Re: SOC 39-11129(B) – Tunnel Mine Spring – Coronado National Memorial

Dear Ms. Logan:

We recently sent you a letter dated May 7, 2003, regarding an amendment for Tunnel Mine Spring at Coronado National Memorial (Statement of Claimant (SOC) No. 39-11129(B)). As noted by Special Master Schade in a recent *Partial Report of the Special Master on Claims Adjudicated in the San Pedro River Watershed*, dated May 15, 2003, we mistakenly reported the Statement of Claimant number for Tunnel Mine Springs as 39-11130(B). The correct SOC is 39-11129(B).

Please amend SOC 39-11129(B), and our recent amendment dated May 7, 2003, by changing the legal description for Tunnel Mine Spring and the place of use to the SE, NW, SE, Section 11, Township 24 South, Range 20 East, G&SRB&M. Sorry for the confusion we may have caused.

If you have any questions please contact Bill Hansen, of my staff, at (970) 225-3532.

NOTE TO FILE

Tunnel Mine Springs is located on Federal reserved lands. On December 14, 1981, the NPS, per Jack Burke's instructions, Office of the Solicitor (SOL), filed a Application to Appropriate Surface Waters (33-87251). The NPS then filed a Statement of Claimant form (39-011130) on January 4, 1982 in the San Pedro River Adjudication. The Application to Appropriate was approved by the Arizona Department of Water Resources on August 6, 1990. The Proof of Completion and Application to Beneficial Use were due on August 6th, 1994 and 1995. Bill Swan, SOL, instructed the NPS to not file the Proofs because Tunnel Mine Spring was located on Federal reserved lands and therefore, was a Federal reserved water right. It was Swan's opinion that the issue would be resolved in the adjudication proceedings and that the NPS would probably withdraw the State application at a later date.

RE: Permit to Appropriate Public Waters No. 33-87251

Dear Sir:

Your application for an appropriative permit has been approved. Enclosed is a copy of the application and your approved permit.

Enclosed are forms titled Proof of Appropriation of Water and Affidavit of Appropriator. These two forms must be completed and filed with the Department of Water Resources for each permit after the means of diversion or storage have been constructed and the appropriated water has been applied to the permitted beneficial use. The Affidavit of Appropriator must be notarized and supported by the affidavit of two witnesses.

The Proof of Appropriation of Water is an important document which should show the amount of water beneficially used. Please answer each applicable question completely, carefully and correctly after reviewing the terms of your permit, the application and any information which you have compiled regarding this use. You may submit attachments with the Proof.

The information set forth in the Proof will be reviewed prior to the issuance of a Certificate of Water Right. This review may include a field examination of the appropriation.

Memorandum

To: Superintendent, Coronado

From: **ACTING** Regional Director, Western Region

Subject: San Pedro Adjudications; Permit to Appropriate Water, Tunnel Mine Spring, Coronado National Memorial, Arizona

As you know, we filed an Application for Permit to Appropriate Water with the State of Arizona on December 9, 1981 to insure Coronado National Memorial's water right to Tunnel Mine Spring, as was recommended by Jack Burke, Field Solicitor's Office, San Francisco (see Enclosures 1 and 2).

As was recently discussed between yourself and William Reed, Division of Water Resources, Western Region, the State, in response to the above action, has sent us two copies of the Notice of posting of the above application and an Affidavit of Posting Notice, by means of the enclosed letter (Enclosure 3). As discussed with Mr. Burke, the forms have been stamped with our standard Disclaimer and, by means of this memorandum, are forwarded to you for action. The procedure for posting is self-explanatory. We suggest that one form be posted, in clear view, at your visitor center and the other at the nearest post office. The affidavit should be signed by yourself or a member of your staff, and then forwarded to the State, as described in their letter. We would appreciate receiving a carbon copy of your submittal.

Thank you for your assistance in this matter. Should you have any questions concerning the attached forms, please contact Mr. Gerard Witucki, Chief, Division of Water Resources at (415) 556-8660.

Re: Application(s) for Permit to Appropriate (Public) Water No.(s): _____
33-87251

Dear Applicant:

Enclosed are:

- 1) Two copies of the Notice of posting of the above application(s);
- 2) An Affidavit of Posting Notice.

The two Notices must be posted within twenty (20) days from the date of issuance appearing at the bottom thereof in two conspicuous-to-the-public places, and MUST remain posted for thirty (30) days from the starting date of posting continuously until the expiration of thirty (30) days. We suggest that one Notice be posted in or near the post office where those who reside in the locality of the proposed appropriation receive mail.

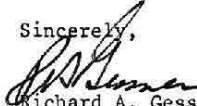

AT THE CONCLUSION OF THE 30-DAY POSTING PERIOD, the Affidavit of Posting Notice, with one copy of the Notice attached, should be completed and notarized. This will then constitute a sworn statement to the fact that the Notices have indeed been posted for the required thirty (30) days in public places.

Per Rules and Regulations R12-5-502 (State Land Department), your prompt attention to the posting of the two Notices and the return of the Affidavit (after 30 days of posting) will facilitate the progression of the application(s) through the various phases required by law before a Permit can be issued.

IMPORTANT: Before posting the Notices, please insert the date of posting on the bottom of each Notice.

At this site water collects behind a wall across an abandoned mine tunnel. The wall is located 30-35 feet from the tunnel entrance. At this point the tunnel is approximately 7.4 feet high at center and 6.46 feet wide at height of wall "window." The window in the wall across the tunnel is located 4.2 feet above the tunnel floor. The window is an equal distance from either tunnel side and is 4.35 feet X 3 feet. A 2 inch diameter spillway pipe is located at left of wall (looking into tunnel) 4.1 feet above tunnel floor. Water behind the wall, as seen by leaning through window, was ponded 0.5 feet deep when this site was visited on August 19, 1980. A 1 inch diameter pipe conveys water from behind wall to two locations. The pipeline must be "forked" outside of tunnel for one location is a drinking tank Southwest of tunnel entrance and the other location is where water flows from pipe onto the ground Southeast of tunnel entrance. Both of the above locations can be seen from tunnel entrance. The drinking tank is 8 feet in diameter and 2 feet high. The 1 inch line that now flows onto the ground is reported as once supplying water to the two residences approximately 300 and 600 feet South by Southeast from the tunnel entrance. The water from this spring is now unused other than by wildlife at drinking tank.

Coronado, Tunnel Mine Spring, looking South. This fork in the pipeline from the spring ends here but once continued on to two houses. The water now flows onto the ground and quickly infiltrates/evaporates. The end of the pipe can be seen next to the container at the bottom of the photo. The trail at the right of the photo leads to houses that are not occupied at this time but that may be used in the future by park personnel.

Coronado, Tunnel Mine Spring, looking North. Man stands inside of entrance, land surface rises to the entrance and then slopes down to the floor of the horizontal shaft or tunnel. 25-35 feet from the entrance there is a wall across the tunnel with a waist high window. The water of this source ponds behind the wall before being piped away to two sites (see other two photos).

Bill, it looks like Tunnel Mine Spring is incorrect. It should be DBD SENWSE. Sorry I missed that on the table.

Thanks, Barbara

Subject: Water right locations

Barbara,

I'm taking care of the administrative business on our claims. If you remember, we discussed the legal locations shown on my table for Brown Allotment Spring, Joe's Spring #3, and Tunnel Mine Spring and you thought the legals might be wrong for each spring. Can you check the legals and let me know what you believe is correct before I amend our claim. For your information the present claim (shown on the table) has the legals as follows:

Brown Allot. Spr.	SENE [AAD] Sec. 7 24S21E
Joe's Spr #3	SENE [AAD] Sec. 12 24S20E
Tunnel Mine Spr.	SWNWSE [DBC] Sec. 11 24S20E

I would appreciate it if you could get the legals for me ASAP - I would like to get our letter off to ADWR this week. I will keep you posted on our progress in the negotiations. Thanks for your help.

ACTING
From: Regional Director, Western Region
Subject: In re Salt River Adjudication, No. W-1
Maricopa County Superior Court

In re San Pedro Adjudication, No. W-1
Cochise County Superior Court

Per our memorandum of July 14, 1981, and numerous subsequent conversations between Messrs. Coda and Burke of your staff and members of the Division of Water Resources, we are forwarding, for your review, the Statement of Claimant forms for the State of Arizona water rights adjudications of the above subject watersheds. The information provided on these forms should reflect those concerns which have been discussed with your staff. As discussed, we are proceeding to file an Application for Permit to Appropriate Water with the State of Arizona to insure the park's water right to Tunnel Mine Spring (Coronado National Memorial). This source is on land that was purchased by the National Park Service on March 18, 1980.

As was discussed between Mr. Steve Carroll of the Department of Justice and Mr. Witucki of the Division of Water Resources, the fees for the filing of the Statement of Claimant forms will be forwarded to the State of Arizona by the Treasury Department when we have been notified that the Justice Department has submitted the claims.

Should you have any questions concerning the attached forms, please contact Mr. Gerard Witucki, Chief, Division of Water Resources, at 556-8660.
