Marc,

That was good information, but not for the peak truck traffic period, since the drilling was winding down. I really need the info for when all the caliche truck were coming in the Park. To make things easier for you all, just fax me all the traffic logs. I should have copies in the file any way, Thanks.

Arlene

Arlene, I trust the vehicle count Carla just sent to you is sufficient for your needs. With regard to the continued efforts to get this well hooked up and on-line, we are eager to take advantage of "good weather" windows in order to expedite the completion of this work. In this regard I asked David to contact the construction crew(s) and HPL folks to work as much as possible this weekend. He will advise you later this afternoon of our weekend schedule. Thanks, Marc
