Subject RE: Notice of Ops for Lemon ST1008 #1

Bill and Victor,

I wanted notify you that the park has received word that the review of the documentation provided yesterday by BNP for the proposed workover of ST 1008 #1 well has been completed. It has been determined that the workover proposed by BNP falls within the approved plan of operations and adequately protects park resources. Therefore you may begin moving in the workover rig on July 10 and begin the work on ST 1008 #1 as described in the documentation provided by BNP. As stated in previous emails, all heavy equipment must be escorted by 2 NPS turtle-trained escorts and daily drilling logs are required to be submitted as for past drilling operations.

If you have any further questions regarding this project please contact me at the number below or via email.

Have a good 4th of July weekend!

Mark
