Subject: Re: FR NOA pkg for BNP's ST 991S well 

The notice and briefing statement look fine to me.

Subject: FR NOA pkg for BNP's ST 991S well

Darrell,

As requested, attached is a FR NOA package for BNP's State Tract 991-S well proposal. As we discussed, you will be preparing the Purchase Request for inclusion in the package down the road when you are ready to fedex to Jerry Buckbinder.

Please give Chris time to review and send you an email that confirms the NOA and briefing statement are acceptable to her.

Then, email the unsigned NOA and briefing statement to Jennifer Lee with a cc to Jerry Buckbinder to request Jennifer to coordinate the Departmental review. If you would like me to pen the text that you can use in your email just let me know. You will need to remind Jennifer to notify you when the approval to publish is granted, but not to proceed with publication until notified by you to do so. Due to the several weeks it may take to complete all the necessary documentation (receive, review and accept the plan, and complete the EA and SOFs), let Jennifer know that upon receiving approval to publish, and completing the documentation, you will fedex the signed NOA in the full package including the PR to Jerry so he can proceed to FR publication. This could help to circumvent another inadvertent premature publication.

Before you can send the NOA and briefing statement to Jennifer, you need to receive and ensure that BNP's documentation of property right interest is complete. Ed Kassman is the best to do a review for you. Once you have confirmed that BNP has the requisite documentation of property right interest, you can proceed with sending Jennifer the NOA/BS and posting a public scoping brochure to PEPC along with mailing to your mailing list.

Would you like me to draft the public scoping brochure for you? I would only need help with the inset map.
