INTRODUCTION

National Park Service professionals are dedicated to their fundamental mission as archivists of the nation's history, providers of educational and leisure time opportunities, and protectors of our resources for future generations. Timely, reliable, and useful information is fundamental to effective management and planning.

The Socio-Economic Studies office acknowledges the conscientious efforts of field staff of the many areas of the National Park Service. Without the effort of park staff to count, record, and report the public use summarized here, a statistical report of this quality would not be possible. A program of collecting and analyzing monthly public use is combined with continuous auditing of park counting procedures to ensure consistency and accuracy of data.

The gathering and publication of these statistics is in accordance with Public Law 88-29, "An Act to Promote the Coordination and Development of Effective Programs Relating to Outdoor Recreation" and related legislation. The definitions at the end of this report were initially outlined by "A Uniform Method for Measuring and Reporting Recreation Use on the Public Lands and Waters of the United States", unpublished guideline of the Recreation Advisory Council Study Committee Number Two, April 1965.

The footnotes at the end of this report describe conditions at parks which may require important adjustments for certain applications of these data.

This annual report is a general summary of visitation records for the year. Comments or requests for additional public use information should be addressed to:

Nonreportable visits include visits by employees of the NPS who are assigned to the park or are visiting the park in connection with their duty assignments, NPS contractors, concessionaires, cooperating associations, and the temporary or permanent members in the households of NPS employees resident in the park.

SUBURBAN AREA PARK. See Category.

URBAN AREA PARK. See Category.

VISIT. The entry of any person, except NPS personnel, onto lands or waters administered by the NPS. Visits may occur as recreation visits or nonrecreation visits. Same day reentries, negligible transits, and entries to detached portions of the same park on the same day are considered as a single visit. Such adjustments are made insofar as practicable for noncontiguous parts of the same park. However, visits are reported separately for two contiguous parks.

VISITOR DAY. Twelve visitor hours in a park.

VISITOR HOUR. The presence of one or more persons, excluding NPS personnel, in a park for continuous, intermittent, or simultaneous periods of time aggregating one hour (e.g., one person for one hour, two persons for one-half hour).
