South Sprint Gas
Pipeline Safety

Mr. M. E. Hancock *MHE*
Acting Superintendent
Padre Island National Seashore
9405 South Padre Island Drive
Corpus Christi, Texas 78418

Dear Mr. Hancock:

The buried pipeline exiting Amoco Production Company's South Sprint Gas Unit is considered to be a jurisdictional gas pipeline. As such, Amoco must meet Texas Railroad Commission regulations governing this type of line in addition to our own strict safety policies. Our Gas Pipeline Safety Program includes requirements on pipeline repairs, leak surveys, pipeline markers, valve maintenance, and pressure relief valves.

A specific emergency plan has been prepared to immediately respond to any type of incident related to the gas pipeline. A key to minimizing the hazard resulting from a gas pipeline emergency is the early notification of Amoco personnel, who can then take the necessary steps for control. In the event that a pipeline emergency is brought to your attention, please contact us immediately at one of the following numbers.

Our 24-hour answering service can be reached at:

Bee Answering Service 512/358-2006
