

1/12/90 - 9:15 am

by David Bieniek

I called Amaco to check on status of the pit.

I called Billy Macon at 512-358-4731.

Billy is out on med. leave indefinitely.

I spoke with Dennis G. He said:

"The pit has been filled in.

We removed any residue that was left.

The pit was replaced with a cement tank."

I asked him if any ground water samples had been taken. He said not to his knowledge.

I also told him they were supposed to have contacted us before doing any of that type of work.

He said that their environmental man was out there last week and had "OKayed" what they had done. I asked for his name and number - Balde Navejar (713) 556-2753

I called Balde and left a message for him to call me or John Miller.

01/12/90 - 9:30

Linda Dansby was made aware of this.
