Please send me a copy of the National Park Service's and U.S. Fish and Wildlife Service's Biological Opinion concerning the proposed expansion of drilling for petroleum on the Padre Island National Seashore, with regard to potential impacts on the seriously endangered Kemp's ridley sea turtles, which is nesting in increasing numbers at PAIS, due in part to the head start experiment carried out by National Park Service and various other agencies. I would like to review the proposal and Biological Opinion before submitting my comments. Thanks, Charles W. Caillouet, Jr., Ph.D. (retired, National Marine Fisheries Service, Galveston, Texas) Please mail the Biological Opinion to me at the following address: 106 Victoria Drive West Montgomery, Texas 77356 Re: article in Corpus Christi Caller Times (November 28, 2004) that the Padre Island National Seashore may be the site of five more gas wells.)
