Comments:

Came out a week ago last Friday
(on 1/26/90) to take water samples.
Used a backhoe and took samples
in several different areas. Sometimes
they had to dig 2-8 ft. to reach
the water table. Sent the
samples to Core Lab and have
not heard anything as of yet.
He will call me, depending on the
out come of the tests. He will
also send me all the information,
maps, & diagrams along with the
water test outcomes.
