Subject: Minor edits on final Lemon EA

Arlene:
One last time eh!

The EA looks pretty good to me.

Here are my final comments - they are minor editorial points. When you print the final to take to the printer, you will need to scan each page one last time to see if any new anomalies pop up:

1) Table of Contents, page ii, I get the Error! Bookmark not defined instead of a page number for 3.5 Wetlands - may just be a Word glitch since it doesn't appear on your screen

2) Table of Contents, page iii, Table 9 - I recommend that you go to table 9 and delete the (T - Threatened, E - Endangered, SOC - Species of Concern, and S/A - Similar in Appearance) and move it into the first row under the header in the table and merge the 3 columns so that it runs right across the top - this way it won't keep automatically going into the Table of Contents.

3) Page 6 - top 2 sentences should be merged into 1 paragraph.

4) Page 7 - shade the "Executive Orders" and "Policies, Guidelines and Procedures" like the header

5) Page 17 - page number is not printing - you may need to reduce the pitch in Table 3 to give the page some room so it can print the page number.

6) Page 28 - insert a space between the end of Table 4 and the text "Conditions of Approval."

7) Page 41 - last paragraph "Adjacent Land Uses" - if this is new or revised text for the EA shouldn't it be shown in "Franciscan FB" font? When you print the final you may want to run through the document to double-check this throughout the EA.

8) Page 42 - insert a space between Section 3.1 and "Methodology."

9) Page 47, Impacts of Alternative A - add ", No Action," on Geology and Soils

10) Page 48, Impacts of Alternative B, Proposed Action (Add a Comma here), on Geology and Soils

11) Page 55, again, page number is not printing

12) Page 61 - Move the title at the end of the page "Impacts of Alternative B, Proposed Action, on Vegetation" to the next page. Titles should not be hanging out alone at the end of the page. This may also be a glitch of how my computer is printing the document.

13) Page 63 - there is an extra line that should be deleted between the intensity threshold and "Affected Environment"

14) Page 64 - at the end of the page, the Conclusion paragraph goes right into "Impacts of Alternative B, Proposed Action, on Natural Soundscapes" - please enter a space

15) Page 70 - another hanging title at the end of the page on my copy - "Cumulative Impacts" move to the next page.

16) Page 73 - This page begins with 1 empty row from Table 9 - delete it.

17) Page 73 - 2nd paragraph. Replace the last 2 sentences that do not correctly describe the impacts with the summary of impacts from Table 8, page 39 - first copy in the description for No Action, and then insert that for the Proposed Action. Then move the 2 sentences dealing with the FWS concurrence on the BA as a new 3rd paragraph before the table.

18) Page 75 - in the table - there is an extra space between "Black" and "Tern."

19) Page 77 - there is no space between the end of the table and "Texas Horned Lizard"

20) Page 78 - Complete the title "Impacts of Alternative A, No Action - add ", on Texas Horned Lizard"

- do the same on page 79 for Alt B

- do the same on page 80 for Alt A ", on Texas Indigo Snake"

- do the same on page 81 for Alt B

21) Page 81 - under the Title for Sea Turtles - please capitalize all the first letters in the title, except for "and" and also add "Atlantic" to the Hawksbill

22) Page 90 - there are too many spaces between the Cumulative Impact and Conclusion paragraphs

23) Page 94 - change the title by removing the plural to "Interior Least Tern, Black Tern, and Piping Plover"

- same on page 97

- same on page 98 - also there is only the title for Alt B at the bottom of the page - move

NPS DOCUMENT #

609

to the next page

24) Page 101 - there is a run-on between the "Northern Aplomado Falcon" and "Impacts of Alt A..." paragraphs - please insert a space.

-same on page 103 between "Cumulative Impacts" and "Conclusion"

25) Page 116 - thanks for including me in the list of preparers - insert a space between "National" and "Parks" and take the "s" off of "Parks."

Arlene, it's been a hoot! You've been fun to work with.

Linda
