

Natural Resource Publications Program on Hold

As a result of restructuring, the former Natural Resources Publication Program is on hold indefinitely pending funds to hire a publications coordinator. Authors interested in submitting materials suitable for publication in the familiar Monographs, Natural Resource Report, and Technical Report

Series will need to find other avenues for publication. Annual Science Reports, the Proceedings Series, and Highlights in Natural Resource Management have been discontinued; data from previously published Annual Science Reports is still available from the Investigators Annual Report database. A new report, described in the following article, will be initiated this year by the Natural Resource Information Division. *Park Science* will continue to be published.

Parties interested in receiving copies of reports may want to initially contact the authors of the respective reports. Alternatively, the NPS Technical Information Center (TIC) maintains copies of all NPS technical reports and drawings including all natural resource reports. For a fee they will make photocopies or microfiche copies of requested NPS reports for interested readers. Contact them at: Technical Information Center; National Park Service; P.O. Box 25287; (DSC-MS-TIC); Denver CO 80225-0287; through NPS cc:Mail at: "TIC- work orders/requests"; or by e-mail at: "tic_work_orders/requests@nps.gov".
