

August 14, 2001:

Joint reconnaissance with PAIS staff (Arlene Wimer), BNP and Bei. Site visit, the proposed Lemon / Lemon Seed location. Visited all three sites and agreed with BNP ? BEI that the central location for both wells would be best. This location would need only one access road through the dunes and less total disturbance. Walked out a route for the access road from the middle site, approximately 1800 feet, through small back dunes. Photos taken.
