Inventory Summary

The Cultural Landscapes Inventory Overview:

CLI General Information:

Purpose and Goals of the CLI

The Cultural Landscapes Inventory (CLI), a comprehensive inventory of all cultural landscapes in the national park system, is one of the most ambitious initiatives of the National Park Service (NPS) Park Cultural Landscapes Program. The CLI is an evaluated inventory of all landscapes having historical significance that are listed on or eligible for listing on the National Register of Historic Places, or are otherwise managed as cultural resources through a public planning process and in which the NPS has or plans to acquire any legal interest. The CLI identifies and documents each landscape's location, size, physical development, condition, landscape characteristics, character-defining features, as well as other valuable information useful to park management. Cultural landscapes become approved CLIs when concurrence with the findings is obtained from the park superintendent and all required data fields are entered into a national database. In addition, for landscapes that are not currently listed on the National Register and/or do not have adequate documentation, concurrence is required from the State Historic Preservation Officer or the Keeper of the National Register.

The CLI, like the List of Classified Structures, assists the NPS in its efforts to fulfill the identification and management requirements associated with Section 110(a) of the National Historic Preservation Act, National Park Service Management Policies (2006), and Director's Order #28: Cultural Resource Management. Since launching the CLI nationwide, the NPS, in response to the Government Performance and Results Act (GPRA), is required to report information that respond to NPS strategic plan accomplishments. Two GPRA goals are associated with the CLI: bringing certified cultural landscapes into good condition (Goal 1a7) and increasing the number of CLI records that have complete, accurate, and reliable information (Goal 1b2B).

Scope of the CLI

The information contained within the CLI is gathered from existing secondary sources found in park libraries and archives and at NPS regional offices and centers, as well as through on-site reconnaissance of the existing landscape. The baseline information collected provides a comprehensive look at the historical development and significance of the landscape, placing it in context of the site's overall significance. Documentation and analysis of the existing landscape identifies character-defining characteristics and features, and allows for an evaluation of the landscape's overall integrity and an assessment of the landscape's overall condition. The CLI also provides an illustrative site plan that indicates major features within the inventory unit. Unlike cultural landscape reports, the CLI does not provide management recommendations or

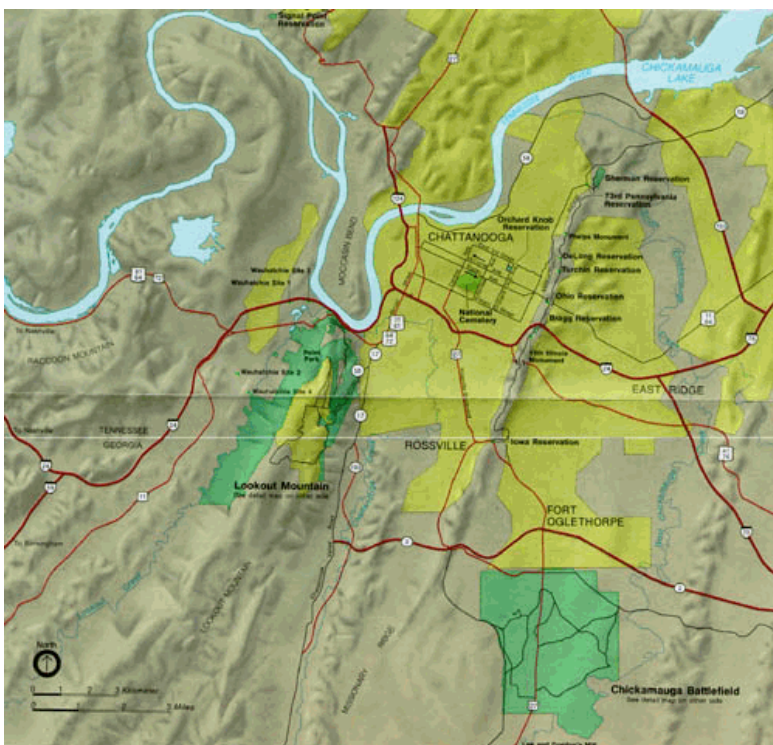

Chickamauga and Chattanooga National Military Park

treatment guidelines for the cultural landscape.

Inventory Unit Description:

The cultural landscape of Chickamauga and Chattanooga National Military Park includes many features which survive from the time of the battles and later commemorative construction on the battlefields. Topography, road alignment, land uses, vegetation patterns and even commemorative monumentation have both changed and been retained over the years. Refer to the individual forms for full descriptions of current conditions and specific features.

Park Organization Code:	5220
Park Administrative Unit:	Chickamauga and Chattanooga National Military Park

CLI Hierarchy Description

Chickamauga and Chattanooga National Military Park

The Cultural Landscape Inventory was conducted for Chickamauga and Chattanooga National Military Park (CHCH) in August 1995. Additional work was completed in 1997, and again -- along with certification -- in 2004. The purpose of the CLI - Level I is to gain a preliminary understanding of the scope of potentially significant cultural landscapes Servicewide. A classification system has been developed to identify cultural landscapes for inventory purposes. The CHCH National Military Park is classified as a historic Landscape, an aggregate of component landscapes which define a cultural landscape eligible for the National Register of Historic Places.

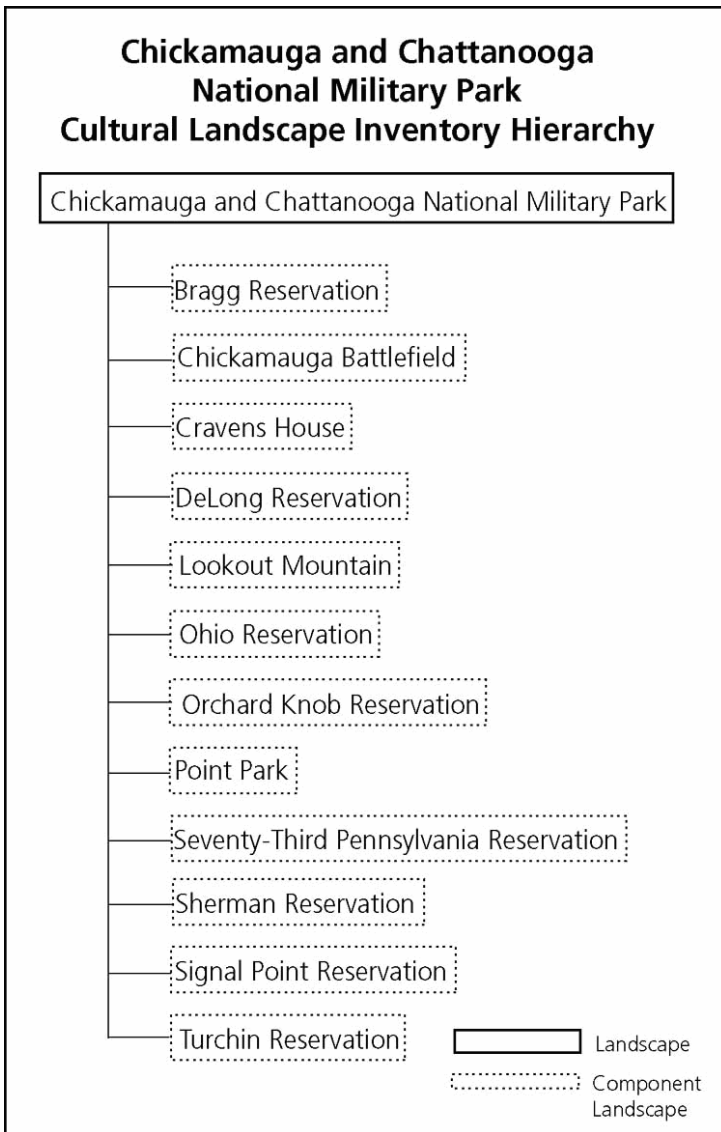

CHCH consists of seventeen discontinuous park units within and surrounding the city of Chattanooga, Tenn., including: Signal Point Reservation, Orchard Knob Reservation, Sherman Reservation, Seventy-third Pennsylvania Reservation, Phelps Monument, DeLong Reservation, Turchin Reservation, Ohio Reservation, Bragg Reservation, Nineteenth Illinois Monument, Iowa Reservation, Chickamauga Battlefield, Lookout Mountain, and the four Wauhatchies sites. Although all of these units contribute to the historic significance of the entire park, only ten are considered significant Component Landscapes, a landscape unit that contributes to the significance of a Landscape as described above. The four Wauhatchie sites and the three monuments were considered of no potential significance as historic component landscapes due to a lack of historic integrity either to the battle scene or the commemorative effort, as well as because they represent isolated structural features.

The ten significant component landscapes include Chickamauga Battlefield, Lookout Mountain, Signal Point Reservation, Orchard Knob Reservation, Bragg Reservation, Ohio Reservation, Turchin Reservation, DeLong Reservation, Seventy-third Pennsylvania Reservation and Sherman Reservation. The Lookout Mountain unit contains two concentrations of historic features (Cravens House and Point Park) that warrant individual classification. All of these component landscapes are documented on separate forms.

This form is an inventory of the Chickamauga and Chattanooga National Military Park historic landscape. The inventory methodology consisted of a site visit and review of existing documentation, including narrative, graphic, and photographic records on file at CHCH and the Southeast Support Office.

CHCH was established in 1890 “for the purpose of preserving and suitably marking for historical and professional military study the fields of some of the most remarkable maneuvers and most brilliant fighting” in the Civil War. This legislation was the first to authorize the preservation of an American battlefield and formed the basis of the establishment and development of a national system of military parks.

The historic landscape of CHCH gains its significance from its association to a continuum of historic events: the Civil War Battles of Chickamauga and Chattanooga, the establishment of the first national military park, and possibly, early NPS park development. Today, the landscape of the park does not reflect any one of these particular periods in the site’s history. Instead, the landscape is distinguished from its surroundings by a feeling of time and place that is the result of unique and successive layers of historical manipulations and associations. Overall, the landscape retains sufficient historic integrity to convey an understanding of the setting of the battle and its purposeful rehabilitation and design as a national military park.

Concurrence Status

Inventory Status: Complete

Completion Status Explanatory Narrative:

In February 1998, the inventory was submitted to the park for review and, in FY 2004, the data from that inventory was entered into CLAIMS and certified.

Concurrence Status:

Park Superintendent Concurrence:	Yes
Park Superintendent Date of Concurrence:	07/21/2010
National Register Concurrence:	Eligible -- Keeper
Date of Concurrence Determination:	10/26/1998

National Register Concurrence Narrative:

CHCH was administratively listed in the National Register in 1966. Additional information was accepted by the Keeper in 1998 in the form of a Historic Resource Study published by SERO for the park. The HRS provides information on the park's historic structures and provides sufficient documentation of the park's cultural landscapes

Memorandum

To: Superintendent, Chickamauga and Chattanooga NMP
From: Chief, Cultural Resource Division, Southeast Region *[Signature]*
Subject: Cultural Landscape Inventories
Reply Due: 11 September 2004

We are pleased to transmit the Cultural Landscape Inventories (CLIs) for Chickamauga and Chattanooga National Military Park. The CLI is an evaluated list of landscape properties in the National Park System eligible for listing on the National Register of Historic Places (NR) or contribute to an existing historic property. In order for the CLIs to be certified and counted under goals 1a7 and 1b2B in PMDS, the State Historic Preservation Office or Keeper of the NR needs to concur on the eligibility of the property for listing. The Park Superintendent also needs to concur on the condition assessment and management category provided within the inventory.

Through prior communication with the Keeper for the 1999 Historic Resource Study, there is consensus on the significance of cultural landscape features at the property. For Park Superintendent approval, a signature page has been sent for each of the thirteen cultural landscapes/component landscapes in the park. These assessment forms need to be signed and returned to the Regional Office for final certification and listing in PMDS goals 1a7 and 1b2B. The overall condition of the park landscapes has improved significantly since the last uncertified assessment in 1997. Most of the landscapes then assessed in fair condition have improved to good; two remain in fair, one in poor. If the condition assessment and management category are agreed upon, please sign the attached approval forms and return to our office to the attention of David Hasty.

CHICKAMAUGA AND CHATTANOOGA NATIONAL MILITARY PARK: HISTORIC RESOURCE

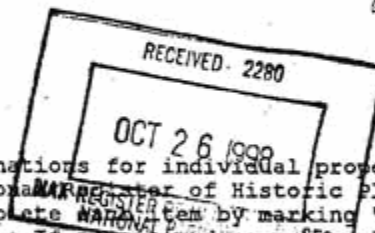

NPS Form 10-900
(Rev. 10-90)

OMB No. 1024-0018

United States Department of the Interior
National Park Service

NATIONAL REGISTER OF HISTORIC PLACES
REGISTRATION FORM

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in How to Complete the National Register of Historic Places Registration Form (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories: the instructions. Place additional entries and narrative items on continuation sheets (NPS 10-900a). Use a typewriter, word processor, or computer, to complete all items.

1. Name of Property

historic name Chickamauga and Chattanooga National Military Park
(additional documentation)

other names/site number

2. Location

street & number P.O. Box 2128, Highway 27

city or town Fort Oglethorpe (park headquarters)

Geographic Information & Location Map

Inventory Unit Boundary Description:

The boundary of Chickamauga and Chattanooga National Military Park is the historic boundary that Congress legislated. This boundary encompassed a large portion of the historic Chickamauga Battlefield while simultaneously incorporating smaller reservations along Missionary Ridge, Lookout Mountain, Orchard Knob -- within the city limits of Chattanooga, and Signal Point northwest of the city.

Regional Context:

Type of Context: Cultural

Description:

The development of Chattanooga as a major transportation hub before and after the Civil War influenced settlement in the city and contributed to its rapid growth after the Civil War. The impact of the growth has and continues to have a strong impact on the park resources.

Type of Context: Physiographic

Description:

CHCH NMP lies within the Appalachian Mountain Chain. Chickamauga Battlefield lies in a valley south of Chattanooga, while Missionary Ridge, Orchard Knob, Lookout Mountain, and Signal Point are all elevated points around the city of Chattanooga.

Type of Context: Political

Description:

The park lies within the 9th Congressional District of Georgia and the 3rd Congressional District of Tennessee.

Tract Numbers: Chickamauga Battlefield: 01-101 to 01-161;
Lookout Mountain: 09-104, 09-105 (Cravens: 07-103, Point Park: 09-102);
Signal Point Reservation: 06-101, 06-102, 06-103, 06-104, 06-105, 06-106;
Orchard Knob Reservation: 06-108, 06-109, 06-110, 06-111;
Bragg Reservation: 04-102;
Ohio Reservation: 04-103;

DeLong Reservation: 04-105;
Seventy-third Pennsylvania Reservation: 05-101;
Sherman Reservation: 05-102, 05-103, 05-104, 05-106, 05-107.

Management Information

General Management Information

Management Category: Should Be Preserved And Maintained

Management Category Date: 03/31/2004

Agreements, Legal Interest, and Access

Management Agreement:

Type of Agreement: Lease

Expiration Date: UK

Management Agreement Explanatory Narrative:

Hay leases are let each spring to mow historic fields at Chickamauga Battlefield.

NPS Legal Interest:

Type of Interest: Fee Simple

Public Access:

Type of Access: Unrestricted

Type of Access: With Permission

Adjacent Lands Information

Do Adjacent Lands Contribute? Yes

Adjacent Lands Description:

Adjacent lands contribute to the Chickamauga Battlefield cultural landscape due to their association with the Campaign for Chattanooga, and for the views of them from the property.

Statement of Significance:

Chickamauga and Chattanooga National Military Park is a nationally significant property under criterion A for the important events that occurred there. It was on this turf that major portions of the important battles for control of Chattanooga and north Georgia took place in 1863. The property also possesses

Chickamauga and Chattanooga National Military Park

national significance under criterion B for its association with the important military leaders on both sides (Grant, Sherman, Rosecrans, Thomas, Bragg, Longstreet) who directed the troops. These are the portions of the battlefields in and around Chattanooga that Congress chose to protect in a national military park. The surviving earthworks at Orchard Knob and Sherman Reservation, the Lookout Mountain rifle pits, and the roads at the Chickamauga battlefield contribute to the national significance of the district. The earthworks were erected by troops for protection in fighting. The Lafayette, Glenn-Kelly, Glenn-Viniard, Brotherton, Alexander Bridge, Viniard-Alexander, Reed's Bridge, Jay's Mill, Vittetoe, Mullis, Dalton Ford, Kelly, Sawmill Fork, Dyer, and Poe Roads all were used for significant troop movements prior to and during the Battle of Chickamauga. The Lafayette Road was the main route between Chattanooga and points to the south; the Battle of Chickamauga occurred largely because of the Confederates' attempt to get astride Lafayette Road and block the Union Army's access to Chattanooga. The roads, earthworks, and rifle pits are significant under National Register Criterion A for their close association with either the Battle of Chickamauga, the largest and bloodiest battle of the Western Theater, or the Battles for Chattanooga.

In addition to its national significance under National Register criterion A as the site of important Civil War battles, the Chickamauga and Chattanooga National Military Park district is also nationally significant under criterion A as the first National Military Park in the United States. The 1890 act establishing the park set several precedents for historic preservation in this country, including the national significance of battlefields, the preservation of the fields for military study, the right of the federal government to obtain land through condemnation proceedings, and the creation of lease back provisions for owners selling their land to the federal government for use in the park. In addition, the national scope of commemoration represented by the marking of both Union and Confederate troop positions preceded earlier battlefield commemoration efforts at sites such as Gettysburg. Most of the individual resources associated with the creation and development of the park, the monuments and markers; the roads, stone-lined drainage ditches, bridges, culverts, and headwalls; the Wilder Brigade monument; the administration building/visitor center at Chickamauga; the Ochs museum and walkway; the Point Park entrance gate, walls, and carriage drive; the Orchard Knob gates and walls; and stonework features at the various reservations contribute to the national significance of the district under criterion A. The park's monuments, the visitor center at Chickamauga, and the Ochs museum also contribute to the national significance of the park under criterion C for their design. The various units of the park are designed landscapes that reveal a great deal about landscape design practices of the 1890s through the 1930s and concepts concerning memorialization through sculpture and architecture.

The reconstructed Cravens, Brotherton, Kelly, and Snodgrass houses also contribute to the national significance of the district under criterion A because they are long-standing elements of the park's interpretive program and help to create a scene similar to what prevailed in fall 1863. The original Brotherton, Kelly, and Snodgrass houses all figured prominently in the Battle of Chickamauga, September 19-20, 1863. Fighting swirled around the Brotherton house on the afternoon of the 19th, and Longstreet's breakthrough the next day occurred near the house. The Kelly house was a landmark for Union forces moving to extend Gen. Rosecrans's left on September 18 and 19. The Union left dug in around the Kelly Farm at the north end of the Chickamauga battlefield and repulsed repeated

Confederate assaults. The Snodgrass house on Snodgrass Hill served as a rallying point for the forces of Union General George Thomas on the afternoon of the 20th. The Brotherton, Kelly, and Snodgrass houses also served as field hospitals during and after the Battle of Chickamauga. The Cravens house served successively as a headquarters for generals of the Confederate and Union armies and was a focal point of the fighting during the Battle of Lookout Mountain on November 24, 1863. While they lack fabric that can be definitely connected to the battle-era houses that bore the same names, the Snodgrass, Kelly, Brotherton, and Cravens houses have been part of the commemorative tradition at the park from its very earliest days and possess significance for that reason. Although the buildings are reconstructions, they were built prior to the 1890 to 1942 commemoration period of significance under which they are being listed and, therefore, do not need to meet the requirements of National Register criteria consideration E.

A few individual resources within the district – superintendent’s residence, ranger’s quarters buildings at Chickamauga and Point Park, comfort station at Point Park, and the Cravens spring house – are significant at the local level under criterion A. Contributing commemorative resources under this context, notably the monuments and markers, meet the requirements of Criteria Consideration F because they have attained significance in their own right. Chickamauga and Chattanooga National Military Park played a pivotal role in the emerging movement to preserve and mark American battlefields.

Year	Event	Annotation
AD 1200 - 1829	Settled	Native American use of the site particularly along the nearby Etowah River. The Cherokee are the primary people who settle this area.
AD 1700 - 1861	Settled	European-American settlement of the area
AD 1861 - 1865	Military Operation	Civil War - 19 and 20 September 1863 - Battle of Chickamauga
	Military Operation	Civil War -- 23 - 25 November 1863 -- Battles for Chattanooga
AD 1890	Purchased/Sold	Legislation is passed to acquire 7,600 acres for the establishment of Chickamauga and Chattanooga National Military Park.
AD 1933	Land Transfer	Chickamauga and Chattanooga NMP is transferred to the National Park Service.

Physical History:

(1829) Native American Use

Paleo-Indian, Archaic and Woodland period peoples probably used the oak-pine-hickory forests of northern Georgia and southern Tennessee for campsites and temporary settlements, with no known permanent settlements in the Chattanooga and Chickamauga areas.

During the Mississippian period, mound builders constructed a large permanent settlement on the Etowah River near present day Cartersville, Ga. (approximately 75 miles southeast of Chattanooga), as well as some smaller mound cities immediately northeast and southwest of the Chattanooga area. The Etowah site was a center of culture, power and artistic achievement during the period AD 1200 - 1350. According to Dr. Jeff Brown, an archeologist who did extensive field work at CHCH, there is evidence of upland sites occupied seasonally as hunting camps in the South Chickamauga Creek watershed and more or less permanent settlements as agriculture grew in importance. (Brewer 1987: 14) After the fall of the Etowah and a visit by Hernando De Soto throughout the area in 1540, the Creek Indians were in power shortly until superseded by the Cherokee.

Although the Cherokee nation was the dominant tribe throughout the mountainous areas of Georgia, Tennessee and North Carolina by the early 1700s, the Cherokee history of the park area begins in the winter of 1776-77. The outbreak of the Revolutionary War invasion of the Little Tennessee valley by the American Army forced pro-British Cherokee (Chickamauga Band) to move out of the high mountains and establish eleven permanent towns in the valleys along waterways. Four of those towns are known to have been located on Chickamauga Creek. Two of them, Little Owl Town and Bull Town, were located far enough south to have possibly been in the area of the park (Brewer 1987: 15).

The layout of the villages consisted of a town house or civic hall surrounded by a number of individual log houses with associated outbuildings similar to early European settlers. Agriculture, managed woodlands and livestock were components of the Cherokee lifestyle by the late 1700s. All eleven of the towns were burned in 1779 by an American army. Some of the towns were rebuilt such as Bull Town, which was burned again by John Sevier in 1782 in a raid down Chickamauga Creek (Brewer 1987:16). Because of these types of raids, many Cherokee moved back into the more mountainous areas.

By the 1790s, as whites began to move into the Piedmont area and there was an obvious impact on hunting and trading economies, the US Government sent agents to teach the Cherokee new farming techniques and trade skills. Soon thereafter the Cherokee began adopting the white man's lifestyle operating mills, businesses, farms and plantations.

The 1798 Treaty of Tellico allowed the Cherokee to establish homes back in the valleys in greater numbers. In the early nineteenth century the Cherokee adopted a Republican form of government with the nation divided into eight civil districts. (Brewer 1987:16) The Chickamauga District encompassed the area surrounding Chattanooga and present day Chickamauga. There were several Cherokee villages including Running Water and Nickajack as well as smaller

towns (Chickamauga, Red Clay, Lookout Mountain Town) in the area.

By the height of the Cherokee Nation dominance in the region, c. 1750, there were numerous pre-aboriginal and aboriginal routes that converged in the Chattanooga and north Georgia area. The Great War Path proceeded north from the mouth of South Chickamauga Creek into upper east Tennessee where branch trails extended as far as the Great Lakes (Myer 1971:16) The Chickamauga Path proceeded south through the South Chickamauga Creek watershed to the Coosa River Valley in northern Georgia. A portion of that trail, shown on a nineteenth century map (MacFarland 1832) as Crawfish Springs Road follows the route of U.S. Highway 27 (Brewer 1987:14). Two other heavily used trails were known as of the New Echota Road leading southeast, and the Alabama or Brainerd Road leading southwest towards Alabama.

Anti-Indian sentiment coupled with the founding of gold in the Cherokee Nation in 1829, prompted the Georgia legislature to pass an act appropriating most of the Cherokee Nation. By 1831 the state had hired a surveyor to mark survey lines, estimate the quality of the land and record all Cherokee improvements including cleared and cultivated land, homes, outbuildings and ferries. By 1835, the Treaty of New Echota was signed, in which the Cherokee people consented to relocate to the Oklahoma territories.

Documentation: Although few extant Native American resources exist in the area, further study of the road system in the region should be undertaken to determine their origins as potentially Native American routes adapted by Euro-Americans.

(1700 - 1861) Early European and American Settlement

The majority of information for the Antebellum, Civil War and Postbellum landscape discussions were extracted from documents and maps prepared by E.E. Betts. Betts served as CHCH Park Engineer from 1891-1911, and as the de facto supervisor of the Park from 1898-1911. Betts' long experience at the park coupled with his attention to detail make him a highly creditable source.

There is strong documentary evidence, but no known existing archeological remains, of a French presence in the area during the French and Indian Wars of the first half of the eighteenth century. Three sources (c 1758, 1823, 1887) located three French forts in the area including one "about twenty miles above the mouth of the Chickamauga Creek" (Brewer 1987: 14-15). Other than the French forts, no definitive research was found concerning the early Euro-American settlers. However, with the 1829 Georgia act appropriating Cherokee lands for settlers and the 1832 land lottery, the settling of north Georgia and the Chattanooga, Tenn., area by Euro-Americans began in earnest.

Lookout, Raccoon and Signal Mountains on the southwest, west and northwest pose a formidable wall around Chattanooga with the Tennessee River at their bases. Lookout Mountain, with a summit of 2,000 feet and steep slopes, has a 150 foot limestone palisade. Along with Lookout Mountain, both Raccoon and Signal Mountain—although slightly less in elevation but similar in steepness—offered substantial enclosure of the valley and relatively unobstructed views of Chattanooga and the Tennessee River downstream. Paralleling Signal

Mountain several ridges of 500' and less, undulate out in a southeast direction. The ridges, running northeast to southwest, create distinct valleys where water drainage, roads and farmsteads occurred. Missionary Ridge, at a height of 400' was the last major ridge before the land dropped into the gently rolling hills of north Georgia. Within Chattanooga several high points were apparent including Orchard Knob at the base of Missionary Ridge.

The city of Chattanooga was nestled in a crook of the Tennessee River, a river that could, at the time, only be navigated with difficulty. Its primary tributaries were Lookout, Chattanooga and Chickamauga Creeks all from the south. South of Missionary Ridge, Chickamauga Creek forked into West Chickamauga Creek and South Chickamauga Creek. These creeks irrigated and drained the valley through many first- and second-order streams that emptied into them. Though the banks of West Chickamauga Creek are steep, many fords crossed the stream. In addition, two bridges crossed the creek, (Reed's Bridge and Alexander's Bridge) which provided east to west access. Numerous springs were also apparent throughout the mountains, ridges and in the valleys. Small springs existed near the Widow Glenn and Viniard farms, which were dammed to create ponds for the watering of livestock.

Due to the mountains and ridges, access into the valleys was difficult relying on aboriginal paths through gap openings for access across the steep terrain. Later railroads were built along the valley floors adjacent to waterways and winding up some of the ridges and mountainsides. The Chattanooga area had always been a center of trade due to its location along the Tennessee River and the number of major roads and turnpikes that went through the town. By the 1840s a major inland trade route led south towards Atlanta and southeast to Augusta, Ga., taking advantage of the Savannah River and its access to the coastal markets. As new railroad lines were constructed through the city, the population grew as well as its importance as a transportation hub. The Western and Atlantic Railroad was completed from Atlanta to Chattanooga in May 1851, with several other rail lines leading in all directions. On the Chattanooga & Cleveland Railroad a tunnel burrowed through Missionary Ridge near its northern end.

A system of roads that connected Chattanooga to north Georgia crossed Missionary Ridge at several places along its spine. Although they were dirt roads, they were larger and more frequently traversed than those on Lookout Mountain. Heading south out of Chattanooga, Lafayette Road, with origins as a Native American trade route, was the main thoroughfare that ultimately connected east Tennessee through Lafayette to Rome, Ga. Flanked by Missionary Ridge on the West and Chickamauga Creek on the east, this main north-south route became a major prize in the fighting between Federals and Confederates in September 1863. (Hanson, Jill K. & Blythe, Robert W., Chickamauga and Chattanooga National Military Park Historic Resources Study, 5) Breaking off the Lafayette Road were numerous lesser roads; some of them wagon-roads, others mere footpaths, but all of them, including the Lafayette Road, were dirt. Many of the roads were named after the gap which they crossed, such as the McFarland Gap Road, while other roads were named for the farmsteads or structures they connected.

The two roads on Lookout Mountain were the Andrew Jackson Road and Whiteside Turnpike, also known as Summertown Road. The Andrew Jackson Road was a Federal road dating from

the period of 1805-07. The first wagon road up the mountain, Whiteside Turnpike, was under construction by 1852 and completed by 1856. The mountain was also criss-crossed by logging and animal trails.

The patterns of settlement and land use in the region responded to the undulating topography and the availability of water. The Tennessee River valley and associated smaller valleys were fertile for growing cotton, grain crops and raising livestock. Subsistence farming was the primary occupation of landholders, with thinly scattered homesteads concentrated along roads and water courses including West Chickamauga Creek and Lafayette Road. Several farmsteads, churches, a school and grist mills were in full operation along the length of the roadway including Cloud Church, Gordon and Lee's Grist Mill, Jay's Saw Mill, and a log schoolhouse across from the Viniard Farm. The farmsteads consisted of small log-constructed dwellings, typically covered in clapboard, with associated outbuildings.

On its lower slopes existed Lookout Mountain's only farm, belonging to local industrialist Robert Cravens. The farmstead consisted of a farmhouse, an orchard, a garden, outbuildings, and cultivated fields. The Cravens' house was located close to the Whiteside Turnpike, facilitating Robert Cravens daily trek to his ironworks in Chattanooga.

Orchard Knob was named for an orchard which crowned its heights. It is unknown what type of fruit was produced in the orchards. Missionary Ridge was sparsely settled by several farmsteads with associated garden plots with the slopes row-cropped, resulting in severe erosion .

Farming determined the composition and patterns of vegetation in the valley. Most of the area had been cleared and areas surrounding the farmhouses were under cultivation, in pasture, or fallow. Accounts of the battle indicate that corn was the area's most common row crop. Orchards, usually located near the farmhouse, were another common feature of the small farms in the valley. According to maps drawn by E.E. Betts in 1895, at the time of the battle most farms had orchards varying in size from a few trees to a quarter of an acre.

Many fields were enclosed by wooden fences to exclude foraging pigs and cattle. Beyond the farm's fences, a mixed hardwood forest where livestock were turned loose to forage, dominated the landscape. This had the effect of clearing parts of the understory, albeit unevenly, permitting vision through the woods up to four hundred yards. Another method of clearing the understory was burning, done in the wetter months, to clear the understory in preparation for planting. One of the unusual features of the valley ecosystem were cedar glades, characterized by an open understory.

The vegetation pattern of the heights overlooking Chattanooga was uneven. On the top of Lookout Mountain, mixed hardwoods constituted a dense forest, including the area now known as Point Park. The lower slopes of Lookout Mountain, began to be stripped of timber to supply the burgeoning industries in the city. The rolling countryside below the western slopes of the mountain, known as Lookout Valley, was a landscape of small farms separated by hardwood forest. Vegetation on Missionary Ridge consisted of scattered hardwoods with patches of

cultivated farmland.

Documentation: Because no Antebellum documentation was found to substantiate Betts work, further research of antebellum land use and settlement patterns would add to this body of work.

(1861 -1865) Civil War

By the time of the Civil War, Chattanooga had become a major railroad hub and important transport station for the Confederate armies. The railroad importance to the confederacy led to the Battle of Chickamauga and the Battles for Chattanooga during the fall of 1863 as the Union armies moved east after the fall of Vicksburg the previous spring.

Battle of Chickamauga: September 19 and 20, 1863

In the battle of Chickamauga, the Confederate Army of Tennessee soundly beat the Federal Army of the Cumberland and sent it in full retreat back to Chattanooga. (Hanson, Jill K. & Blythe, Robert W., Chickamauga and Chattanooga National Military Park Historic Resources Study, 9) The Battle of Chickamauga unfolded in an area of about 20 square miles, from Lee and Gordon's Mill north almost to Rossville along the Lafayette Road and within two miles of the road on either side. In 1863, the entire area was heavily wooded, consisting mostly of hickory and oak with interspersed stands of cedar and pine. In some places, a dense understory of shrubs and vines impeded movement and made for limited visibility. (Hanson, Jill K. & Blythe, Robert W., Chickamauga and Chattanooga National Military Park Historic Resources Study, 9) The landscape of the battle of Chickamauga, named for the creek that ran through the battlefield, was a valley south of Chattanooga lying between Missionary Ridge on the west and Peavine Ridge on the east. These ridges influenced the course of the contest by dividing the Union army and screening both the Confederate and Union armies from each other. Each Corps of the Union army crossed Missionary Ridge at a separate gap and the recombination of the army in the face of Confederate attacks is the story of the battle.

Between West Chickamauga Creek and Missionary Ridge, the ground undulated in a series of ridges and swales that provided cover for troops during the battle. The use of Snodgrass Hill as a final line of defense for Union troops on September 20, 1863, is an illustration of the advantage of high ground to the outnumbered Union army on the defensive. Another important characteristic of the battlefield was the Karst topography, characterized by sinkholes which were used as defense areas as well as dumps during and after the battle.

At the time of the battle, Lafayette Road, the state road, was a main thoroughfare leading south from Chattanooga with numerous wagon roads and footpaths crossing it. The Lafayette Road was the largest of these roads and was the Union army's link to Chattanooga and their tenuous supply line. At Chickamauga, the McFarland Gap Road served as the retreat route to Rossville for the fleeing Union army. Because no large roads other than the Lafayette Road ran through the battlefield, many units on both sides became lost and wandered away from their parent commands. Numerous accounts exist of couriers, even generals, becoming lost on the narrow, unmarked, trails, and riding into enemy lines. Confederate forces were prevented from using their numerical advantage by the lack of large roads through the woods, forcing them to commit their troops piecemeal to the battle. Union forces, by holding the Lafayette Road, had a clear

line of communication between Corps, which enabled the command to shift forces to threatened points along the line. In addition, two bridges crossed West Chickamauga Creek, (Reed's Bridge and Alexander's Bridge) which provided east to west access and figured significantly in the troop movements of the battle. Possession of these crossings in the initial phases of the battle dictated the course of the conflict and the ground over which it was fought. Because the Confederates were able to gain the west bank of the creek at the Alexander and Reed's Bridges, instead of near Lee & Gordon's Mill or Glass's Mill, the battle of Chickamauga occurred where it did.

Aside from the control of access across West Chickamauga Creek, water played a crucial role to the parched troops. During the battle the dammed ponds near the Widow Glenn and Viniard farms became an important source of water for Union forces. Many wounded men and animals found their way to the ponds to drink the water. As they bled into the water, the blood colored the water and one of the popular watering holes earned the name "Bloody Pond."

The pattern of cultivated fields, pastures, woodlands and farmsteads influenced the way the battle occurred. Areas surrounding the farmhouses were under cultivation, in pasture, or fallow, with corn the area's most common row crop. Because the battle occurred in September, most cornfields had recently been harvested, affording an unobstructed view across their expanse. Some of the worm rail fences at the farmsteads provided an impediment to movement across the field of battle and regiments that had to stop and disassemble fences under fire suffered heavy casualties. When piled together, the fence rails sufficed as makeshift breastworks. Most of the structures that survived the fighting were turned into makeshift hospitals during and after the battle. Glass' Mill sufficed as a large Union hospital during the fighting but was abandoned with the Union rout. Hall's and Thedford's farmhouses were used by Confederates as field hospitals during and after the battle. Other farmhouses were used as temporary headquarters by both sides during the conflict including the Brotherton cabin and Snodgrass farm.

The livestock-browsed understory vegetation had the effect of clearing parts of the understory, permitting vision through the woods up to four hundred yards. The woods were not foraged evenly, however, and many war-time accounts state that the underbrush slowed movement and hampered visibility. The cedar glades were characterized by an open understory, accounting for reports of troops forming in straight ranks and firing uninterrupted volleys.

Battles for Chattanooga: November 23, 24, and 25, 1863

The Battles for Chattanooga include descriptions for Lookout Mountain, the Wauhatchie field, and Missionary Ridge.

The topography of the Chattanooga landscape influenced the strategy and conduct of those battles. Confederate forces occupied the high-ground around the besieged Union forces in Chattanooga and entrenched the hills with a variety of earthworks including forts, trenches, and rifle pits. Lookout Mountain, Missionary Ridge, and Orchard Knob are the three notable high points that formed the Confederate siege ring. Lookout Mountain, with such severe topography, seemed a natural fortress. Missionary Ridge, represented another natural obstacle which the Union army was forced to overcome to break out of Chattanooga. Signal Mountain,

north of the city, offered an unobstructed view of Chattanooga and the Tennessee River downstream. Its topography made it an ideal site for a Union signal station. Finally, Orchard Knob, a small hill near the base of Missionary Ridge, was used as a forward observation post/artillery site in the Confederate lines.

The valley floor between Chattanooga and Missionary Ridge was occupied by Confederate forces during the siege of Chattanooga, as was the valley floor between Chattanooga and Lookout Mountain. When the much-reinforced Union army began to move toward Confederate lines after the battle of Lookout Mountain, the rebels retreated toward the high ground of Missionary Ridge, leaving Orchard Knob to their enemies. Thus, the plains between Chattanooga and its surrounding prominences were not the scene of the fighting, only the slopes of those elevations. Sight-lines between Missionary Ridge, Orchard Knob, and Lookout Mountain were very important to the conduct of the battle and the strategy of opposing general officers. The ability to see the length of the battle lines on Missionary Ridge from the crown of Orchard Knob was the reason U. S. Grant placed his headquarters there. The commanding view of Lookout Valley from Lookout Mountain's Sunset Rock and a similarly commanding view of Chattanooga from the point of Lookout Mountain (Point Park) is one reason that the mountain was of strategic importance to the Confederates.

A poor understanding of the topography of these heights ensured Confederate defeat. Because Confederate lines were sited along the true crest of Missionary Ridge instead of the military crest, the defenders were silhouetted against the sky and provided easy targets while being unable to depress their cannons low enough to hit the enemy. The placement of entrenchments along the slopes of Missionary Ridge again demonstrated a poor understanding of the topography of the ridge; rifle pits and trenches were so close together that Confederates retreating from one line to the next blocked their comrades field of fire. This permitted those Union troops that followed the Confederates closely to avoid being fired upon.

The vegetation pattern of the heights overlooking Chattanooga during the Civil War was uneven. On the top of Lookout Mountain, mixed hardwoods constituted a dense forest. In the area where Point Park is now, timber had to be cleared by rebel soldiers to provide a field of fire for Confederate cannon. Confederate entrenchments lined the south end of Lookout's summit, constructed near the Georgia state line. The lower slopes of Lookout Mountain, had been stripped of timber from the beginning of the war to fuel Chattanooga's industry. The lower slopes were a tangle of tall stumps, newly-emergent undergrowth, and fallen wood too small to be of industrial use. This broken countryside was the scene of the Union advance on the morning of November 24, 1863, which initiated the battle of Lookout Mountain. The Union division of General John Geary advanced along the mountain's slopes, across a sea of stumps and creepers, to engage the Confederate brigade of General E.C. Walthall. Walthall's Mississippians were situated behind an ell-shaped stone breastwork they had constructed on the mountain's north slope. This combination of obstacles explains how the fortified but outnumbered rebels could retard the Union advance for as long as they did. The rolling countryside below the western slopes of the mountain, known as Lookout Valley, was a landscape of small farms separated by hardwood forest. Lookout Valley was the scene of a Confederate night attack on October 28, 1863, against Union forces camped near Lookout

Creek. The area where this engagement took place is known today as the Wauhatchie sites.

Because of its location on the slopes and its proximity to Whiteside Turnpike, the Cravens farmhouse was used as a headquarters by both sides before, during, and after the battle. On the evening of November 24, 1863, Confederates dug earthworks southeast of Cravens' house, though they were evacuated before they could be put to use.

Entrenchments were dug on east and west slopes of Orchard Knob by Confederate and Union troops during their respective occupations. By November, 1863, many of the fields on the slopes of Missionary Ridge had a cleared field of fire and were traversed with trenches, rifle pits, and man-made obstacles.

Because no road ran the length of Missionary Ridge at the time of the battle, Confederate forces were obliged to travel down the slope behind them, move several hundred yards down the back of the ridge, and ascend at the next dirt road. Grant saw Bragg shifting his troops in such a manner from his headquarters on Orchard Knob. Grant ordered the Army of the Cumberland to assault the rifle pits at the base of the ridge to prevent the troops atop the crest from supporting other embattled Confederates. The subsequent assault was carried out and continued up Missionary Ridge, overwhelming Confederate defenders before reinforcements could navigate the circuitous route to the threatened positions.

Some of the bitterest fighting of the war raged at the Chattanooga & Cleveland Railroad tunnel, as a division of Confederates under General Cleburne held off Union General Sherman's Corps. At a decisive moment in the battle, Confederate reinforcements passed through the tunnel, counterattacking Sherman in the flank.

The water features of the Chattanooga landscape shaped the command strategy of each side. The Union forces, after their defeat at Chickamauga, took refuge in Chattanooga. The river became a barrier to the Union forces under siege in Chattanooga. The night crossing of the river at Brown's Ferry by Federal soldiers was crucial to lifting the siege of Chattanooga. Lookout Creek, which follows the base of Lookout Mountain's west side and emptied into the Tennessee River, became an impediment to the Union breakout effort. The night battle at Wauhatchie was a failure for Confederate forces in part because of the difficulty of crossing Lookout Creek. On Lookout Mountain an abundance of springs supplied the Confederate defenders with water, helping to reduce supply problems. Chattanooga Creek, in the valley between Lookout Mountain and Missionary Ridge held up the advance of Union General Hooker's XX Corps. Hooker's delayed advance was the reason General Grant ordered Thomas' Army of the Cumberland to attack the Confederate rifle pits at the base of Missionary Ridge. The army's resulting assault up the ridge, enjoined by the men in ranks, was a turning point in the war and secured Grant's promotion to overall command of the United States armies.

Documentation: There has been a study done to locate on a map places where primary sources describe the landscape during the battle (Larson, "The Historic Landscape," 1984).

Photographic evidence exists of the landscape immediately following the battle, but no attempt

has been made to reference it to historic base maps. Maps in the park's files that detail existing conditions (i.e. road networks, vegetation patterns, number and location of structures, ponds, etc.) at the time of the battle were reviewed. The general consensus is that the E.E. Betts historic base maps, prepared for the Park Commission in the 1890s are the authoritative maps of the conflict. There is extensive documentation of the strategies and course of the battles in the form of primary and secondary narrative accounts in the park files.

(1866 - 1890) The Postbellum Landscape

No comprehensive study exists that documents the changes in the landscape in the post-war years. A historic base map noting conditions in 1863, and an existing conditions map of Chickamauga for the years 1892 and 1896, was prepared at the request of the Park Commission by E.E. Betts in the early 1890s. A cursory comparison of these maps reveals changes in the Chickamauga and Chattanooga landscapes.

At Chickamauga, local farmers returned to their land, rebuilt and continued agricultural production. Fields at Chickamauga were sown with crops after the war and new fields were cleared from the surrounding woodland. Families migrated in and out of the valley, but the overall trend was an increase in population and agriculture. Between 1863 and 1890, at least 24 new farmsteads were established on the battlefield. Unlike Missionary Ridge, many antebellum structures at Chickamauga survived the battle including the Vittetoe, Brotherton, Viniard, Park, Hall, Hunt, Cooper and Thedford houses and the log schoolhouse. Although homes and outbuildings were burned during the battle, in many cases new buildings were built on the old foundations. In some cases, like Jay's Saw Mill, businesses closed after the war. The dead who were buried in graveyards on the farms were, if Union casualties, disinterred and removed to the new national cemetery in Chattanooga. Confederate dead, if not shipped home, were often removed to local churchyards or other burial grounds. The sinkholes, used for defense during the war, were now used as dumping grounds during the post war clean-up.

Roads at Chickamauga continued to link farmsteads to each other (Glenn-Kelly Road), to bridges and fords (Reed's Bridge Road), or to nearby towns (Lafayette Road). Farms that weren't rebuilt after the war, such as the Poe or Brock properties, lost the roads that linked them to the circulation network. Additional alteration of the circulation was caused by the straightening and widening of several existing roads.

After the war, Chattanooga's landscape changed, reflecting the ravages of war and rebuilding. Robert Cravens rebuilt his house in 1866 and moved his family back to Lookout Mountain. As Robert Cravens's children matured and married, new structures were built on his farm to house them. The Cravens farm retained its overall antebellum size, while new neighbors joined the family in settling the slopes of Lookout Mountain.

Up the mountain, the Point Hotel was established in 1885, on a rock outcropping below the present Point Park. Summertown (or Summertown), a community of summer homes established atop Lookout Mountain before the war, grew vigorously during the postbellum years. Four separate railways were built across the Lookout Mountain battlefield to provide access to the mountain's top. The first, installed in 1886, was an incline railway which ran to Point Hotel. In

1889, a broad gauge railway was built to access the mountain, emulated two years later by a narrow gauge railway that built a track to the top. Finally, in 1895, the present incline railway was built. Its speed, safety, and efficiency allowed it to continue where others had failed.

Point Hotel burned after several years of operation and its absence made the Park Commission's acquisition of Point Park affordable.

None of the antebellum farmstead buildings on Missionary Ridge survived the war.

Photographs of Missionary Ridge taken soon after the battle show signs of severe erosion on cultivated fields, probably due to Confederate trenching. The photographs also show trees, scarred by the battle, dotting the crest and slope in clumps as well as slopes cleared of native vegetation for the planting of crops and a few scattered trees, generally near houses.

Farmers returned to the trenched land, regrading it for agricultural production. Orchards were planted on the crest of the ridge, holding the soil in place and providing a marketable harvest. The Moon farm, on the site of the current Sherman Reservation, was one such operation. Houses were built on Missionary Ridge, along the antebellum roads, by farmers and people who worked in Chattanooga. It was not until the Park Commission built the Crest Road in 1895, that the settlement pattern on Missionary Ridge changed to follow the new road.

Documentation: There has been no study done to assess the extent of changes in the landscape during the postbellum years. While photographic evidence exists of the landscape during this time, no collation of the data has been attempted. Maps in the park's files detailing existing conditions in 1892 and 1896, were reviewed, however no narrative sources have been discovered for this time period.

(1890 - 1911) Early Park Commission

Twenty-five years after the Battles of Chickamauga and Chattanooga, a private movement began to preserve the battlefield of Chickamauga and to commemorate the valor of the troops that fought there by placing monuments to mark the lines of battle. This movement was led by retired officers of the Society of the Army of the Cumberland, who held their 1881 annual reunion in Chattanooga. This was the first such reunion of Union veterans south of the Ohio River. The veterans found that time had changed the conditions of the battlefield, and it was remarked "there wasn't a man who could tell a thing about it." In 1888, a committee was formed by the Society of the Army of the Cumberland to investigate purchasing the battlefield and placing monuments to mark the troop positions. Spearheading the effort to commemorate the battle was Henry Van Ness Boynton, who had served in the 35th Ohio and been wounded on Missionary Ridge. Boynton wanted veterans of both sides to participate in the project of monumentation and marking of the battlefield, a unique proposal since Gettysburg at the time had Union monuments and markers only. The work of Boynton and others resulted in the formation of the Chickamauga Memorial Association in 1889, a united effort of both Union and Confederate veterans to preserve the battlefield and memorialize the valor of the soldiers who fought there. Boynton envisioned a joint effort by the government, the nine regular military commands represented in the battle, and the states, who would be asked to erect monuments to mark the ground where their troops had distinguished themselves. The veterans expanded their vision beyond just Chickamauga battlefield to include Orchard Knob, Missionary Ridge, and

Lookout Mountain in an effort to make it unsurpassed as a place for military study. Legislation was passed in 1890 calling for acquisition of 7,600 acres, including “approach roads”, to establish Chickamauga and Chattanooga National Military Park. This legislation was the first to authorize acquisition and preservation of an American battlefield and laid the basis for the concept of a national military park.

The first National Commission, comprised of two civilian veterans and one military representative, was appointed by the Secretary of War. Henry V. Boynton, later a commissioner, was appointed assistant in historical work. Land acquisition, road construction, clearing of underbrush, and location of troop positions were the immediate responsibilities of the three commissioners appointed in 1890. By 1892, 4,200 acres had been acquired by condemnation proceedings. A year later the total acquisition was almost 6,000 acres, including Orchard Knob and several reservations on Missionary Ridge. Efforts by the commission to obtain the required property proved frustrating because the value of land had risen due to several factors: public opposition to federal land acquisition; a railroad was built along the west side of a proposed park tract; a number of fruit and vegetable farms were located on the lands slated for acquisition; coal and iron ore were discovered in the area; and a complicated and political history of land ownership on Lookout Mountain. An innovative program of buying property with conditional leaseback provisions was implemented by the Commission as a way to accelerate public acceptance of the concept of battlefield preservation, as well as a way to retain historic land use and preserve the “outlines of field and forest and farm houses.” Acquisition of property also took varying forms. A large continuous tract of land was acquired to encompass nearly the entire Chickamauga field of battle. In contrast was the pattern of land acquisition on Missionary Ridge and Lookout Mountain where only portions of the field of battle were acquired. On Missionary Ridge a number of small, discontinuous tracts were acquired to mark specific locations along the Confederate defensive lines that stretched along the ridge. The earliest land acquisitions on Lookout Mountain were limited to the Cravens House tract.

An immediate concern of the Commission was correctly locating troop positions so that monuments, markers, and tablets could be erected. Ongoing efforts were made using maps prepared by Stanford Kellogg, the Commission's military representative, and elaborated on by Boynton. Additionally, veterans groups from both sides came to the park to help with this effort and to outline the areas that were fields in 1863 with stone markers. In 1890, the United Confederate Veterans assisted in locating their positions on Missionary Ridge and Lookout Mountain, and the Society of the Army of Tennessee and the Army of the Potomac helped mark Sherman and Hooker's positions. In 1892, the Society of the Army of the Cumberland held their annual reunion in the park and remarked that a thick growth of oak, elm, willow, and pine had changed the appearance of the fields. The various state commissions also came to the park to help locate troop positions in preparation for building monuments to their soldiers. By 1893, E.E. Betts was designated Park Engineer, charged with topographic mapping and the erection of monuments. In 1900, an inspection of the site by a large number of veterans of all armies was held; printed sheets were issued to the participants for corrections.

Closely connected with land acquisition in early park development was the construction and maintenance of roads. The majority of the road work focused on reopening or improving roads

that were present at the time of the battle although new roads were also constructed. The enabling legislation for the park called for the acquisition and maintenance of a network of “approach roads.” These roads provided visitor access to and through the park along routes used by the combatants. One example was “great Military Road” encompassing the existing Crest and Lafayette roads stretching from the north extremity of Missionary Ridge through Rossville Gap and south to Lee and Gordon's Mills below the park. Improvements to the roads, both inside and outside the park boundaries, generally followed their historic alignment although some undulating portions of roads were straightened out. Further, most roads in the parks were improved including some regrading, resurfacing and the construction of stone-lined swales and culverts for drainage.

New roads were built to provide access to monuments and as service roads. Battleline Road within the Chickamauga tract, for example, did not exist at the time of the battle but its alignment did reference historic battle lines. The Chick-Vittatoe Road is a rare example of a road that was constructed without reference to the historic scene to function as a service road. By 1892, a total of 16 miles of 16-foot-wide gravel roads and 4 miles of 32-foot-wide macadam roads had been built. Substantial stone and wooden bridges were also constructed where needed along the approach roads. In the 1901 Annual Report, Boynton remarked that most of their field work concerned construction, improvement, and maintenance of roads, and that the “central driveway” of the park was nearly complete and would run 30 miles from Sherman's battlefield at the north end of Missionary Ridge, along Bragg's line of battle, through the center of Chickamauga field, and 13 miles beyond over Bragg's withdrawal from Chattanooga. In 1903, there was a “complete disorganization” of the work force due to construction of Fort Oglethorpe adjacent to the park. However, the annual report of 1903 indicates 6,965 acres held for the park and 110 miles of roadways. The completion of the military post in 1904 led to an increase in the use of park roads. The Annual Report of 1905 called for the construction of the last road which the Commission wanted to build that had a battle association, Mullis-McFarland Gap Road. Maintenance during this time period included constant graveling and cleaning out ditches, gutters, and catch-basins due to the heavy usage by the military presence.

As the first national military park, Chickamauga and Chattanooga promoted the practice of monumentation started at Gettysburg and subsequently followed in most other national military parks. The 1890 enabling legislation specifically addressed the commemorative effort, stating that the Federal Government would finance the erection of monuments honoring participant Regular Army Units. Similarly, through mutual agreement, interested states were allowed to erect suitable memorials honoring the 1863 service of their respective units at Chickamauga and Chattanooga. In 1893, the Commission issued regulations directing the placement of monuments, markers, and tablets. They specified the location for each monument or other permanent memorial must be approved through the Park Commission by the Secretary of War; the design and inscriptions for all monuments, markers, and tablets must be submitted to the Commission for approval; and all monuments, markers, and other permanent memorials must be bronze, granite, or other durable stone

From the time of the park's establishment until its dedication in 1895, a great deal of the

Commission's time was taken up going over the fields with groups of veterans to accurately determine the placement of monuments. By 1893, 17 state commissions had been formed and the first bronze interpretive tablets were placed along the road, and condemned artillery was to be delivered for use in marking the battlefield. Provisions were made for the erection of observation towers to be set up at the Bragg and DeLong Reservations on Missionary Ridge, on the Chickamauga battlefield near Hall's Ford, and a third at Snodgrass Hill. These were the first interpretive facilities to be located in the park and afforded unobstructed views of the terrain in all directions. As the park dedication approached in 1895, monument foundations were constructed and markers and tablets erected. The city of Chattanooga gave permission for monuments, markers, and tablets to be raised within the municipal limits. By the time the park was opened, five states had erected 90 markers and 212 iron historical tablets were in place. Additionally, distance markers and locality tablets were placed at crossroads and at prominent battlefield landmarks to further orient visitors. Eight state monuments were completed when the park was dedicated in 1895, and 100 of the 400 cannon received to mark the positions of batteries were in place.

The alterations to the landscape by the Commission resulted in a commemorative landscape superimposed on that of the battle era; a layering that was in response to the topography and historic associations of the site. Even though there was an initial attempt to preserve historic land use and land patterns through a leaseback program, the eventual loss of working farmsteads and their associated outbuildings, circulation network, fencing, and livestock resulted in a stylized landscape of commemoration. In the Chickamauga section of the park, where a large tract was acquired, efforts to restore the fields and forests to their 1863 appearance were made but alterations also occurred. These efforts were interrupted by the 1898 military occupation, and the subsequent use of the park annually for military maneuvers. At Missionary Ridge, Lookout Mountain, and Orchard Knob a different type of landscape evolved, as there was a need to concentrate memorialization there due to the smaller parcels of land acquired. Decorative walls, fences, and gates were built, and trails were put in to provide visitor access. The construction of Crest Road along Missionary Ridge created a linear park connecting the various reservations. Photographic concessions were located at Point Park as early as 1899, and the Kelly house was leased as a tea room in 1910.

Almost from the beginning, the Commission's efforts were geared towards development of the fields at Chickamauga into a conceptually integrated unit of lands and roads that conveyed the progress of the various battles commemorated by the park. They intended to restore the lands generally to their appearance at the time of the battles, and only structures that had figured importantly in the fighting and had since been destroyed were to be restored. In 1892, the Commission reported clearing the underbrush from 400 acres of forested land and restoring overgrown fields to their former appearance, with no work done for purely decorative purposes:

The park is not in any sense a pleasure ground, and no work of beautifying is in progress or contemplated. The central idea is the restoration of these battlefields to the conditions which existed at the time of the engagements.

By 1895, Commission Chairman Fullerton reported that the work of restoring the fields to their condition at the time of the battle was rapidly progressing. In 1898, Chickamauga battlefield functioned as a training ground for the Army as specified in the Congressional legislation of 1896. As a result of 75,000 troops stationed at the Spanish-American War training facility, the occupation caused sinks in several of the fields which had to be disinfected and filled in. Further several historic structures that had survived the civil war were destroyed during the military occupation. In 1899, the Commission reported they were unable to do annual park burnings as the troops had cleared off all the underbrush and that timber was heavily damaged by Army livestock. As late as 1905, the park was still trying to restore the areas occupied by the Army in 1898. Also in 1905 the park removed at least four historic structures that had survived the civil war but were considered in poor condition.

The 1900 Annual Report recommended planting nut-bearing native hardwoods along with sycamore, elm, and oaks in the areas they were trying to reforest, such as the Jay's Mill tract. Two nurseries were planted with seedlings from the National Botanic Garden in Washington; the ornamentals sent were planted at the various houses in the park to ensure they would receive proper attention. By 1905, over 12,000 trees were ready to be planted out into fields that had been cleared since 1863 and were also used to replace dead fruit trees at the Sherman Reservation; Lafayette and Ringgold approach roads were also planted. Between 1899-1906, the park was regularly engaged in the following activities: marking of historic field boundaries; mowing of fields and around monuments, gun carriages, along road sides and battle lines; filling ditches with brush to prevent erosion; sowing grass seed donated by the Department of Agriculture throughout the park, including Orchard Knob and the reservations; spreading manure to promote vegetation and prevent washing; mowing and burning of the woodlands to thin the understory; fencing in the park to exclude free-range livestock; and removal of structures that post-dated the battle. The 1905 Annual Report stated that the land in some parts of the park was so enriched that the vegetation required frequent cutting to keep it "presentable and accessible," and in 1906, it was reported that only 100 acres remained to be restored.

In 1911, the Commission abolished the office of Park Engineer and appointed a Superintendent to administer the affairs of the park. In his last Annual Report of 1911, Betts noted that the yearly expenditure was inadequate to carry out needed maintenance and that it was of necessity left for future years.

Documentation: This time period has not been the focus of detailed study. There is no documentation of an overall park plan during this period, nor have any studies been done to verify that the historic base maps produced by Betts were accurate. There is also no documentation with which to interpret these maps, and they were not keyed. There has been no extensive study to show if any of the present-day roads retain their 1863 alignment or their early Park Commission alignment, or what parts of the drainage system were altered and when. There has been a cursory study of roads and culverts for the Chickamauga Battlefield. There has been no study to identify all aspects of the commemorative effort and exactly what alterations were made. Documentation reviewed included Annual Reports from 1892 and 1899-1906 that are on file at the park. The 1901 Annual Report includes a list of the trees and shrubs received from the National Botanic Garden. There is a gap in the Annual Reports

reviewed from 1906-1911. The 1983 Administrative History does not document the full range of Commission alterations to the battlefield. On file at the park are numerous photographs, maps, and plans that date to this period.

(1912 - 1922) Late Park Commission

In 1912, Congress passed legislation providing for the gradual transfer of the Commissions' duties to the Secretary of War as attrition of their membership occurred. By 1916, total park acreage stood at 6,541. Between 1913 and 1918, 330 acres of land were acquired along Lafayette Road to complete a fifty-foot right-of-way for its length. The park had 102 miles of improved roads by this time, and was engaged in graveling, cleaning out ditches and culverts, and repairing bridges. Major alterations to the park roads occurred during the WWI occupation from 1917-1918, and due to heavy use the military resurfaced 15 of the 102 miles of roads with concrete and macadam. In 1921, the park began reconstructing these occupation roads (many around Snodgrass Hill) and began oiling the Crest Road in an attempt to cut down on dust.

A 1912 memo speaks of a general policy to reforest the park replacing dead or dying trees that stood on the field when the battle was fought with young trees. In the 1915 Annual Report it was noted that the small reservations were taking on the "nature of city parks." By 1916, progress had been made in clearing the woodlands of underbrush and opening up the lines of battle to make it possible to readily locate monuments, markers, and tablets. These efforts were curtailed during the World War I military occupation, and in 1918 training in trench warfare began. Fearing destruction of the timbered park land, it was requested of the War Department that such entrenchments be confined to the open fields where restoration could be made. Extensive trench works carved up the terrain on the north and south slopes of Snodgrass Hill, and a 1918 Army inspector reported that this area had been so disturbed that "it is doubtful whether it will be possible to restore" it. Other threats to the park's historic integrity included cutting trails wherever needed and altering the grade of the battlefield terrain to conform to construction needs. By 1919 the park was back to mowing fields, picking up windfalls, clearing underbrush, and cleaning up the reservations. Work to undo the occupation damage, which included open trenches, felled trees, and buildings constructed against monuments, began in 1920, with no real progress reported in the field work. By 1922, it was reported that temporary roads, trails, trenches, ditches, and other scars were being obliterated, with a marked improvement in appearance.

Monumentation during this period occurred in 1913 with the dedication of the Florida and Alabama monuments, and in 1915 and 1917, monuments were dedicated at the Bragg Reservation and Cravens House. During the military occupation, monuments were enclosed with fences to protect them from damage. In 1922, two more houses that had survived all of the military occupations were torn down and the last Commissioner died allowing the War Department to become the sole administrator of the park.

Documentation: Previous research has not included a comprehensive examination of alterations to the landscape during its use by the military, nor whether efforts at restoration introduced elements that caused a change in the historic character of the site. There is a gap in the Annual Reports reviewed from 1912-1915, and the Administrative History does not address the

full range of what manipulations occurred. There are no Betts maps and plans after 1911, but in 1921 the Commission was directed to prepare a report on the cost of improving Crest Road, and detailed maps of the road and all the properties along it were prepared. Plan maps are available at the park which document the location, configuration, and function of the military structures constructed in the park.

(1923 - 1933) War Department

Excluding the Fort Oglethorpe Reservation, Chickamauga and Chattanooga National Military Park included 5,733 acres in 1926. In 1932, residents of Signal Mountain, Tennessee, donated two acres for the purpose of establishing the Signal Mountain Reservation, and this addition was the final War Department acquisition.

In 1925, legislation was passed to allow the approach roads to be deeded back to the states, as maintenance had become increasingly burdensome. In 1928 and 1929, money was appropriated for paving the roads to induce the states to accept their return and the process of turning the approach roads back over to the states began. In 1931 plans were prepared for concreting all primary roads (Lafayette, Mullis-McFarland Gap, Ringgold, Glenn-Kelly, and Chick-Vittatoe). Secondary routes, such as Mullis and Snodgrass-Savannah roads, were to be oiled, while those less traveled would be retained with gravel surface. In 1932 the Lafayette Extension Road was turned over to Georgia and the Missionary Ridge roads to Tennessee, leaving the park with 72 miles of roads.

Between 1923-1925, the three Chickamauga observation towers were dismantled. In 1927 an area near the park entrance was prepared for tablets honoring veterans of the Spanish-American War. During this period, War Department regulations called for guide services in all national military parks to assist visitors in visualizing troop positions and movements, and park personnel were instructed to place all facilities at the disposal of the visitor.

Documentation: The period of the War Department administration has not been the focus of previous studies in the park. Little information is available on alterations to the landscape.

(1933 - 1941) National Park Service

In 1933, administrative control of the park was transferred to the National Park Service (NPS) by Executive Order. Part of a larger government reorganization under the New Deal administration of Franklin D. Roosevelt, the move was consistent with an increase in the number of historical parks developed under the NPS in the early 1930s.

When the NPS assumed administration of the park total acreage was 5,533. In 1935, the park received 2,700 acres on Lookout Mountain from the estate of Adolph Ochs. In the early 1930s, this tract had been improved with the construction of roads and hiking paths by workmen from the Civilian Conservation Corps (CCC) camps on Lookout Mountain. In 1938, the Viniard House, one that had survived the civil war and later military occupation albeit remodeled extensively, was torn down.

In 1933, there were 72 miles of roads in the park. In 1934 Ringgold Road was regraded and resurfaced in preparation for transfer to Catoosa County, Georgia. During this time, improvements were completed on Alexander Bridge, several miles of roads were graveled and oiled, some roads and trails were obliterated, while paving of parts of Reeds Bridge and Lafayette roads was accomplished. In 1938, McLemore Cove Road was transferred to Walker County, Georgia.

Much of the road construction in the park during this time was in conjunction with other work projects completed by the CCC. Superintendent Randolph estimated that the men would help in “grubbing out underbrush, trimming and thinning out the trees, taking down dead timber and other miscellaneous work in beautifying the grounds, caring for the roads, trails and etc.” Planting was also a major part of the work done by the CCC. According to reports made to the NPS between January-March, 1935:

Landscaping and work incidental thereto has been one of our principal projects. This work consists of bank sloping, soil preparation, fertilization, seeding and sowing grass and planting native trees, shrubs and vines along the . . . Ochs Highway. January Jasmine has been planted in the area along the Lookout Mountain Incline where extensive erosion control work was done in the third period. Planting slopes with laurel, holly, dogwood and other native trees, shrubs and vines . . . will continue through this period.

The major part of our efforts during this fourth period have been concentrated on background planting around what is known as the Ranger's Short Tour of Chickamauga Park. It was planted . . . to put in a total of 65,000 trees and shrubs in these areas. We are very glad to report that we have made our estimate and in addition have planted approximately 23,000 more filler type plants than we had anticipated. These filler plants are of very low growth from six to twelve inches in height, and after consultation with the members of the Branch of Plans and Designs it was decided that these few plants were needed to bring about the effect for which they were working.

Crews on Lookout Mountain also laid concrete sidewalks and built benches, picnic tables, and a foot trail between Point Park and the Cravens House, erected a cable guard along the highway, and undertook development of several scenic and historical trails. A retaining wall, gutters and sidewalks were built at Point Park, and flagstone walks were laid at DeLong and Bragg Reservations.

Major new construction efforts centered around the Administration Building and a maintenance complex built (1936) and the Ochs Observatory-Museum (1940). Work by the CCC continued on Lookout Mountain to build the comfort station and caretakers lodge. In 1937, Emergency Conservation planted 92 boxwood around the Administration buildings and 30 trees at the north entrance of Chickamauga Battlefield and around the Administration building. Supplementary plantings with native species from adjacent areas—maple, dogwood, short leaf pine—was done in Chickamauga Park and Lookout Mountain.

The observation towers along Missionary Ridge were dismantled in 1941. In 1939 a six-year master plan was adopted that envisioned the restoration of the battlefields to correct those areas not representative of the historic scene of 1863. Additionally, trails obliterated over the years were to be reopened as bridle paths and roads without historical significance were to be closed. As none of the existing historic structures in the park were present in 1863, NPS officials proposed removing them and marking the sites of all original structures with bronze tablets.

Documentation: There has been no previous study to assess the impact of the CCC construction and planting efforts on the historic landscape although it is known that they planted some areas without historical reference. It is also not known exactly how their work affected historic road alignment or the extent of alterations made to either battle-era roads or War Department roads. There are numerous NPS maps dating from this time period. No Annual Reports were reviewed.

(1942 - present) National Park Service

During the 1940s, attempts were made to enlarge the acreage of the Signal Mountain tract to permit development of trails and parking facilities. Legislation passed Congress in 1942 authorizing acceptance of five acres of land from the Town of Signal Mountain, but acquisition was delayed by litigation until 1948. Construction of the parking area and a comfort station was completed in 1956 and interpretive exhibits installed in 1964. The unit was officially dedicated in 1966.

In 1942, the Third Cavalry replaced the Sixth at Ft. Oglethorpe and continued using the park for drill and maneuver exercises but was transferred out later that year. In 1943 a Women's Army Auxiliary Corps (WAAC) Training Center opened on park lands and was the focus of most military activity until it closed in 1945. In 1947 Ft. Oglethorpe was closed, and military activity, as it had been known, ended in the park.

After Fort Oglethorpe closed in 1947, the War Assets Administration (WAA) donated about 100 acres along Reed's Bridge Road, although the park argued that the entire tract had originally belonged to them before the fort was established and had historical associations to Chickamauga battlefield. Despite NPS objections, the WAA decided it would be financially desirable to sell the remaining acreage.

In 1946, personnel from Washington inspected the park and made recommendations for an expanded interpretive program that included installing trailside exhibits at Snodgrass Hill, Chickamauga Creek, and other selective points. In 1958, several historic structures were taken down (Vittetoe, Snodgrass, Brotherton, Kelly and Dyer houses, Kelly barn, and blacksmith shop) and the Cravens House was partially restored and opened on a limited basis through a cooperative agreement with the Association for the Preservation of Tennessee Antiquities. In 1962, a park interpretive prospectus was completed calling for a revision of the self-guided tour. In the 1970s living history demonstrations were initiated, and in 1974 split rail fencing was erected around three historic houses to create a period atmosphere.

The policy of transferring ownership of approach roads back to the states continued throughout the 1940s. Additionally, longtime efforts to route through traffic, especially trucks, around the park continued during the 1950s and 1960s, as well as fighting proposals to build a four-laned highway across park land. Under a master plan prepared in 1964, the highway was to be relocated on the west boundary of the Chickamauga Battlefield portion of the park. In anticipation of this plan, 17 monuments were moved onto adjacent ground, where a walkway was planned to connect a recently completed parking area and Wilder's Tower. From that point forward, the road project has met successive delays and is presently still under construction. The Iowa monument was also moved about 30 feet from its original site in 1962 to allow Highway 27 to be widened. In the 1980s Alexander Bridge Road was improved by the Federal Highway Administration and was probably regraded to provide wider shoulders. As part of the improvements to Brotherton Road in 1982, many of the stoned-lined ditches built by the War Department were removed. Recent improvements to Snodgrass Hill loop road, Glenn-Kelly and Glenn-Viniard Road, Brotherton Road and Dyer Road has resurfaced the roads. During these resurfacing projects although the stone-lined ditches were not removed, they were filled in creating drainage problems. The 1994 Road Plan proposed 26 new pulloffs throughout the Chickamauga park unit. The proposed resurfacing of Alexander-Viniard Road in 1997 will accompany a proposed one way loop for both Alexander-Viniard and Brotherton Roads.

In 1942, hay was allowed to be cut and sold for the first time, as an alternative to mowing all the open spaces of Chickamauga battlefield. This practice has continued and over 400 acres are presently leased for hay production. According to the 1994 Resource Management Plan, the smaller park units such as Orchard Knob, Signal Point, Missionary Ridge, Point Park, and the Cravens House are not being considered for historic landscape management strategies due to their size and urban surroundings. Vegetation in parts of these areas has been released and does not conform to any historic pattern. Cedar glades located in Chickamauga Battlefield are disappearing due to lack of natural or managed disturbance. Included in the glades are endemic species which are listed as protected by both state and federal agencies. Alterations to the preexisting circulation network (vehicular and pedestrian) is ongoing. These alterations are occurring primarily on the Chickamauga Battlefield and involve road resurfacing and the addition of paved parking pulloffs. In 1977 the last monument was erected with 600 total monuments, tablets, etc.

Documentation: There has been no detailed examination of the full range of alterations to the landscape during this period. In 1984 a Historic Landscape Study was completed that compared the existing and 1863 vegetation patterns using graphic documentation. In 1993 a Vegetation Study was completed which identifies the present species composition in the park.

Analysis & Evaluation of Integrity

Analysis and Evaluation of Integrity Narrative Summary:

Chickamauga and Chattanooga National Military Park is a significant historic property listed on the National Register of Historic Places. The park retains integrity in terms of its location along the Missionary Ridge, Lookout Mountain, the Chickamauga Battlefield, and Signal Point northwest of the city of Chattanooga. It also retains integrity in terms of the design, materials, and workmanship of the commemorative-era infrastructure, monuments, and markers. Views are largely open, with some vistas obstructed and other views partially blocked from new vegetation, including some invasive exotic species. The overall feeling and setting of the park, however, is still intact. What follows is an synopsis of the park resources, but for detailed analysis and evaluation, refer to this section in each of the twelve CHCH component landscapes.

Landscape Characteristic:

Buildings And Structures

Few features remain from the battle era. One such building is the Cravens Dairy. Other buildings and structures at the park largely date to the commemorative era, and contribute to the park within that context.

Character-defining Features:

Feature: Brotherton, George, House

Feature Identification Number: 101307

Type of Feature Contribution: Contributing

IDLCS Number: 00181

LCS Structure Name: Brotherton, George, House

LCS Structure Number: HS-25

Feature: Cravens Kitchen, Spring House/Diary

Feature Identification Number: 101308

Type of Feature Contribution: Contributing

IDLCS Number: 91219

LCS Structure Name: Cravens Kitchen, Spring House/Diary

LCS Structure Number: HS-6A

Circulation

Several roads remain in place from the time of battle, particularly at Chickamauga Battlefield. While they are largely repaved, most still retain their integrity in terms of location, feeling, association and setting. Other roads and other related infrastructure were built during the commemorative era and contribute to that context.

Small Scale Features

Hundreds of monuments and markers were installed at the park and they contribute to the commemorative context of the park.

Character-defining Features:

Feature: 100th Illinois Infantry Regiment Marker
Feature Identification Number: 101738
Type of Feature Contribution: Contributing
IDLCS Number: 08958
LCS Structure Name: 100th Illinois Infantry Regiment Marker

Type of Feature Contribution: Contributing
IDLCS Number: 03179
LCS Structure Name: Twenty-Third Battalion Tenn. Infantry Marker
LCS Structure Number: MT-1394

Feature: Twenty-Third Tennessee Infantry Regiment Marker

Feature Identification Number: 99123
Type of Feature Contribution: Contributing
IDLCS Number: 03202
LCS Structure Name: Twenty-Third Tennessee Infantry Regiment Marker
LCS Structure Number: MT-1395

Feature: Two Companies 96th Illinois Inf. Regt. Marker

Feature Identification Number: 99124

Type of Feature Contribution: Contributing

IDLCS Number: 08936

LCS Structure Name: Two Companies 96th Illinois Inf. Regt. Marker

LCS Structure Number: MT-714

Feature: Wiedrich's Battery Monument

Feature Identification Number: 99125

Type of Feature Contribution: Contributing

IDLCS Number: 03293

LCS Structure Name: Wiedrich's Battery Monument

LCS Structure Number: MT245-46

Feature: Wilder Brigade Monument

Feature Identification Number: 99126

Type of Feature Contribution: Contributing

IDLCS Number: 03285

LCS Structure Name: Wilder Brigade Monument

LCS Structure Number: MT454-61

Feature: William H. Lytle Shell Monument

Feature Identification Number: 99127

Type of Feature Contribution: Contributing

IDLCS Number: 03272

LCS Structure Name: William H. Lytle Shell Monument

LCS Structure Number: MT-452

Feature: Wisconsin State Monument

Feature Identification Number: 99128

Type of Feature Contribution: Contributing

IDLCS Number: 08684

LCS Structure Name: Wisconsin State Monument

LCS Structure Number: MT336-38

Feature: York's 9th Georgia Art. Battal. Battery E Marker

Feature Identification Number: 99129

Type of Feature Contribution: Contributing

IDLCS Number: 08843

LCS Structure Name: York's 9th Georgia Art. Battal. Battery E Marker

LCS Structure Number: MT-1275

Feature: York's 9th Georgia Art. Battal.-Battery E Marker

Feature Identification Number: 99130

Type of Feature Contribution: Contributing

IDLCS Number: 08852

LCS Structure Name: York's 9th Georgia Art. Battal.-Battery E Marker

LCS Structure Number: MT-1274

Views And Vistas

Views to and from Lookout Mountain, Orchard Knob, Signal Point and Missionary Ridge played an important role in the battle for Chattanooga. Many of these same views were recognized during the commemorative era and incorporated into that era's design for the park. These views and vistas largely remain intact and contribute to the integrity of the park.

Condition

Condition Assessment and Impacts

Condition Assessment: Fair
Assessment Date: 09/30/2000
Condition Assessment: Fair
Assessment Date: 07/22/2004

Condition Assessment Explanatory Narrative:

Most of the CHCH component landscapes are currently in good condition. Views, vegetative patterns, and overall cultural feature conditions have largely improved since the first uncertified condition assessment in 1997. The component landscapes not in good condition are DeLong Reservation (fair), and Sherman Reservation (poor). See their separate inventories for more details.

Condition Assessment: Fair
Assessment Date: 07/21/2010

Condition Assessment Explanatory Narrative:

Reassessed & approved by Supt. Shawn Bengé.

Impacts

Type of Impact:	Release To Succession
External or Internal:	Both Internal and External
Impact Description:	Some historic views are blocked by vegetation. This impact has been reduced at many of the reservations in recent years. See component landscape inventories.
Type of Impact:	Vandalism/Theft/Arson
External or Internal:	Internal
Impact Description:	Iron markers and metal tablets have been stolen from the park at places including Sherman and DeLong Reservations.
Type of Impact:	Deferred Maintenance
External or Internal:	Internal
Impact Description:	Downed trees block access into and around Sherman Reservation.

Type of Impact:	Visitation
External or Internal:	Internal
Impact Description:	The former access road to Sherman Reservation is closed by a gate. Visitors must now enter from near Crest Road, decreasing accessibility and security.
Type of Impact:	Vegetation/Invasive Plants
External or Internal:	Internal
Impact Description:	Privet, ailanthus and other invasive exotic species threaten to overtake forest edges and sometimes obstruct views.
Type of Impact:	Exposure To Elements
External or Internal:	Internal
Impact Description:	Mortar along the retaining walls at the Seventy-Third Pennsylvania Reservation show signs of deterioration, and a large red oak causes the wall to bow out slightly.
Type of Impact:	Adjacent Lands
External or Internal:	External
Impact Description:	Commercial and residential development on the periphery of the various reservations threatens the integrity of the park.

Stabilization Costs

Landscape Stabilization Cost: 250,000.00

Level of Estimate: C - Similar Facilities

Cost Estimator: Regional Office

Landscape Stabilization Cost Explanatory Description:

\$2,500 - Cravens Springhouse LCS

\$250,000 - Lookout Mountain landscape

\$500 - Ohio Reservation retaining wall and steps LCS

Treatment

Treatment

Approved Treatment: Preservation
Approved Treatment Document: General Management Plan
Document Date: 04/13/1998

Approved Treatment Costs

Cost Date: 04/13/1998
Level of Estimate: C - Similar Facilities
Cost Estimator: Regional Office

Landscape Approved Treatment Cost Explanatory Description:

\$33,150 - Chickamauga LCS entries
\$10,000 - Orchard Knob Gates and Walls LCS
\$500 - Sherman Reservation 40th Illinois Infantry Monument LCS
\$8,000 - DeLong Reservation 2nd Minnesota Monument and entry gate and wall
