Thank you for contacting us. I look forward to meeting and working with you. We will add you to our mailing lists, including oil and gas EAs.

I travel to Albuquerque on occasion and will call next time to see if we can meet. Padre Island National Seashore has many issues and external threats including smuggling of drugs and aliens, dredging spoil disposal, hazardous materials and trash that washes onto our shores, low-level overflights, global warming, and proposed space ports that would impact us if approved. Fortunately, through strong public opposition to a bombing range proposal that would have impacted us, the Navy has chosen to drop it for now.

If you are ever in the area, or available to come down to sub tropical paradise for a turtle hatchling release this summer, please contact me for a tour of the island and issues.

Subject: Please add us to your NEPA mailing list

Mr. Superintendent:

My name is Randy Rasmussen and I'm with the National Parks Conservation Association's (NPCA's) southwest regional office. I'm serving as Acting Regional Director now that David Simon is no longer with us.

Can you please ensure that I am included on the park's regular mailing list for park planning and other NEPA-related actions, to include oil and gas EAs and the forthcoming Lemon/Lemon Seed Plan of Operation?

Thank you. I would like to meet with you soon and discuss how NPCA can help you in your on-going park protection efforts.

Randall Rasmussen
Acting Regional Director
