of clear sand for public beach, Lavaca Bay on Port Lavaca

1200'-1500'
2000' 2300'

6/4/02

BNP Plum Directional Drilling - Call
W/Regional Folks
Potential Subsurface issues/potential impacts

? Can we use COE NEPA/EA for this project? —

NEPA/Can we omit land facilities scenario? — 9000 ft.

Impacts surface - seagrasses
Water Quality

Need: 1) Well casing
" Plugging

> down hole issues = require ^{operator} ~~team~~ to provide.

2) Surface facility (ask to provide)

To Characterize := "notification" process are impacts that
impacts "can" occur - but no "quantifiers" (moderate,
major, etc...) are attached.

? PAIS will have indirect impacts from surface - T&E/water
Reasonable accommodation to "negotiate" (not require)
mitigation measures.

1500' offset conflicts

Assess impacts from June 11, 2002 CoE/Meeting

* Request sea-grass bed mapping for "Action" area
- sediment deposition = 1 mile distant from spoil
deposition area.
