

Al,

8/25/89

Enclosed are the soil & water samples that we spoke about over the phone today. For the soil samples, we need to know what kind of compound is in the sample. On the label of one I put "Hydrocarbon Retraction." That is not what you called it over the phone but it is the test ~~for~~ to identify the hydrocarbon in the soil. The other soil sample is marked "Oil & Grease." If this test is needed, please run it, but if you need the soil ^{to complete} ~~for~~ the first test, use it for that.

If you have any questions, please call myself or Jennifer Bjork. at 949-8173.

Thank You,
David Blinick
PAIS,
Environmental
services.
