

*Ecological Economics* is the name of the brand new journal of the International Society for Ecological Economics, published by Elsevier Science Publishers. According to its editor-in-chief, Dr. Robert Costanza, the journal "is intended to be a new approach to *both* ecology and economics that recognizes the need to make economics more cognizant of ecological impacts and dependencies; the need to make ecology more sensitive to economic forces, incentives, and constraints; and the need to treat integrated economic-ecologic systems with a common (but diverse) set of conceptual and analytical tools."

Associate editors are Herman Daly, with the World Bank in Washington, DC; A.-M. Jansson, Askö Laboratory, University of Stockholm, Sweden; and D. Pearce, Department of Economics, University College of London, U.K. Papers presented at two workshops on ecology and economics, one in Stockholm in 1986 and one in Barcelona in 1987, appear in Vol. 1 No. 1, together with papers from the 1987 Ecological Society of America meeting in Columbus, OH.

Announcements of upcoming meetings of the International Society for Ecological Economics and related events will be published in the journal and in the Society's newsletter. Editor Costanza can be addressed at the Center for Environmental and Estuarine Studies, University of Maryland, Solomons, MD 20688-0038.
