

Dear Editor,

I am a university scientist who has worked on a number of NPS research projects and have received *Park Science* for some time. For us “outsiders,” an article on the NPS reorganization would be very helpful, particularly how it affects the NPS research efforts... What has transpired in the reorganization is very much a mystery to me.

Jim Gregory

Department of Forestry

North Carolina State University

Editor's Note: *The article beginning on page 24 addresses some consequences of the NPS reorganization on research.*
