately as possible all visitors using exhibits-in-place, orientation stations, and overlooks, wayside shelters housing interpretive services, trailside exhibits, self-guiding nature trails and auto caravan routes, and the like at which Service personnel is not on duty. Historical areas will find in many cases that this section of the form does not apply.

Interpretive Activities Outside the Area: This includes all interpretive activities performed or provided by Service personnel outside the area. Number of replies in response to written requests for interpretive data should be indicated.

INSTRUCTIONS FOR FILLING OUT THE FORM

Column #1 records the number of trips conducted during the month, the number of talks made, and the number of days on which interpretive stations and devices are open to the public.

Column #2 indicates the total attendance of visitors at each class of trip, talk, station, or device. Please total each column in all blocks.

Column #3 shows the average amount of time of each class of service, or the average time spent by visitors in using each interpretive device. Some study of visitor habits must be made with periodic checking at occasional intervals.

Interpretive Activities Outside of the Area are included on this form as a matter of record only. They should not be included in the totals in the lower right-hand corner of the form.

Totals: A summary of interpretive services furnished visitors within the area is provided for in the lower right-hand corner. Total Attendance shows the actual number of visitors who took advantage of the various interpretive services offered. Since each visitor may use several different interpretive devices, this attendance may record a total considerably in excess of the visitors registered in the area during the same period. For comparison, the total number of visitors to the area during the month should be shown.

THIS REPORT DUE: From all National Park Service areas providing any interpretive services. Send two copies to the Regional Director who will forward one to the Director. One copy should be retained by the superintendent or custodian of the area in which the report originates. Coordinating superintendents also should be provided with a copy. Due in the Regional Director's Office not later than the 6th of the month following that covered by the report.

NATIONAL PARK SERVICE

December 23, 1947.

MEMORANDUM for the Regional Director,
Region Three.

There follows the narrative report for Casa Grande National Monument for December, 1947.

General: The 1947 holiday season finds us still plenty busy, with definite possibilities that we will be busier. An epidemic of colds and flue hit the monument but at this writing, except for the children, it is now under control. Shortage of water is still a major problem and a program of irrigating now to get the soil in shape for spring plantings has been initiated in the valley, in the hope that it will cut down on the demand for water during the peak periods of use. A new schedule of airline service to Coolidge is in the process of being developed.

Weather: Compared to records made since 1941, this report period has been one of the coldest. With the exception of 5 days all minimums were below freezing and for seven days during the time, the maximums did not go over 60. The last week we started to get typical Arizona weather with maximums of 71 and 70 recorded. Nights continue to be cold with minimums running around 25. .90 inches of rain fell during the month.

Visitors: December 1947; 3461: Dec. 1946; 2705: Travel year to date - 1947; 9081: Travel year to date - 1946; 7816: Travel year to date - 1941; 3924. The usual pre-Christmas lull was noticed with our travel dropping a little below Nov. However compared to other Decembers on record it is still way above any of them. Ticket sales revenue amounted to $570.00 with 1900 tickets sold. SWNM Association book sales for the month was $183.42 and for the quarter $412.92.

Interpretive Service: Of the 3461 visitors to the area, 2249 made the Ruins trip in 182 trips averaging 51.1 minutes per trip. 2076 made the museum trip in 165 groups averaging 26.3 minutes per trip. 1212 people came into the area to take a quick look at the monument or bring other people to see it, but did not make the guided trip. "Why do you keep all these broken dishes around?" was the question that was hardest to answer.

Maintenance: The cleaning and regrading of the ditches along the entrance road was completed. Doors and windows in quarters # 2-4 are in the process of being worked over. The bathroom window is pulled out and rebuilt and new plaster and stucco applied around it.

Administration & Protection: Two trips were made to the Adamsville Site and on the last trip some evidence of vandalism was found. The map case refiling and cataloguing was completed.

Trips Taken: Mechanic Stonebocker made one trip to Phoenix for parts.

NPS Visitors & Visitors of Note: Regional Director Tillitson paid us a brief visit on Dec. 3. P. R. Richardson of the Phoenix Weather Bureau Office checked over our observation equipment on Dec. 4, and Custodian Egermeyer brought in some equipment to be repaired in the shop on the same date. Dec. 11, Mr. Obrien of Gila Pueblo stopped in to say hello. Dec. 21, Custodian Hastings and family, on a postmans holiday, gave us the once over.

Mechanics Activities: The following equipment was worked on and general repairs made to it.

Area From	Equipment.
Region Three	Auto Car
Casa Grande	Sewer Pump
Saguaro	Ford Dump
	Ford Stake
	Chev. Pickup
	Horse Trailer
Organ Pipe	International Pickup
	Motor Grader
