Park Person Bjork

Date 8-14-89

Person Contacted Billy Mason - AMOCO

Time 2pm

Subject AMOCO pit

Comments:

what's happening?

*they don't have water sample analysis back yet
told him our 1st sample collected — showed signif.
hydrocarbons (67mg/l oil & grease — didn't tell him #)*

he did admit that no longer needs pit

*thinks only 1 1/2 barrels produced H₂O over last 2 weeks
thinks fluctuates with tides (was told that no
other pond on the island does)*

was told needs to modify Poo

*" " meet w/ us to discuss what needs to do
(remove contam. material & fill in pit & utilize some
other means of containing produced water)*

*was told will need to pay for groundwater analysis to
ensure it's not contaminated*

*(we'll need sediment analysis, too, to see extent of area
need to clean up & remove)*
