Mr. Stephen A. Lipari
Enron Oil and Gas Company
539 N. Carancahua, Suite 800
Corpus Christi, Texas 78401

Dear Mr. Lipari:

Upon review of the Arcadis Geraghty & Miller Preliminary Site Investigation, May 22, 1998, it would appear that the vacuum extraction method designed and utilized by Amoco has accomplished the intent of removing the free product from the perched shallow aquifer beneath the South Sprint facility.

We believe it is time to employ other means to remediate the remaining hydrocarbon contamination that exists at the South Sprint facility. If Enron Oil and Gas Company agrees, please submit new remediation protocols to this office for concurrence.

If you have any questions, please contact Mr. Paul Eubank, of my staff; he can be reached at (512) 949-8173, extension 224.

Sincerely,

David E. McGinnis
Acting Superintendent
