RE: Changes to BNP Petroleum Corporation's ST 991 #1, Dunn McCampbell 12A, and 11A
Plan of Operations

BNP Petroleum Corporation (BNP) has submitted to the National Park Service (NPS) revisions to a plan of operations to drill and produce three natural gas wells, known as the ST 991 #1, Dunn McCampbell 12A, and Dunn McCampbell 11A wells, within Padre Island National Seashore. The revisions were submitted on May 23, 2007 and apply to the original plan of operations submitted to the NPS by BNP on January 18, 2007.

The updated information provided in the enclosed binder addresses comments you and/or your staff provided to BNP on March 2, 2007. Please update your existing plan of operations with these documents. A technical review of the revised documents is requested to determine whether the changes provided address earlier comments and if the plan should be formally accepted.

Your timely response is greatly appreciated. If you need any additional information, please contact Mark Biel, Resource Management Specialist, at (361) 949-8173, extension 234.
