

Scoping Meeting for BNP
Lemon/Lemon Seed Units
November 7, 2001 - Arlene

Scott Taylor, BNP
Bo Waters, BNP
Charlie Belair, BEI
Jeff Nelson, BEI
Arlene Wimer, NPS
Ken McMullin, NPS
Jody Mays, NPS
Darrell Echols, NPS
Sue Hansen, NPS

Scott's opening statement was that BNP does not support Mr. Patterson's viewpoint.

Lemon will be 15,000 TVD
Lemon Seed 9,000 TVD

Plan Needs:

Final road cut data, road length 790 or 430 ft.
Suggest matting of at least geo textile under the caliche
Road won't be level with the beach

Adjustments need to be made for not having a rat hole on the rig

Fresh water needs to put on the road

TNRCC permit to drill water hole

Construction: need a location to store caliche, cycle time week +
Ask Jock about using the VC parking lot !

BNP field people need to be turtle trained before the start of the nesting season

9 yard truck, contractors ??need escorting ??

"gate guard" concept to help with accountability and communication
copy of log weekly

CREW – 10 hands/ 7 days on, 5 / 12 hour shift
Need to car pool down the beach
Need a pre-construction meeting with contractors

Access road through dunes
Remove plants from area before construction, pot and replant ASAP the road is down
Hay bales on the unvegetated slopes in a checkerboard style
Possible hay source is La Playa
La Playa is BNP's new well site just north of the park, the yellow gate on the surf side
Method to water plant with a water truck

Reduced size fig 12

Archaeology needs permit for trenching in the pipeline are

ESA compliance – Endangered Species Act
Need a copy of the Corps delineation

6 inch Duke line

Develop beach-driving protocols
Some type of ID pass for the vehicles
